¹ These voltage ranges are for operation at full load. At half load, the UPS will run at voltage levels down to 100V, but will neither start up nor charge the battery at this level. Therefore, do not attempt to run the unit at input voltages below these ranges. For example, do not attempt to use a 110 V input supply for 230 V output even at a reduced load.

AC Output

Output Specifications										
UPS VA	1000	2000	2200	3000	5000	6000	8000	10,000	15,000	20,000

Output Frequency (sync to mains)	50/60 Hz +/- 3 Hz user-adjustable +/- 0.1									
Output Voltage Distortion	< 3.0%								< 5.0%	
Crest Factor	3:1									
Waveform Type	Sine wave									
Output Power Capacity	700W	1400 W	1540 W	2100 W	3500 W	4200 W	6400 W	8000 W	12 kW	16 kW
Output Overload Rating ¹	For online operation: At overload of 105% - infinite; at overload of 125% - 1 minute; at overload of 150% - 30 seconds.									
Output Connections ²	(6) IEC 320 C13	(8) IEC 320 C13; (2) IEC 320 C19					(1) Hard Wire 3-wire (H N + G); (4) IEC 320 C13; (4) IEC 320 C19		(1) Hard Wire 3-wire (H N + G); (1) Hard Wire 5-wire (3PH + N + G); (8) IEC 320 C19	
¹ When the UPS is in bypass mode, overload is limited by the external input circuit breaker that feeds the UPS. ² Wire connection "G" represents protective earth ground. 										

Configuration and Management

Network Management Card 2

Smart-UPS On-Line models, 5kVA and higher, have the Network Management Card 2 with Environmental Monitoring pre-installed. This management card enables you to monitor and control an individual UPS remotely over your network.

See the *User's Guide, UPS Network Management Card 2, AP9630, AP9631* for information on how to use this management card. To obtain the latest version of this documentation:

1. Go to www.apc.com/site/products/index.cfm.
2. Click on **Uninterruptible Power Supply (UPS)**.
3. Under **UPS Management**, click on **UPS Network Management Cards**.
4. Click on **UPS Network Management Card 2 with Environmental Monitoring**.
5. Click on the **Documentation** tab.
6. Download the *UPS Network Management Card 2 - User's Guide* for the latest firmware release.

Emergency Power Off (EPO)

For 3 kVA to 20 kVA Smart-UPS On-Line models, you can connect the UPS to a central EPO switch by means of a cable from the EPO Terminal on the UPS. The system power can be disabled in an emergency by closing the switch connected to the EPO.

Note: Refer to local and national electrical codes when wiring the EPO.

The switch should be connected in a normally open switch contact. External voltage is not required; the switch is driven by 24 V internal supply. In closed condition, 4 mA of current are drawn. The EPO switch is internally powered by the UPS for use with non-powered switch circuit breakers.

The EPO circuit is considered a Class 2 circuit, (UL, CSA standards) and an SELV circuit (IEC standard). Both Class 2 and SELV circuits the EPO terminal block unless it can be confirmed that must be isolated from all primary circuitry. Do not connect any circuit to the circuit is Class 2 or SELV. If circuit standard cannot be confirmed, use a contact closure switch.

To obtain the latest versions of documentation pertaining to circuit breaker requirements and requirements for isolated circuitry for a central EPO switch:

1. Go to www.apc.com/site/products/index.cfm.
2. Click on **Uninterruptible Power Supply (UPS)**
3. Under the **Network and Server** category, click on **Smart-UPS On-Line**.
4. On the Smart-UPS On-Line products page, click on a Smart-UPS On-Line model name.
5. Download the User Manual (which also documents installation) for your Smart-UPS On-Line model

You need one of the following types of cable to connect the UPS to the EPO switch:

- CL2: Class 2 cable for general use
- CL2P: Plenum cable for use in ducts, plenums, and other spaces used for environmental air.
- CL2R: Riser cable for use in a vertical run in a floor to floor shaft.
- CLEX: Limited use cable for use in dwellings and for use in raceways.

Limited Warranty

American Power Conversion (APC) warrants its products to be free from defects in materials and workmanship for a period of two years from the date of purchase, except in India where the period is one year for battery module(s). Its obligation under this warranty is limited to repairing or replacing, at its own sole option, any such defective products. To obtain service under warranty you must obtain a Returned Material Authorization (RMA) number from customer support (see Service in the *User Manual* for your Smart-UPS On-Line model). Products must be returned with transportation charges prepaid and must be accompanied by a brief description of the problem encountered and proof of date and place of purchase. This warranty does not apply to equipment that has been damaged by accident, negligence, or misapplication or has been altered or modified in any way. This warranty applies only to the original purchaser who must have properly registered the product within 10 days of purchase.

EXCEPT AS PROVIDED HEREIN, AMERICAN POWER CONVERSION MAKES NO WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Some states do not permit limitation or exclusion of implied warranties; therefore, the aforesaid limitation(s) or exclusion(s) may not apply to the purchaser.

EXCEPT AS PROVIDED ABOVE, IN NO EVENT WILL APC BE LIABLE FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OF THIS PRODUCT, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE. Specifically, APC is not liable for any costs, such as lost profits or revenue, loss of equipment, loss of use of equipment, loss of software, loss of data, costs of substitutes, claims by third parties, or otherwise. This warranty gives you specific legal rights and you may have other rights that vary from state to state.

Worldwide Customer Support

Customer support is available at no charge via e-mail or telephone. Contact information is available at www.apc.com/support/contact.
