10. **Micro USB port**
    You can use it to connect to PC for data transmission, charging or connection with external USB devices.
11. **Back camera**
   2.0 mega pixels back camera
12. **Flashlight**
13. **Speaker**

3 Getting Started

Before operating your Tokio Smartphone for the first time, please read this manual carefully and follow the instructions as described below.

4 Installing the SIM card/Micro SD card

Please install the SIM card/Micro SD card according to below procedures:

- With the phone turned off, hold your phone securely with the front facing down, lift up the back cover from the notch with your thumb or finger.
- Install the SIM cards/Micro SD card according the correction directions, see below:
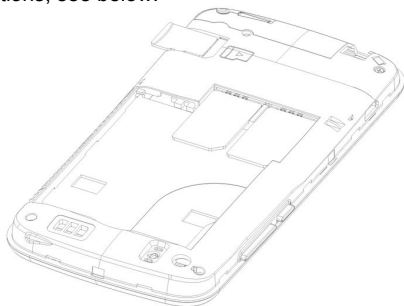

- Install the battery according to correct direction.
- Align and secure the cover and press it down to close the back cover.

Note: the phone supports 2 GSM SIM cards and 2 GSM SIM cards are at standby mode after installation. It supports maximum 32GB micro SD card.

5 Battery charging

The smartphone is equipped with a built-in rechargeable Lithium battery. It is suggested to fully charge the battery before use.

We strongly recommend to use the power adapter provided in the packaging, using other adapter may damage the Phone and void the warranty.

Charging Process:

- Connect one end of the USB cable with power adapter, and then connect the other end of USB cable with your smartphone.
- Plug the power adapter into the nearest electrical outlet.
- Users can still use the Smartphone while it is being charged.

6   Turn ON/OFF Phone

1. Turn On: after the battery has been fully charged, press & hold the power switch for around 3 seconds to turn on the phone. Screen lock will be showed after starting up.

2. Turn Off: When the phone is ON, press & hold the power switch for around 3 seconds and the system will popup out "power off" option, tap on the option to turn off the phone

3. Sleep mode: when the phone is ON, briefly press the POWER button to turn off the display temporarily and switch your phone to Sleep mode. Your phone also automatically goes into Sleep mode when you leave the phone idle after a certain period of time. To wake up the phone from Sleep mode, just briefly press the POWER button again to wake it up.

4. Unlock screen: screen lock will be appeared after you start up your phone or the phone wakes up from sleep mode, to unlock the screen, Press and hold lock key 🔒 to drag it to unlocking icon 🔓 to unlock it to enter the main interface:
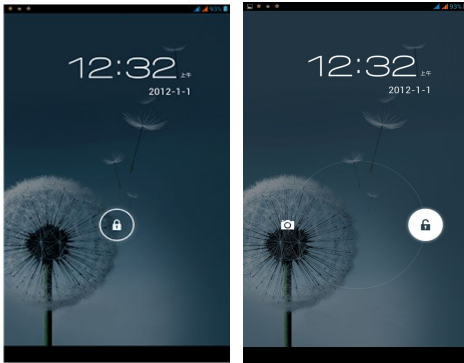

Remarks:
- When battery power has been used up, the phone will shut down itself automatically.
- If you illegally turn off the device, restart will scan and restore the memory, it may take longer time to enter into system.

3

7 Touch Operations

Tap: quick tap on an icon on the screen to enter that application.

Swipe or slide: slide your finger across the screen to go to next screen interface or page

Press and hold: press and hold an icon to open the available options.

Press, hold and drag: Press and hold your finger on an app with some pressure before you start to drag. While dragging, do not release your finger until you have reached the target position.

Pinch: for some applications, like Photos or the web browser, you can "pinch" the screen using fingers to zoom in or zoom out.

   Before you start listen to the radio, you need to connect your earphone
   headset(which is not included in your purchase), the earphone headset
   will be used as radio antenna.

33 Important maintenances precautions

In order to offer your phone good maintenances, please always follow the below basic precautions:
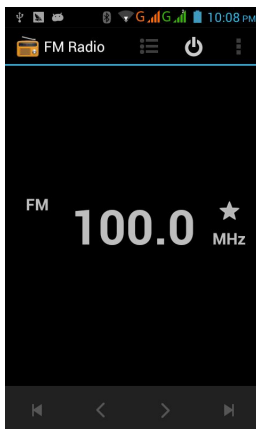

- Keep it in a safe distance from the strong magnetic field.
- Keep it away from water.
- Keep it and its accessories away from children.
- Prevent the device from falling or impact during usage, as this may cause damage to the phone.
- Do not use the device in a extremely humid environment or in the rain, because moisture penetrates inside and may damage the phone without the possibility of repair.
- Do not clean your phone using harsh chemicals, detergents and chemicals that can dissolve the plastic.
- Do not use headphones at maximum volume. This is dangerous and can lead to permanent hearing loss.
- Do not place other objects on LCD screen, as it may crush and damage the LCD screen.
- Do not use any sharp objects to touch the LCD screen, as this will scratch the screen.
- Only use the AC adapter included with the device. Using any other power adapters will damage your phone and void the warranty.
- Do not attempt to dismantle the phone by yourself to do any repair, this will damage the phone and void the warranty.

34 Battery Management

The battery is not fully charged from factory, so it is recommended that you charge the battery for at least 4 hours before you start to use the device.

The rechargeable battery is designed and manufactured to be used and recharged frequently. As same with all of lithium batteries, the capacity of the battery reduces each time it is charged. However, you can still try to prolong the battery's lifetime by following the suggestions below:

- Use your Phone at least once a week.
- Fully charge the battery regularly.
- Never leave the battery fully discharged for a long period of time.
- Always keep the device and the battery away from heat and moisture.
