2.2.1 UPS selection recommendations

We recommend to select UPS with the following requirements, to support analyzer power + monitor power + PC
 * 1,4 and practical added with margin 30%.

- Thus Aquakem 200/250 could be $(300 + 100 + 300) * 1,4 = 1000 \text{ VA} + \text{margin} = 1,3\text{kVA}$. The power should last 3-5 minutes with 60% of max power load.
- Thus Aquakem 600 could be $(700 + 100 + 300) * 1,4 = 1540 \text{ VA} + \text{margin} = 2\text{kVA}$. The power should last 3-5 minutes with 60% of max power load.

|---|--|--|
| When replacing the workstation PC from Aquakem 200/250 models, older models require additionally a USB-CAN kit. The reason is that the USB-CAN kit replaced the RTX software in the older analyzers. See NTU 20/2004 for more details. | | |

For availability and price for filters not listed (note that all filters *must be between 340-880nm*), please contact system.support.fi@thermofisher.com before placing the order.

For filters that are not in basic configuration delivery time is longer than for basic configuration filters. For non basic filters a separate quotation is needed.

Below is a list for example of filter specifications. Please note that this information can change without any prior notice. Kindly contact service support desk at system.support.fi@thermofisher.com, if you need to remove the filters. Filter lot number is seen in the filter ring, they are coded with numbers like F0306A 450 021. Numbers underlined here indicate the wavelength (450 nm).

If detailed filter specifications and scanning results are needed, please make the request while ordering the analyzer / filter. Kindly contact system.support.fi@thermofisher.com before ordering.

6.3.2 Other items

981615

Tray for corks 45 positions no sticker included.

981616
981617

Tray for reagent vessels 24 positions: 12 x 20 ml & 12 x 60 ml.
Tray for reagent vessels 16 positions: 8 x 60 ml & 8 x 20 ml.

984018

Tool for tube positioning.

981470

Table rack. Sample cups rack holding 20 cups.

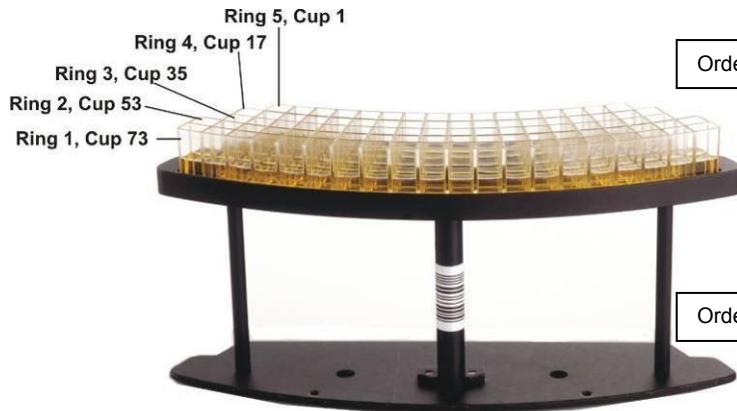

6.3.3 Segments

Note: Segments available separately are always unlabelled.

984100 Automation Segment with aliquoting positions.

Contains 92 sample positions, volumes 300-1000 µl can be used, dead volume app. 100 µl.
Fits all Aquakem models.

Ordering code 984100

Ordering code 984074

984074 Segment holder

Note: unlabelled, use label numbers starting with 9 (3 numbers; 900-999).

984075 Barcode labels for KUSTI segment (# 0) (901-950)

984041 Sample segment for 5 / 7 ml tubes.

Cups 0.5 ml, 2 ml and 4 ml can be fitted. This model is included in the analyzer delivery.

Additionally order:

984039 200/250 Barcode labels for segment (# 0) (1-50) or
984042 600 Barcode labels for segments (# 0) (1-50)

984051 Sample segment for 10 ml tubes.

Additionally order:

984039 200/250 Barcode labels for segment (# 0) (1-50) or

984042 600 Barcode labels for segments (# 0) (1-50)

Note: If the kit is referring to a name PRIME, it means a similar type as model Aquakem 600 or 600 A (new model).

7. ADVICE FOR RETURNING

7.1 RMA-procedure (Return Material Authorization)

For returning goods to the factory, you need to contact first the Customer Service.

Inform the reason for returning and you will receive the authorization number (RMA-number) and additional shipping instructions.

- Items should be returned to the factory within 3 (three) months from the date RMA-number has been issued.
- In case of warranty/other type of reclamation, the WARRANTY CLAIM TECHNICAL SHEET must be filled. See the following page.

RETURN

To be used in case you want to return goods to the factory (error in ordering or delivery).

- Shipment should be sent with a Proforma invoice and mention the RMA-number as a reference.
- Please contact immediately after arrival of the goods and follow the shipping instructions
- Received goods must be in new-like condition
- After receipt of the goods you will be credited.

WARRANTY

To be used when you want to return parts under warranty.

Parts returned on warranty bases, should indicate:

- The WARRANTY CLAIM TECHNICAL SHEET properly filled in.
- Return the items in their original condition (i.e. neither stripped, nor fixed)
- Use RMA number as a reference in all documentation
- Follow the shipping instructions.
- Only properly returned material attached with completed warranty documentation will be considered. Once the validity of warranty has been verified, we will credit you for full price
- In case the parts are rejected, we will send them back to you upon your request. Thermo Fisher Scientific Oy will store the parts 1 (one) month after customer has been informed of the rejection

NOTE: Replacements have to be ordered separately and they will be sent at full price.

OTHER RECLAMATIONS

To be used in case you want to return goods to the factory for reclamation feedback.

- Please start the RMA –process immediately after noticing the need for reclamation feedback
- The WARRANTY CLAIM TECHNICAL SHEET must be properly filled in
- Use RMA as a reference in all documentation
- After receipt of the goods, they will be investigated and we will contact you for possible compensation or comments.

NOTE:

1. Reagents marked with XL in 60 mL vial sizes, TON R2XL and Sulphate R1XL, are only available for Aquakem systems.
2. Number of tests/ kit is test flow dependent number.
3. ISBN number refers to the UK blue book method
SM refers to Standard Methods for The Examination of Water and Waste Water, the 21th edition (APHA, AWWA, WEF)
SW refers to Standard Methods for Water and Waste Water
Methods are adapted for discrete analyzers from referred standards.
4. MDL, Method detection limit, is the minimum concentration of an analyte that can be identified, measured and reported with 99% confidence that the analyte concentration is greater than zero. Measurements were performed by Gallery.
a) MDL = 3.14 x SD (blank sample, n = 7)
b) MDL = 3 x SD + average (blank sample, 3 batches, n = 30)
5. Application of the Gallery system
6. Application of the Aquakem system
7. Ammonia result is needed for Urea calculation from assayed Ammonia
