Microinvest

2013

Microinvest eMenu Pro

Microinvest eMenu Pro is a vanguard software system with a highly innovative interface. Owing to the fact that the system is realized as a WEB application, it has the ability to be used with any type of operating system. Moreover, the program has no system or hardware requirements.

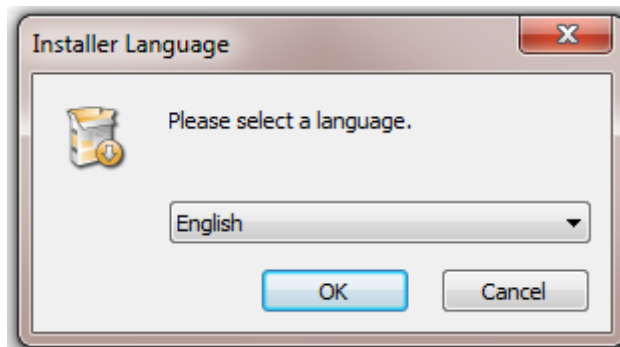

Microinvest eMenu Pro can be used as a customer-serving mobile restaurant system or as an electronic menu, providing clients with a detailed description of all the products and services, offered in a given retail or food and drink establishment.

The ability to define products into groups according to certain predefined criteria allows for the visualization of a higher variety of products on the screen of a standard peripheral device. The incorporated functionality for associating one device with only one selected worksite enables the devices to be placed directly upon the restaurant tables.

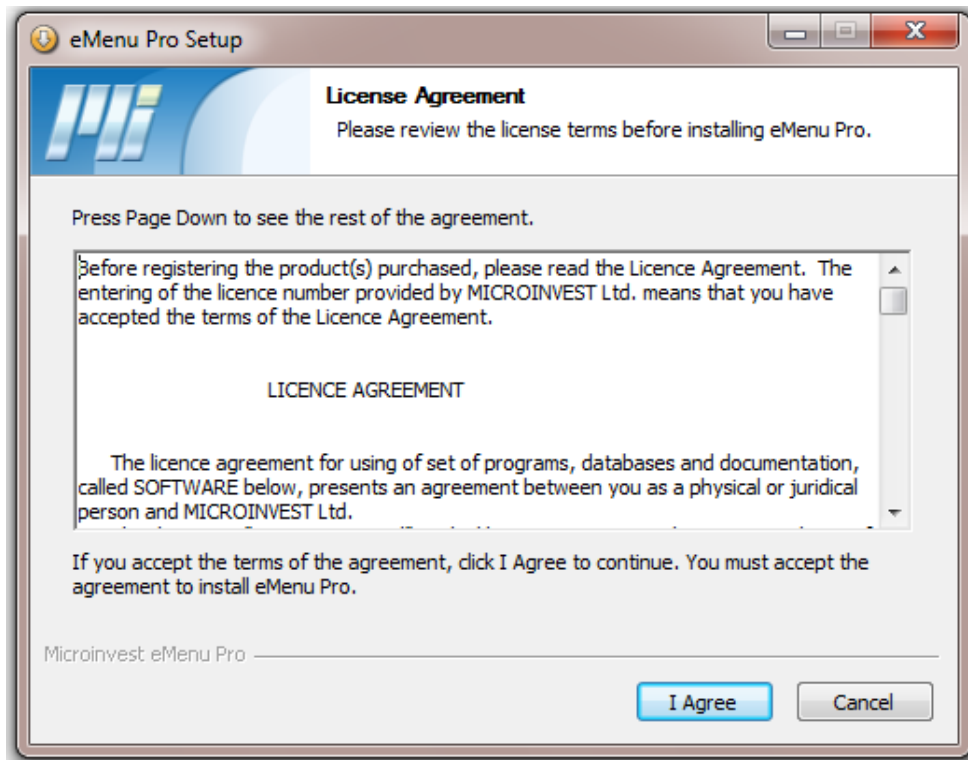

Microinvest eMenu Pro has an optimized and user-friendly installation wizard, which automatically runs and installs all components, necessary for the proper functioning of the program.

Product Installation

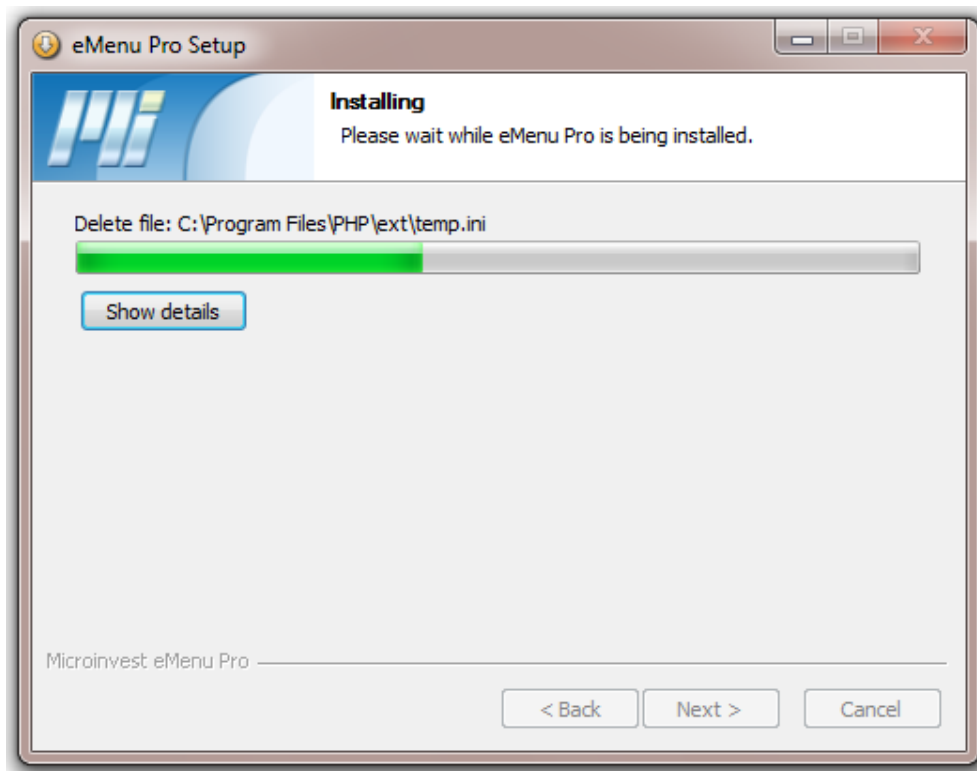

The working language is selected in the first pop-up window.

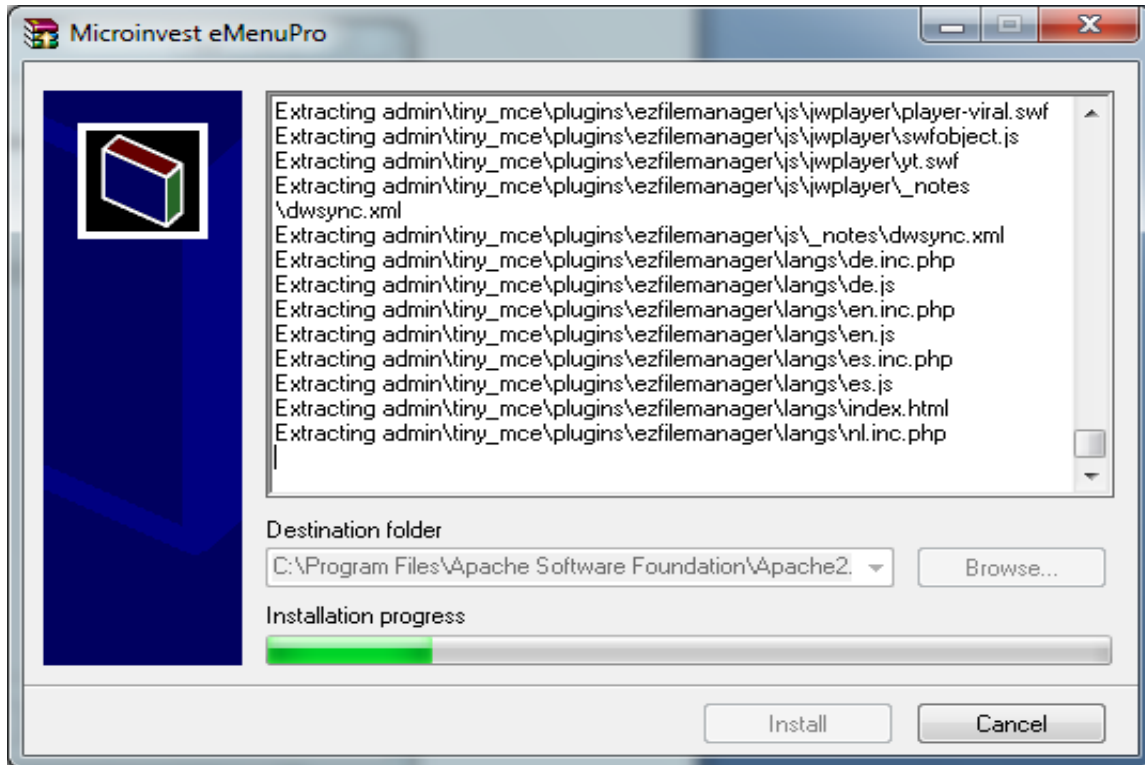

In order to continue running the installation, you must read the licensing terms and conditions.

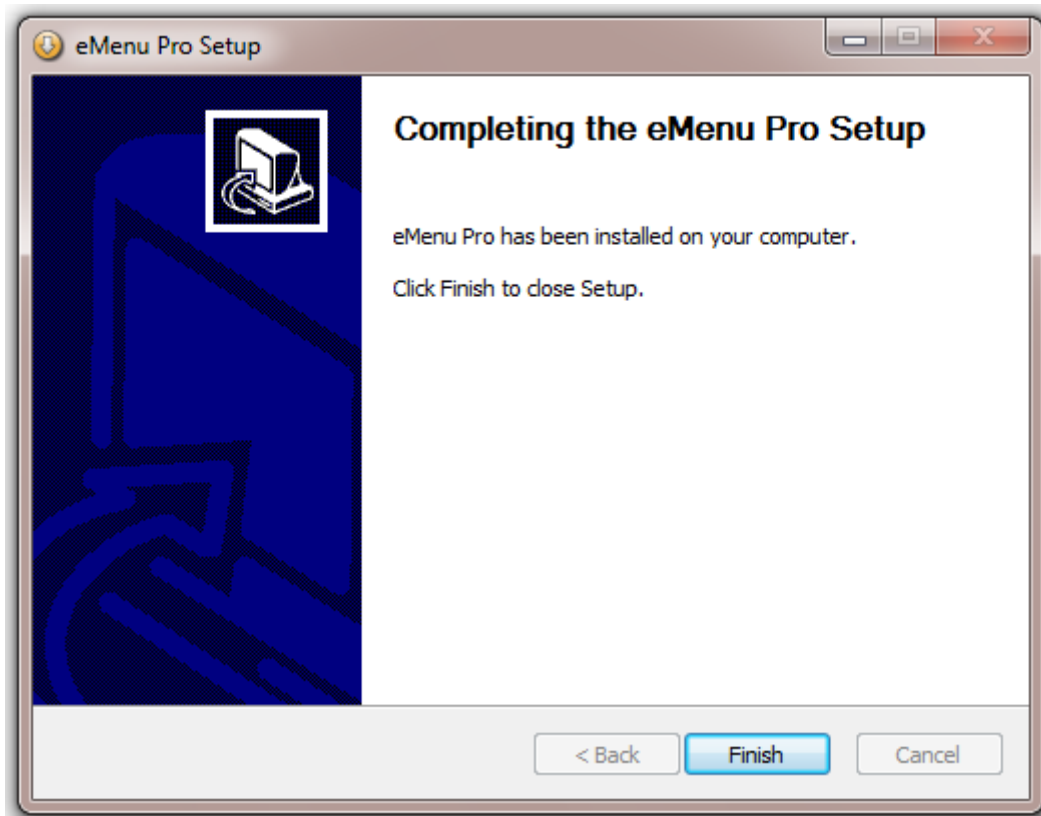

Microinvest eMenu Pro continues the installation with component unpacking in a default folder:

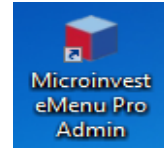

The installation finishes with clicking on the “**Finish**” button.

Database Connection

In order to work with *Microinvest eMenu Pro*, the internal application for database connection must be configured.

First, the *Microinvest eMenu Pro Admin Icon* is initialized. The authentication window, in which the password for changing the settings must be typed, opens. The settings configuration and the operation of the program itself is accomplished via any internet browser, which enables the application to be used with any operating system, regardless of the system type.

The default password for the application is: **Admin**

A screenshot of a login window titled "LOGIN". It features a "Password:" label next to a white input field. Below the input field is a "Login" button. At the bottom of the window, there is a message: "If you are using for the first time, please enter 'Admin'".

After the window for setup of the database connection appears, the type of database created by *Microinvest Warehouse Pro* is selected.

Microinvest eMenu Pro cannot administer a database by itself and does not work with a predefined database, respectively. When choosing the type of server (two server types are supported – MySQL and MSSQL), the following blank fields must be filled in:

- Server
- Name of database
- Database user
- Password for connecting with the database

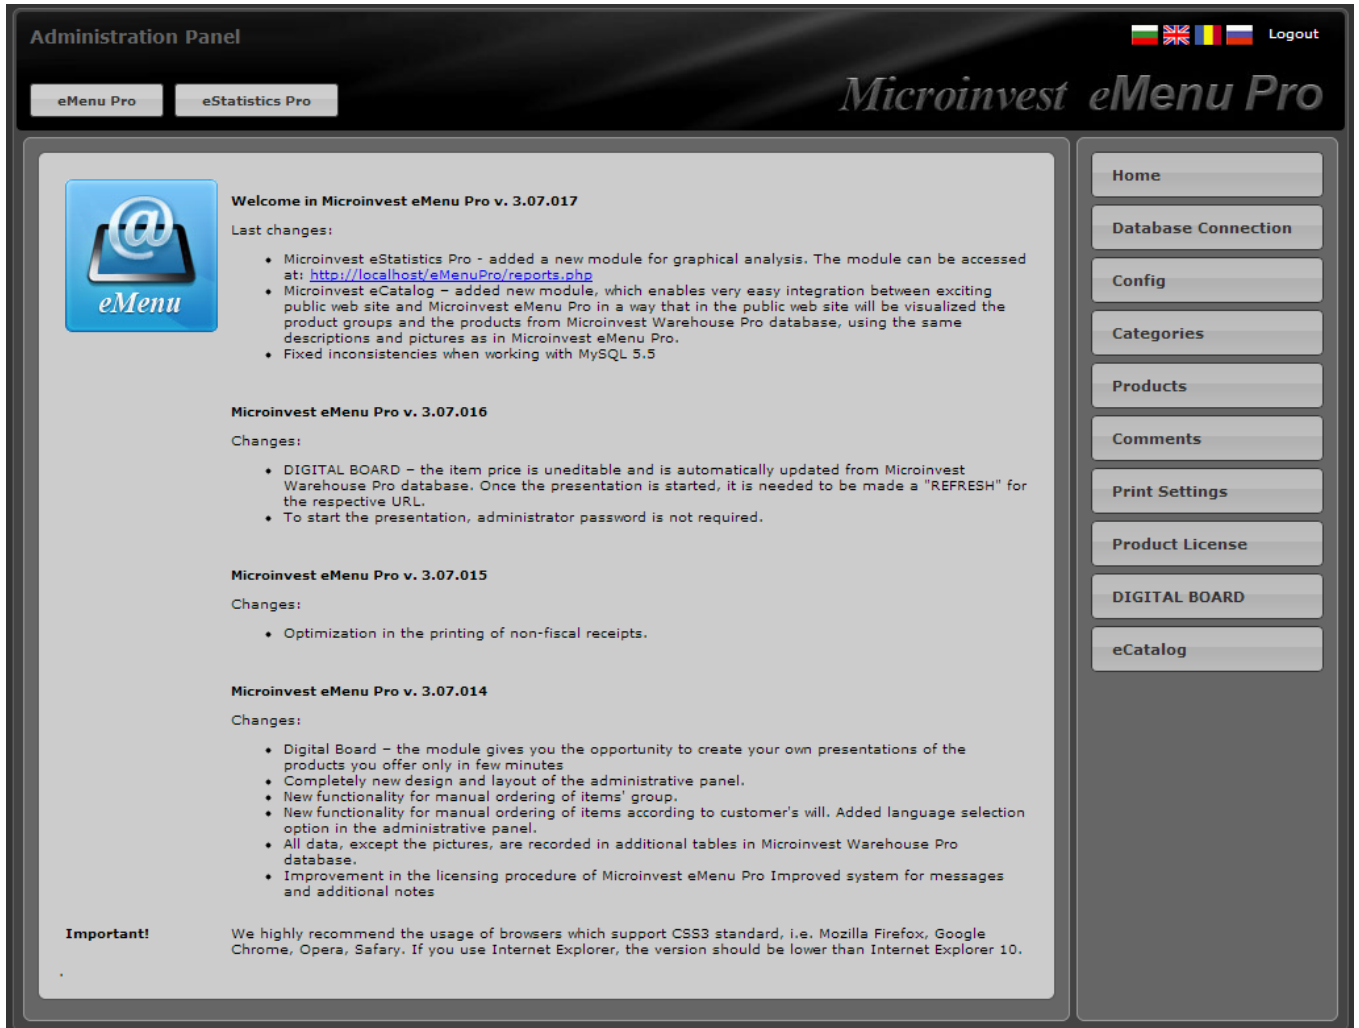

In the “**Server**” field, the name of the server, as well as its IP address, can be typed in. The rest of the parameters are filled analogously to the settings in the back-office program (*Microinvest Warehouse Pro*).

The screenshot displays the 'Administration Panel' for 'Microinvest eMenu Pro'. The main content area is titled 'Edit Database Settings!' and contains the following fields:

- Server Type:** A dropdown menu with 'MS SQL' selected.
- Server:** A text input field containing 'localhost'.
- Database Name:** A text input field containing 'eMenu'.
- Database User:** A text input field containing 'sa'.
- Database Password:** A text input field with masked characters '.....'.

Below the fields is a 'Save' button. At the bottom of the main area is a 'Back' button. On the right side, there is a vertical navigation menu with buttons for: Home, Database Connection, Config, Categories, Products, Comments, Print Settings, Product License, DIGITAL BOARD, and eCatalog. The top right corner includes flags for Bulgaria, UK, and Romania, along with a 'Logout' link.

After the database is loaded, on the screen will be visualized the **Home** screen of the administration panel. Here, you can read all the updates in the last versions.

Administration Panel Logout

Welcome in Microinvest eMenu Pro v. 3.07.017

Last changes:

- Microinvest eStatistics Pro - added a new module for graphical analysis. The module can be accessed at: <http://localhost/eMenuPro/reports.php>
- Microinvest eCatalog - added new module, which enables very easy integration between existing public web site and Microinvest eMenu Pro in a way that in the public web site will be visualized the product groups and the products from Microinvest Warehouse Pro database, using the same descriptions and pictures as in Microinvest eMenu Pro.
- Fixed inconsistencies when working with MySQL 5.5

Microinvest eMenu Pro v. 3.07.016

Changes:

- DIGITAL BOARD - the item price is uneditable and is automatically updated from Microinvest Warehouse Pro database. Once the presentation is started, it is needed to be made a "REFRESH" for the respective URL.
- To start the presentation, administrator password is not required.

Microinvest eMenu Pro v. 3.07.015

Changes:

- Optimization in the printing of non-fiscal receipts.

Microinvest eMenu Pro v. 3.07.014

Changes:

- Digital Board - the module gives you the opportunity to create your own presentations of the products you offer only in few minutes
- Completely new design and layout of the administrative panel.
- New functionality for manual ordering of items' group.
- New functionality for manual ordering of items according to customer's will. Added language selection option in the administrative panel.
- All data, except the pictures, are recorded in additional tables in Microinvest Warehouse Pro database.
- Improvement in the licensing procedure of Microinvest eMenu Pro Improved system for messages and additional notes

Important! We highly recommend the usage of browsers which support CSS3 standard, i.e. Mozilla Firefox, Google Chrome, Opera, Safari. If you use Internet Explorer, the version should be lower than Internet Explorer 10.

Interface Configuring

After a connection between *Microinvest eMenu Pro* has been established, the visual style of the interface can be changed in the **Config** Menu.

In the menu **Config** might be edited different config settings such as: Restaurant Title, Admin password, Price format, Application mode and so on.

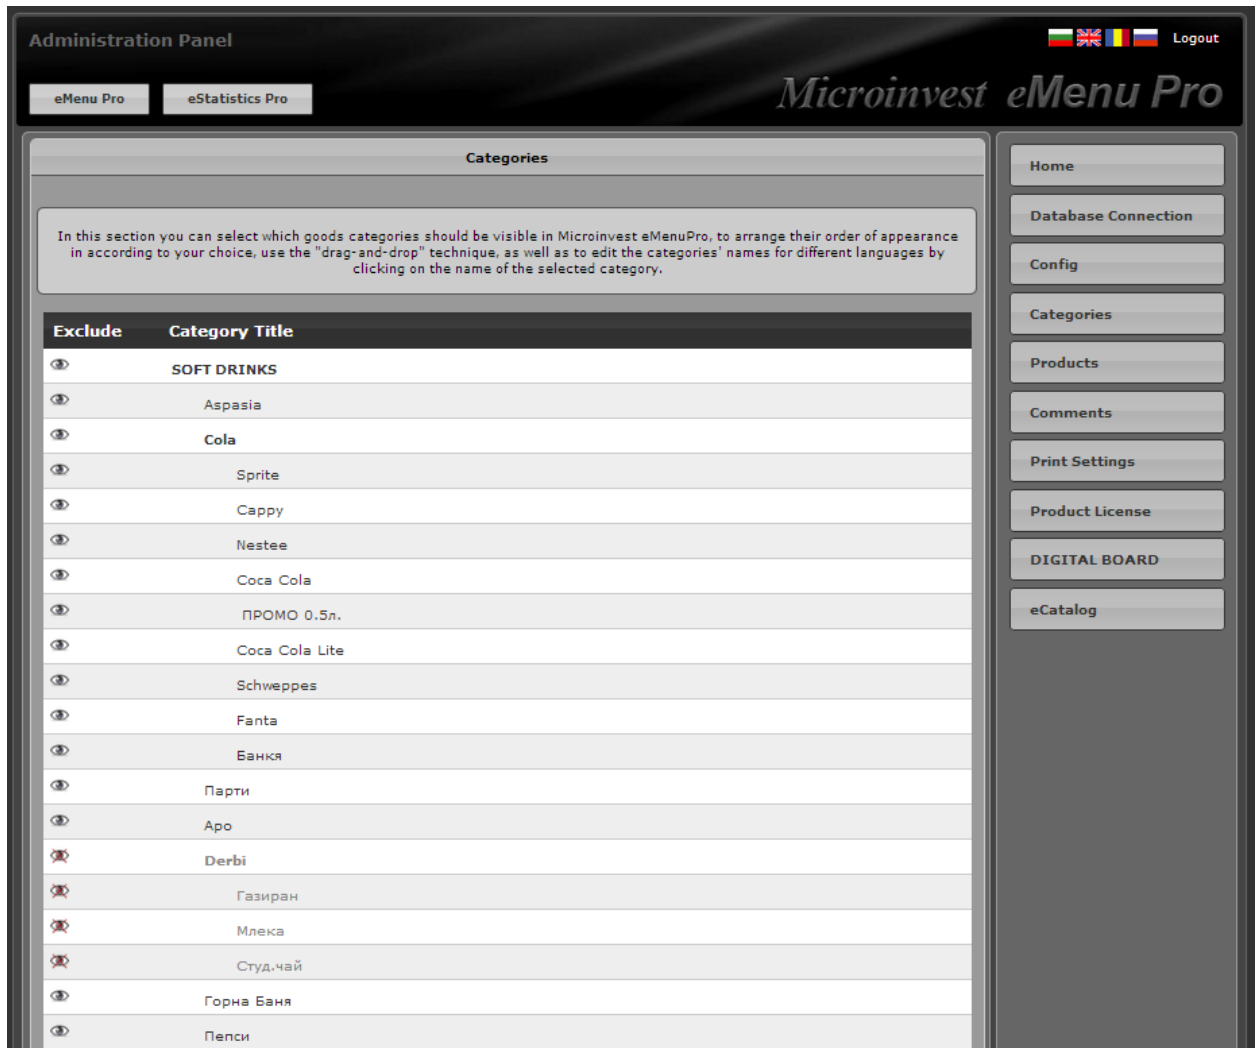

There is an option for enabling limitations for the users, which are restricted to see certain groups of users:

In the menu **Config** might be selected and the visual style of the user interface. The application offers very attractive and fashion colors:

In the “Categories” menu, there is a possibility to hide “Product Groups”, i.e. to make them invisible for the customers through placing a tick in the “Exclude” column.

The screenshot shows the Administration Panel for Microinvest eMenu Pro. The main content area is titled "Categories" and contains a table for managing product groups. A sidebar on the right contains navigation buttons for various system functions.

Categories

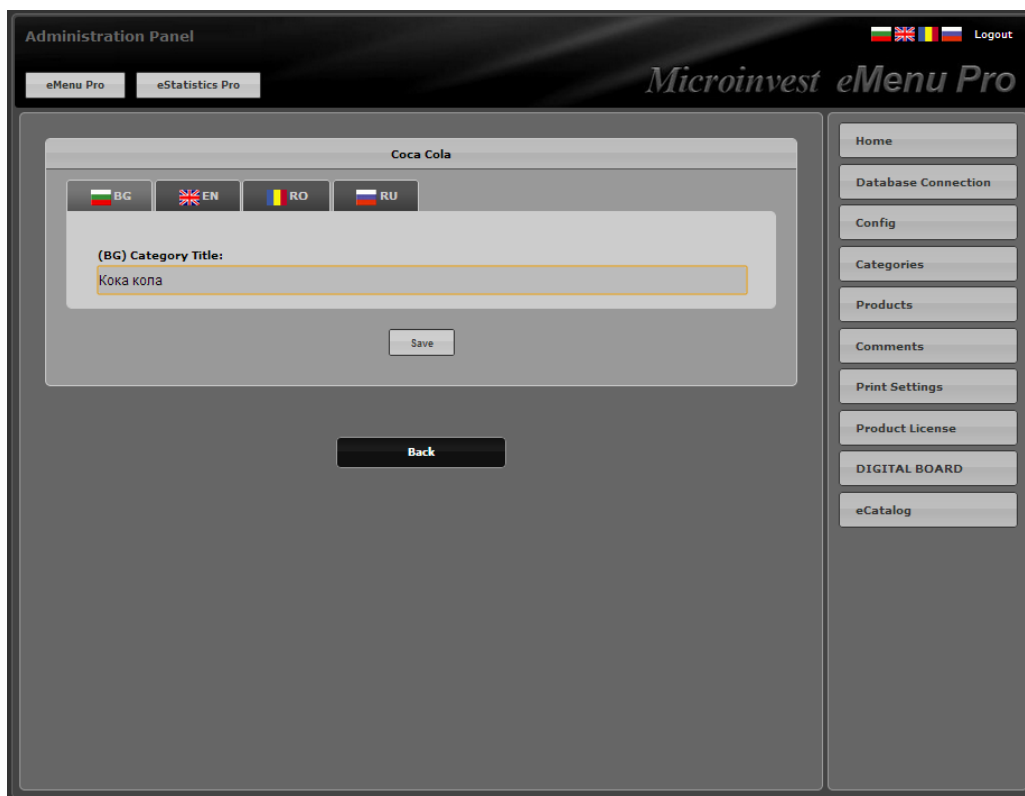

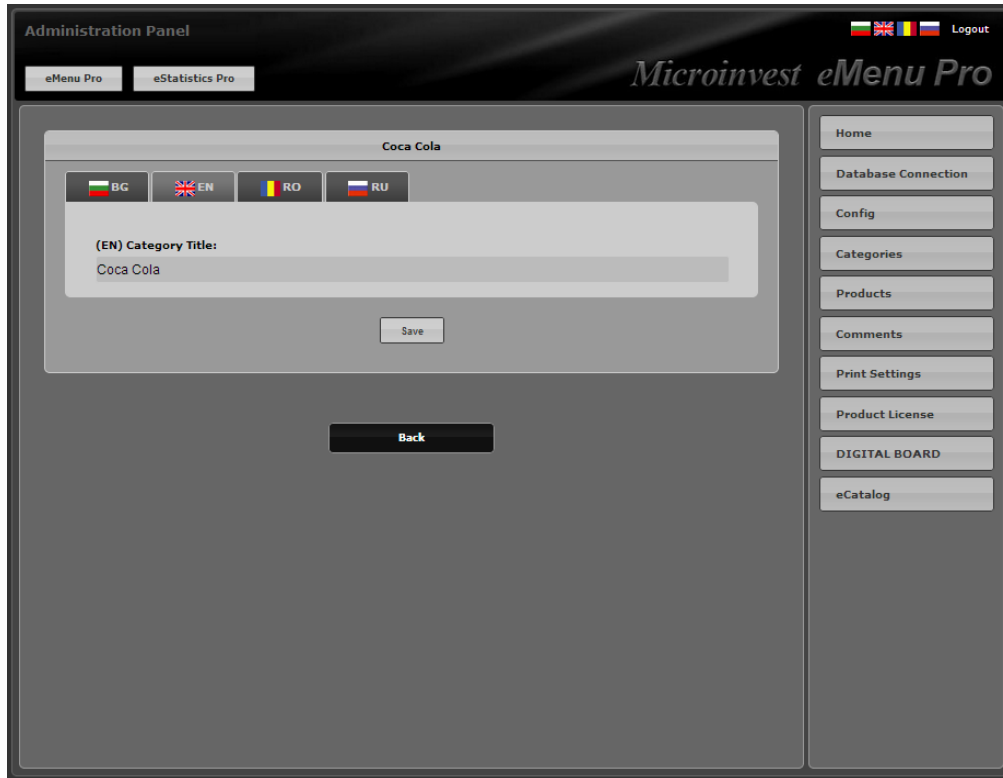

In this section you can select which goods categories should be visible in Microinvest eMenuPro, to arrange their order of appearance in according to your choice, use the "drag-and-drop" technique, as well as to edit the categories' names for different languages by clicking on the name of the selected category.

Exclude	Category Title
<input type="checkbox"/>	SOFT DRINKS
<input type="checkbox"/>	Aspasia
<input type="checkbox"/>	Cola
<input type="checkbox"/>	Sprite
<input type="checkbox"/>	Cappy
<input type="checkbox"/>	Nestee

When clicking on a product, the product's name can be modified. The name can be in Bulgarian, English, Romanian or Russian language and up to two pictures and a description can be uploaded with each product item.

This is the place where you can enter short text description for the product.

The screenshot displays the 'Administration Panel' for 'Microinvest eMenu Pro'. The interface is in English (EN) and shows the editing screen for a product titled 'КОЛА /0.5Л./'. The product title is 'Coca Cola /500 ml/'. The description field contains a rich text editor with a toolbar and a text area containing the following text: 'Coca-Cola is a carbonated soft drink sold in stores, restaurants, and vending machines in every country except Cuba and North Korea. [1] It is produced by The Coca-Cola Company of Atlanta, Georgia, and is often referred to simply as Coke (a registered trademark of The Coca-Cola Company in the United States since March 27, 1944). Originally intended as a patent medicine when it was invented in the late 19th century by John Pemberton, Coca-Cola was bought out by businessman Asa Griggs Candler, whose marketing tactics led Coke to its'. A 'Save' button is located at the bottom of the form. The right sidebar contains navigation buttons for Home, Database Connection, Config, Categories, Products, Comments, Print Settings, Product License, DIGITAL BOARD, and eCatalog. The top right corner shows flags for BG, EN, RO, RU, and a Logout button.

To upload or delete pictures of the products, please click on the tab Photos.

A big and a small sized picture can be uploaded. In the standard appearance, the small picture is visible and, with a mouse click, a second window appears with the bigger picture and the inserted product description. This description can be in any of the 4 languages – Bulgarian, English, Romanian or Russian. Such functionality enables clients who use **Microinvest eMenu Pro** directly, not through a waiter, to receive more detailed information for a selected product item.

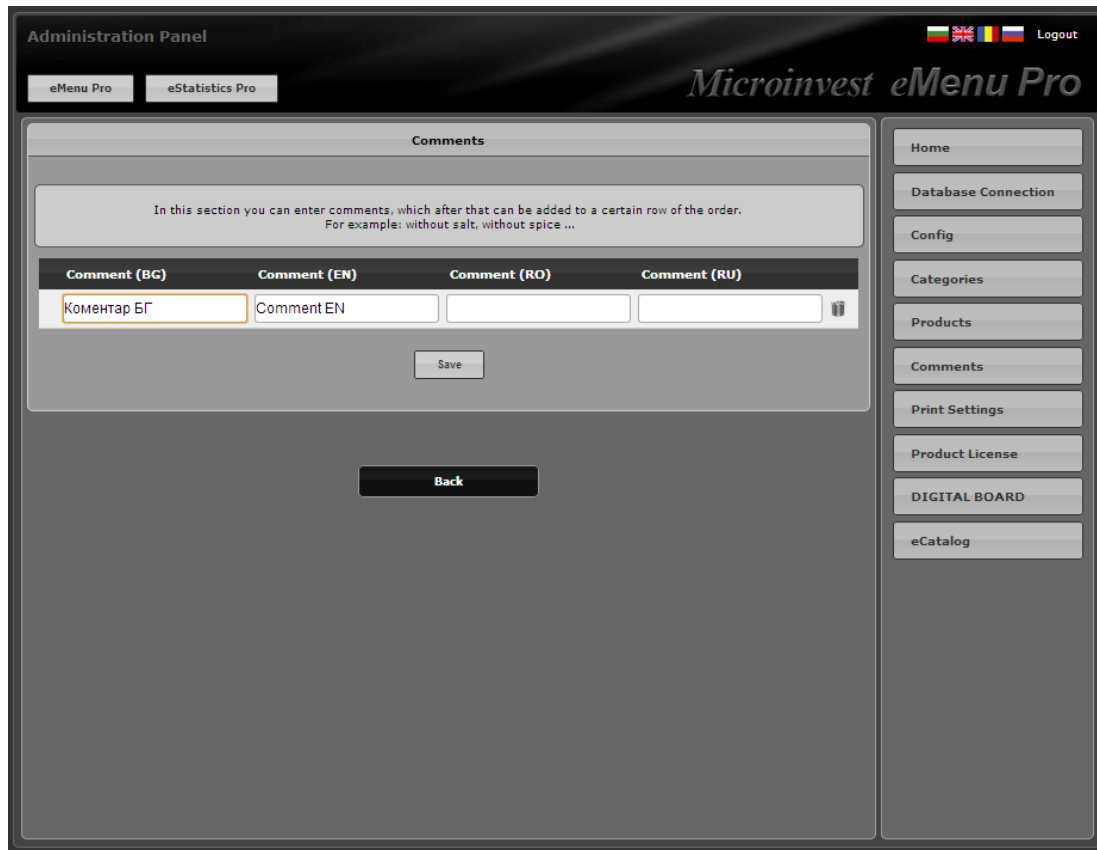

There are no restrictions as to the size and format of the pictures, which can be attached to the product items, since the program performs automatic resizing and reformatting. The recommended picture size is:

- Small – 120 x 120 pixels
- Big – 480 x 360 pixels

The acceptable formats of the pictures are jpg, gif and png.

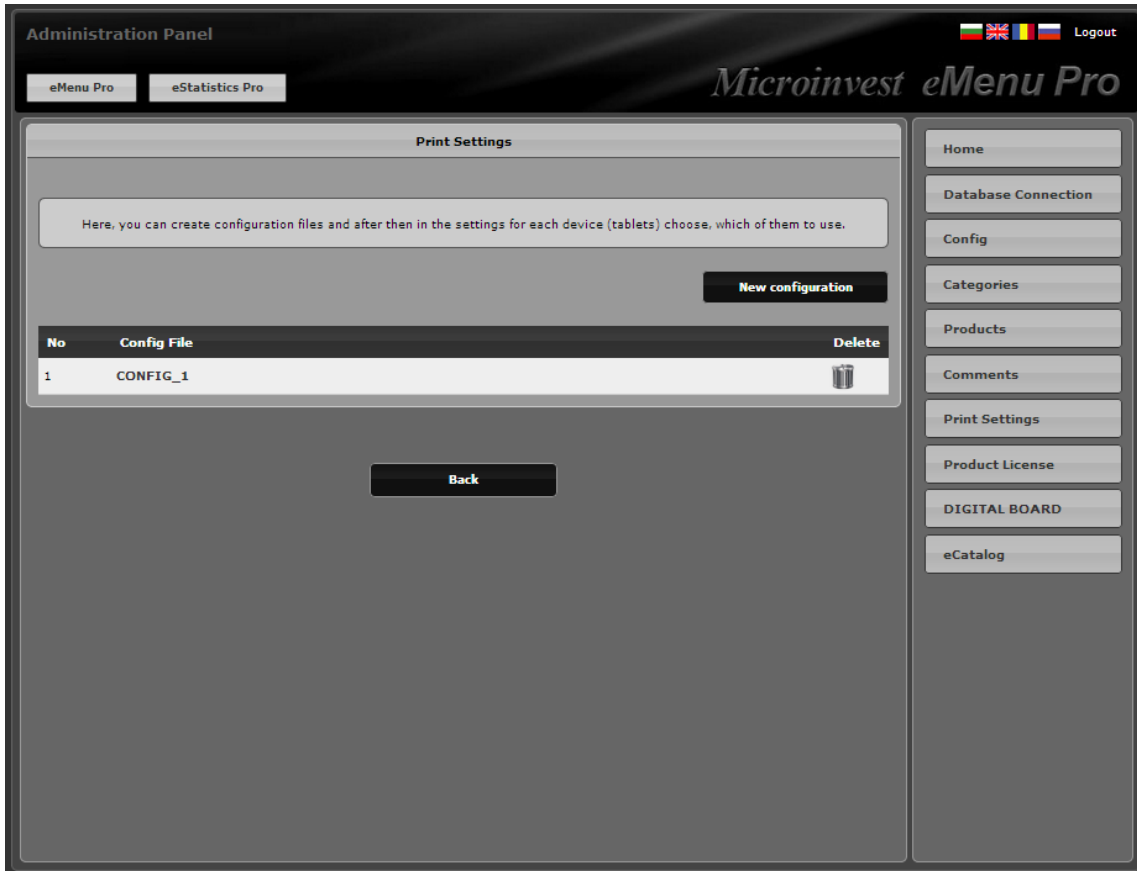

Important! If you plan to use Digital Board, the picture size should be 4:3 and the resolution should be lower than 800*600px.

To enter comments on the four languages for the products, select the menu Comments from the right side bar.

The screenshot shows the 'Administration Panel' for 'Microinvest eMenu Pro'. At the top, there are tabs for 'eMenu Pro' and 'eStatistics Pro', and a 'Logout' button with flags for Bulgaria, UK, and Romania. The main content area is titled 'Comments' and contains a text box with instructions: 'In this section you can enter comments, which after that can be added to a certain row of the order. For example: without salt, without spice ...'. Below this are four input fields for comments in different languages: 'Comment (BG)' with the text 'Коментар БГ', 'Comment (EN)' with 'Comment EN', 'Comment (RO)', and 'Comment (RU)'. A 'Save' button is located below the input fields. At the bottom of the main area is a 'Back' button. On the right side, there is a vertical sidebar menu with buttons for: Home, Database Connection, Config, Categories, Products, Comments, Print Settings, Product License, DIGITAL BOARD, and eCatalog.

In Print Settings should be entered the following settings for printing:

It is used only in mode "Menu Restaurant". Here you can create different config files. From the tablet settings you can select which config file to be used (this option is very useful for restaurants with different halls and floors and if you have on each floor a bar. When ordering a drink from a table from the 1st floor, the order is sent automatically to the bar printer on the first floor and if you have food order, it goes to the kitchen printer and so on).

Licensing

Product License is described in the **Licensing Terms and Conditions** of **Microinvest eMenu Pro**. In the 5 blank fields, the 25 digit license code for registering the program is filled in.

The screenshot shows the 'Administration Panel' for 'Microinvest eMenu Pro'. It includes a navigation menu on the right with options like Home, Database Connection, Config, Categories, Products, Comments, Print Settings, Product License, DIGITAL BOARD, and eCatalog. The main content area displays the 'LICENCE AGREEMENT' text, which includes sections for '1. Subject of the Licence Agreement' and '2. Copyright'. The text explains the terms of the license, including the non-exclusive nature of the software and the copyright ownership by Microinvest Ltd.

6. Guarantees

6.1 MICROINVEST Ltd. guarantees the quality of the data on the bearers as well as the efficiency of the programs included in the SOFTWARE package, under the terms described in the documentation, the correspondence of the software components to the specifications and the correctness of the documentation.

6.2 Regarding the rest of the components, the SOFTWARE is delivered "as it is", MICROINVEST Ltd. does not guarantee that there are no errors in the software and does not bear any responsibility in the cases of occurring of damages, direct or indirect, including damages caused by possible errors in the software package.

6.3 MICROINVEST Ltd gives no guarantees for the work of this software in combination with other installed software or hardware, especially with software or hardware from earlier versions.

7. Termination

7.1 The present Licence Agreement operates upon entering the registration key/s received by MICROINVEST Ltd on the number of computers indicated in column "Registration numbers of the purchased products" of the "Registration card" and remains in force for the time you use the SOFTWARE.

7.2 If for some reason or other you can not stand by the terms of the present Licence Agreement, you must exterminate all copies of the software, including the bearers, documentation information files and archive copies, thus terminating the action of the Licence Agreement.

7.3 The present Licence Agreement is terminated in the cases when there is another explicit Agreement between the both sides, which clauses are different than the above-mentioned ones. These clauses have priority to the clauses listed in this Licence Agreement.

Please enter the license key

Digital Board

This is additional functionality of **Microinvest eMenu Pro**, which allows creating a professional presentation of the products. The application contains 3 templates, 8 color schemes, 4 languages, and 4 types of slide effects.

The screenshot displays the 'Administration Panel' for 'Microinvest eMenu Pro'. The interface is divided into several sections:

- Administration Panel:** Includes flags for language selection and a 'Logout' button.
- Presentations:** A sidebar on the left with options for 'Display resolution' (800x800 Landscape), 'Title' input, 'Create New' button, and 'NEW 800x600px (0) slides'.
- Current Slide:** The main workspace showing a slide for 'Coca Cola /500 ml/'. It features a red background with a Coca-Cola bottle, a yellow starburst price tag '0.00', and descriptive text. Controls for 'Color shema' (red), 'Language' (EN), 'Duration' (5 sec), and 'Effect' (explod) are visible, along with 'New From Current Slide' and 'Delete' buttons.
- Templates:** A sidebar on the left showing three different slide templates.
- Current Presentation:** A section at the bottom showing a 'Presentation: NEW' with 'Save', 'Delete This Presentation', and 'Preview' buttons, and a row of five slide thumbnails.
- Home / Database Connection / Config / Categories / Products / Comments / Print Settings / Product License:** A vertical sidebar on the right with various system management buttons.
- Products:** A sidebar on the right showing a list of products with categories and prices, such as 'Coca Cola /500 ml/ 0.00 BGN' and 'КОЛА / КЕН / -330ГР. 0.00 BGN'.

eCatalog

Enabling this service allows many easy integration of existing public web site with **Microinvest eMenu Pro** so that in this web site will be visualized the product groups and the product itself from the **Microinvest Warehouse Pro** database, using the descriptions and pictures in **Microinvest eMenu Pro** .

Setting the parameters, the system will generate files which you just have to add to the files of your web site.

However, to operate the service, it is necessary to have access through an external IP address to the computer, where **Microinvest eMenu Pro** is installed. It is necessary to have a static IP address provided by your Internet provider, the appropriate settings of the router, which should redirect the requests to the computer, where **Microinvest eMenu Pro** works. If you do not have a static IP address, you can use web sites such as www.noip.com, which provide similar services.

Before you start using this, please make sure you have access via external IP address to the computer where **Microinvest eMenuPro** is installed.

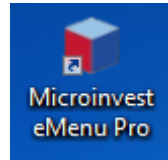

The screenshot displays the 'Administration Panel' for 'Microinvest eMenu Pro'. The main content area is titled 'eCatalog configuration' and contains an 'eCatalog Widget' section. This section includes a detailed explanation of the service, instructions on how to activate it, and a list of configuration parameters. The parameters are as follows:

Parameter	Value
The service is activated:	Yes
External URL to Microinvest eMenuPro:	http://--external-url/eMenuPro/
Number of products per page:	10
Sort products by:	Manual sorting
Default Language:	EN
To be shown a panel for language selection:	Yes
To be shown search form:	Yes
Visualization of the products:	With pictures and description

Navigation buttons include 'Forward' and 'Back'. A sidebar on the right contains a 'DIGITAL BOARD' with buttons for 'Home', 'Database Connection', 'Config', 'Categories', 'Products', 'Comments', 'Print Settings', 'Product License', and 'eCatalog'. The top right corner features flags for Bulgaria, UK, and Romania, along with a 'Logout' link.

Microinvest eMenu Pro Settings

When *Microinvest eMenu Pro* is ready for usage and all parameters have been configured for proper functioning, *Microinvest eMenu Pro* icon is initialized.

The icon starts the default web browser, opening a window for configuring the connection with the database, this time the connection of the application itself. Initially, a message for error in the connection attempt appears.

The screenshot shows the settings interface for "Restaurant Black and White". At the top, the title "Restaurant Black and White" is displayed in white on a red background. Below it, the "Microinvest eMenu Pro" logo is centered. On the left, there are labels for "Waiter: Admin", "Table:", and "Customer:". On the right, there are flags for Bulgaria, the United Kingdom, Romania, and Russia, along with a gear icon for settings. A "Logout" button is located in the bottom right corner. In the center, a "MESSAGE" box contains the following text: "Invalid print configuration!", "This tablet is not configured!", and "Please, enter required settings!". A "Config" button is positioned at the bottom of the message box.

When pressing the **Config** button, a window containing authentication and a list of the workplaces, appears.

When the program is used for direct waiter servicing of clients, a printing template can be installed. In order this printing template to be set up, there should be already installed workplace with **Microinvest Warehouse Pro Light**, where the printers are physically installed.

The screenshot displays a software interface with a dark red background. At the top, a section titled "Client to choose dinamicly: Yes" contains two buttons: "No" and "Yes". Below this is a section titled "Table: Restaurant 1" which contains a table with columns for "Cus" and "Print". A modal dialog box is open over the table, titled "Please, select a configuration for printing!". The dialog has a close button (a red circle with an 'X') in the top right corner. Inside the dialog, there is a list of five configuration options: "CONFIG_1", "CONFIG_2", "CONFIG_3", "CONFIG_4", and "CONFIG_5". Below the list is a "Select" button. At the bottom of the main interface, there is a section titled "Template width: 600 px" with two buttons: "600 px" and "800 px". At the very bottom center is a large "Save" button.

The server used for the printing also needs to be defined in the settings of **Microinvest Warehouse Pro Light** (menu Setup->Main> Print server).

When an order is entered, the quantity is specified with the help of the numbered buttons (x1, x2, x3...), and when clicking on the name of the product, a window with a bigger product item picture and a detailed description of it, appears:

Beer

Amstel

1.68 F

1.68 F

1.68 F

1.68 RUB

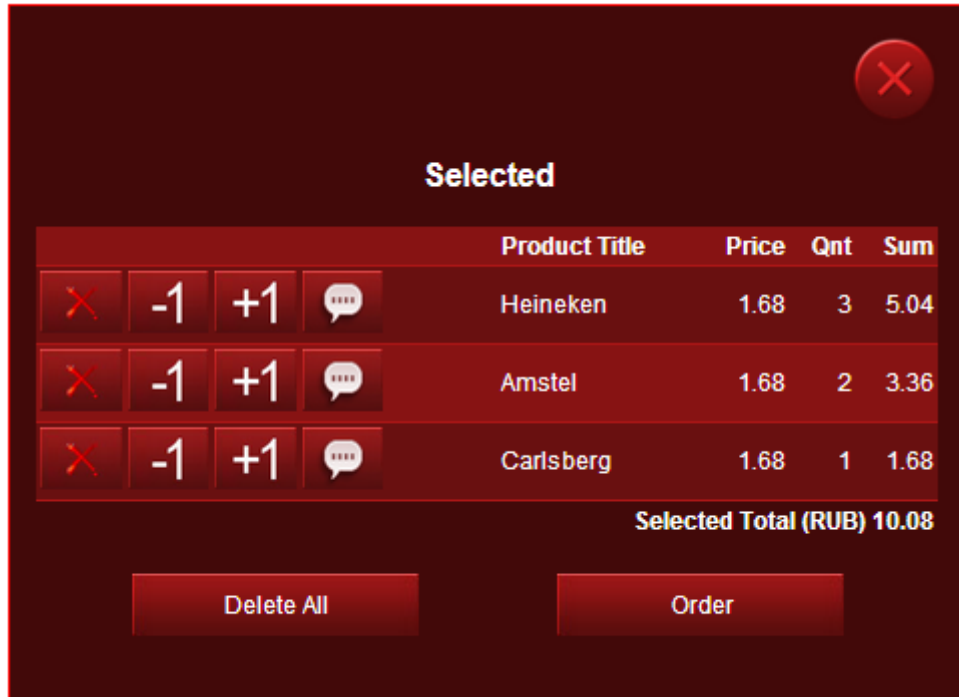

The Amstel is a river in the Netherlands which runs through the city of Amsterdam. The river's name is derived from Aemestelle, old Dutch for "area abounding with water".

Amstel beer is named after the river. The Amstel brewery, as a lot of other breweries, was situated close to the Amstel river because clean river water was used to produce the beer.

After that the order can be either accepted or rejected:

If accepted, a window for viewing the ordered products and the value of the order pops out.

Microinvest eMenu Pro is applicable for being both a purely informative electronic menu without an active module for ordering, and being a module for entering of orders on behalf of an operator. The latter leads to a direct transfer of the quantities for fulfilling the order with consequent printing, taking place on the predefined printing devices.
