## SAFEGUARDS & SAFETY

---

### IMPORTANT SAFEGUARDS

When using electrical appliances, in order to reduce the risk of fire, electric shock, and/or injury to persons, basic safety precautions should always be followed.

#### FOR YOUR SAFETY

Read all instructions carefully even if you feel you are quite familiar with the appliance.

- This appliance is not intended for use by young children or infirm persons without supervision.
- Young children should be supervised to ensure that they do not play with the appliance.
- This appliance should be placed on a flat, stable surface before it is operated.
- Total darkness or a reflection on the picture tube can cause eyestrain. Soft and indirect lighting is recommended for comfortable viewing.
- INDOOR USE ONLY - this appliance is not intended for outdoor use.
- Do not expose this appliance to rain or moisture. Do not immerse.
- Do not place items filled with liquids, such as vases, on the appliance. Do not expose appliance to dripping or splashing liquids.
- Do not place naked flame sources, such as candles, on the appliance.
- Do not locate the appliance near heat sources such as radiators, heaters, air ducts or direct sunlight.
- Do not block any of the ventilation openings. Ensure that vents are not covered by newspapers, tablecloths, curtains, etc. Do not install in a tight fitting cabinet.
- Do not insert or allow foreign objects to enter any grille openings.
- This appliance is not intended for use in bathrooms, laundry areas or similar moist locations. Never locate this appliance in the immediate surroundings of, or where it may fall into, a bath, basin, washtub, shower or swimming pool.
- Do not run the power cord under carpeting. Arrange the supply cord away from traffic areas and where it will not become a trip hazard.
- To disconnect the appliance, turn appliance off, switch off power outlet and remove plug from power outlet.
- Do not abuse supply cord. Never carry the appliance by the supply cord. Never yank the supply cord from the power outlet; instead, grasp the plug and pull to disconnect. Keep supply cord away from heated surfaces.
- Do not operate the appliance with a damaged supply cord or plug or after the appliance malfunctions, has been dropped or damaged in any way. Consult an authorised service facility or similarly qualified person for examination.
- When cleaning the picture tube face, turn off television and remove plug from power outlet. Using a dry cloth, wipe the television ensuring that no dust or lint enters any vents.
- This product has not been designed for any other uses other than those specified in this booklet. This product is intended for household use only.
- All television receivers are high voltage instruments. Your PICTURE TUBE is highly evacuated. If broken, glass fragments will be violently expelled. Scratching, chipping, or putting undue pressure on the tube is dangerous and should be avoided. During thunder and lightning, unplug the power cord and antenna cord to prevent your TV set from damage. All 'inside work' on your receiver should be performed by an authorised repair agent.
- The television(or this product) shouldn't suffer the drop of water or water to splash.
- The television(or this product) shouldn't place or a type of product that fills up liquid such as the vase.
- The power supply plug of the television(or this product) be of the power supply/bresk device, should be putting to pull out easily of place usage.
- Batteries(battery pack or batteries installed) shall not be exposed to excessive heat such as sunshine, fire or the like.

## PRODUCT FEATURES

---

### INSTALLATION

Locate the receiver in the room where direct light does not strike the screen.

Total darkness or a reflection on the picture screen can cause eyestrain.

Soft and indirect lighting is recommended for comfortable viewing.

Allow enough space between the receiver and the wall to permit proper ventilation.

Avoid excessively warm locations to prevent possible damage to the cabinet, or premature component failure.

This TV receiver can be connected to AC supply, never connect to DC supply or any other power supply.

Do not install the receiver in a location near heat sources such as radiator, air ducts, direct sunlight or in a closed area.

### COMPULSORY WARNING

If the supply cord is damaged it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.

### CAUTION

- DO NOT OPEN - DO NOT ATTEMPT TO REPAIR, DISASSEMBLE OR MODIFY THIS APPLIANCE.
- DANGEROUS HIGH VOLTAGES EXIST INSIDE THIS APPLIANCE.
- THIS APPLIANCE IS ONLY TO BE SERVICED BY A QUALIFIED PERSON.
- NO USER - SERVICEABLE PARTS INSIDE.

### **WARNING:**

***Some of TV are designed by unilateral power switch, beware of shock when repairing it.***

## LOCATIONS OF CONTROL PANEL

## CONNECTIONS

### INSTALLATION OF ANTENNA

Connect the 75 OHM coaxial cable from the antenna to the antenna jack on the rear panel, as shown above.

**Note:**

- For better reception, especially in outlying area or where ghost or interference happens, an external roof-mounted antenna is recommended.
- For UHF TV reception, use the specified UHF antenna. Consult the local sale dealer.
- When using 300 OHM flat cable, a 300 OHM - 75 OHM adaptor should be adopted for a proper connection to the antenna jack.

### POWER CONNECTION

- Plug the AC cord into an AC outlet.
- Press the Power button to turn on, press the Power button again to shut off.

**Note:**

- This unit should be operated from a household AC supply.
- When you disconnect the power supply cord, pull it out by the plug. Never pull the cord itself.

**CAUTIONS:**

During a power outage, the TV should be unplugged from the AC outlet. To conserve energy the TV should be unplugged from the AC outlet if not being used for a prolonged period of time.

## CONNECTIONS

## TROUBLE SHOOTING GUIDE

Many apparent malfunctions are caused slight misadjustments of the regular controls of your unit or equally simple causes. If any difficulty arises through normal use of your unit, check the list of common problems in the list below.

If the problem persists, unplug your unit and contact your dealer.

SYMPTOM	METHODS OF CHECKING OR ADJUSTING
No picture or sound	Check the AC plug is in the socket. Check house circuit breaker is in the ON position.
Picture normal but no sound	Check that the volume is not at its minimum setting or on MUTE.
Remote control not working	Check that TV set power switch is ON.  Check batteries are operational and inserted correctly.  Make sure infrared receiving window on TV is not exposed to strong lighting or blocked in any way.
Cannot receive any TV signal	Ensure TV/AV switch is set to TV. Check aerial location and connection. Re-check your tuning method.
No program signals output from external source	Check TV/AV button to make sure it is in the correct position for reception.
Contrast and brightness problems	Make necessary adjustments to relevant settings.
Intermittent poor contrast and colour fading on all channels	Check aerial positioning
Some channels have poor reception and colour fading	Readjusting fine tuning with great care ( refer to section on: 'FINE TUNE' ).
Dotted lines or stripes appear on screen	There may be Interference from another electrical product. Move appliance if it persists.
Snow on screen	Check aerial for broken circuit, loose connection or any visible damage.
Double images or 'ghosting'	Check aerial location and direction - strong winds may cause it to move. Also check whether mountains or tall buildings may be the problem. Minor adjustment of the direction of your antenna should keep the ghosting to a minimum.

**Note:** External rooftop/antenna adjustment should be left to a suitably qualified person.
