

IPADS APPS

The iPad2 has a front and rear camera. The video captures 720p video and has a 5X digital zoom for taking still pictures. The camera does not take as high quality of image as the iPhone, but better images than the iPod Touch.

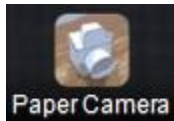

Icon	Title	Description	Cost
	<u>Camera Genius</u>	<p>★ Take Videos (iPhone 3Gs, iPhone 4, iPod Touch ONLY) What camera would be complete without a video mode? Capture videos and even zoom in and out on your subjects while recording, just like a real video camera! *</p> <p>★ Camera Zoom (Up to 6X digital zoom) Now zoom in on subjects to get that close-up shot. Combine it with our anti-shake for even clearer zoomed shots.</p> <p>★ Timer & Sound Capture A timer lets you set up timed group photos. You can set the interval between 2 and 300 seconds. Just tap the numbers when the timer pulls up to change the timing interval. You can even set it to repeat mode to capture photos automatically. The sound capture setting allows you to take photos by detecting noise to snap your photo.</p> <p>★ Full Screen Camera Button The big photo button makes it easy to capture those photos without having to try and tap the tiny photo button, potentially missing that candid shot. Just tap the screen to take the photo.</p> <p>★ Prevent Blurry Photos with Anti-shake Anti-shake stabilization helps eliminate those blurry photos caused by excessive iPhone camera movement.</p> <p>★ Improve Photo Composition with Guides Camera guides help you compose and align photos based on known photographic principles. Eliminate those crooked photos before they happen.</p> <p>★ Burst Mode Shooting Take 3 shots in rapid succession. Great for getting that action shot!</p> <p>★ Camera Manual Lots of hints on the best way to take photos on your iPhone. Read the quick tips to greatly improve your photos.</p>	\$.99

Comic Life for iPad has everything you need for creating and sharing comics, including fun and quirky templates, stylized image filters, and an easy-to-use drag and drop placement. You have full control over the design of your comics with a huge selection design options – colors, fonts, gradients, balloons, captions, panels and more.

The Comic Life app is designed to parallel that of Apple's iWork suite of apps, making it easy for you to transition your skills from Pages and Keynote to Comic Life. With similar tap functions and commands, it is simple to hit the ground running with Comic Life for iPad.

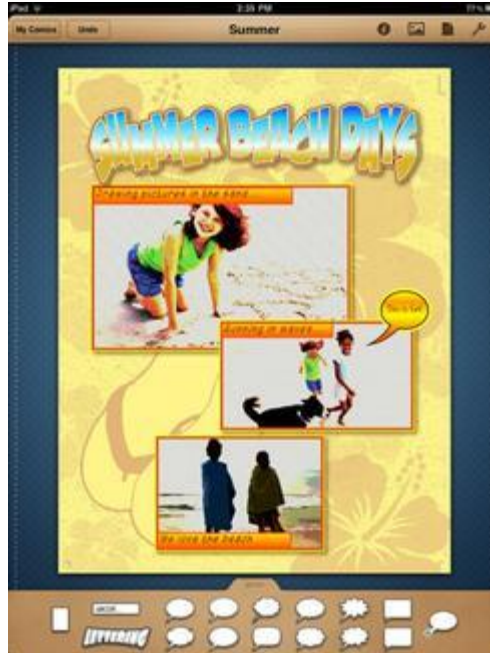

Using Comic Life for iPad you can:

- Create photo comics in the full featured comic editor.
- Read your comics with the integrated e-reader.
- Share your comics on Facebook, via Mail.
- Send your comics to a printer on your wireless network.
- Exchange comics with other iPads through the innovative In Tray.
- Choose from full page layouts including panels, titles and captions along with complimentary styles for a professional look.
- Drag and Drop elements anywhere in your comic page.
- Easily add photos from your library with the Place Photo button in panels.
- Curve and place balloon tails precisely with advanced tail controls.
- Resize and rotate images, clip them in panels along with balloons, captions, and lettering.
- Create multilayered color gradients to design the perfect style for lettering, captions or background.
- Use smart shapes to add common shapes and the free from shape drawing tool to create any line or shape you can imagine.

- **IMPORT:** Import pictures from your iPhone or iPod touch, or even take a snapshot with the iPhone's built-in camera.
- **MAGISKETCH:** State-of-the-Art image processing algorithms process your input image to create a customizable sketch, fully automatically. You can create many exciting effects just by adjusting the basic and advanced MagiSketch settings.
- **PAINTING:** You can color-in the MagiSketch by painting with your finger to create amazing images within minutes.

[ToonPAINT](#)

\$1.99

- **AUTO COLOR:** With our new optional Auto Color feature, you can take the hard part out of creating great looking color sketches and let the app do the heavy lifting.
- **SESSIONS:** Your current session is automatically saved when you load a new image, so you can continue it at a later time.
- **UNDO/REDO:** You can correct any painting mishaps by shaking the iPhone, or by accessing undo/redo via the

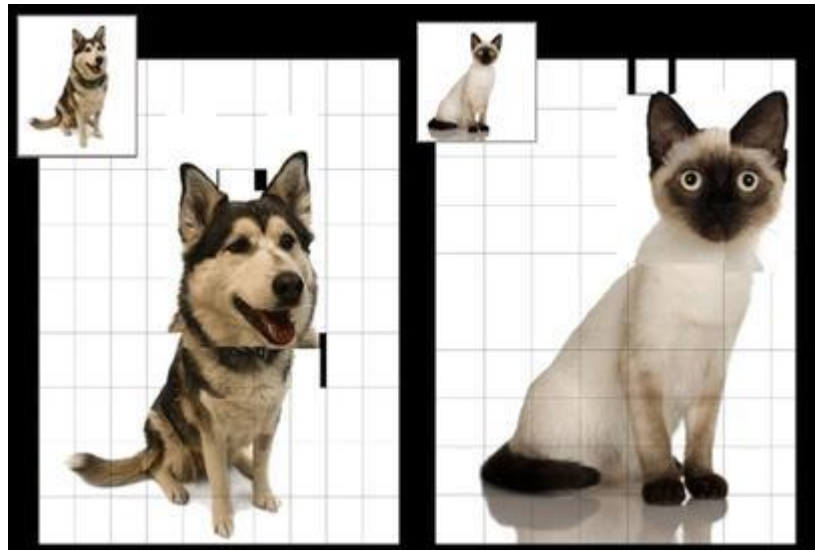

"bomb" icon.

ChipPhoto is one of the best photo apps that allows you to cut your photos into 4x4 to 16x16 square pieces. Each of the pieces can move to any spot of the picture and they are all size adjustable.

After carefully adjusting and rearranging the little pieces, the seemed-to-be ordinary picture has been given a new life!! The new photo cannot be more interesting, amusing and fun. ChipPhoto can not only provide a new way of editing your pictures, giving whole new different looks, but also can be as jigsaw games for children.

[8mm](#)

8mm HD brings your iPad and iPad 2 back in time to capture the beauty and magic of old school vintage movies. By mixing and matching films and lenses, you can recreate the atmosphere of those bygone eras with 42 timeless retro looks. Dust & scratches, retro colors, flickering, light leaks, frame jitters - all can be instantly added with a single tap or swipe.

\$2.99

What's in the camera:

Viewfinder

▶ Total live view of the effects. What you see in the viewfinder is what you record.

Lenses

▶ 6 lenses bundled - Super 8, Clear, Flickering Frame, Spotlight, Light Leak and Color Fringing.

Films

▶ 7 grainy, discolored, dusted and aged films from different eras - 1920, Noir, 60s, 70s, Sakura, XPro, Siena.

Jitter Button

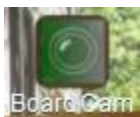

▶ Add random up and down displacement of frames to imitate real 8mm projectors.

Sound

▶ Add projector sound for extra authenticity, mute the video to make a silent movie, or use the microphone only - your choice.

Board Cam transforms your iPad 2 in an enhanced document camera. Perform live dynamic presentations of objects to a large audience and record augmented reality videos. What you do is what they see.

[BoardCam](#)

Augmented reality videos: Record videos where you paint, use pointers and display labels superimposed over the camera video output.

\$1.99

Live presentations: Just connect your iPad 2 to an external video output and focus with the built-in device camera. Use your fingers as pointers or to place labels and draw over the screen image.

This app benefits from many of the new features introduced in the iPad 2

like its built-in camera, the mirror screen output or its lighter weight.

Are you a teacher looking for a way to show a live experiment to your crowded class? Are you a seller that wants to make a live display of your products to a huge audience? Are you real state agent that wants to create a tour video in a property? Just want record funny videos? Then this app is for you.

Use Board Cam to make live presentations or record videos while you stick labels, draw and use pointers over the device's camera video output.

Board Cam is an ideal app for educational environments. You can use it to show on your classroom TV or projector what you are doing on your teacher table while you point, draw, label, etc. on the image. Or you can use it to record educational videos for distribution among your students. Also, kids will love this app for drawing on everything that surrounds them and recording videos of their creations.

And, of course, you can use Board Cam as a augmented reality tool just for fun and draw whatever you want over the video image, record it and share your video with your friends.

Features

- Interaction with the camera image using pointers, connected pointers, labels and freehand drawing.
- Video and audio recording.
- Customizable pointers, labels and lines.
- Pointers look like real laser pointers.
- Label storage for later use.
- Undo and redo freehand drawing. You can undo and redo your strokes. Perfect for preparing all your drawing in advance and recover it later step by step during your presentation.
- Settings and free hand drawing kept between sessions.
- Session configuration management. You can save and restore different session configurations. So, you can prepare all your labels, pointers and line configurations, do all your drawing and save them for future uses. The undo queue is also saved.
- Controls can be hidden to make the most of the screen space.
- Built-in user manual.
- Tell a friend and rate this application button in the session configuration management view.

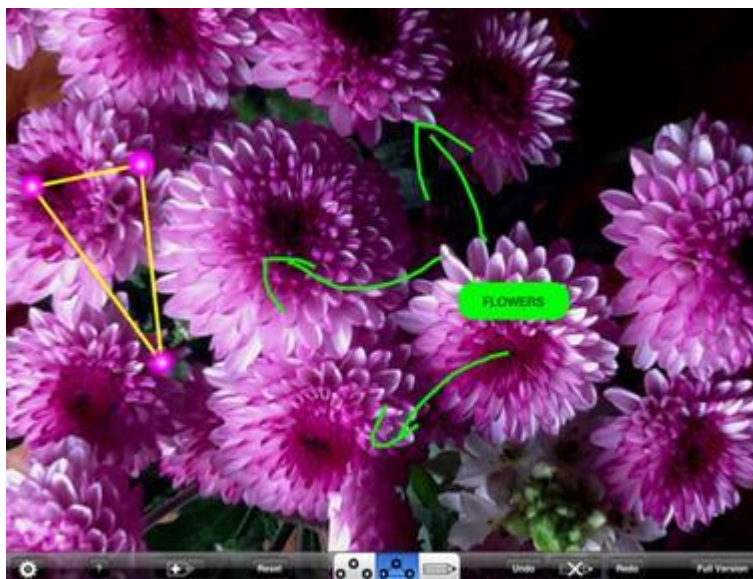

Board Cam LITE transforms your iPad 2 in an enhanced document camera. Perform live dynamic presentations of objects to a large audience.
