## Torque Control System

A new way to optimize your tightening process

- ✓ Replace up to 8 Screwdrivers on your work bench thanks to 8 programmable digital Torque / Speed / Angle settings selectable through I/O or sensor ports.
- ✓ Set up to 8 counting programs with up to 20 screws each with different torque targets.

Best choice for Cell line Manufacturing

Easy PC Communication through USB Port

Screw counter inside (detect cross thread, screw omission...)

Tightening process management through 25P I/O port or sensor port

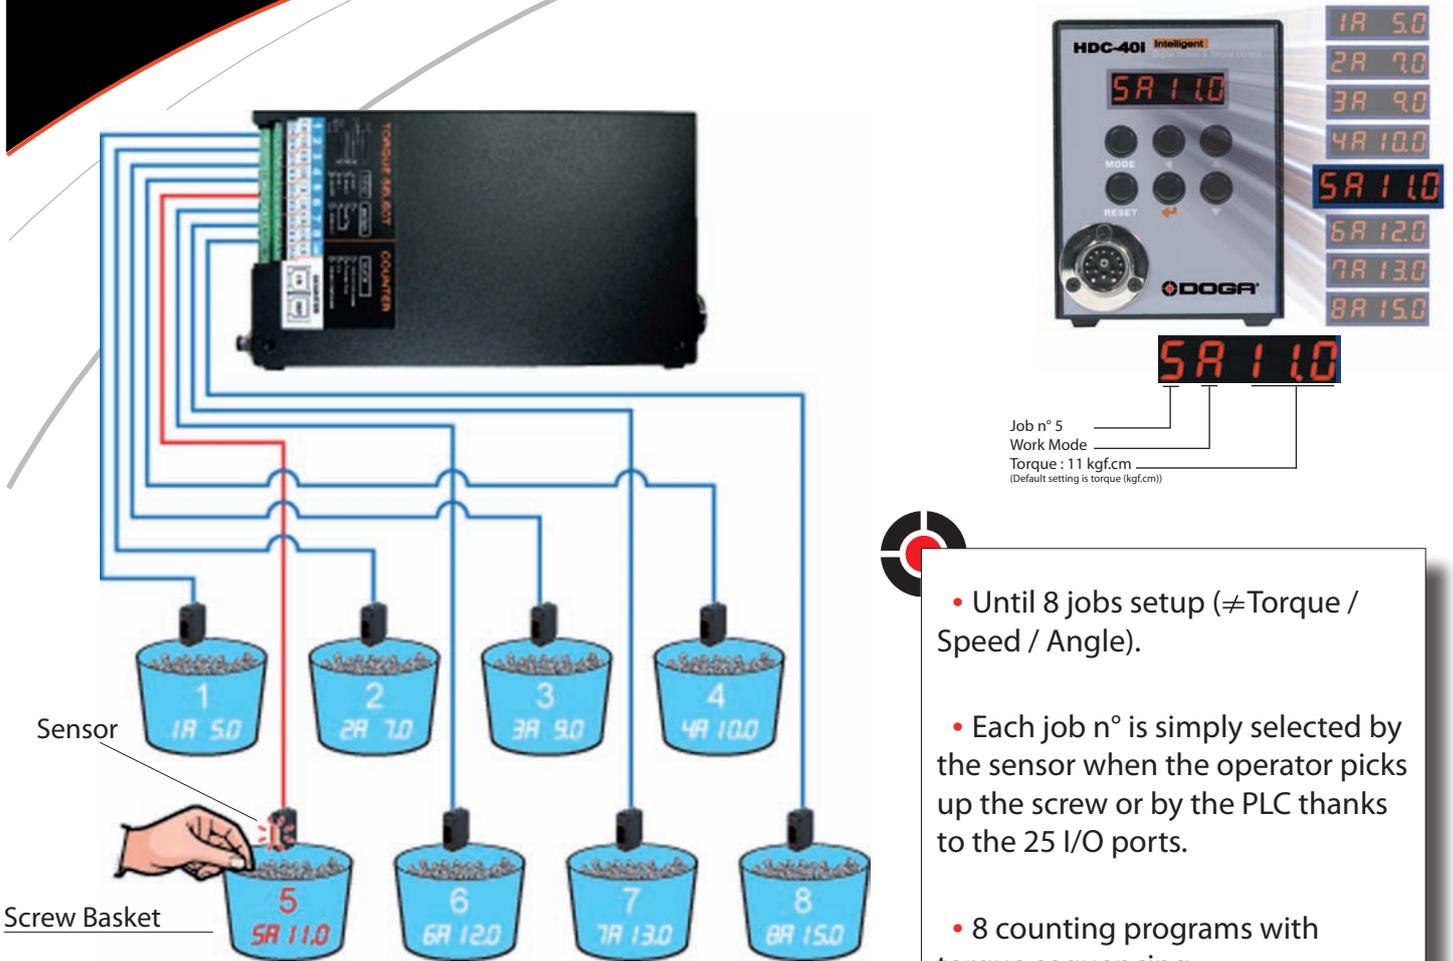

Built-in 32 Bit microprocessor

Data monitoring & Quality Control

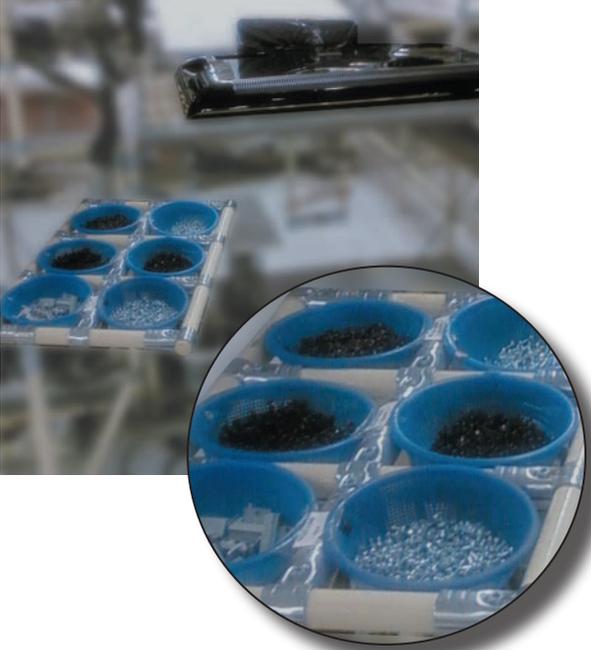

# Example of job selection through sensors

- Until 8 jobs setup (≠Torque / Speed / Angle).
- Each job n° is simply selected by the sensor when the operator picks up the screw or by the PLC thanks to the 25 I/O ports.
- 8 counting programs with torque sequencing.

## Example

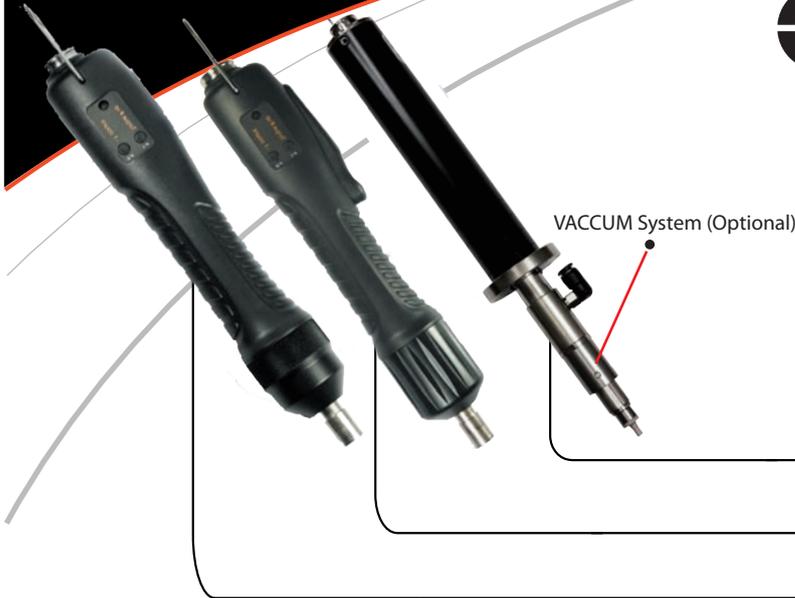

**8** different jobs with one Hybrid screw driver.

Jobs may be selected as well through PLC, socket tray...
