1 Introduction

!Advanced Album Editor can help you organizing your digital images, generate thumbnails and create a web site quickly and easily. You can create a web site to publish your own digital images with thumbnails in seconds. Thumbnails (jpg format) can be generated automatically, and images that are not gif or jpg format (such as BMP, DIB, ICO, PCX, PNG, TGA, TIF, TIFF, WMF, etc.) can be convert to jpg format automatically. You need not to write any HTML codes to create a web site. !Advanced Album Editor can automatically generate all HTML pages for the web site.

!Advanced Album Editor can also help you to create a web site by organizing your multimedia files. You can share these files on Internet with other people by the web site that you will create:

- Photos, images, and pictures (gif, jpg, jpeg, bmp, dib, ico, pcx, png, tga, tif, tiff, emf, wmf ...)
- Audio files (mp3, wav, mid ...)
- Video files (avi, mpeg, wmv ...)
- Documents (doc, xls, ppt,txt ...)
- Download files (zip, exe, gz)

How to create a web site with !Advanced Album Editor? It is simply. Follows these steps:

- Collect photos, images, pictures, mp3s, documents and other materials in different folders;
- Run !Advanced Album Editor, you can browse your files in "File Explorer".
- Import them by Drag&Drop. Drag folders and files from "File Explorer" to "Album Explorer".
- Set options values.
- Export the web site or the photo album.

Then you will get the web site or the photo album you want. It is quickly, easily and interesting. Please see the screenshot:

2 System requirement

You will need a Pentium 100 PC or higher, 16MB RAM or more. The operating system should be Windows 95, Windows 98, Windows ME, Windows NT 4.0, Windows 2000, or Windows XP.

3 Installation

First, please download a latest copy from our web site. The URL is:

http://www.info2web.com/download/aalbumed.zip .

Second, unzip it to a folder with "Winzip" or other tools, then run "Setup.exe", follow the instructions.

	Information:
	IAdvanced Album Editor v4.2 Readme File July 2003
	HOW TO USE THIS DOCUMENT You can view the Readme file on-screen in Windows Note
æ	then on the File menu, click Print.

Choose Destination Loca	tion	×
	Setup will install !Advanced Album Editor in the following directo	ry.
	To install to this directory, click Next.	
	To install to a different directory, click Browse and select anothe directory.	r
	You can choose not to install !Advanced Album Editor by clickin Cancel to exit Setup.	g
	Destination Directory G:\Program Files\AAlbumEd Browse	
	< <u>Back Next></u> Cancel	

4 Interface

The layout including:

- Menu
- Toolbar
- Album Explorer: Manage the folders and links of current project.
- File Explorer: List folders and files in the hard disk.
- Property Area: Show the properties and thumbnail of selected folder, file or link. The properties of the folders and links in current project can also be edited.

4.2 Menu

• File

 \diamond New: Create a new project.

- ♦ Open: Open an exist project.
- ♦ Close: Close current project.
- ♦ Save: Save current project.
- \diamond Save as: Save current project as a new file.
- ♦ Exit: Exit application.

• Edit

- \diamond New folder: Create a new folder under selected folder.
- \diamond New link: Create a new link under selected folder.
- ♦ Cut: Cut selected folders and links.
- \diamond Copy: Copy selected folders and links.
- ♦ Paste: Paste copied folders and links to selected folder.
- \diamond Delete: Delete selected folders and links.
- \diamond Move up: Move selected folder or link up.
- ♦ Move down: Move selected folder or link down.
- ♦ Convert images: Convert the format of selected image files.

• Site

- ♦ Export web pages: Export web pages to a folder.
- \diamond Preview web pages: Export web pages to a folder, and preview them.
- \diamond Export album: Export the photo album to a folder.
- ♦ Preview album: Export the photo album to a folder, and preview it.

• View

- \diamond Toolbar: Show or hide toolbar.
- \diamond Status bar: Show or hide status bar.
- ♦ Album explorer: Show or hide album explorer.
- ♦ File explorer: Show or hide file explorer.
- \diamond Property area: Show or hide property area.
- ♦ Large icon: Display folders, links and files by using large icons.
- ♦ Small icon: Display folders, links and files by using small icons.
- ♦ List: Display folders, links and files in a list.
- ♦ Detail: Display information about each item.
- ♦ Thumbnail: Display folders, links and files by using thumbnail icons.
- \diamond Refresh: Refresh the contents of current folder in file explorer.
- Option

- \diamond Web site properties: Setting common properties of web site.
- ♦ Layout properties: Setting layout properties of web site.
- ♦ Environment: Setting environment options.
- Help

4.3 Toolbar

: Create a new project.

: Open an exist project.

: Save current project.

: Create a new folder under selected folder.

: Create a new link under selected folder.

: Cut selected folders and links.

: Copy selected folders and links.

: Paste copied folders and links to selected folder.

: Delete selected folders and links.

: Move selected folder or link up.

: Move selected folder or link down.

: Convert the format of selected image files.

: Export web pages to a folder.

: Export web pages to a folder, and preview them.

: Export the album to a folder.

: Export the album to a folder, and preview it.

: Display folders, links and files by using thumbnail icons.

: Display folders, links and files by using large icons.

: Display folders, links and files by using small icons.

: Display folders, links and files in a list.

: Display information about each item.

: Show help contents.

: Show registration window.

Ç

: Make an online purchase.

4.4 Layout of web pages generated

The layout of web pages generated including:

- Top Navigator: Including links that point to top level folders.
- Next Navigator: Including links that point to subfolders of current folder.
- History Bar : Including links that point to each folders in the path from root to current folder.
- Index Bar : Show index of pages in current folder.
- Main Canvas : Main area to show data.
- Header : Show header of the page. HTML tags can be used.
- Footer : Show footer of the page. HTML tags can be used.

4.5 Layout of photo albums generated

This is a photo album that generated with !Advanced Album Editor.

The toolbar:

5 **Operation**

5.1 Browse images

First, double click an image in Album Explorer.

Album Explorer				
Jindex Animal Flags Map		a the		
	0606.JPG	0620.JPG	0630.JPG	•

Then the image browser appears. Browse the images in current folder with toolbar buttons or the keyboard. This is the image browser:

The toolbar:

5.2 Convert format of images

First, select images in File Explorer.

File Explorer	Caption	Size	Туре	Time	I.
🛱 🛄 Images 🛛 📔	0244.JPG	20 KB	JPG file	03/09/00 19:03:02

5.6 Setting maximal size of images when exported

Some users want to reduce the size of the photos that appear in the web pages, so that the photos can fit the screen. We can set maximal size of images when exported in "Environment".

Click menu item "Option Environment", we can see "Environment" dialog.

₩ Set n	anemi ven	ize when evnort
Je Jucci	nax intage s	Size when export
Width	640	
Height	480	÷ Pixels

Check the checkbox "Set max image size when export", input value of width and height, click the "OK" button.

5.7 Burn CDs

When export web pages, application generates these files:

- □ index.htm
- \Box other "htm" files
- $\hfill\square$ autorun.exe , autorun.inf , ie.ico

and these subfolders:

- □ audio: Save "wav", "mid", "midi", "mp3", "m3u", "aif", "aifc", "aiff", "au", "cda" files₀
- □ doc : Save "txt", "wri", "doc", "dot", "xls", "ppt", "mdb", "pdf", "htm", "html", "xml", "chm", "eml" files.
- □ Image: Save "gif", "jpg", "jpeg", "bmp", "dib", "ico", "pcx", "png", "tga", "tif", "tiff", "emf", "wmf" files.
- \Box thumbnail : Save thumbnail files.
- □ video : Save "rm", "ram", "avi", "mpg", "mpeg", "dat" files.
- □ zip : Save "zip", "z", "gz", "tz", "taz", "tgz", "lzh", "arj", "arc", "tar", "cab" files.
- \Box other : Save other files.

When export photo albums, application generates these files:

- □ myalbum.exe
- □ autorun.inf

and these subfolders:

- □ image
- \Box lang

How to burn your web sites or photo albums onto a CD? Follow these steps, you can burn your web sites or photo albums onto a CD.

- 1. Export your web site or photo album to a folder (eg "C:\AlbumCD") on the hard drive. Now you get many files and some subfolders under this folder.
- 2. Launch your CD writing software, eg "Easy CD Creator", or "Nero".
- 3. Using your CD writing software, navigate to the folder that you have exported your family photos to (eg "C:\AlbumCD") and copy all files and subfolders onto the CDR.
- 4. After that, if you want to view your web site or photo album, simply double click the "index.htm" or "myalbum.exe" on the CD in windows file explorer.

Note: "!Advanced Album Editor" does not come with the programs required to write onto CDs. The CD writing software is generally provided with CD writers. For further information, please contact the manufacturer of your CD writer.

To assist you in understanding the process of burning the album to the CDR, two typical CD writing software, namely Easy CD Creator and Nero will be used as examples.

Easy CD Creator 5

- 1. Launch Easy CD Creator 5.
- 2. Click "Data CD" on the Easy CD Creator dialog box. The Untitled Easy CD Creator dialog box will be displayed.
- 3. Navigate to the folder (eg C:\AlbumCD) you have exported your album to in the Explorer

pane.

- 4. Click Edit and click Select All to highlight the files and subders.
- 5. Drag and drop the folders and files to the CD Layout pane.
- 6. Click File and click Create CD.
- 7. The CD Creation Setup dialog box will be displayed. Click OK to start writing (accept default).

Nero 5

- 1. Launch Nero 5. The New Compilation dialog box will be displayed.
- 2. Click CD ROM (ISO) on the left hand pane.
- 3. Click New button.
- 4. Click Window on the menu bar and click Horizontal.
- 5. Navigate to the folder (eg C:\AlbumCD) you have exported your album to in the Explorer pane.
- 6. Click Edit and click Select All to highlight the files and subders.
- 7. Drag and drop the folders and files to the ISO1 Explorer pane.
- 8. Click File and click Write CD. The Write CD dialog box will be displayed.
- 9. Click the Write button to start.

5.8 Registration

After purchasing "!Advanced Album Editor", you will get a registration code. Click toolbar button or menu item "Help^D Registration", registration dialog will appeared. Input your

name and registration code, then click "OK" button.
