1. Safety Precautions

Information for parents

Please read the operating instructions and safety precautions carefully before use.

Explain the content to your children and the hazards associated with the phone.

Remember to comply with legal requirements and local restrictions while using the phone, for example, in airplanes, petrol stations, hospitals or while driving.

Mobile phones can interfere with the functioning of medical devices, such as hearing aids or pacemakers. Keep at least 20 cm (9 inches) distance between the

phone and the pacemaker. While using the mobile phone hold it to the ear which is furthest away from the pacemaker. For more information, consult your doctor.

Always keep the phone and accessories out of the reach of small children.

Do not place the phone near to electromagnetic data carriers, such as credit cards and floppy disks. Information stored on them could be lost.

Permanent hearing loss may occur if you use earphones or headphones at high volume. You can adapt over time to a higher volume, which may

sound normal but can be damaging to your hearing. Set the volume of the earphones to a safe level. If you experience discomfort or buzzing in your ears, reduce the volume or discontinue using earphones or headphones.

Ring tones, info tones and handsfree talking are reproduced through the loudspeaker. Do not hold the phone to the ear when it rings or when you have switched on the handsfree function. Otherwise you risk serious permanent damage to your hearing.

The main voltage (V) specified on the power supply unit must not be exceeded. Otherwise the charging device may damage.

The power supply must be plugged into an easily accessible AC main power socket while charging the battery. The only way to turn off the charging device after charging the battery is to unplug it.

You should only open the phone to replace the battery, SIM and microSD card. You must not open the battery under any circumstances. All other changes to this device are strictly prohibited and will invalidate the guarantee.

The phone may cause interference in the vicinity of TV sets, radios and PCs.

Dispose of the unwanted batteries and phones as per the laws of your country.

Use only original batteries and charging devices. Otherwise you risk serious damage to health and property..

A battery can cause property damage, injury or burns if a conductive material such as jewelry, keys or beaded chains touches its exposed terminals. The material may complete an electrical circuit and become quite hot. Take extra care while handling any charged battery, especially when you are carrying it in your pocket, purse or other container with metal objects.

Do not dispose off the battery in fire as it may explode.

Improper use will nullify the guarantee! These safety instructions also apply to original accessories.

2. Phone Overview

Communication Control Keys

Master SIM key is used to make a call after a number has been entered in the idle screen, or to answer an incoming call. In idle screen, press Master SIM key to show call logs of Master SIM card.

End key is used to end a call during calling or conversation, or to quit the menu and return to idle screen. Press and hold the End key for about three seconds to turn on/off the phone.

5 Way Navigation Key

Scroll and select the desired function.

In idle screen, press this key to access the main menu.

Press the key to confirm a selection in menu option screen.

Left and Right Soft Keys

In idle screen, press the left soft key to directly access the main menu.

In idle screen, press the right soft key to directly access the

phone book list.

During menu operation, the current functions of the left and right soft keys are shown in the bottom line of the screen, and they are related to the current status of the phone.

Number Keys

In idle screen, press number keys (0-9) to enter numbers.

In idle screen, press and hold number keys (2-9) to start speed dial.

You can also use number keys to select menus. If a number is shown before an option in menu list, you can select the option quickly by pressing the corresponding number key.

Asterisk Key

In idle screen, press the asterisk key to enter "*".

Hash Key

In idle screen, press the hash key to enter "#".

Input switch key

Switch the input methods between **Numeric**, **Normal**, **Smart** and **Hindi** in any text editor screen.

Shift key

In standby mode, press and hold the Shift Key for about 3 sec to turn on/off the torch.

Input capital letters or small letters in any input mode.

Fn Key

Press the Fn Key once to input the digit or symbol labeled in the keypad temporarily.

Press the key twice to input the digit or symbol labeled in the keypad permanently.

SPACE Key

In standby mode, press and hold the SPACE Key for about 3s to directly access the FM radio module.

Insert a space character in any text editor screen.

Message Key

In standby mode, press the Message Key to access the write message screen directly.

SYM Key

In standby mode, press and hold SYM Key in idle screen to activate/deactivate the Silent mode.

In standby mode, press RSK and then the SYM key to lock the keypad. To unlock the keypad press the RSK and then the SYM key.

Show the symbol selected screen in any text editor screen.

Enter key

Press the Enter Key to add a new paragraph in the text editor screen.

Del Key

Press the Del key once to delete the last character in the display, long press it to delete the characters consecutively.

Connection Jack

The connection jack is used to connect the charger and headset with the phone.

Icons displayed on the main screen (Icons may be changed without further notice)

The following icons may be displayed in the first line of the screen.

Icon	Indicates
	Network Signal strength.

	A new text message is received.
	A new multimedia message is received.
	MP3 player is running in the background.
	Alarm activated.
	Keypad locked.
	Battery power level.
	The call forward function is activated.
	General profile activated.
	Outdoor profile activated.
	Silent profile activated.
	Missed call(s).

3. Getting Started

What is a SIM card ?

While registering your mobile phone number, you will be provided with a SIM card (Subscriber Identity Module) by network operator.

The SIM card has information, such as phone number, PIN (Personal Identification Number), PIN2, PUK (PIN Unlocking Key is the password to unlock PIN), PUK2 (password to unlock PIN2), IMSI (International Mobile Subscriber Identity) number, network information, phone book data, SMS data and so on reserved for your use. . If it is lost, contact your network operator immediately for help.

PIN Code

PIN is usually a 4 digit password provided by your network operator. It is usually 4 digits. When you input the PIN code, the screen displays “*” to replace the number entered.

PIN is used to access the SIM card. If the PIN protection function is enabled, the screen will display “Enter PIN” each time the phone is switched on. You can deactivate this feature but this may result in the unauthorized use of the phone. Some network operators do not permit deactivating the control.

PIN2 Code

PIN2 is required for some specific functions provided by the network, such as the charge information.

Note: If you enter the incorrect PIN three times in a row, the SIM card will be locked. Please contact your network operator immediately for decoding the PIN. Attempting to decode it yourself may result in the permanent failure of the SIM card.

PUK Code

PUK (8-digit) unlocks a locked PIN. If you enter the PUK incorrectly ten times in a row, the SIM card will become invalid. Please contact your network operator for a new SIM card.

Inserting the SIM card

1. Press and hold the ending key to turn off the phone.
2. Remove the battery cover and then the battery.

3. Insert the SIM card into the card holder. Ensure that the cut corner is at the top left and the metal contacts face the phone.
4. Re-insert the battery. Place the battery cover onto the back of your phone and slide it forward until the latch catches the cover.

Note: A SIM card can be easily damaged if its metal contacts

become scratched. Therefore, take special care while holding or inserting it and keep it away from small children. **Battery Charging**

The battery is not fully charged when first unpacked. It takes three charging-discharging cycles for the battery to reach its peak performance. The battery can be charged and discharged hundreds of times. However, the capacity of the battery will be reduced each time it is charged/emptied, and it will eventually wear out. When the talk time and the standby time are noticeably shorter than normal, replace the battery. Use original batteries and charging devices only.

Unplug the charger from the outlet and the phone when not in use. Do not leave a fully-charged battery connected to a charger because overcharging may shorten the life of the battery.

If the battery is completely discharged, the charging may not start immediately when you plug in the connector. Wait 10 to 15 minutes for the phone to begin charging.

Use the battery only for its intended purpose. Never use any charger or battery that is damaged.

Do not short-circuit the battery. An accidental short circuit may occur when a metallic object such as a coin, clip or pen causes the direct connection of the positive (+) and negative (-) terminals of the battery, for example, when you carry a spare battery in your pocket or purse. Short circuit may damage the battery and the connecting object.

Storage at too high or low temperatures will result in a gradual capacity loss. As a result the operating time of your mobile phone may be considerably reduced, even after the battery is fully charged.

Do not dispose off the battery in a fire as it may explode. Batteries may also explode if damaged. Dispose off the unwanted batteries and phones as permitted by the laws in your countries.

Talk and standby time of the battery varies depending upon the

signal strength of the network, parameters set by the network operator and usage of the battery.

Battery

QT-60 comes with a 1000mAh battery, which gives about 15 days of standby time (under test conditions) so that you can keep in touch with your loved ones for many days without charging the battery.

Battery type	Standby time	Talk Time
Each Li-ion battery	15 days	240 minutes

* Note: The actual operation time of a battery varies depending upon the operation mode, network settings and call settings.

Follow the below mentioned steps to charge the battery:

1. Connect the charger to the connection jack of the phone in proper direction, and connect it to the main socket.
2. The phone displays "Charger Connected!" and starts

charging. The battery icon dynamically displays the charging process. In switch-off state, the phone dynamically displays the charging process.

3. When the battery is fully charged, the charging process stops automatically, and the battery icon indicates full grid on the screen. After the battery is fully charged, remove the charger from the phone and socket as soon as possible.

Note:

- After the phone has run out of battery, we recommend that you recharge the battery on time. If you do not recharge the battery within two days, the phone may enter the slow charging mode. When you recharge the battery, there may be no display temporarily. After about 10 minutes, the

charging indicator icon is displayed on the screen of the phone. If you do not recharge the battery for more than two days, the battery may enter the deep discharge protection state. Thus, in order to get the battery into normal charging mode quickly, we recommend that you charge the battery on an adapter to activate the battery for charging, and then charge the battery with the phone. Alternatively, you can charge the battery with the adapter.

- Do not change the parts and accessories of the battery yourself or take off the battery cover for safety.
- Use only original batteries and charging devices. Otherwise you may risk serious damage to health and property.
- The temperature recommended for charging a battery is 10°C to 55°C. Do not charge battery in too high or too low temperature.
- Do not use the phone while charging.
- It takes approximately four hours to fully charge a battery.

Remove the charger quickly after the battery is fully charged.

- After pulling out the battery system date and time will reset to default values (factory settings).

Memory

QT-60 supports dual Memory cards of 8 GB each. Which allows you to save any kind of data, such as music, videos etc. The maximum memory space supported by the two SDCard is 16 GB.

T-Flash/Micro SD card: It is a type of memory card.

Insert T-Flash card into mobile phone

Multi SIM:

This phone supports Multi-SIM (GSM+GSM) card with dual-standby. When in Multi SIM Mode:

- a) You can make or receive calls from/at master SIM card/slave SIM card,
- b) You can send or receive SMS/MMS from master SIM card/slave SIM card,
- c) You can reply/forward SMS of master SIM/slave SIM of the phone from other SIM,
- d) You can access Phone book / Call Logs of master SIM card/Slave SIM card,
- e) You can access WAP/GPRS (for internet access on phone) on

master SIM card/slave SIM card.

Stand By Mode Settings:

Note: This phone supports Dual SIM, Dual standby but single calling i.e if you make a call from master SIM card then you cannot receive another call on your slave SIM card at the same time or Vice-Versa. Hence incoming / outgoing / call conference / call swap on any other master SIM card/slave SIM card is not possible.

Switching the phone on

Press and hold the ending key to turn on/off the phone . The phone will automatically search for the network, if there is no password protection for the SIM card and the phone. After the phone has been registered on the network, the name of the service provider will be displayed on the idle screen. Then you can make or answer a call.

The phone remains in the searching state if it fails to find the available network system.

If your phone asks for a password when it is switched on, then enter the correct PIN code and press the left soft key or the OK key for confirmation. After being unlocked, the phone will display the name of the registered network and the signal strength. Contact your network operator if you do not know the PIN code. The default password of the phone is “1122”.

When you switch on the and it displays “Insert SIM Card” on the screen, press and hold the ending key to turn the phone off, and check whether the SIM card is properly inserted.

Switching off the phone

Press and hold the ending key to turn off the phone. After the switch-off animation is displayed on the screen, the phone will be switched off.

Do not attempt to turn the phone off by directly taking out the battery.

4. Text Entry

This phone supports the QWERTY keypad, which is the most useful function for editing text.

Traditional Entry Mode

Press the keys to enter the corresponding characters, which are labeled on them.

Smart Entry Mode

Press each key associated with the letter you want to enter only once. The words you have entered appear at the bottom of the screen.

Set Default Input Method

Set the preferred input method by the route **Settings > Phone Settings > Pref. Input Methods**. The preferred input method is the default input method each time when you enter the text editor screen.

Changing the Input Method

In the editing screen, select **Options** > **Input Method** to directly select the required input method. The current text input method is indicated in the upper left corner of the display screen.

Press **Input switch key** to switch the input method between **Normal**, **Smart**, **Hindi** and **Number** entry mode.

Press **Shift key** to enter capital letters and small letters.

Insert Symbols

Press the **SYM key** and select the required symbols.

Press **FN Key** once to input the symbol labeled in the keypad temporarily, press it twice to input the symbol labeled in the keypad permanently.

Insert a Space

In any text input method press **SPACE key** to insert a space character.

Delete Character

Press **RSK(Clear)** once to delete the last character on the display, press and hold it to delete all entered text.

Press the **Del key** once to delete the last character in the display, long press it to delete the characters one by one.

Add New Paragraph

Press **Enter key** to add a new paragraph.

5. Calling

Making a Call

In idle screen, enter the phone number and press the **Master SIM key** to make a call by the master SIM.

Making an International Call

1. Press the plus key “+” to enter “+”.
2. Enter the country code, area code and phone number.
3. Press the **Master SIM key** to make a call by master SIM.

Dialing an Extension Number

Enter the number, and press the P key to enter “P”, or press the W key to enter "W".

Then enter the extension number.

Press the **Master SIM key** to make a call by master SIM.

Correcting a key-in Error

Press the right soft key to delete the last character on the display.

Press and hold it to clear all entered text.

Making a call from Phone book

1. In idle screen, press the right soft key to enter **Phonebook** list, or enter the menu and select **Phonebook**.
2. Enter the quick search screen, scroll and select a contact name. This quick search function is advanced option and is hence known as Intelligent Quick Search. Just type the first character of the name in the quick search and you will get all the contacts matching your entry. It makes it simpler to search any entry.

Press the “Master SIM key” to make a call by the master SIM.

Dialing a previous number

1. In idle screen, press the **Master SIM key** to display **Call Logs of** master SIM card, and press **Slave SIM key** to display call logs of slave SIM card. Press the up and down direction keys to select a number.

2. Press the **Master SIM key** to make a call by the master SIM.

Dialing a speed dial number

In idle screen, press and hold the corresponding number (2-9) in the speed dial list to make a call. Note that number key 1 is reserved for the voice mail number (to get Voice mail number, please contact your Service provider).

To set speed dial,

1. Go to **Phone book > Options > Phonebook Settings > Speed dial** > select **On** to enable this function.
2. Edit the speed dial numbers in **Phone book > Options > Phonebook Settings > Speed dial > Set number > OK > Edit**.

Listening to voice mail

Press and hold number key 1.

You need to set the voice mail number and store it in your phone. To set the number, go to **Messaging**> **Message settings** **Text message** > **Master/Slave SIM** **Message settings** > **Vicemail server**, select **Options** and then **Edit**.

Answering a call

- Press the Master SIM key.
- Press the OK key or select **Options** and **Answer** to receive the call.

Make call Silent

Press the RSK.

Rejecting a call

Press the end key.

Ending a call

Press the end key.

Call Options

Press **Options** during a call for more options. Options vary depending on the current situation.

Hold Single Call	Hold the current call.
End Single Call	End the current call.
End all calls	End all the calls which are in progress.
New Call	Add a new call and talk with more than one person at a time.
Phone book	Use Phone book to search for numbers.
Messaging	Read/write a message during a call.

Sound Recorder	Record the call.
Background sound	The phone adds an additional sound of your choice in the conversation.
Mute	This function does not let the caller on the other side hear your voice temporarily.
DTMF	Enter tone sequences (number) for remote inquiries to an answering machine.

6. Menus

6.1 Phone book

The phone provides two kinds of storage media: Master/Slave SIM card and phone. The phone can store 1000 entries with multiple fields. The capacity of the phone book on your master SIM card/slave SIM card depends on the type of master SIM card/slave SIM card provided by your network operator.

Enter a number in the idle screen and press OK key to save the number. Select the storage location. Then the edit interface appears. If you want to save the contact in the Master SIM then select Master SIM card or Slave SIM. If you select SIM card you need to edit the number only. If you select phone you need to edit the items that you set in the settings of phone book, including the name, number, email address, caller picture and caller ringtone, and you can add more information using **Options > Add detail**, including home number, office number, fax number and company name.

In idle screen, press the right soft key to directly access the phonebook.

The small icon on the left of the phone book list indicates whether the record is stored on the master SIM card, the slave SIM card or the phone.

View	View the detailed information of the record.
Send message	Send SMS/MMS after selecting a designated number.
Call	Dial phone number by the master SIM card Call or slave SIM card Call.
Edit	Edit the options included in a phone book record.
Delete	Delete the record.

Copy	Copy the record from the current storage to the other storage.
Move	Move the record from the current storage to the other storage.
Send VCard	Send vCard by SMS/MMS or save it to file.
Add to Blacklist	Add the selected contact to the black member.
Mark several	Select multiple contacts for operating at a time.

Caller groups	A caller group is the combination of phone settings that are used to identify a particular group of records. The phone provides five call groups: Friends, Family, VIP, Business and Others. You can manage and edit the details of caller groups.
Phonebook settings	View the memory status. Set the default storage of new numbers, Speed dial, My number and other useful functions.

You can also set caller ringtone or picture by setting the parameters of caller groups.

6.2 Messaging

The phone supports Short Messaging Service (SMS) and Multimedia Messaging Service(MMS). You can send text/multimedia messages and manage the messages that you send and receive.

If the memory for short messages is not full, short messages will be directly saved in the SIM card. A flashing icon  will appear on the top of the main screen if the memory is full.

The phone also supports Multimedia Message Service (MMS), which is a network service. It enables you to send messages with images, sounds and text. Ask your service provider whether this service is available. You may need to subscribe for the service to your network operator before sending and receiving multimedia message. All multimedia messages are stored in the phone memory. The SIM card cannot store multimedia messages. If the memory for MMS is full the phone can not receive the new messages. Please delete the unnecessary MMS and download them manually.

1. Write (Text/Multimedia) Message

Create and edit the Text/Multimedia message in the “Write message” menu.

Create a new text message.

1. Go to **Main Menu > Messaging > Write Message**
2. Write the message you want to send.
3. Press the left soft key (**Options**) and then select **Advanced** to add the required items, including **insert text template**, **Insert contact number**, **Insert contact name**, **Insert bookmark**.
4. Press the LSK (**Options**) and select **Send to** or press OK key to navigate to **Send SMS** screen.
5. Enter the recipient numbers in **Enter recipient** option or attach the recipients from the phonebook list.
6. Press OK key and then select **From Master SIM/Slave SIM** to send the SMS.

Create a new Multimedia message

1. Go to **Main Menu > Messaging > Write Message** to navigate to message editor screen..

2. Press LSK (**Options**) and then select **Switch to MMS** to make this message to be MMS.
3. Press LSK (**Options**) and then select **Add subject** to edit the subject of this MMS.
4. Press the LSK (**Options**) and select the items you want to send, including images (**Add picture**), audios (**Add audio**), video clips(**Add videos**) and files in other formats (**Add attachment**), also organize slide(**Add slide before/after**) and so on.
5. Press the LSK (**Options**) and select **Send to** or press OK key to navigate to **Send MMS** screen.
6. Enter the recipient numbers in **Enter recipient** option or attach the recipients from the phonebook list.
7. Press LSK (Options) and select **Changes to Cc/Bcc**, edit the MMS to be carbon copied or blind carbon copied to.
8. Press OK key and then select **From Master SIM/Slave**

SIM to send the MMS.

2. Inbox

Incoming short/multimedia messages are saved in inbox.

View	Read the message content.
Reply	Reply the short/multimedia message.
Call back	Make a call to the sender.
Forward	Forward this short/multimedia message to others.
Delete	Delete the short message.
Delete all	Delete all the messages stored in inbox.
Save to phonebook	Save the sender number as a contact in the phonebook.

Move to Archive	Move the selected messages to Archive folder.
Filter by	Only show Master SIM or Slave SIM message in inbox, show all the messages of master and slave SIM if select All messages option.

You cannot receive new messages if the message memory is full. Delete unnecessary messages.

3. Drafts

You can save a short/multimedia message as draft while creating it. When you press End/Back key in editing screen, it will save the message in Drafts automatically.

4. Outbox

Short/multimedia messages failed to be sent are saved here.

5. Sent Message

Short/multimedia messages that have been send successfully are saved here.

6. Archive

The short/multimedia messages can be copied from Inbox, Sent message, Drafts and Outbox and saved here.

7. Delete Message

Delete the selected message folder or all the messages folders.

8. Broadcast Message

Broadcast messages are messages that your network operator broadcasts to all users within a particular area, such as weather forecast and transportation conditions.

Receive Mode	Enable or disable the function.
---------------------	---------------------------------

Read Message	Scroll to read broadcast messages.
Languages	Set languages for cell broadcast information. Only information in the set language can be received.
Channel Settings	Select the channel of cell broadcast.

9. Templates

There are 10 common short phrases stored in the phone. You can edit or delete the common phrases. After deleting, the phrase will display empty.

There are five preset multimedia messages. You can view and make new multimedia messages from the sample available in your phone.

10. Schedule SMS

The phone will automatically send the SMS at the time

predefined by you.

11. Message Settings

Set the following settings for short messages.

Profile Settings	Set profile name, SC address, validity period and message type.
Voicemail server	Please see the explanation below this table.
Common Settings	Enable or disable the delivery report and reply path of short messages.
Memory Status	View the memory usage ratio of the SIM card and phone for short messages.
Preferred Storage	Set to save short messages to the SIM card or to the phone. By default messages are saved in the phone memory.

Voice Mail Server

Dial the voice mail number to access your voice mail. The number is provided by your network operator.

Call Mail	Voice	Connect to the current voice mailbox number.
Edit		Add or change the voice mailbox number.

Note: The voice mail function requires network support.

Set the settings of multimedia messages.

Set the network settings included by the service operator in **Profiles**.

Compose	Set how a multimedia message is composed, including creation mode, picture resizing, Best slide duration, auto signature and Signature.
----------------	---

Sending	Set the validity period, delivery report, read report, priority, slide timing, delivery time and whether to save the send MMS for sending multimedia messages.
Retrieval	Set home network, roaming, read report and delivery report for receiving multimedia messages.
Preferred storage	Select the storage location for saving the MMS in the phone or on the memory card.
Memory Status	View the memory usage ratio, used space and free space for multimedia messages.

6.3 Call Center

6.3.1 Call History

In idle screen, press the Master SIM key to directly access the call history.

1. Master card Call History

In idle screen, press the Master SIM key or go to **Call center > Call history > Master SIM call history > Master SIM missed calls, Master SIM dialed calls and Master SIM received calls.**

Select a call from the list. When the call is displayed, press the send key to make a call from the master SIM card or the slave SIM card. You can press the OK key to view the details of the call. Select **Options** for more options.

View	View the call log information.
Call	Dial the selected number.
Send message	Send text/multimedia message to the record.
Save to phonebook	Save the selected number to the master SIM card, the slave SIM card or the phone.

Add to Blacklist	Add the contact as a black list member.
Edit before call	View and edit the number information before making a call to it.
Delete	Delete the selected number from the list.

Delete Master SIM Call Logs: Delete missed calls, dialed calls or received calls, or delete all call logs.

Master SIM call timers: View **Last call time**, **Total dialed calls** and **Total received calls**, or **Reset all time** of the slave SIM card.

Master SIM call cost: View **Last call cost** and **Total cost** of the master SIM card. You can also reset cost and set the maximum cost and the price per unit of the master SIM card. It requires network support.

Master SIM text message counter: View and reset the numbers of short messages sent and received on the master SIM card.

7. Appendix I Troubleshooting

Available accessories with phone are 1 Battery (1000mAH), 1 Dual Stereo Headset with call connect/disconnect button & 1 Travel Charger,

This device has been tested and found to comply with Part 15 of the FCC rules. Performance is subject to the following conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.
- Changes or modifications not expressly approved by the manufacturer or authorized service center could void the user's authority to operate this equipment.
- If you encounter problems while using the phone, or if it performs erratically, you can consult the information in the following table. If a particular

problem cannot be resolved by using the following information, contact the dealer where you purchased the phone.

Problem	Possible causes	Possible solution
Poor reception	The network signal is too weak at your current location, for example, in a basement or near a tall building, because wireless transmissions cannot effectively reach there.	Move to a location where the network signal can be properly received.

	<p>The network is busy at the current time, for example, during peak times, because there may be too much network traffic to handle additional calls.</p>	<p>Avoid using the phone at such time, or try again after waiting for a while.</p>
	<p>You are too far away from a base station of your service provider.</p>	<p>You can request a service area map from your service provider.</p>
<p>Echo or noise</p>	<p>Poor network trunk quality on the part of your service provider.</p>	<p>Press the ending key and dial again. You may switch to a better-quality network trunk or phone line.</p>

	Poor local telephone line quality	Press the ending key and dial again. You may switch to a better-quality network trunk or phone line.
Battery will not charge.	The battery or battery charger is damaged.	Contact the dealer.
	The temperature of the phone is below -10°C or higher than 55°C .	Adjust the battery charging environment to avoid extremes of temperature.

	Poor contact between the battery and charger.	Check all connectors to make sure all connections have been properly made.
Shortened standby time	The standby time is related to your service provider system configuration. The same phone used with different service providers' systems will not provide exactly the same length of standby time.	If you are located in an area where signals are weak, temporarily switch off the phone.

	<p>The battery is depleted. In high temperature environments, battery life will be shorter.</p>	<p>Use a new battery.</p>
	<p>If you are not able to connect to the network, the phone will continue to send out signals as it attempts to locate a base station. Doing so consumes battery power and will consequently shorten standby time.</p>	<p>Change your location to one where the network is accessible, or temporarily turn off your phone.</p>

You cannot switch your phone on.	Battery power has been depleted.	Recharge the battery.
SIM card error	SIM card malfunction or damage	Take the SIM card to your service provider for testing.
	SIM card is inserted improperly.	Insert the SIM card properly.
	Debris on the SIM card contacts	Use a soft and dry cloth to clean the SIM card contacts.
Unable to connect to	SIM card invalid.	Contact your service provider.

the network.	You are not within the service area of the network.	Check the service area with your service provider.
	Poor signal.	Move to an open space, or if you are inside a building, move closer to a window.
You cannot answer incoming calls.	You have activated the call barring feature.	Go to Settings > General call settings > Master SIM card /slave SIM card call settings > Call Barring/Line Switching , and then select Cancel All/Line1 .

<p>You cannot make outgoing calls.</p>	<p>You have activated the call barring feature.</p>	<p>Go to Settings > General call settings > Master SIM card/slave SIM card call settings > Call barring/Caller ID, and then select Cancel all/Set By network.</p>
	<p>You have activated the fixed dial number feature.</p>	<p>Go to Settings > Security Settings > Master SIM card/slave SIM card security Settings > Fixed dial, and select Off to disable this feature.</p>

<p>PIN Code is blocked.</p>	<p>You have entered an incorrect PIN code three times in a row.</p>	<p>Contact your service provider. If the service provider provides the PUK code of the SIM card, use the PUK code to unlock the SIM card.</p>
<p>Unable to enter information into the phone book.</p>	<p>The memory of the phone book is already full.</p>	<p>Delete unnecessary data from the phone book.</p>

Unable to select certain features.	Your service provider does not support these features, or you have not applied for services that provide these features.	Contact your service provider.
------------------------------------	--	--------------------------------

8. Appendix II Abbreviations and Explanation

GSM	Global System of Mobile Communication
GPRS	General Packet Radio Service
SMS	Short Message Service
WAP	Wireless Application Protocol
FDN	Fixed Dialing Numbers
SIM	Subscriber Identity Module
PIN	Personal Identification Number
