13	PLC Networking Trainer	EZ-NETW001P
14	Factor Manufacturing Trainer	EZ-AOT0001P

## **Sensor Trainer EZ-SENSR001**

### **Description:**

The Sensor Trainer has been **designed with** an easy set up sensor testing accessories to study different type of sensor. The program cover on the performance, characteristic, output type, linearity, precision, hysteric and maintenance for the individual sensor. A series of real application example are given to enhance student understanding in sensor usage in different industrial environment.

The **sensors used** in this trainer are Inductive sensor, capacitive sensor, thru' beam photo-electric sensor, Retro-reflective photo-electric sensor and, Diffuse Reflective photo-electric sensor and a list of sensor selection guide to broaden student knowledge.

The sensors able to interface with DAQ data acquisition card which allow the information of the sensors to display as GUI.

This trainer is **complete with** a total of **over 20 experiments**. Each experiment identifies the objective, gives a background briefing, explains the procedures, and student is required to answer a series of observation and assignment.

Note:

ControlEZ reserves the rights improve the above specification and design without prior notice.

### **CPM1A PLC Trainer (Micro size)**

#### **EZ-CPMA001**

#### **Description:**

User-friendly CPMA PLC Trainer specially include **step-by-step guide** to assist student with the fundamentals of **PLC operation, programming and wiring**.

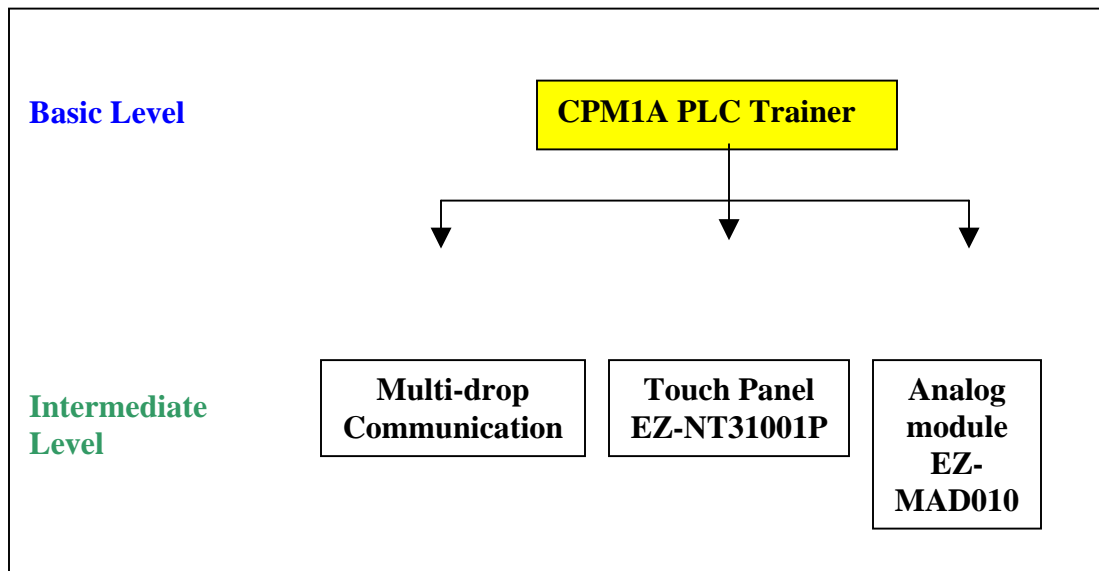

The trainer kit base **consists of** lamp, switches, banana sockets and a selector switch. By selecting LAMP mode using the selector switch, student is able to simulate and test their Ladder program by using the pre-wired switches and lamps to confirm the correct operation of their Ladder program before switching into SOCKET mode. Switching to SOCKET mode will provides student with hands-on wiring experience. The entire banana socket is directly connected of PLC Input and Output terminals.

Besides learning on PLC concept, operation, programming and wiring, the course consists of **15 Life Application, 12 useful Ladder circuitries, Installation and Wiring consideration, Maintenance and Trouble shooting**.

The trainer is **complete with:**

• PLC CPU unit (CPM1A-20CDR-A)	• PLC Training Manual
• Trainer Kit Base	• Ladder Programming Software (Syswin)
• RS 232 Adapter (CPM1-CIF01)	• Syswin User Manual
• RS 232 Training Manual	• Trainer Storage Box

**Learning path of CPM1A PLC Trainer:-**

\*\*The PLC system able to interface with DAQ data acquisition card which allow the information of the PLC to display as GUI.

Note:

ControlEZ reserves the right to improve the above specification and design without prior notice.

## **CJ PLC Trainer (Small Size)**

### **EZ-CJ1M001P**

#### **Description:**

User-friendly CJ PLC Trainer specially comes with **step-by-step guide** to assist students with the fundamental of **PLC operation, programming and wiring**.

This trainer kit base **consists of** lamps, switches, banana sockets and a selector switch. By selecting **LAMP** mode using the selector switches, student is able to simulate and test their Ladder program by using the pre-wired switches and lamps to confirm the correct operation of their Ladder program before switching into **SOCKET** mode. Switching to **SOCKET** mode will provide student with hands-on wiring experience. All the banana sockets are directly connected PLC Input and Output terminals.

Beside learning PLC concept, programming and wiring, the courseware consist of operation of **15 real Life applications, 12 useful Ladder circuitries, Installation and Wiring consideration, Maintenance and Trouble shooting**.

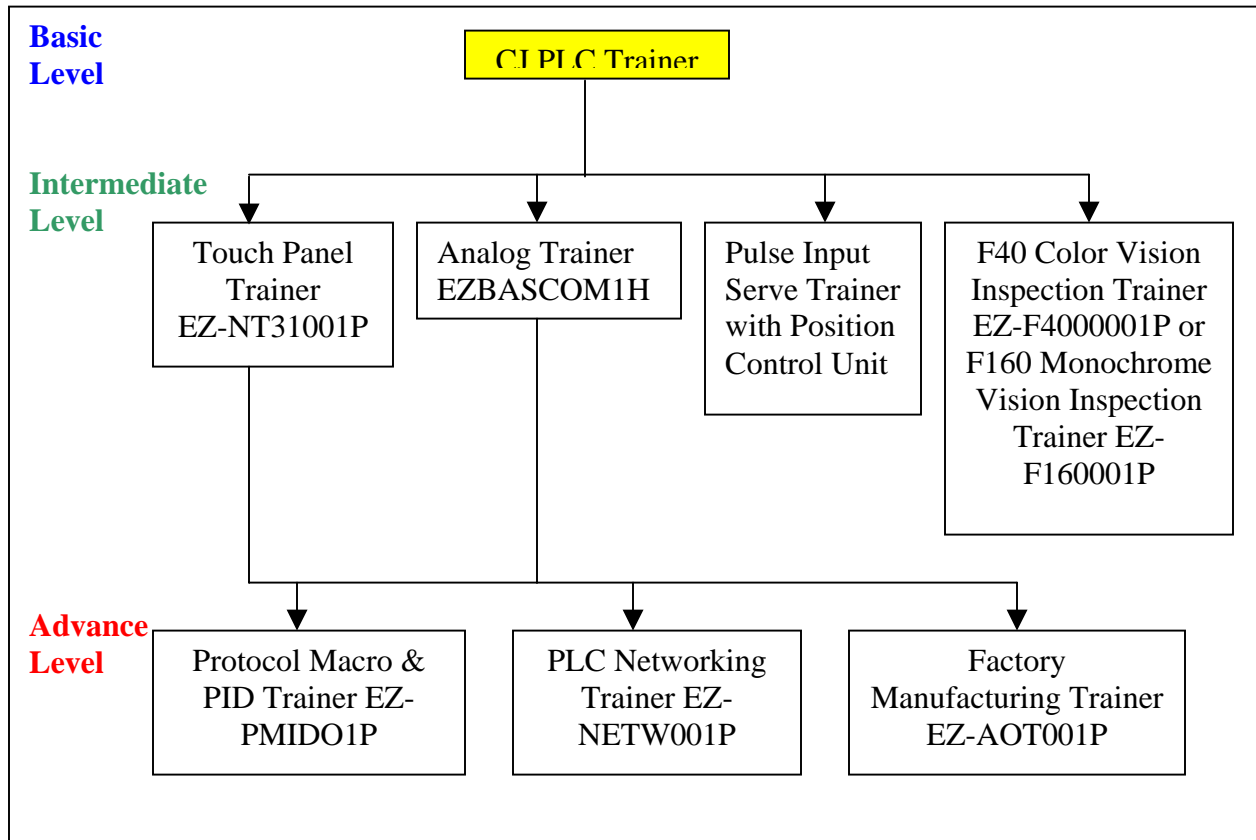

The trainer is **complete with:**

• CJ Kit Base	• Programming Console
• 16 Digital Input Card	• Kit Base Power Supply
• 16 Digital Output Card	• Training Manual
• PLC Power Supply	• Ladder Programming Software ( Syswin)
• CJ PLC CPU	

Note:

ControlEZ reserves the rights to improve the above specification and design without prior notice

### Learning path of PLC trainer:-

\*\*The PLC system able to interface with DAQ data acquisition card which allow the information of the PLC to display as GUI.

Note:

ControlEZ reserves the rights to improve the above specification and design without prior notice

### CS1 PLC Trainer (middle size)

#### EZ-CS1G002

#### Description:

User-friendly CJ PLC Trainer specially comes with **step-by-step guide** to assist students with the fundamentals of PLC programming and wiring.

This trainer kit base **consists of** lamps, switches, banana sockets and 2 set of 25 ways D-Connor. By using the 25 way D-connector plug to port A, student is able to simulate and test their Ladder program by using the pre-wired switches and lamps to confirm the correct operation of their Ladder program before switching into port B. Switching are directly connected to PLC Input and Troubleshooting.

The trainer is **complete with:-**

• PLC CPU (CS1G-CPU42H)	• Programming Console
• 16 Digital Input Card	• Kit Base Power Supply
• 16 Digital Output Card	• Training Manual
• PLC Power Supply	• Ladder Programming Software( Syswin )
• CS1 Kit Base	

**ControlEZ Technology Sdn Bhd (515007-U)**

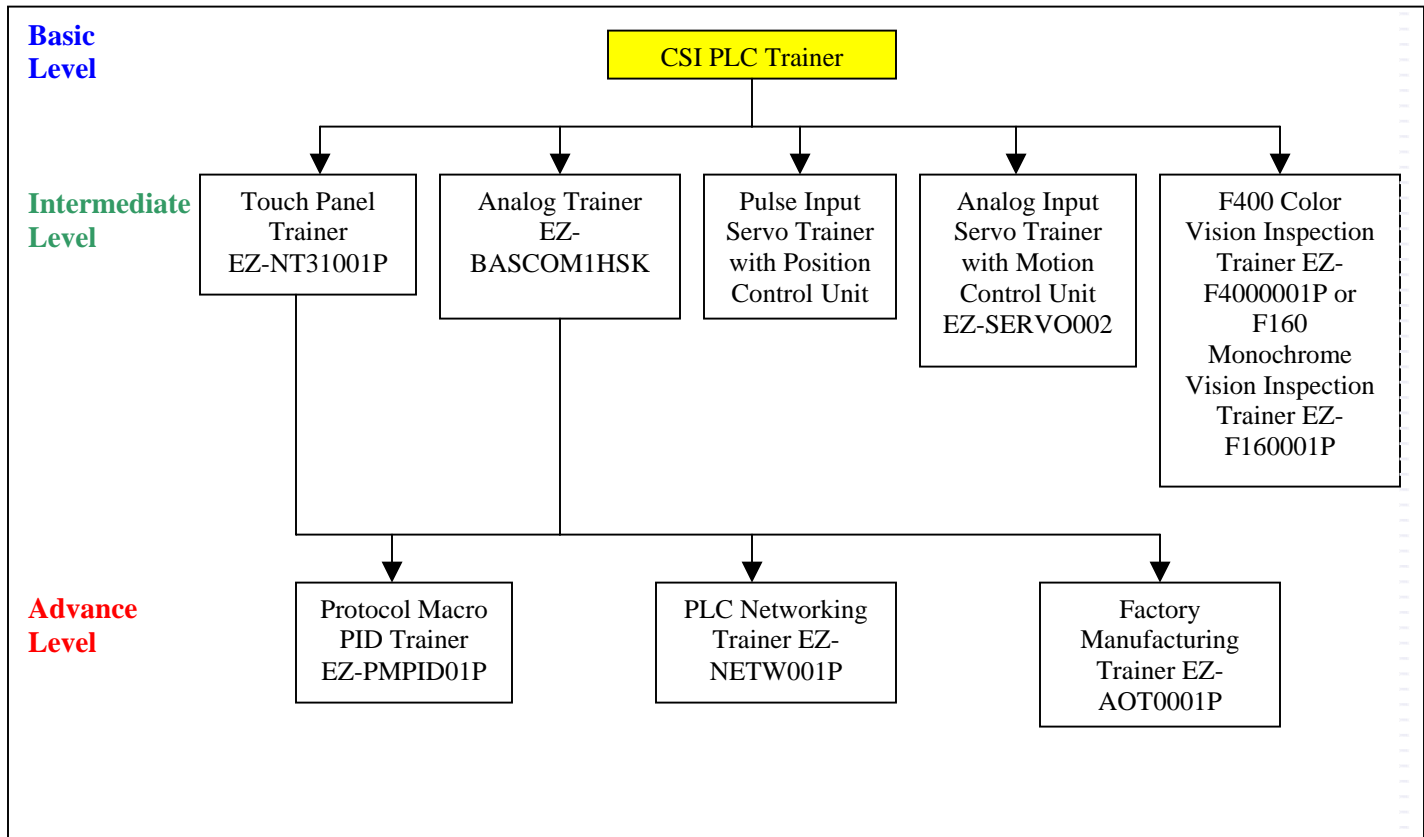

**Machine Vision, Motion, PLC-PC-Based Industry Control Automation.  
Education Control Training Equipment.**

### Learning path of CS1 PLC trainer:-

\*\*The PLC system able to interface with DAQ data acquisition card which allow the information of the PLC to display as GUI.

Note:

ControlEZ reserves the rights to improve the above specification and design without prior notice

**FA Training Kit  
EZ-FAMY001P**

**Description:**

This trainer is suitable for **basic Factor Automation training** as it provide flexibility to integrate sensor, PLC, Relay, timer, counter and conveyor based on the student creativity.

**The courseware cover on:-**

• Outline of Control	• Installation Work
• Switches	• Protective Structure
• Sequence Circuits	• Symbols
• Relays	• Sensor Output Forms
• Timers	• Internal Schematic Diagram of Sensors
• Counters	• Programming Console Operations
• Sensor	• PLC Internal Processing
• Programmable Logic Control	• PLC Errors & Solutions
• List of Items, Materials & Parts used	

This trainer is **complete with over 20 experiments**. Each experiment identifies the objectives, gives a background briefing, explains the procedures, and the student is required to answer a series of observation and assignment.

**ControlEZ Technology Sdn Bhd (515007-U)**

**Machine Vision, Motion, PLC-PC-Based Industry Control Automation.  
Education Control Training Equipment.**

Fax : 603-8945 3922

Email: [sales@controlEZ.com](mailto:sales@controlEZ.com) <http://www.controlEZ.com>

**Components:**

• CPM2A PLC	• Single pole Double pole Relay
• Programming Console	• Double pole Double Relay
• Proximity Sensor	• Plastic Casing
• 4 type of Photo-electric Sensor	• Relay Socket
• FA Kit Briefcase	• Timer Socket
• Timer	• Training Manual (Student & Lecturer)
• Counter	

\*\*The PLC system able to interface with DAQ data acquisition card which allow the information of the PLC to display as GUI.

Note:

ControlEZ reserves the right to improve the above specification and design without prior notice.

## **PLC Servo Trainer**

### **EZ-SERBVO002**

#### **Description;**

This trainer is integrated PLC, Sensor, Touch Panel, Linear guide, Power supply, Solenoid, Analog Input Servo Driver and Servo Motor. The student shall be able to interpret electrical system circuit diagram, troubleshooting fault on electrical system and Servo driver, enhance PLC and Touch Panel programming skill, and program Two-axis Motion control with multi-tasking PLC programming. This trainer is complete with **over 10 real application exercises on PLC Code Programming.**

This trainer **complete with:**

• Motion Control Programming Console
• Touch Panel
• Servo Driver Programming Console
• RS232 Cable
• Analog Servo Driver AC200V 50W
• Servo Power Cable
• Servo Motor
• Ladder Programming Software
• Sensor Terminal

**ControlEZ Technology Sdn Bhd (515007-U)**

**Machine Vision, Motion, PLC-PC-Based Industry Control Automation.  
Education Control Training Equipment.**

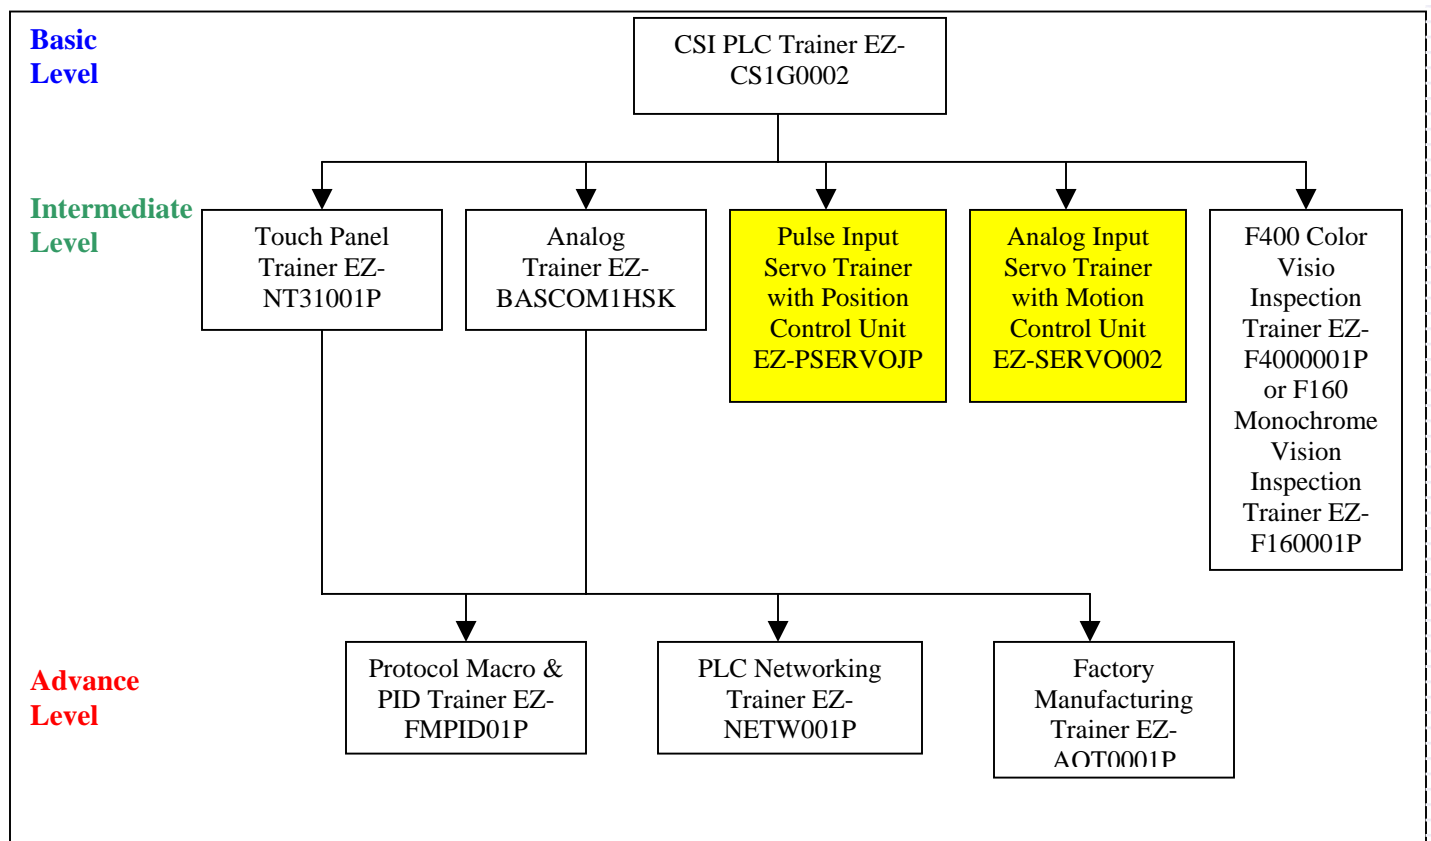

Tel : 603-8945 2922

Fax : 603-8945 3922

Email: [sales@controlEZ.com](mailto:sales@controlEZ.com) <http://www.controlEZ.com>

• PLC
• Sensor Terminal Cable
• Training manual
• Motion Control Unit
• Computer

### Learning path of Servo Trainer :-

**\*\*The PLC system able to interface with DAQ data acquisition card which allow the information of the PLC to display as GUI.**

Note:

ControlEZ reserves the right to improve the above specification and design without prior notice.

## PLC Touch Panel Trainer EZ-NT31001P

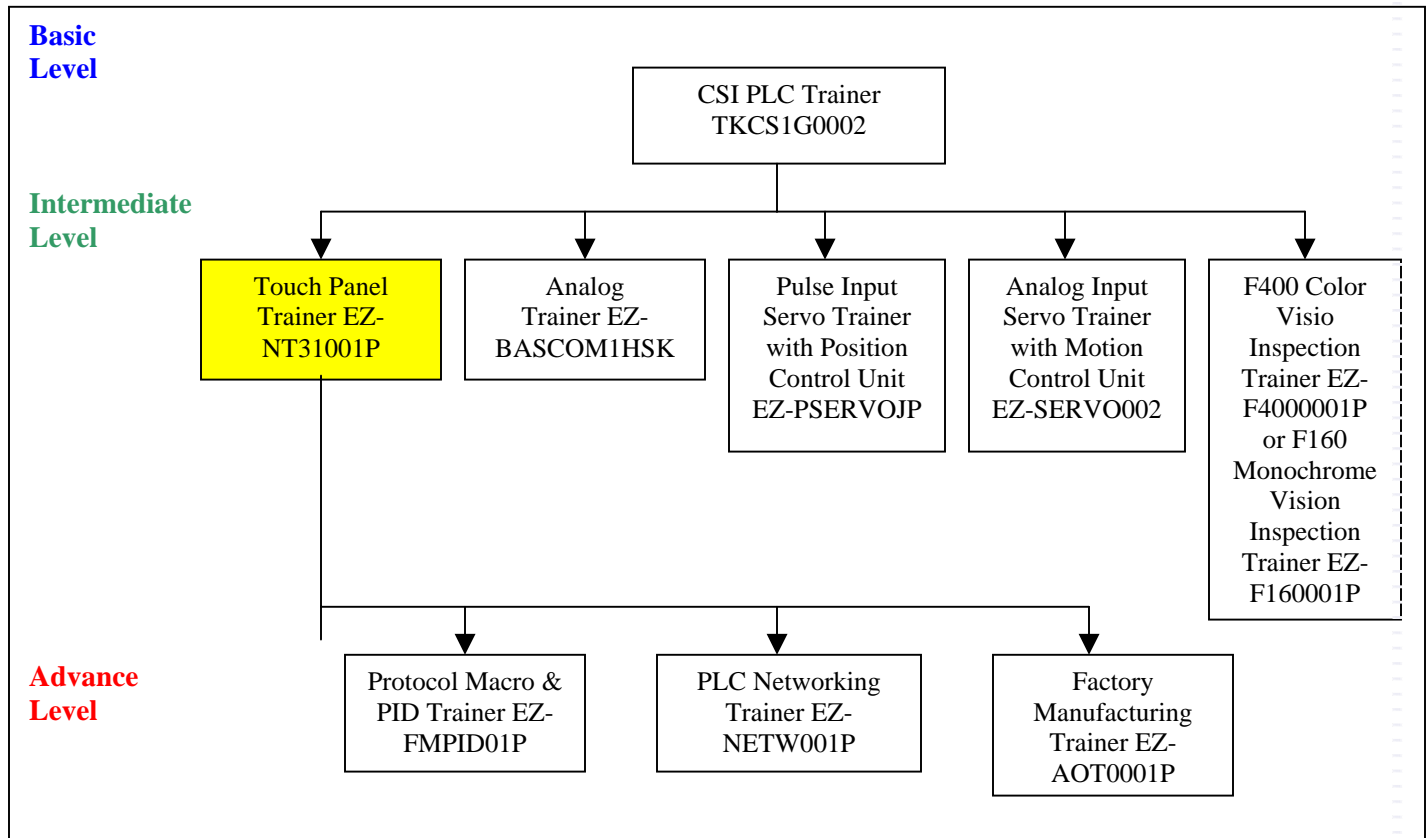

### Description:

This trainer needs to cooperate with PLC trainer CPM1A PLC Trainer (EZ-CPM1A001), CJ PLC Trainer (EZ-CJ1M001P) or CS1 PLC Trainer (EZ-CS1G0002). Through this trainer student will be expose to **Man Machine Interface programming, monitoring, operating and troubleshooting**. In industrial, Touch Panel (Man Machine Interface) is very common in automations it assists the worker to understand and operate the system easier.

### The trainer complete:

• Touch Panel
• Window base Touch Panel Programming Software
• Training Manual for Student & Lecturer

### Learning path of Touch Panel Trainer:-

Note:

ControlEZ reserves the right to improve the above specification and design without prior notice.

## PLC Analog Trainer EZ-BASCQM1HSK

### Description:

PLC Analog Trainer is a necessary tool for PLC trainer. It extend trainer understanding / learning PLC. Learning PLC shall not be complete knowing how PLC manage Analog signals are the crucial signal for automation operation.

Analog Input	Analog Output
<ul style="list-style-type: none"> <li>One set of –10V to +10V banana socket input</li> </ul>	<ul style="list-style-type: none"> <li>One set of –10V to +10V banana socket input</li> </ul>
<ul style="list-style-type: none"> <li>One set of 0 to 20mA banana socket input</li> </ul>	<ul style="list-style-type: none"> <li>One set of 0 to 20mA banana socket input</li> </ul>
<ul style="list-style-type: none"> <li>Four units of –10V to +10V terminals</li> </ul>	<ul style="list-style-type: none"> <li>Two units of –10V to +10V terminals</li> </ul>
<ul style="list-style-type: none"> <li>Four units of 0 to 20mA terminals</li> </ul>	<ul style="list-style-type: none"> <li>Two units of 0 to 20mA terminals</li> </ul>
<ul style="list-style-type: none"> <li>Two units potentiometer</li> </ul>	<ul style="list-style-type: none"> <li>Two sets of 7 segment displays</li> </ul>
<ul style="list-style-type: none"> <li>Two sets of 7 segment displays</li> </ul>	

This trainer is **complete with:-**

- PLC Analog Trainer (EZ-CS1AD001P)
- CPM1A PLC Trainer (EZ-CPM1A001) and CPM1A Mix Analog Input and Output Module.

Or

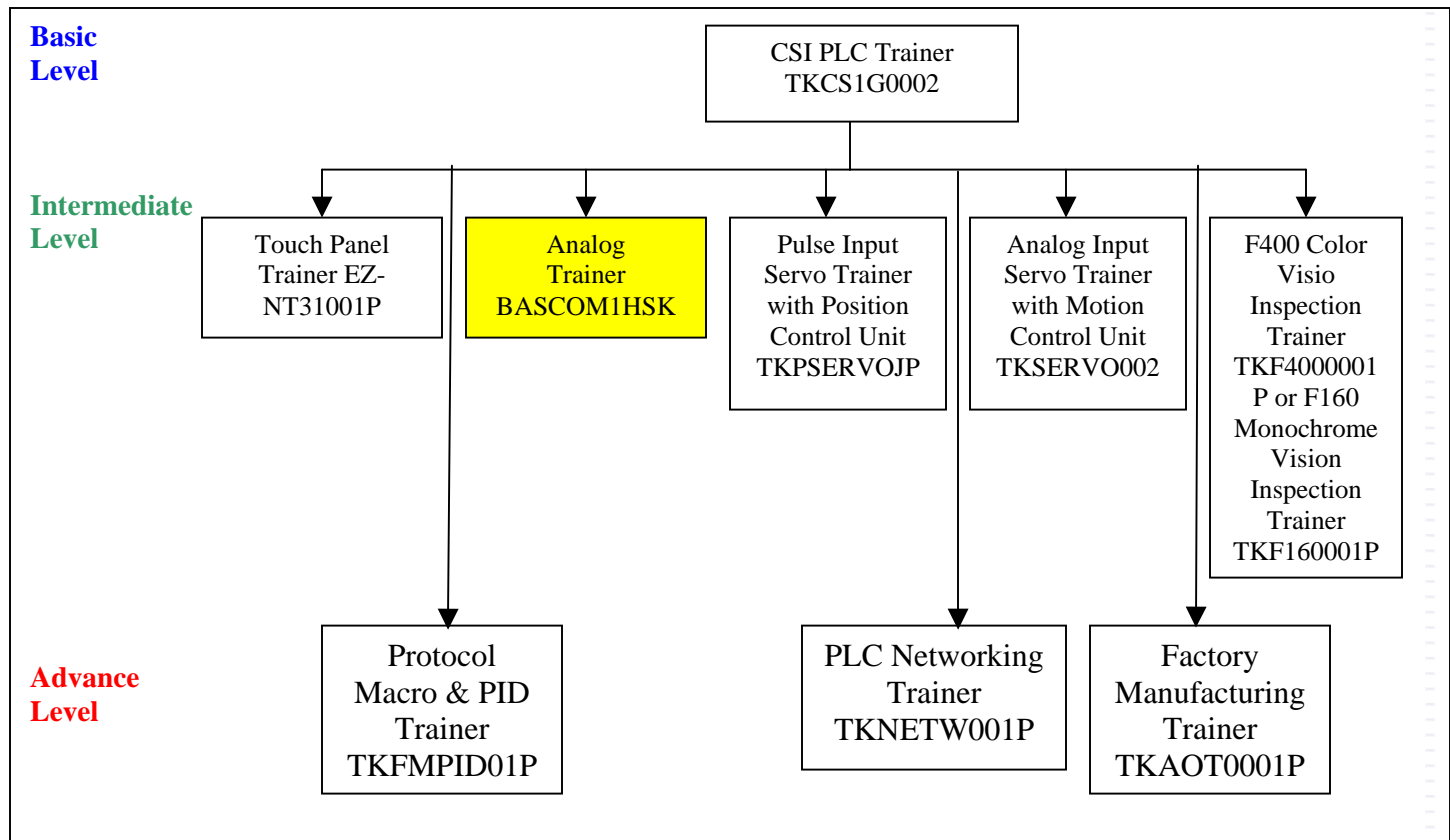

- CJ PLC Trainer (EZ-CJ1001P) and CJ1W Analog Input and Output Cards

Or

- CS1 PLC Trainer (EZ-CS1G0002) and CS1W Analog Input and Output Cards

**Learning path of PLC Analog Trainer :**

**ControlEZ Technology Sdn Bhd (515007-U)**

**Machine Vision, Motion, PLC-PC-Based Industry Control Automation.  
Education Control Training Equipment.**

Tel : 603-8945 2922

Fax : 603-8945 3922

ControlEZ reserves the right to improve upon the above specifications and design without prior notice.

**F160 Monochrome Vision Inspection Trainer  
EZF160001P**

**Description:**

This trainer has been developed to provide **basic facilities to study Vision Inspection Sensor**. The program incorporates a wide variety of checking accessories to expose the capability and the performance of the Vision Inspection Sensor.

**Components:-**

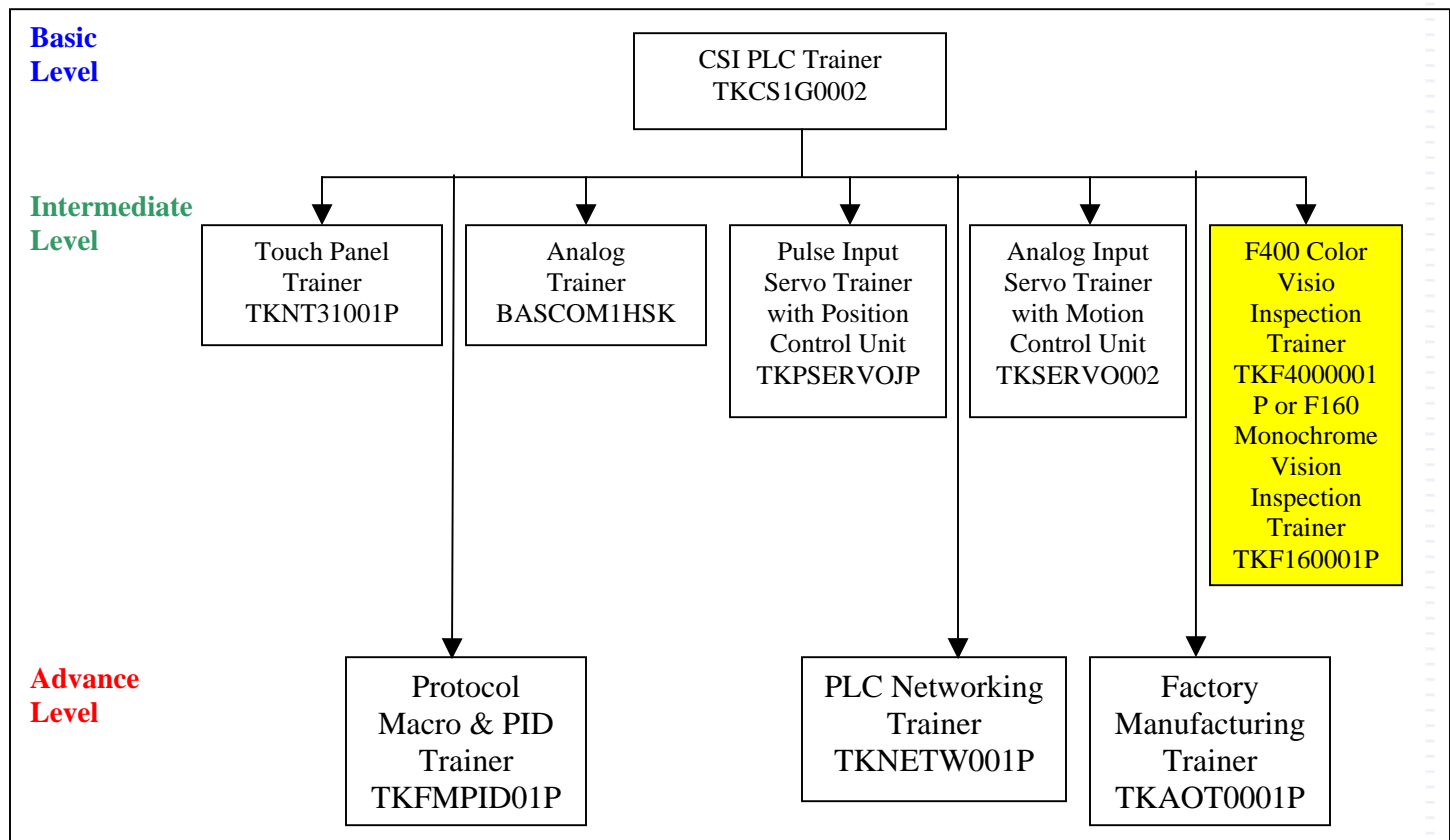

• Metal Briefcase	• Polarizer
• Programming Console	• Extension Tube Set
• F160 Vision Inspection System	• 30 DEG. Red LED Ring Light
• Memory Card	• 70 DEG. Ring Light W Polarizer
• S82V-0524 AC100/200 24V2.1A	• 75 DEG. Ring Light
• 12MM LENS	• LED Power Supply, 10W
• 25MM LENS	• 2 Ways, 1M Extension Cable
• 50MM LENS	• Camera + Light Holder
• Red Filter	• Training Manual

F160 vision system Inspection System allows participants to expose

- *the measurement algorithms in pattern matching*
- *width measurement*
- *surface detect*
- *character recognition*
- *surface density and slotting*

which can apply in various kind of applications.

## Learning path of F160 Monochrome Vision Inspection Trainer

**ControlEZ Technology Sdn Bhd (515007-U)**

**Machine Vision, Motion, PLC-PC-Based Industry Control Automation.**

**Education Control Training Equipment.**

Fax : 603-8945 3922

Email: [sales@controlEZ.com](mailto:sales@controlEZ.com) <http://www.controlEZ.com>

### **F400 Color Vision Inspection trainer EZF4000001P**

#### **Description:**

This trainer has been developed to provide basic facilities in **studding Vision Inspection sensor**. The program incorporates a wide variety checking accessories to expose the capability and the performance of the color Vision Inspection sensor.

#### **Components:-**

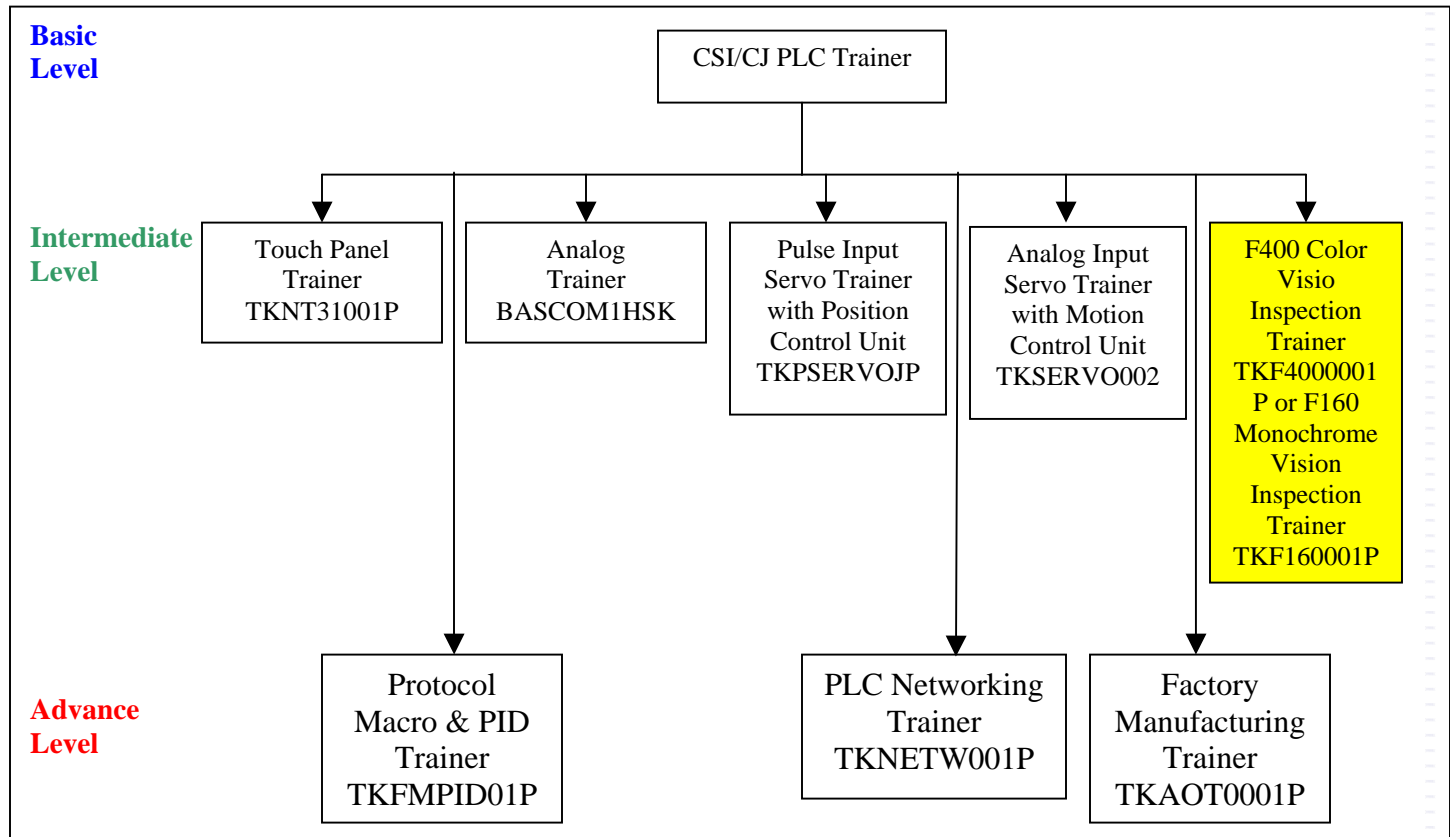

• Metal Briefcase	• 25MM LENS
• Programming Console	• 50MM LENS
• F400 color inspection system	• Extension Tube Set
• Memory Card	• LDR-50B-SW (White LED Light)
• Power supply	• Training Manual
• 12MM LENS	

F400 color Vision System able to distinguish differences in color, 56 colors in RGB filter matters. It also capable to detect up to 8 color pickup for inspection.

Note:

ControlEZ reserves the right to improve the above specification and design without prior notice.

**Learning path of this trainer:-**

**ControlEZ Technology Sdn Bhd (515007-U)**

**Machine Vision, Motion, PLC-PC-Based Industry Control Automation.  
Education Control Training Equipment.**

Tel : 603-8945 2922

Fax : 603-8945 3922

Email: [sales@controlEZ.com](mailto:sales@controlEZ.com) <http://www.controlEZ.com>

### **Protocol Macro & PID Trainer.**

#### **Description:**

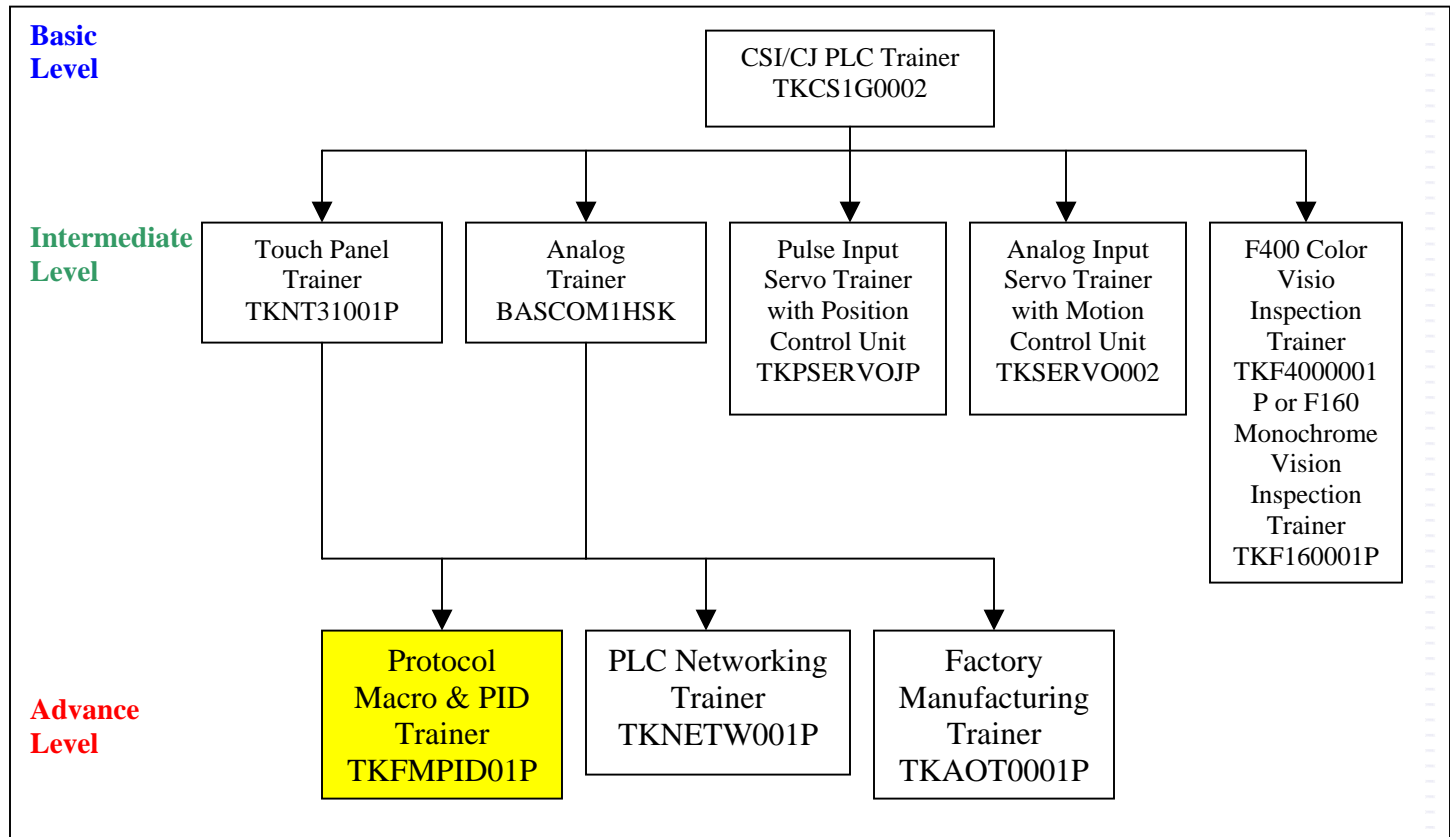

#### **Brief explanation:**

The simulation of reference temperature is set through the potential that to temperature controller with the information is being fed to CSI via protocol macro function. CSI will then supply a 4~20mA to the inverter which controls the blower speed. This airflow is then monitored through a flow sensor and fed back to CSI-MAD. It is to maintain the speed at the set point. NT31C is used display and simulate door access system that can communicate with CSI via protocol macro function.

This trainer is **complete with:**

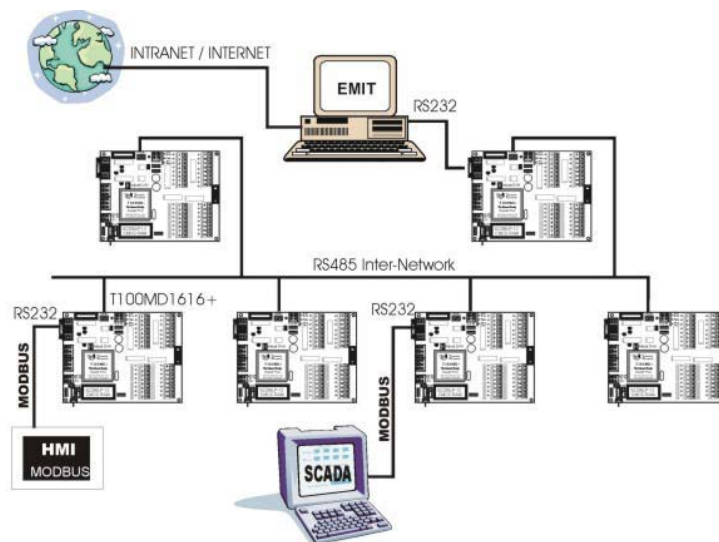

1- Briefcase for storage Which will lead the student how to interpret electrical system circuit diagram, troubleshooting fault on electrical system and inverter, enhance PLC and Touch Panel programming skill, create external device protocol for data exchange by executing with single instruction, and the real effect of tuning PID.

**Learning path of this trainer:-**

## PLC Networking Trainer EZNNETW001P

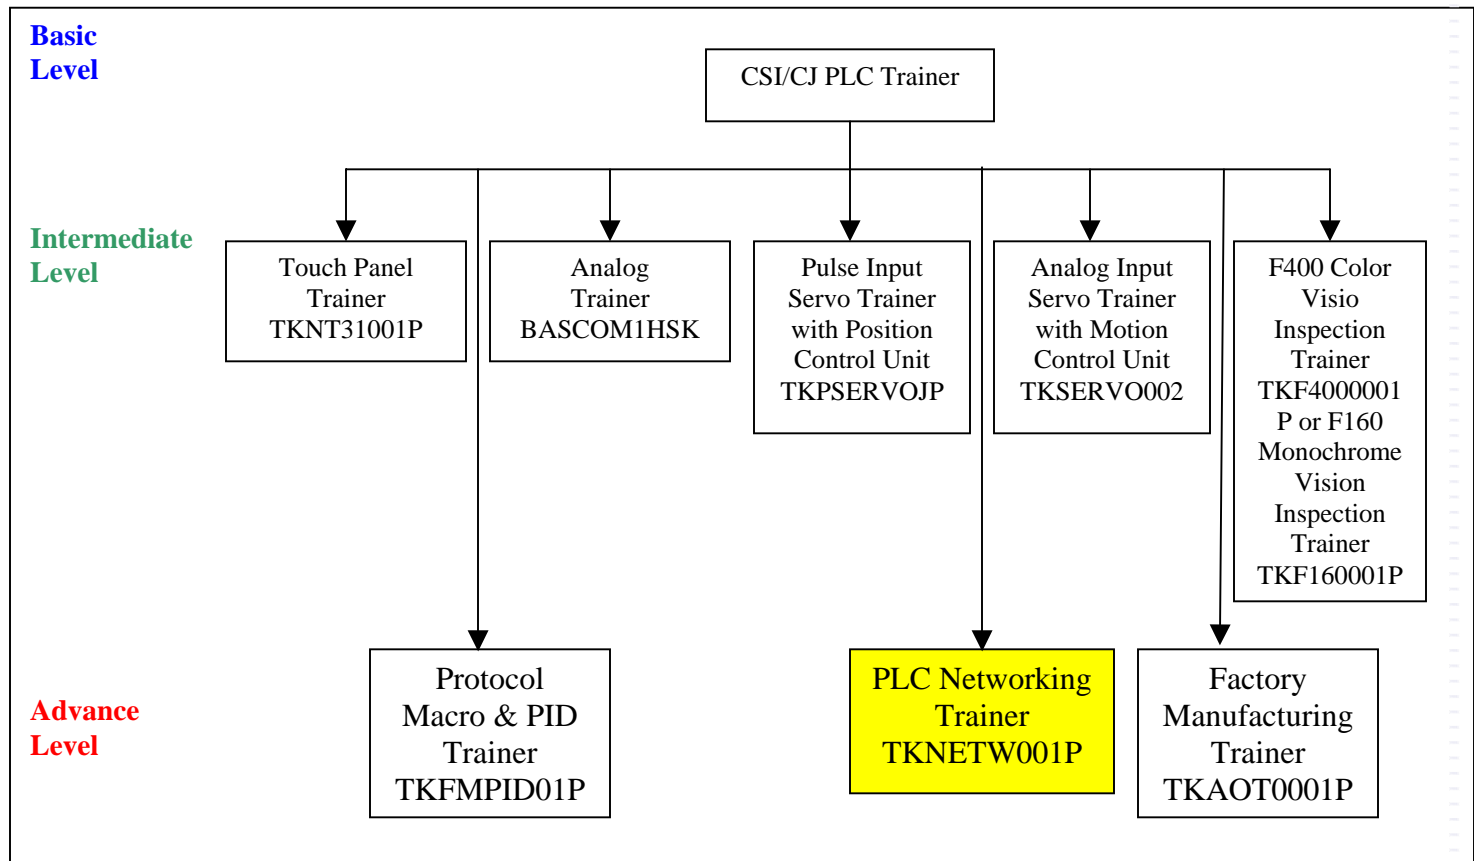

### Description:

This trainer emphasis on seamless Message Communication across the automation network levels. Networks are available for every level: Ethernet for information, Controller Link and Sysmac Link for Controller and Device Net ad Compo Bus/S for components. Message communications can be performance smoothly across three network levels, dramatically accelerating the exchange of information at the production site. Student shall also learn to construct a system in multi vendor environments simplified with protocol macros for data exchange.

The trainer is **complete with**

• Ethernet Module	• Programming Software
• Controller Link Module	• Temperature Controller
• PLC	• Serial Communication Mod
• Data Modem	• Compo Bus/ D communication Unit
• GSM Modem	• Mounting Board
• HUB	• Cross Cable
• Device Net Module	• RS 233 Cable
• Programming Console	• Training Manual

**Learning path of this trainer:-**

**Factory Manufacturing Trainer  
EZAOT0001P**

**Description:**

Station 1

**The loading station.** It must receive a model number from the operator before it pushes out the part for loading. The pick place sequence will only start with the depression of the “start” push button.

Station 2

To simulate a **drilling station**. It is to read the data carrier to determine which model is present on the pallet and then decide the drilling pattern to be carried out

Station 3

**The heating station** and the control of oven temperature is assigned to a PID controller (E5CK). The PLC only has sends the required “set” value for the oven and to display the ‘present’ value of the oven temperature. The communication between the temperature controller and PLC is done using the protocol macro function.

Station 4

**The testing station.** It will read from the data carrier the model number and then select the appropriate tolerance range to conduct the test. After the test, the station will write the result to the data carrier.

**ControlEZ Technology Sdn Bhd (515007-U)**

**Machine Vision, Motion, PLC-PC-Based Industry Control Automation.  
Education Control Training Equipment.**

Tel : 603-8945 2922

Fax : 603-8945 3922

Email: [sales@controlEZ.com](mailto:sales@controlEZ.com) <http://www.controlEZ.com>

Station 5

**The reject station.** It will read from the data carrier and if the pass/fail statuses reflect as fail, the pick and place sequence will then star.

Station 6

**The accept station.** It will read from data carrier and if the pass/fail statuses reflect as pass, the pick and place sequence will then start.

This trainer shall analysis, installation, troubleshooting diagnosis and repair, design, and understanding and drawing up of documentation.

This trainer is **complete with**:

• Photo Sensor
• Proximity Sensor
• ID sensor System
• Inverter
• PLC
• Temperature Controller
• Compo bus/S Input and Output module
• Relay Sockets
• Relays
• Touch panel
• Robot
• Conveyor
• Switches
• Lamps
• Pneumatic
• SCADA
• Mechanical Structure
• Training manual
• Computer

Note:

ControlEZ reserves the right to improve above specification and design without prior notice.

### Learning path of this trainer:-
