Setting Up

1 Insert SIM card and battery

1. Push here to detach the SIM card.

2. Press down on the back cover and slide it open. Remove the battery by lifting it up.

3. Slide the SIM card tray away from the center of the device and then lift it up.

4. Align the angled corner of the SIM card with the angled corner of the SIM card tray. Slide the SIM card into the tray.
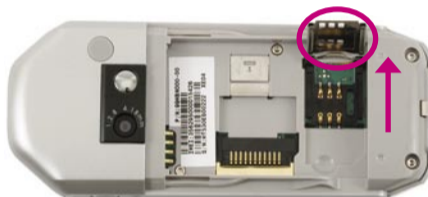

5. Lower the SIM card tray and press down gently to lock it.

6. Align the gold contacts on the battery with the contacts in the battery compartment. Press the battery down and slide the back cover closed.

---

2 Charge battery

Charge using AC adapter
Insert the AC adapter plug into an electrical outlet and the other end into the sync connector port of the device.

OR

Charge using USB cable
Insert the USB plug into a USB port on your computer and the other end into the sync connector port of the device.

Note: If battery power is completely drained, then you have to use the AC adapter to charge it instead of using the USB cable.

Tips

Type using your device

Your device supports four text entry modes: **Multipress**, **T9®**, **Number**, and **Symbol**. When you are typing text, your device automatically selects the appropriate text entry mode.

Multipress allows you to type letters by pressing the key labeled with the letter you want until the correct letter displays. For example, to type **Hey**, you press **4** twice, then **3** twice, then **9** three times.

T9 allows you to type words with one keystroke per letter. The device analyzes your keypresses and attempts to complete the word. For example, to type **Hey**, you press **4, 3, 9**.

Number and Symbol allow you to type numbers and symbols.

To insert symbols
Press ⬚ until the Symbols list appears. Scroll to and select the symbol that you want.

To insert a space
Press ⬚ to add a space after a word.

To change text mode
Press ⬚ until you see the desired mode.

Send | Menu

Text Mode Indicator
T9 for T9 mode
abc for Multipress mode
123 for Number mode

To type punctuation mark
Press ⬚ repeatedly until you see the symbol you want.

To delete characters
Press ⬚ to delete single character. Press and hold ⬚ to delete entire text field.

To add a + to a phone number,
In Numeric mode, press and hold ⬚

Features and Services

For more information on how to use these features and services and the applicable charges for usage, please refer to the T-Mobile SDA™ Welcome Guide, User Manual on the CD, and visit www.t-mobile.com.

E-Mail

T-Mobile My E-Mail provides you unlimited access to your work and personal e-mail. Instantly access your e-mail from AOL®, Yahoo!® Mail Plus, EarthLink™, Comcast®, Microsoft® Exchange, Lotus Notes®/ Domino®, and more, including any POP3 or IMAP4 e-mail server. Select **My E-mail** on the Home screen to begin.

Pocket MSN allows you to send and receive e-mails from your free Hotmail account and send and receive instant messages with MSN® Messenger.

Messaging

Text messaging allows you to send, receive, and reply to short text messages using your device.

Picture Messaging allows you to send and receive picture / video messages.
At Home screen, select **Start > Messaging** to read and send text and picture messages.

Instant Messaging allows you to log in to AOL®, ICQ®, and Yahoo!® using your device.

Data

T-Mobile Internet (GPRS/EDGE) gives you wireless access to the Internet over the GPRS / EDGE network in many locations across the U.S. and worldwide

T-Mobile HotSpot (Wi-Fi) gives you wireless access to the Internet over the T-Mobile Wi-Fi network in convenient locations across the U.S., such as airports, coffeehouses, bookstores, universities, and more. To turn on Wi-Fi, select **Wi-Fi** on the Home screen to open the Comm Manager.

Synchronization

You can synchronize e-mail, calendar, contact, tasks, and notes by connecting your device to your computer using the USB cable.

You can also wirelessly synchronize if you have Microsoft Exchange Server 2003, and if the server is set up for wireless synchronization. Set up synchronization by using the Comm Manager and selecting **Menu > Add server source**.
