

## **Lighting Appendix**

## **In-pool Lighting Images**

The following images were developed using Lightscape modeling of the in-pool lighting. Realistic modeling of light in water is next to impossible due to the scattering, attenuation, caustics, etc. involved with the physics of modeling light in water. In an attempt to gather images to replicate the scene, undulating surfaces were created to represent small water waves and assigned the physics template for water within Lightscape. The following images are, therefore, obtained when attempting to replicate the lighting possible through the fiber optic system.

**Figures a-b (Above): In-Pool Lighting Only  
Figure c (At Left): View From Within the Pool**

Striations should be created on the wall due to the reflections of light in water. These striations are similar to those seen below and shall invoke a feeling of serenity for the occupants.

# SPECIFICATIONS - CYCLO 04

## PHYSICAL

L x W x H	1190 x 98 x 88 mm (50 x 4 x 3.7 in)
Weight	5.5 kg (12.1 lbs)
Shipping dimensions	1210 x 115 x 95 mm, (51 x 4.8 x 4 in)
Shipping weight	5.9 kg (13 lbs)
Fixture color	white (NCS 0402-G06-Y)

## INSTALLATION

Orientation	any
Minimum free space around fixture when installed	25 mm (1 inch)

## SOURCE

Approved lamp type	OSRAM T5 FH 28 watt tubes
Light source	T5 tubes (3x28W)
Expected lamp life	20000 hours

## POWER

AC power	115 V - 254 V, 50 / 60 Hz
Dimmer control	, 1-10V control
Maximum power and current @ 254 V / 60 Hz	0.56 A / 128 watts

## THERMAL

Maximum ambient temperature (Ta)	40° C (104° F)
----------------------------------	----------------

## DYNAMIC EFFECTS

Dimmable tubes	Red, green, blue and white
Independent dimming of each tube via 516 Converter	

## CONTROL (VIA 516 CONVERTER)

Number of independently controllable dimming channels	16
Channels required per independently controlled Cyclo 02 group	2
Channels required per independently controlled Cyclo 03 group	3
Channels required per independently controlled Cyclo 04 group	4
Number of Cyclos per group (fixtures wired in series)	1-10 (of the same model)

## ORDERING INFORMATION

Cyclo 04	P/N 90550000
----------	--------------

## INCLUDED ITEMS

Lamp	OSRAM T5 FH28W/60 (red)
Lamp	OSRAM T5 FH 28W/66 (green)
Lamp	OSRAM T5 FH28W/67 (blue)
Lamp	OSRAM T5 FH28W/840 (white)
User manual	

# INTRODUCTION

Thank you for selecting the Martin Cyclo. The Cyclo Series is a range of controllable, fluorescent color changers. These fixtures are designed to be used for cove lighting, perimeter lighting, light walls, behind semi-transparent materials, or any place where room is restricted.

Cyclo is a family of fixtures based on dimmable fluorescent T5 tubes. The T5 tubes have achieved widespread popularity due to their sleek design and high efficacy combined with their long lamp life.

In order to be DMX controlled, the Cyclo fixtures require the Martin 516 DMX to 0-10 V Converter. The 516 Converter converts DMX to 0-10 V analog output. Additional Cyclos can be daisy-chained for synchronous dimming. A single 516 Controller can control 4-8 Cyclo groups individually, each group consisting of one to ten of the same Cyclo model wired in series (the number of groups depends on the model of Cyclo that is installed). The member fixtures in each group will react similarly when controlled.

Cyclo control and power-cables are through-wired for easy installation.

The Cyclo series offers:

- Controllable RGB color-mixing and/or color temperature
- Bright output
- Long lamp life of 20,000 hours

**Note:** *It is important to read this manual through before you attempt to install this product.*

## Cyclo fixtures

### CYCLO 02

Cyclo 02 contains a single warm white tube and a single cold white tube.

It is designed as a functional lighting fixture for applications where dimmable color temperature control ranging from 2700K up to 6000K are desirable.

### CYCLO 03

Cyclo 03 contains dimmable red, green and blue tubes and is a cost efficient RGB solution.

# FLUORESCENT TUBES

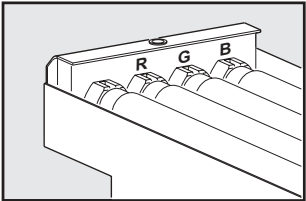

---

## Burning in new tubes

In order to obtain the full 20000 hour life time, new fluorescent tubes must be burned in for 100 hundred hours at full power (10 volts).

## Identifying tube positions

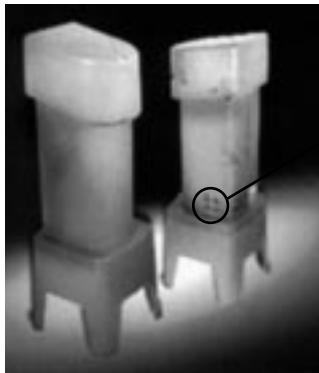

Tube positions are identified in the Cyclo 03 and Cyclo 04 as follows:

Marking in fixture	Marking on tube	Color	Reference illustration
R	OSRAM 28/60	Red	
G	OSRAM 28/66	Green	
B	OSRAM 28/67	Blue	
None	OSRAM 28/827	2700K white	
	OSRAM 28/840	4000K white	
	OSRAM 28/860	6000K white	

## CLEANING

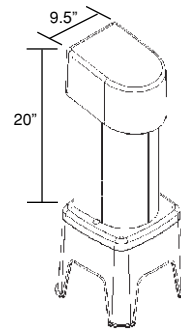

---

We recommend that you clean the dust cover with a damp cloth.

## NEW!

**External Control for Color Wheel Tempo**  
There is now a dial on the outside of the light source that easily allows the builder or homeowner to increase or decrease the amount of time spent on each color. Screwdriver included.

**SV150T Tower Illuminator**  
150 Watt Metal Halide lamp,  
10,000 hour average lamp life,  
550 strand fiber capacity  
(upgradable to 756),  
white light or 6-color,  
mounting base included.  
5 year limited warranty.

## REMOTE CONTROL

**Remote Kit**  
Part No.: SVRFLCK\*  
Description: remote control for SV150T - order separately

## REPLACEMENT LAMP

**Replacement lamp**  
Part No.: 40-GA

## FIBERHEAD UPGRADE

**756 Fiberhead Upgrade Kit**  
Part No.: SVFH756KIT

Model Number	Description	Ctn. Qty.	Ctn. Weight	List Price
--------------	-------------	-----------	-------------	------------

## Standard Units

SV150T1	White Light Only - remote control optional			
SV150T6	6-Color: Moonlight white, hot pink, tangerine dream, lime green, ocean deep blue, indigo blue			

## Synchronous Units for use with Multi-Illuminator Systems

SV150T6C	6-Color: Moonlight white, hot pink, tangerine dream, lime green, ocean deep blue, indigo blue *Important! When adding wireless remote to a synchronous system, one receiver (svRFR) must be installed in each tower)			
----------	---	--	--	--

Note: 17.0609 Data cable must be installed between light sources.

## Synchronization Component

17.0609	Data Cable - 3 wire per foot	1		
---------	------------------------------	---	--	--

## Replacement Lamp

40-GA	Replacement Lamp for 150 watt Metal Halide Light Source	1	1/3 lb.	
-------	---	---	---------	--

## Wireless Remote Control - Optional. May be added to ANY tower style light source.

SVRFLCK	Wireless remote control kit	1	.6 lbs.	
SVRFT	Transmitter only	1	.4 lbs.	
SVRFR	Receiver only	1	.4 lbs.	

## Upgrade Kit - Optional.

SVFH756KIT	Kit increases light source capacity to 756 strands	1		
------------	--	---	--	--

## Features:

### Standard Units

- 550 strand capacity, upgradable to 756 strands.
- Mounting pedestal base included for clean installation.
- Easy lamp replacement.
- Taupe color blends easily with the environment.
- On/off, start/stop switches on all units.
- Hard wire ready for external remote systems.
- Quick disconnects allow Wireless Remote Control to be added easily.
- Limited lifetime warranty on lamp.

### Synchronous Units

- Control amount of time spent on each color.
- Slow, smooth transition from one color to the next.
- Color Tempo dial located on outside of light source.
- One unit can be either a master or a slave unit when synchronization is desired.
- May be used as a stand alone unit in single light source installation.

## Features of Wireless

### Remote Control

- Can be added to any metal halide light source.
- Quick disconnects provide easy installation.

## SPECIFICATIONS

### UL Listed for Wet Locations

#### Electrical Rating:

- 120 VAC, 60 Hz / 3 Amps (start up)
- 120 VAC, 60 Hz / 1.8 Amps (running)
- 220-240 VAC, 50 Hz / 3.0 Amps (start up)
- 220-240 VAC, 60 Hz / 1.2 Amps (running)

#### Lamp:

- 150 watt metal halide - 4000K
- 10,000 hours average life

#### Fiber Capacity:

- 550 fibers maximum - PAF30
- 756 fibers max. upgrade

#### Power Consumption:

- 200 watts max.

#### Storage Temperature:

- -40°F to 140°F
- -40°C to 60°C

#### Ambient Operating Temperature:

- -20°F to 110°F
- -29°C to 44°C

#### Motors:

- 1RPM motor

#### Dimensions:

- 9.5 x 9.5 x 20"
- 241mm x 241mm x 508mm

#### Weight:

- 21 lbs.
- 9.5 kg.

#### Material/Finish:

- UV stabilized materials
- Water, corrosion and chemical resistant

#### Mounting / Installation:

- Surface or burial mount

#### Ventilation:

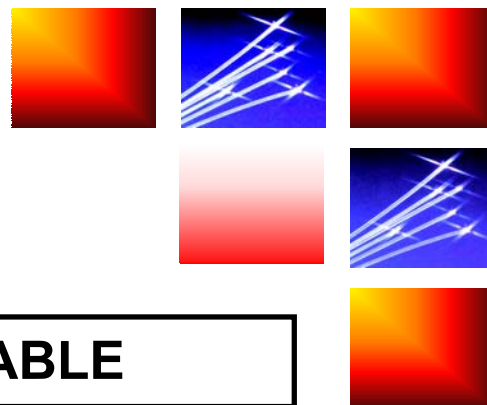

- Forced ventilation 115 CFM, FAN: 20 Watts, 80,000 life hours. 6" clearance required to nearest surface. 2' clearance between each illuminator.

#### Warranty:

- 1 Year (excluding lamp)

# Poly Optics Australia

Leaders in Fibre Optic Lighting ...

## END LIGHT FIBRE OPTIC CABLE

Poly Optics is the leading manufacturer of solid core plastic fibre optic cable for lighting.

Our fibre is rugged, non-conductive, water resistant and flexible.

The fibre is able to transmit light along its length with minimal loss of intensity and no heat transfer.

End Light Fibre is designed to be illuminated with halogen or metal halide light sources.

### **FOR USE IN A RANGE OF APPLICATIONS:**

- Safety Lighting
- Decorative Lighting
- Inspection Lighting
- Non-Conductive Lighting for Electricity-Free Areas
- Alternative Lighting

Original Polycarbonate Lens

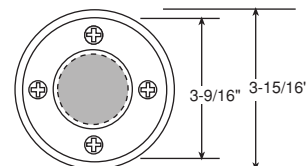

Flat Glass Lens - Flood  
Multiple Lens application

Convex Glass Lens - Spot  
Single lens for pools

Vinyl Lens

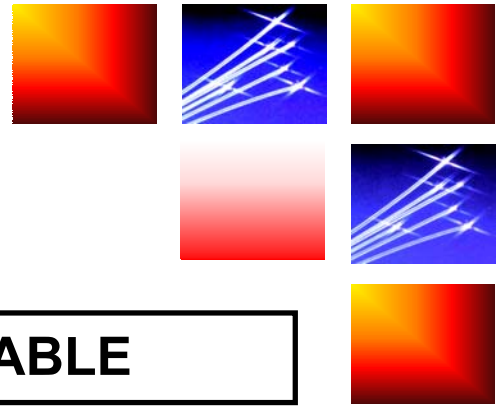

## Features of glass Lenses

- Provides up to 30% more light transmission
- Flat glass "flood" lens and convex "spot" lens accommodate a variety of applications
- Sealed lens prevents water in the conduit, eliminating problems such as clouding, algae growth, etc.
- 300 strand capacity

# COVELIGHT 26

## FCV 26

Low-profile cove mounted  
2" x 6" luminaire with indirect  
asymmetric distribution.

1 Lamp T8

1 Lamp T5 Et T5HO

2 Lamp T5 Et T5HO

## Features

### Construction

One piece housing of die-formed 22 Ga. C.R.S. forming 2"H x 6"W rectangular profile. Socket bridge and 20 Ga. Galvanized end caps are mechanically fastened.

Weight: 4' unit—7 lbs  
8' unit—14 lbs

### Optic

Die-formed 20 Ga. steel reflector with aluminum insert, finished in high reflectance white paint (90% reflectance).

### Electrical

Luminaires are pre-wired with factory installed branch circuit wiring with over-molded quick connects. All ballasts are thermally protected and have a Class "P" rating.

*Consult Ballast Ordering Guide on following page for ballast specifications*

Optional DALI and other dimming ballasts available. Consult factory for specifications and availability. UL and cUL listed.

### Emergency

Emergency battery packs provide 90 minutes of one lamp illumination. Initial lumen output for lamp types are as follows:

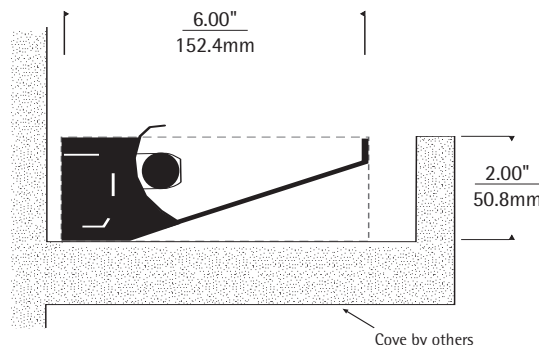

T8 Lamp: Up to 550 lumens  
T5 Lamp: Up to 550 lumens  
T5HO Lamp: Up to 825 lumens

Battery pack requires unswitched hot from same branch circuit as AC ballast.

### Finish

Luminaire housing and reflector are finished in high reflectance white paint (90% reflectance).

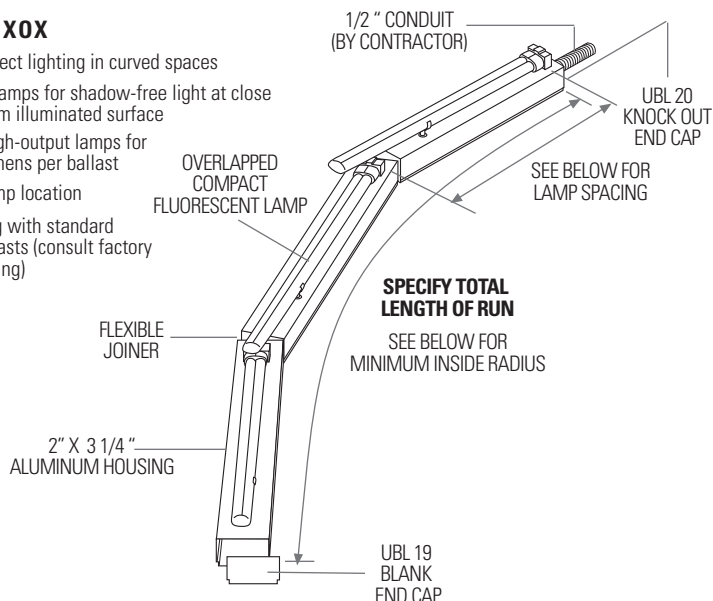

- High performance indirect luminaire designed for concealed cove applications.
- Covelight provides pleasing and even illumination that highlights architectural details.
- Continuous row installations may be configured with 2', 3', 4', 5', 6', 7' and 8' luminaires.
- Metric housing design for T5/T5HO lamps minimizes socket shadows.
- Enhanced ease of installation: simple plug connection eliminates need to access electrical components in luminaire housing.

Cove by others

### UBL 5000 BX0X

- Ideal for indirect lighting in curved spaces
- Overlapping lamps for shadow-free light at close distances from illuminated surface
- Uses long, high-output lamps for maximum lumens per ballast
- Listed for damp location
- 10% dimming with standard dimming ballasts (consult factory for 5% dimming)

### LAMP SELECTION

TYPE : COMPACT FLUORESCENT

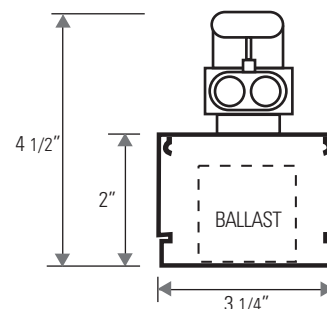

BRANDS : GE "HIGH LUMEN BIAx," PHILIPS "PL-L," OSRAM "DULUX-L"

WATTS	LENGTH	BASE	RATED HRS.	LUMENS	COLOR TEMP.	CRI
18W	10.5"	2G11	12000-20000	1160-1250	3000-6500	82
27W/24W	12.8"	2G11	12000	1800	3000-4100	82
39W/36W	16.5"	2G11	12000	2850-2900	3000-4100	82
40W/38W	22.5"	2G11	20000	2900-3300	3000-5000	82
50W	22.5"	2G11	14000	4000-4300	3000-4100	82

Refer to manufacturers' catalog for full selection and details.

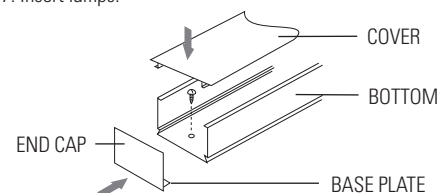

### LAMPS NOT INCLUDED

### END VIEW

### QUICK REFERENCE INSTALLATION INSTRUCTIONS

1. Remove cover piece from module, by removing screws and using flathead screwdriver to pry open.
2. Screw mount bottom piece directly onto secure surface.
3. Snap cover piece into bottom piece and replace screws.
4. To continue run, attach and mount next module and make electrical connections.
5. Attach end caps at beginning and end of run, sliding base plate into bottom piece and securing with screw.
6. Connect lead wires at beginning of run to power source and ground. Do not power until installation complete.
7. Insert lamps.

## FEATURES

### OPTICAL SYSTEM

- Reflector - Self-flanged, specular clear or semi-diffuse reflector. Fluted vertical upper section works in conjunction with Bounding Ray Optical Principle to provide lamp before lamp image and smooth transition from top of reflector to bottom. Minimum flange matches reflector finish. White painted flange optional.
- Baffle/cone - Specular clear upper reflector. Microgroove baffle with white painted flange or specular black cone with flange that matches cone finish.
- Hinged lampdoor seals upper trim for optimal fixture efficiency and the reduction of stray light in the plenum.

### MECHANICAL

- 16-gauge galvanized steel mounting/plaster frame with integral yoke to retain optical system. Maximum 1-1/2" ceiling thickness.
- Mounting bars are 16-gauge galvanized steel with continuous 4" vertical adjustment, held in place with tool-less, integral cam-action locking system. Post installation adjustment possible without the use of tools from above or below the ceiling. Shipped pre-installed.
- Galvanized steel junction box with bottom-hinged access covers and spring latches. Two combination 1/2"-3/4" and three 1/2" knockouts for straight-through conduit runs. Capacity: 8 (4 in, 4 out) No. 12 AWG conductors, rated for 90°C.

### ELECTRICAL SYSTEM

- Horizontally-mounted, four-pin, positive-latch, thermoplastic socket.
- Class P, thermally-protected high power factor electronic ballast mounted to the junction box (CP and EL ballast mounted on ballast tray).

### LISTING

- Fixtures are UL listed for thru-branch wiring, recessed mounting and damp locations. Listed and labeled to comply with Canadian Standards (see Options).

## Features

- Reflector:** 16 ga. Alzak® aluminum, 55° visual cutoff to lamp and lamp image, wide distribution. Iridescence Free finish. Self-flanged or flangeless with molded white trim ring (field paintable).
- Socket Cup:** Die-cast aluminum cup effectively dissipates heat and positions lamp holder. Snaps onto reflector neck to assure consistently correct optical alignment without tools.
- Mounting Frame:** Die-cast aluminum for dry or plaster ceilings.
- Retaining Springs:** Precision-tooled steel friction springs secure reflector to mounting frame for quick, tool-less installation.
- Mounting Brackets:** 16 ga. steel. Adjust from inside of fixture. Use 3/4" or 1 1/2" lathing channel, 1/2" EMT, or optional mounting bars.
- Ballast/J-Box:** Outboard mounted to reduce heat transfer and maintain lamp efficacy and life. Service from below without tools.

## Electrical

**Note:** For ballast electrical data and latest lamp/ballast compatibility refer to "Ballast" specification sheet for complete electrical data.

**7132BU, 7132BCU, 7142BU, 7142BCU:** UL listed for through branch circuit wiring with max of (8) No. 12 AWG, 90°C supply conductors.

## 6" SEMI RECESSED DOWNLIGHT

### SPECIFICATION INFORMATION

#### HOUSING ASSEMBLY

Mounting Frame and J-box are galvanized, pre-coated steel. Telescopic bar hangers are supplied and provide for off center mounting. Socket has twist lock mechanism for re-lamping with a pole. Can is spun aluminum with self flange trim, finish is matte white powder coat. Fixture is prewired with ground wire included.

#### GLASS

The glass is hand blown and available in four colors, glass color must be specified.

- I** - indigo
- M** - marine
- O** - opal
- T** - tangerine

#### BALLAST

Electronic ballasts use 4 pin lamps and provide rapid start .99 power factor with THD<10%. Standard ballast operates 26, 32 or 42W lamps. Outboard mounting provides quiet cool operation. Dimming ballast controls lumen output down to ±5% . All require compatible dimmers.

#### ELECTRICAL

Allows 4-in / 4-out #12 AWG conductors rated at minimum 90° C. For use in damp locations. J-box and ballast are accessible through fixture. U.L. Listed for use in damp locations.

#### ACCESSORIES

**CHANGER** for re-lamp pole

## FEATURES

### OPTICAL SYSTEM

- Semi-specular clear anodized aluminum upper reflector.
- Available with tempered prismatic lens (T73), flat fresnel lens (FFL), concave Holophane lens (CHL), polycarbonate clear lens (PCL), prismatic polycarbonate lens (PPC), acrylic prismatic lens (A!@), acrylic clear lens (CAL) or flat opal (acrylic) lens (FOL).

### DOOR

- Regressed white splay or stepped matte black baffle lens door frame.
- Self-aligning butterfly door support springs.

### MECHANICAL SYSTEM

- 16-gauge galvanized steel mounting/plaster frame accommodates up to 1-1/4" thick ceiling standard.
- Mounting bars are 16-gauge galvanized steel with continuous 4" vertical adjustment, held in place with tool-less, integral cam-action locking. Post installation adjustment possible without the use of tools from above or below the ceiling. Shipped pre-installed.
- Galvanized steel junction box with bottom-hinged access covers and spring latches. Two combination 1/2"-3/4" knockouts and three 1/2" knockouts for straight-through conduit runs. Capacity: 8 (4 in, 4 out) No. 12 AWG conductors rated for 90°C.

### ELECTRICAL SYSTEM

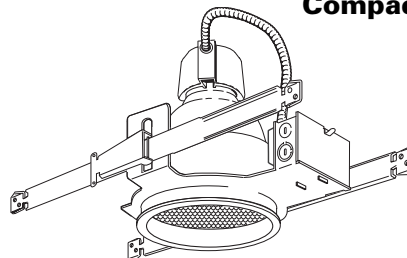

- Die-cast aluminum socket housing. Ventilated top for effective heat dissipation.
- Vertically-mounted, positive latch thermoplastic sockets.
- Class P, thermally-protected, high power factor ballasts mounted to the junction box.

### LISTING

- Fixtures are UL listed for thru-branch wiring, recessed mounting and wet locations. Listed and labeled to comply with Canadian Standards.

## ORDERING INFORMATION

Choose the boldface catalog nomenclature that best suits your needs and write it on the appropriate line. Order accessories as separate catalog numbers (shipped separately).

Example: LGFV26TRT7RWT73120

### LGFV

Series	Wattage/lamp <sup>1</sup>	Door frame	Shielding	Voltage	Options
<b>LGFV</b>	26TRT One 26W tri-tube <b>32TRT One 32W tri-tube</b> 42TRT One 42W tri-tube	7RW Regressed white door  7SB Stepped black baffle  <b>7FW Flush white door</b>	T73 Prismatic lens CHL <sup>2</sup> Concave Holophane lens  <b>FFL Flat fresnel lens</b>	<b>120</b> 277 347	LP With 30K lamp (shipped separately). SSC Provides compatibility with Lithonia Reloc System 820. System 820 can be installed less this option with connectors provided by others. GMF Single slow-blow fuse. RIF Radio interference filter. DMHL Lutron Hi-lume <sup>3</sup> electronic dimming ballast, 120V or 277V, 32W only. ELR Emergency battery pack. Remote test switch provided. (Consult factory for dimensional changes.) TPS Tamperproof. (Includes two tamperproof screws. Not available with flush white door frame.) CSA Listed and labeled to comply with Canadian Standards.

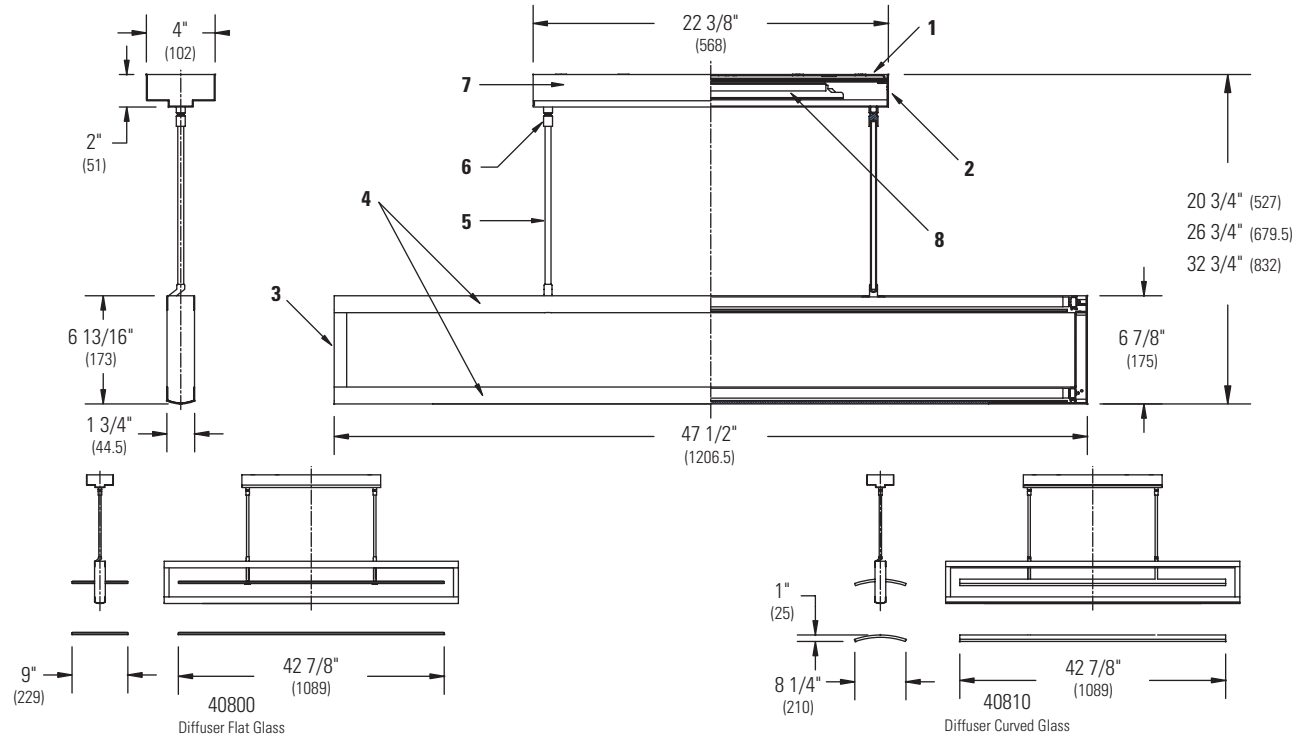

### Accessories

Order as separate catalog number.

SC7 Sloped ceiling adaptor. Degree of slope must be specified (10D, 15D, 20D, 25D, 30D). Ex: SC7 10D.

### Notes:

- Operates Philips PL-T or Osram Dulux T/E type lamp.
- Not available with 42TRT.
- Hi-lume is a registered trademark of Lutron Electronics.

Note: Luminaire can be ordered with or without diffuser shield. Order each separately.

( ) Denotes dimensions in mm

## Fixture Ordering Information

Catalog No.	Finish	Wattage	Voltage	Lamping
48228ALU	Metallic Aluminum Powder Coated	2 x 28W	120/277V	T-5, Mini-Bipin
48254ALU	Metallic Aluminum Powder Coated	2 x 54W	120/277V	T-5 HO, Mini-Bipin High Output

## Diffuser Ordering Information (Order diffuser separately)

Catalog No.	Description	Dimensions	Finish
40800	Flat Glass Diffuser (3/8\" Thick)	9\" W x 42 7/8\" L	White ceramic coated top, etched bottom. Clear polished edges.
40810	Curved Glass Diffuser (3/8\" Thick)	8 1/4\" W x 42 7/8\" L	Etched top and bottom. Clear polished edges.

## Features

- Mounting Plate:** 18 GA. (.048) Galvanized steel for direct mounting to most junction boxes. Secondary mounting holes provided to mount directly to ceiling.
- End Cap:** (2) Die cast aluminum. See above for finish.
- End Cover:** (2) Die cast aluminum. See above for finish.
- Lamp Enclosure:** (2) Extruded aluminum. See above for finish.
- Support Stem:** (2) 3/8\" diameter steel tubing. Luminaire provided with three lengths (10\", 16\" and 22\"). See above for overall heights. Stems can not be added together.
- Swivel:** (2) Meets California Earthquake codes.
- Housing:** Extruded aluminum. See above for finish.
- Ballast:** See below for details.

Lamp Length	Length (center to center of hubs)
1 x 2'	25-1/4" (640mm)
1 x 3'	37" (940mm)
1 x 4'	48-3/4" (1240mm)
1 x 5'	60-5/8" (1540mm)
2 x 3'	72" (1830mm)
2 x 4'	96" (2440mm)

Specifications

<b>A</b> UV and impact resistant acrylic snap-on lens with silicone gasket	<b>D</b> Aluminum hubs with silicone o-ring gaskets (ordered separately)
<b>B</b> Die-cast aluminum end plates	<b>E</b> Integral electronic ballast / internal wireway
<b>C</b> Extruded aluminum visor with stamped end plates	<b>F</b> 1/2" rigid conduit supports (by others)
<b>G</b> Specular extruded aluminum reflector	<b>K</b> Tubular steel arm or stem
<b>H</b> Surface or pendant hangers with hubs (ordered separately)	<b>L</b> Aluminum mounting plate
<b>J</b> Aluminum cover (conceals fasteners)	<b>M</b> Access with gasketed cover (electrical feed)
<b>O</b> 1/2" fittings (by others)	<b>N</b> Recessed outlet box

Finish:

Exterior surfaces - 6 stage pretreatment and electrostatically applied thermoset polyester powder coating for a durable abrasion, fade and corrosion resistant finish. Choice of semi-gloss colors (see ordering information).  
Reflector - extruded high purity aluminum with clear anodized specular finish. All hardware and components - non corrosive stainless steel or aluminum.  
Snap-on lens - composite of impact resistant and UV stabilized acrylic. Silicone gasket for watertight operation.

Mounting:

1-1/2" dia. x 1-1/2" aluminum hubs with 1/2" NPT threaded entry. Reflector aiming is adjustable - locks with set screws. Specify with hubs only for use with 1/2" rigid conduit or fittings supplied by others, or specify accessory surface or pendant hangers (ordered separately). Hangers include aluminum mounting plate, cover and hub with 7/8" O.D. steel arm/stem (1/4-20 fasteners by others). Suitable backing structure required - allow 3 lbs/ft (21.6kg/m) (8' unit = 24 lbs). Specify end kit or intermediate hubs/hangers.

Electrical:

Use 90°C wire for supply connections and through wire. Electrical feed hanger (optional) mounts over recessed outlet box (by others) with gasketed access cover. Internal wireway allows supply wiring to be fed through mounting hub to adjacent units. Locate electrical feed at end of row.  
Integral electronic HPF thermally protected class P ballast rated for 0°F/-18°C starting.  
For complete ballast specifications, see Accessories Section.  
**Standard:** UL listed or CSA certified for wet locations when mounted horizontally. For positions other than horizontal, consult factory.

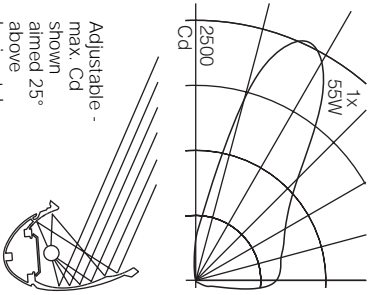

Features

- Reflector optimized for T5 - uplight canopies, vaults, soffits with unequated uniformity from minimal setbacks
- Secure snap-on UV resistant acrylic lens - easy to relamp
- Extruded visor provides shielding - concealed drainage
- Polyester powder coat - exceeds 1000 hour salt spray test
- Integral electronic ballast - internal wireway for thru wiring

Performance

Two parabolic reflector sections drive light across the overhead plane from one edge. An elliptical section redirects its light to a parabola and shields the lamp. Asymmetry is maximized resulting in high beam efficiency and superior surface uniformity. The fast "unback" minimizes wasted spill light.

Adjustable - max. Cd shown aimed 25° above horizontal.

Note: Lamp light output may be diminished when operated in low ambient temperatures.

For complete photometrics, visit [www.elliptipar.com](http://www.elliptipar.com)

2 Style

164 = Medium outdoor, integral ballast

3 Lamp

T = T5 Fluorescent Lamp Code

Lamp Wattage (see chart below)

Number of Lamps in Length, specify 1 or 2

Example: T155 = Nominal 4' (1.2m) housing with one 55W T5HO lamp

Lamp Length (nominal)	T5 Code	Lamp(s)	T5HO Code	Lamp(s)
--------------------------	------------	---------	--------------	---------

For complete lamp and ballast information, see Accessories Section. Standard T5 lamp color is 3000K / 80+ CRI.

4 Mounting

H = For use with mounting hubs (1/2" rigid conduit support or fittings supplied by others), or

For use with accessory surface or pendant hangers.

Note: Order either hubs only or hubs with hangers separately. For reflector positions other than horizontal, consult factory.

Project:

5 Finish

02 = Semi-gloss white  
06 = Dark bronze  
07 = Silver  
08 = Semi-gloss black  
12 = Green  
99 = Custom RAL or computer matched color to be specified, consult sales representative.

6 Voltage/Ballast

Electronic  
1 = 120V  
2 = 277V  
3 = 347V

\* Dimmable ballasts available for F55T5/HO only. Consult sales representative.

7 Option

V0 = Cutoff visor included, no other option  
00 = Cutoff visor NOT included, no other options (Suggested when architectural cove or other detail provides shielding of lens brightness.)  
VX = For modification not listed, include detailed description. Consult factory prior to specification.

8 Standard

0 = UL, Underwriters Laboratories  
J = CSA, Canadian Standards Association

Example

F164 - T155 - H - 08 - 1 - V00

Medium outdoor fluorescent for use with one 55W T5HO lamp in nominal 4 foot reflector. For use with mounting hubs (1/2" rigid conduit supports by others) or accessory hangers. Semi-gloss black powder coat finish. Integral 1-lamp 120V electronic ballast. Cutoff visor included. UL. (Order end kit and intermediate mounting hubs or hangers separately.)

Type:

Hubs Only (order separately)

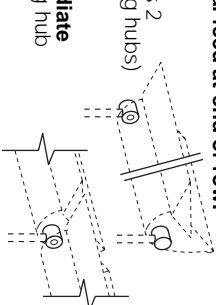

For use with 1/2" rigid conduit or fittings (supplied by others). Order one hub end kit for each individually mounted luminaire or each row. For a continuous row, order one intermediate hub for each additional luminaire in the row. Example: a row of six reflectors requires 1 hub end kit and 5 intermediate hubs. Note: Locate electrical feed at end of row.

HOD = End kit (includes 2 mounting hubs)

5

HOC = Intermediate mounting hub

5

Hubs with Hangers (order separately)

Order one hanger end kit for each individually mounted luminaire or each row. For a continuous row, order one intermediate hanger for each additional luminaire in the row. Example: three rows of four reflectors requires 3 end kits and 9 intermediate hangers. Note: Hubs included. End kit includes one electrical feed hanger - locate at end of row.

## FEATURES & SPECIFICATIONS

### INTENDED USE

T5 linear direct fluorescent intended for use in low-profile commercial, retail, manufacturing, warehouse, cove and display applications.

### ATTRIBUTES

Designed exclusively for use with T5 lamps, T5 sockets and T5 electronic ballasts.

### CONSTRUCTION

Housing formed from cold-rolled steel. No asbestos is used in this product. Heavy-duty 20-gauge channel.

Extended-height end caps retain and support sockets. Compact T5 socket features rotating collar and enclosed contacts.

### FINISH

High-gloss, baked white enamel finish. Five-stage iron-phosphate pretreatment ensures superior paint adhesion and rust resistance.

### OPTICAL SYSTEM

A variety of optical assemblies are available. See the MS5-Reflector or MS5-Louver spec sheets.

### ELECTRICAL SYSTEM

Thermally protected, resetting, Class P, HPF, non-PCB, UL Listed.

Suitable for damp locations. AWM, TFN or THHN wire used throughout, rated for required temperatures.

### INSTALLATION

Labor-saving coupler supplied for row mounting. Numerous knockouts for easy installation. Surface-mount or suspended.

### LISTING

UL Listed and CSA Certified (see Options).

### WARRANTY

Guaranteed for one year against mechanical defects in manufacture.

*Specifications subject to change without notice.*

# SKY

## Specification Grade Deep Regressed Lens Troffer

Available in a wide assortment of sizes

Type: \_\_\_\_\_

Job Description: \_\_\_\_\_

### Features

- Deep regressed trim without a surrounding black reveal enables the fixture to imitate a natural skylight.
- Extruded aluminum white trim presents a clean highly gloss finish.
- Available in an assortment of sizes.
- Standard white opal lens produces a luminaire with a true skylight appearance.
- Available with a wide assortment of lamps.
- Optional trim finishes available to match ceiling tiles.
- Lay-in lens ensures lens security with ease of removal.
- Designed to fit NEMA type G, F and M ceilings.
- 8" deep housing ensures no lamp imaging which retains the skylight appearance.

### Housing

Fixture is constructed of die formed and embossed code gauge steel. End caps are riveted to the housing for added rigidity. Designed for installation in all ceilings as shown below. Specify exact ceiling type.

### Ballast & Electrical

All luminaires are completely wired with class "P", thermally protected, resetting, HPF, CBM, LE ballast, sound rated A. Lampholders are medium bi-pin with positive retention and edge-wipe contacts. Furnished with an access plate.

### Finish

All metal parts processed with a five-stage phosphate bonding treatment and finished with a high reflectance baked white enamel after fabrication.

### Shielding

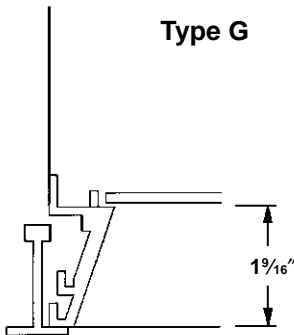

Standard lens is an acrylic, matte white opal finish. Fixtures are designed to accept any flat unframed sheet of light diffusing plastic. Lens must lay in place and is supported by the extruded trim on all four sides. Regressed trim is finished in matte white and is 1 9/16" deep. Trim is secured rigidly in place to the housing with rivets. Larger sizes of luminaires (such as 4' x 4') may require pre-arched panels in some shielding to prevent sagging. Contact your Columbia Representative for details.

### Labels

All fixtures carry a UL or CSA listing and bear the appropriate UL labels.

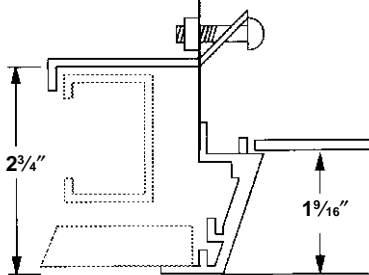

### Ceiling Compatibility

#### Type G

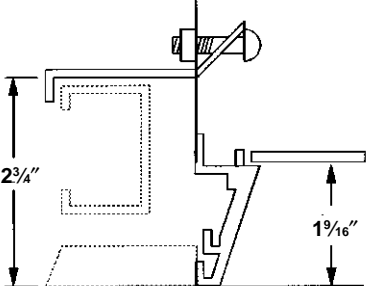

For lay-in installation in exposed grid ceilings. Maximum tee widths of 1" and maximum tee heights of 1 1/2" allowed.

#### Type F

Overlapping extruded aluminum trim conceals edges of ceiling opening. Cantilever arm suspension system included. For in-row mounting, row information is required.

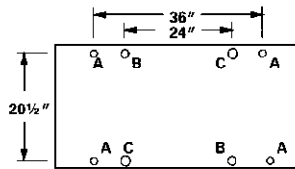

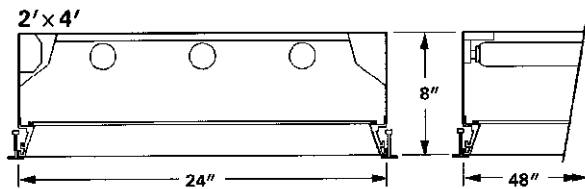

#### Type M

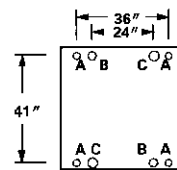

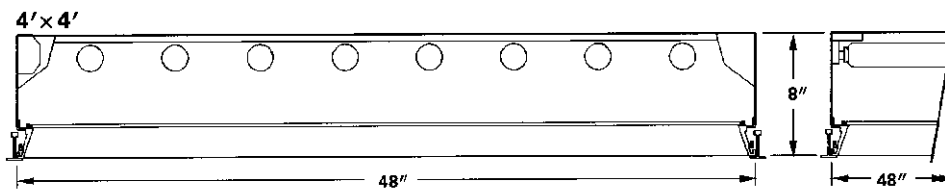

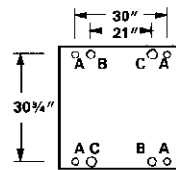

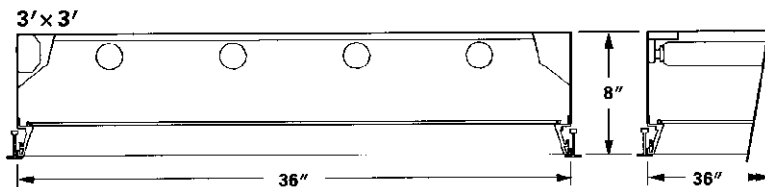

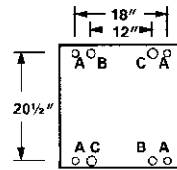

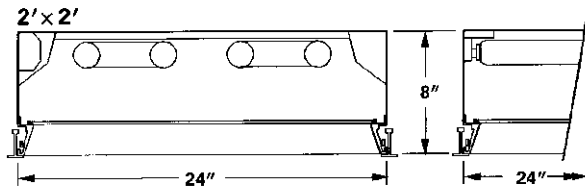

"Fit-in" style extruded trim align with modular tile joints. Fixture is supported from concealed suspension, includes adjustable wing hangers. Cantilever arm suspension system included.

Complete ordering information on back. Dimensions and specifications subject to change without notice.

## FEATURES & SPECIFICATIONS

### INTENDED USE

High performance deep-cell parabolic luminaires for superior light control, visual comfort and light cutoff in open area applications.

### ATTRIBUTES

Choice of low iridescent diffuse or specular louver finishes. Also available with Achroma™ non-iridescent louver finish.

Models available to meet IES RP-1 minimum luminance criteria for office lighting systems in VDT applications. Optimax products are available to meet preferred criteria.

### CONSTRUCTION

Black reveal provides floating louver appearance, conceals optional air-supply slots. Optional heat-removal dampers and air-pattern control blades allow airflow control.

Overlapping flange and modular ceiling trims factory-installed with standard swing-gate hangers or field convertible with optional trim and hangers. T-hinges die-formed for maximum strength. Latches spring-loaded, concealed in reveal.

Housing formed from cold-rolled steel. Louvers formed from anodized aluminum. No asbestos is used in this product.

### FINISH

Five-stage iron-phosphate pretreatment ensures superior paint adhesion and rust resistance. Painted parts finished with high-gloss, baked white enamel.

### ELECTRICAL SYSTEM

Thermally-protected, resetting, Class P, HPF, non-PCB, UL Listed, CSA certified ballast is standard. Energy saving and electronic ballasts are sound rated A.

Luminaire is suitable for damp locations. AWM, TFN or THHN wire used throughout, rated for required temperatures.

### LISTING

UL Listed (standard). CSA Certified or NOM Certified (see Options).

### WARRANTY

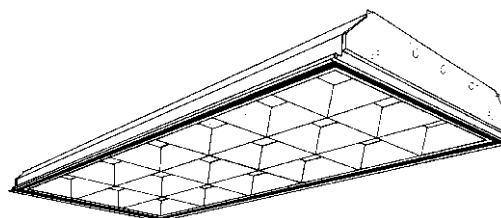

Guaranteed for one year against mechanical defects in manufacture.

Reflector colour Silver  
HIT-CE 70W G12 6600lm

## Product description

Housing: corrosion-resistant cast aluminium, No-rinse surface treatment. Black double powder-coated. Mounting by means of an adjustable bar. Clamp extension up to 35mm.

Cable 3x1.5mm<sup>2</sup>, L 1m.

Control gear with temperature controller, timed ignitor, capacitor.

Wallwasher reflector: Aluminium, silver anodised.

Darklight reflector: aluminium, silver, bright anodised, with wall-washer lens. Cut-off angle 50°.

Without spill light.

Screw-mounted cover ring with flush safety glass: corrosion resistant stainless steel.

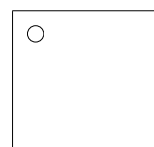

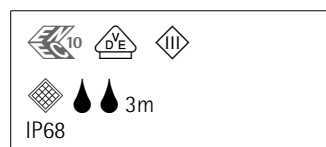

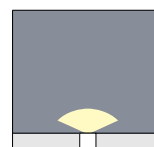

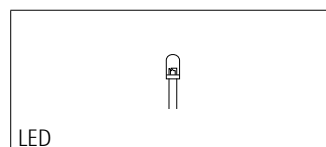

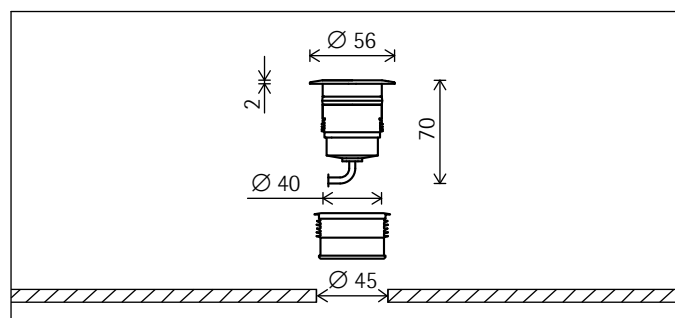

Safety glass: 12mm, clear. Surface temperature 75°C. Can be driven over by vehicles with pneumatic tyres. Load 44kN.

Installation with separate connection sleeve.

Protection mode IP68 3m: protection against dust ingress, and continuous immersion up to 3m deep.

On site protection must be provided using a residual current circuit breaker, FI<30mA.

Weight: 10.20 kg

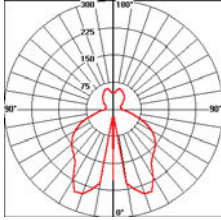

**33764.000**

PH 4<sup>1</sup>/<sub>2</sub>-3<sup>1</sup>/<sub>2</sub> Glass Floor (1927) provides soft illumination. The PH 4<sup>1</sup>/<sub>2</sub> family is based on the principle of a reflecting multi-shade system, producing a harmonious and glare free illumination. The shades are drawn over a logarithmic spiral, with the center of the light source placed in the spiral's focal point.

## Finish

White opal glass. High lustre chrome plated.

## Material

Shades: Handblown white opal glass. Base: High lustre chrome plated, spun brass. Top plate: High lustre chrome plated, spun brass. Stem: High lustre chrome plated, steel.

## Mounting

Cord type: Black. Cord length: 9'. Plug: 120V.

## Weight

Max. 34 lbs.

## Label

CUL, Dry location. IBEW.

# The original BEGA classic caged sphere

General purpose pole mounted sphere luminaires with diffused source.

**Enclosure:** Molded high impact acrylic, minimum 1/8" thick, two piece half spheres clamped and gasketed at the equator by a die cast aluminum six spoke lower guard and clamping ring secured by eight (8) socket head stainless steel fasteners. (9150/9156 is hand blown, seamless, three-ply opal glass). Enclosure assembly is secured to fitter by four (4) socket head stainless steel set screws threaded into stainless steel inserts.

**Guard:** One piece 8-rib die cast aluminum slip fitter slip fits pole and is secured by secured by six (6) stainless steel socket head set screws. 9150/9156/9250/9350 slip fit a 2 3/8" O.D.; 9259 slip fits a 3" O.D.

**Electrical:** Lampholders: Incandescent are medium base porcelain with nickel plated copper screw shell supplied with 200°C high temperature leads, rated 600V. H.I.D. rated 4KV. Fluorescent are type GX23-2 (13W). Ballasts are located in the base of the selected BEGA pole and are available in 120V or 277V, HPF - specify.

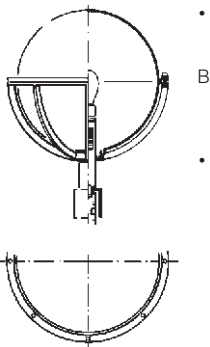

**Finish:** Standard finish is an eight step process consisting of two coats of black or white polyurethane, one with light texture over a phosphate base.

Custom colors supplied on special order.

U.L. listed, suitable for wet locations.

Pole mounted luminaires with lower guard. Die cast aluminum fitter which slip fits a pole top or tenon. 9150, 9156, 9250, 9350 slip fits 2 3/8" O.D. and 9259 slips 3" O.D. Three-ply opal glass standard on 9150, 9156; optional opal acrylic available - suffix PDC. Opal DR acrylic half spheres clamped at the equator standard on 9250, 9350, 9259. Color: Black or white. Note: Metal Halide and HPS pole top units require ballasts mounted in base of 5" butt pole.

## Features

- ▼ ADA compliant
- ▼ Extruded aluminum frame
- ▼ Solid metal trim and accents
- ▼ Oven cured low VOC lacquer paint
- ▼ 1/8" thick virgin acrylic diffuser with matte finish, UV stable, UL-94 HB Flame Class rated
- ▼ Easy tool-less relamping
- ▼ Fluorescent lamping
- ▼ High power factor electronic ballast
- ▼ Shallow 3-1/2" depth recessed housing rated for through-circuit wiring
- ▼ Recessed housing in stock and available for rough-in installation
- ▼ Rated for insulation contact
- ▼ 5 year product warranty

## Variations

- ▼ Specialty finishes to match architectural detail
- ▼ Mix and match accents and trim from other product designs
- ▼ Increase/decrease fixture height and/or width

## Installation Instructions

**Note:** One long edge of cutout must be adjacent to a wall stud or other appropriate mounting structure.

Fixture Length	RL

# ARTRES SCONCE

énergie®

## Catalog Number

### FIXTURE

ARS – Artres Sconce

### VOLTAGE

120 – 120 Volt

277 – 277 Volt

**EXAMPLE:** ARS-120

## Specifications

### CONSTRUCTION

Fixture is constructed of extruded aluminum, type F22. All seams and edges are welded together with invisible welds. Fixture mounts to wall-bracket with recessed screws.

### SHIELDING

Lamp openings are shielded with gasketed glass plates.

### FINISH

Finished in lightly textured gray polyester powdercoat. Finish specially developed for outside exposure with excellent all weather resistance.

### ELECTRICAL

Specify 120 volt or 277 volt. Fixture is supplied with internal electronic transformer and is fully gasketed and U.L./C.U.L. wet location labeled. Fixture may be dimmed with no special modification or specification.

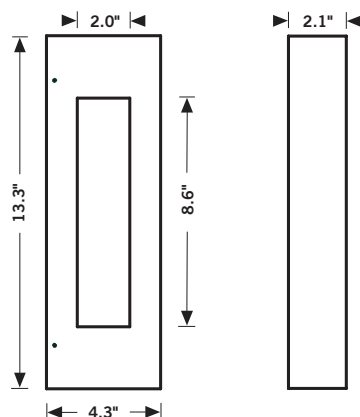

### LAMPING

Single, 35 Watt, MR-11. Lamp is placed above the vertical window to evenly illuminate both sides of the vertical opening. Lamp not included.

### MOUNTING

Fixture is supplied with an Énergie junction box. See reverse for detail. Fixture may be mounted in any orientation.

## Dimensions

## Wall up/downlight luminaires

High output wall mounted luminaires with fully shielded light source for dual up and down lighting effects for indoor or outdoor applications.

**Housing:** One piece die cast aluminum supplied with universal mounting bracket for direct attachment to 3½" or 4" octagonal wiring box (6610/615) use 538 small opening wiringbox). A round "rotation" plate allows the housing to be precisely leveled (or rotated) after installation.

**Enclosure:** Tempered clear glass, 3/16" thick, retained by one piece die cast aluminum step baffle frame on bottom, flush on top, secured by stainless steel screws threaded into stainless steel inserts. Internal full, dual semi-specular optical system. Fully gasketed for weather tight operation using molded silicone rubber "U-channel".

**Electrical:** Lampholders: Incandescent are double contact bayonet, (6610) stainless steel with porcelain insulator disk with 250°C high temperature leads, rated 600V, or medium base porcelain (6615) with nickel plated copper screw shell supplied with 200°C high temperature leads. H.I.D. are G12, bi-pin, pulse rated 4KV.

Ballasts: are magnetic, HPF, available in 120V or 277V - specify.

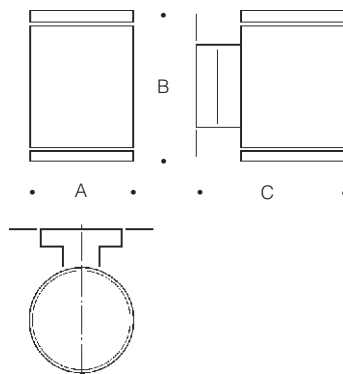

**Finish:** Standard finish is an eight step process consisting of two coats of black or white high solids, UV stabilized polyurethane, one with light texture over a phosphate base.

Custom colors supplied on special order.

U.L. listed, suitable for wet locations.

\*Yoke includes (2) 9/32" dia. holes at 12" (305mm) centers for supplemental mounting support (1/4" fasteners by others)

Side-Mount Slipfitter 1:12 Scale (For use with X Mount)

Specifications

<b>A</b> Milled extruded aluminum door with silicone gasket	<b>D</b> Tamper-resistant captive door screws	<b>H</b> 1/2" NPT nipple	<b>M</b> Welded aluminum mounting plate with splice access cover
<b>B</b> Cutoff visor (included)	<b>E</b> Die-cast aluminum end plates	<b>J</b> Aluminum reveal plates (black)	<b>N</b> Recessed outlet box
<b>C</b> Clear, flat, thermal and impact resistant tempered glass lens	<b>F</b> Locking set screw	<b>K</b> Specular extruded aluminum reflector	<b>O</b> Accessory extruded aluminum slipfitter for 2-3/8" O.D. pole or tenon
	<b>G</b> Aluminum yoke	<b>L</b> 1-1/2" x 2" aluminum arm	

Finish:

Exterior surfaces - 6 stage pretreatment and electrostatically applied thermoset polyester powder coating for a durable abrasion, fade and corrosion resistant finish. Choice of semi-gloss colors (see ordering information).

Reflector and internal end plates - extruded high purity aluminum with clear anodized specular finish. All hardware and components - non corrosive stainless steel or aluminum. Door secured with captive tamper-resistant (#10 Torx) screws in stainless steel threaded reflector inserts to prevent seizing. Yoke attaches with recessed hex socket screws.

Mounting:

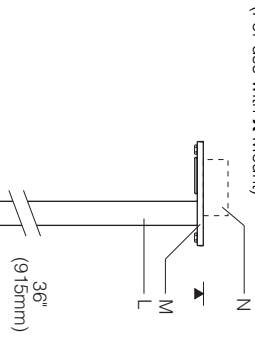

1/2" NPT nipple (wet location outlet box or fitting by others). Aluminum cantilever mounting assembly ordered separately; specify **X** mount. Suitable backing structure required.

Accessory slipfitter ordered separately. Top-mount for single unit, or side-mount for one or two (back-to-back) units; specify **X** mount. Fits 2-3/8" O.D. stanchion, pole or tenon (by others).

Standard:

UL listed or CSA certified for wet locations.

Cantilever 1:12 Scale (For use with X Mount)

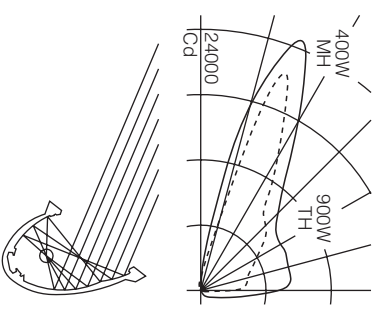

Features

- Compact yet powerful - up to 1000W halogen, 2x400W metal halide for uplighting large vaults, canopies or arches
- Optimum performance - high output position oriented metal halide, end-of-lamp aligner, set screw locks aiming
- Built to last - all aluminum and stainless steel components, tempered glass lens, tamper-resistant door screws

Performance

Two parabolic reflector sections drive light across the overhead plane from one edge. An elliptical section redirects its light to a parabola and shields the lamp. Asymmetry is maximized resulting in high beam efficiency and superior surface uniformity. The fast "unback" minimizes wasted spill light. Wide lateral distribution permits greater spacings.

For complete lamp and ballast information, see Accessories Section.

\* Use clear metal halide horizontal or universal position lamp with compact envelope. 250 and 400W lamps are horizontal position oriented mogul base (POMB) that yield higher light output than universal position lamps. Standard metal halide lamp colors are 4000K for 175W, 3200K for 250 and 400W.

† 2x400W metal halide uses position oriented mogul lampholders that are ringed and fixed in position to uplight across an overhead surface (± 15°).

+ 350 and 900W IR coated halogen yield approximately the same light output as conventional 500 and 1500W halogen lamps respectively.

Project:

## 4 Mounting

V = External yoke with 1/2" NPT nipple (wet location outlet box or fitting by others)  
X = External yoke for use with accessory cantilever or slipfitter (order separately)

## 5 Finish

02 = Semi-gloss white  
06 = Dark bronze  
07 = Silver  
08 = Semi-gloss black  
12 = Green

99 = Custom RAL or computer matched color to be specified, consult sales representative.

## 6 Voltage

A = 120V  
B = 277V  
F = 220V (1000W TH only)

G = 240V (900W, 1000W TH only)  
H = 347V

## 7 Option (See Accessories Section for specifications)

VO = Cutoff visor included, no other options  
VD = Remote ballast for dry indoor location  
VH = Long distance remote HPS ballast up to 35' (10m) for 150W HPS, up to 50' (15m) for 250W and 400W HPS  
VL = Micro-prismatic tempered glass lens (replaces clear, flat lens, offers smoother light pattern at reduced peak candlepower.)  
VX = For modification not listed, include detailed description. Consult factory prior to specification.

Note: Cutoff visor included unless specified otherwise.

## 8 Standard

0 = UL, Underwriters Laboratories  
J = CSA, Canadian Standards Association

## Example

H152 - 0400 - V - 07 - B - VH0

Large outdoor model for use with 400 watt high pressure sodium lamp. External yoke with 1/2" NPT nipple. Silver powder coat finish. Long distance (up to 50') remote 277V ballast in weatherproof enclosure. UL. Cutoff visor included.

Type:

## Accessories

Order separately. See Accessories Section for specifications.

AC — 36 — = Cantilever, 36" (914mm) setback (for use with X mount unit)

0 = UL  
J = CSA

## 5 Finish

L = single unit  
U = double unit (back to back)

ASF — T10 = Top-mount slipfitter, for 2-3/8" O.D. pole, stanchion or tenon (for use with single X mount unit)

## 5 Finish

ASF — S — 0 = Side-mount slipfitter, for 2-3/8" O.D. pole, stanchion or tenon (for use with X mount units)

1 = single unit  
2 = double unit (back to back)

## 5 Finish

AE — V — 0D0 = External vertical blade baffle, black, for lengthwise shielding

2 = 25° shielding  
4 = 45°

C = 300W-350W TH; 150W-175W HID (not for use with 500W TH)

D = 250W, 400W HID

F = 900W, 1000W TH, 2x400W HID

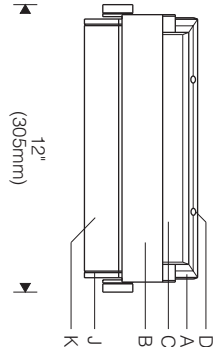

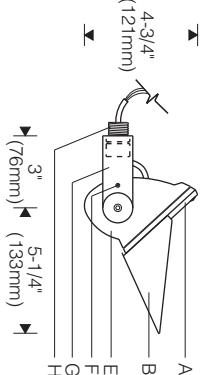

AXF = Wet location color filter assembly, interchangeable frame with striped color glass, visor. Not suitable for all lamp wattages. Consult factory for complete specifications and ordering information.

AFK000X — = Ballast fuse kit

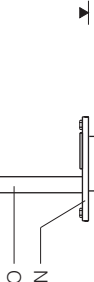

0 = UL  
J = CSA

Specifications

<b>A</b>	Milled extruded aluminum door frame with silicone gasket	<b>D</b>	Tamper-resistant captive door screws	<b>H</b>	1/2" NPT nipple	<b>M</b>	Accessory extruded aluminum slipfitter for 2-3/8" O.D. pole or tenon
<b>B</b>	Cutoff visor (included)	<b>E</b>	Die-cast aluminum end plates	<b>J</b>	Aluminum reveal plates (black)	<b>N</b>	Welded aluminum mounting plate with splice access cover
<b>C</b>	Micro-prismatic, thermal and impact resistant tempered glass lens	<b>F</b>	Locking set screw	<b>K</b>	Specular extruded aluminum reflector	<b>O</b>	1" x 1-1/2" aluminum arm
		<b>G</b>	Aluminum yoke	<b>L</b>	1/2" NPT entry (with plug)		

Finish:

Exterior surfaces - 6 stage pretreatment and electrostatically applied thermoset polyester powder coating for a durable abrasion, fade and corrosion resistant finish. Choice of semi-gloss colors (see ordering information).

Reflector - extruded high purity aluminum with clear anodized specular finish. All hardware and components - non corrosive stainless steel or aluminum. Door secured with captive tamper-resistant #10 Torx screws in stainless steel threaded reflector inserts to prevent seizing. Yoke attaches with recessed hex socket screws.

Mounting:

1/2" NPT nipple (wet location outlet box or fitting by others). Aluminum cantilever mounting assembly ordered separately; specify X mount. Suitable backing structure required.

Accessory slipfitter ordered separately. Top-mount for single unit, or side-mount for one or two (back-to-back) units; specify X mount. Fits 2-3/8" O.D. stanchion, pole or tenon (by others).

Electrical:

Use 90°C wire for supply connections. Leads exit reflector through watertight flush cord entry and silicone coated fiberglass sleeving with 8" (.2m) exposed beyond nipple. 60° (1.5m) leads for X mount.

Tungsten halogen - recessed single contact (RSC) or DC bayonet lampholders retained with patented clamping supports for maximum heat dissipation.

Metal halide - G12 lampholder for use with single ended lamp. Remote HPF high reactance autotransformer (HX-HPF) ballast rated for -20°F/-29°C starting. Die-cast aluminum weatherproof ballast enclosure includes four 1/2" NPT threaded entries. Optional electronic ballast with automatic shut-off to eliminate end-of-life cycling. Optional remote ballast for dry indoor location.

For complete ballast specifications, see Accessories Section. **Standard:** UL listed or CSA certified for wet locations.

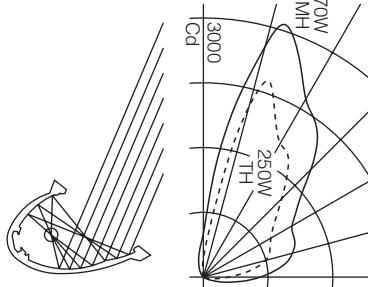

Features

- Compact size, minimal setbacks and wide spacings - ideal for unobtrusive uplighting of soffits, canopies, vaults
- Durable and secure - thermal and impact resistant lens, tamper-resistant fasteners, set screw in yoke locks aiming
- Precured silicone gaskets, unique flush cord entry - seal out dirt and moisture, maintain performance

Performance

Two parabolic reflector sections drive light across the overhead plane from one edge. An elliptical section redirects its light to a parabola and shields the lamp. Asymmetry is maximized resulting in high beam efficiency and superior surface uniformity. The fast "runback" minimizes wasted spill light. Wide lateral distribution permits greater spacings.

\* Metal halide lamps using ceramic arc tubes yield higher light output than lamps with quartz arc tubes. They offer improved lamp-to-lamp color consistency and a more stable color temperature over their life (±200K). Standard lamp color is 3000K / 80+ CRI.

4 Mounting

V = External yoke with 1/2" NPT nipple (wet location outlet box or fitting by others)

X = External yoke for use with accessory cantilever or slipfitter (order separately)

5 Finish

02 = Semi-gloss white  
06 = Dark bronze  
07 = Silver  
08 = Semi-gloss black  
12 = Green

99 = Custom RAL or computer matched color to be specified, consult sales representative.

Project:

6 Voltage/Ballast

Magnetic

A = 120V  
B = 277V  
H = 347V (Canada)\*

Electronic

1 = 120V  
2 = 277V

\* Not available for 35W metal halide

7 Option (See Accessories Section for specifications)

V0 = Cutoff visor included, no other options

VD = Remote ballast for dry indoor location

VH = Long distance remote metal halide ballast, 35W; 15' min. up to 50' max. (4.5m - 15m), 70W; up to 50' max. (15m), 150W; up to 50' max. (15m)

VX = For modification not listed, include detailed description. Consult factory prior to specification.

Note: Cutoff visor included unless specified otherwise.

8 Standard

0 = UL, Underwriters Laboratories

J = CSA, Canadian Standards Association

Example

M151 - 150G - X - 06 - A - VDJ

Small outdoor model for use with 150 watt metal halide lamp. External yoke for use with accessory cantilever or slipfitter (order separately). Dark bronze powder coat finish. Remote encapsulated 120V magnetic ballast suitable for dry indoor location. CSA. Cutoff visor included.

Type:

Accessories

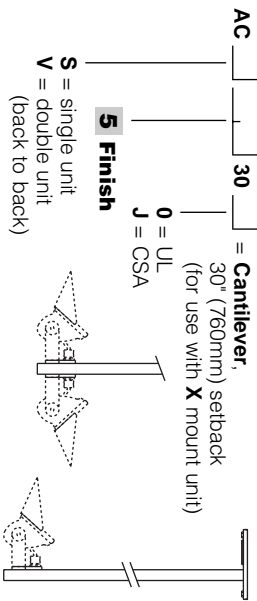

Order separately. See Accessories Section for specifications.

AC 30 = Cantilever, 30" (760mm) setback (for use with X mount unit)

0 = UL  
J = CSA

5 Finish

S = single unit  
V = double unit  
(back to back)

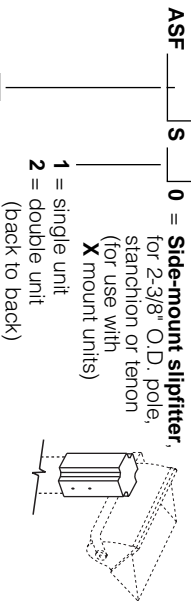

ASF T10 = Top-mount slipfitter, for 2-3/8" O.D. pole, stanchion or teron (for use with single X mount unit)

5 Finish

ASF S 0 = Side-mount slipfitter, for 2-3/8" O.D. pole, stanchion or teron (for use with X mount units)

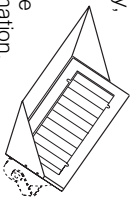

5 Finish

1 = single unit  
2 = double unit  
(back to back)

AXF = Wet location color filter assembly, interchangeable frame with stripped color glass, visor.

Maximum 200W TH, 70W CMH.

Note: Consult factory for complete specifications and ordering information.

AEBV 0D0 = External vertical blade baffle, black for lengthwise shielding

2 = 25° shielding  
4 = 45°

AFK000X = Ballast fuse kit

0 = UL  
J = CSA

MRC16 50W 12V GU5.3 36°

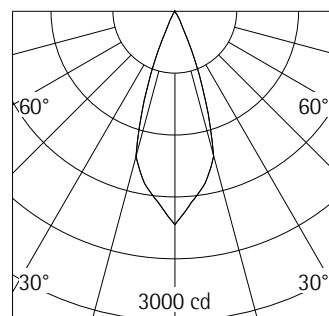

### Product description

Mounting plate: plastic, white.  
Mounting ring for lampholder carrier: cast aluminum, white (RAL9002) powder-coated. 360° rotation.  
Lampholder carrier: cast aluminum, black powder-coated, designed as heat sink. 40° tilt.  
Double-sided, reversible mounting frame to cover the ceiling aperture or for use as flush ceiling, trim detail: cast aluminum, white (RAL9002) powder-coated.  
Mounting bracket: metal.  
Mounting box for preinstallation with junction box for through-wiring, black powder-coated.  
Magnetic transformer 120/12V, 60Hz inside mounting box. Snap-in plug for connection between transformer and luminaire.  
Anti-glare ring: plastic, black, external white (RAL9002) lacquered.  
Type Non IC luminaire.  
Insulation materials must be kept away from the luminaire by a minimum of 3". Thermally protected luminaire. Suitable for damp location. Removal of luminaire allows access to transformer and junction box from below.  
Max. ceiling thickness 3/4".  
Use lamps with up to 36° max. beam angle.  
Weight: 13.01 lbs / 5.90 kg

**Varianti MR-16: Matte Aluminum**

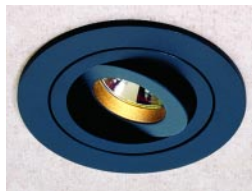

**Varianti** is an adjustable recesses downlight trim series available for MR-11 and MR-16 lamps. The trim is made from three precision-machined metal rings. This three ring construction makes for easy re-lamping and ideal heat dissipation. A spring tension lamp holder insures positive lamp placement and allows the use of two optional lenses and louvers at the same time. Machined aluminum trims are powder coat painted white, black and metallic silver. Machined brass trims are plated chrome, matte aluminum, black nickel and polished natural brass. Consult factory for custom colors or finishes.

**Specifications:**

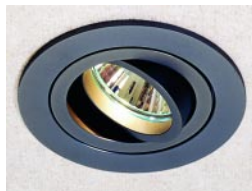

Rotating center ring pivots 35 degrees in either direction, capable of utilizing two (2) media accessories in conjunction with one MR-11 or MR-16 lamp. Snap-in/Pull-out center ring assembly provides convenient lamp servicing.

UL and cUL Listed for use with Ardee Lighting A35 series low-voltage rough-in downlight housings. Suitable for use in damp locations.

Lamp: Enclosed MR-11, 12 volt, or open MR-11 12 volt lamp and added protective lens. 35 watts maximum. Enclosed MR-16, 12 Volt, or open MR-16 12 volt lamp and added protective lens. 50 watts maximum.

## FEATURES

- Trim, low-profile design, only 1-3/16" deep.
- Flattened knockouts for cleaner appearance.
- Snap-fit channel cover attachment. No tools required for wire-way access.
- Hinged, removable channel cover allows hands-free wiring and quick installation.
- Factory-installed starters on all preheat models.
- Romex/BXR conduit connector provided with each fixture.
- Optional instant-on electronic start magnetic ballast for flicker-free lamp start.
- Low-brightness, linear prismatic diffuser provides improved visual comfort.
- 15% DR acrylic and snap-fit diffuser design for improved shatter-resistant and positive attachment.
- Optional task diffuser with clear linear prismatic bottom and opaque front for maximum illumination without direct edge glare.
- Five fixture lengths available.
- Available with factory-installed lamp, switch, cordset and convenience outlet options.

## SPECIFICATIONS

**BALLAST** — Normal power factor reactor type ballast standard. Others available (See ordering information).

**WIRING & ELECTRICAL** — Fixture conforms to UL 1570 and is suitable for damp locations. AWM, TFN or THHN wire used throughout, rated for required temperatures.

**MATERIALS** — Metal parts precision roll-formed from 20 gauge cold rolled steel.

**FINISH** — Five-stage iron-phosphate pre-treatment ensures superior paint adhesion and rust resistance. Painted parts finished with polyester powder paint.

**LISTING** — UL listed and labeled. Listed and labeled to comply with Canadian and Mexican Standards.

Specifications subject to change without notice.

### Product description

Housing: metal, white (RAL9002) powder-coated.  
Electronic control gear 120V/277V, 60Hz, class P inside cast housing.  
Mounting plate for preinstallation with junction box for through-wiring, black powder-coated. Snap-in plug for connection between junction box and luminaire.  
Wallwasher reflector: aluminum, silver, satin matt anodized. Hinged cover for lamp replacement.  
Type Non IC luminaire.  
Insulation materials must be kept away from the luminaire by a minimum of 3". Suitable for damp location. Removal of reflector allows access to junction box from below.  
Max. ceiling thickness 3/4".  
Weight: 17.64 lbs / 8.00 kg

## Specifications

Wall/Slot-2000

Wall/Slot-2000PR

**FIXTURE SUPPORT RAIL.** Extruded white aluminum, wall-mounted rail provides continuous support and true alignment of fixtures and components. Rail is designed to provide reveal and compensate for irregularities in wall construction. Galvanized spline keys are included for continuous alignment.

**FIXTURE HOUSING.** Die-formed and welded 20-gauge steel. Plenum cover/wall bracket is a one-piece assembly of 20-gauge steel and heavy-gauge steel brackets with leveling screws to provide adjustment. Brackets are spaced approximately every two feet for 2-, 4-, and 8-foot fixtures, and 1 1/2 feet for 3-foot and 6-foot fixtures. Plenum cover has a continuous hook-and-lock feature for quick installation.

**REFLECTOR.** 2000 Curved reflector is die-formed specular hammertone aluminum, precisely shaped for maximum downward light projection. Straight reflector portions are steel, finished in high-reflectance white for uniform light distribution. 2000PR Parabolic reflector (PR) is die-formed low-iridescence semi-specular aluminum, precisely shaped for maximum downward light projection. It is shielded from all viewing angles from 0° to 60° below horizontal. Straight reflector portions are steel, finished in high-reflectance white for uniform light distribution.

**CEILING TRIM/LUMINANCE CONTROL DEFLECTOR.** Extruded aluminum with internal aligner splines. LCD shields lamps from direct view and eliminates socket shadows on wall. Paint finish is CWM (Matte White) baked enamel.

**BALLAST.** Electronic, high power factor, thermally protected Class P, Sound Rated A, manufactured by a UL Listed manufacturer, as available, determined by Litecontrol. The minimum number of ballasts will be used.

**CEILING TYPE.** Compatible with most types of ceiling systems, including grid and plaster. Fixture system must be installed prior to installation of ceiling. Finish of wall should extend 13" above finished ceiling height. See Wall/Slot-2000 Pre-Installation Manual for specific ceiling type details.

**CERTIFICATION.** Fixture and electrical components shall be UL and/or CUL Listed and shall bear the I.B.E.W., A.F. of L. label.

Note: Litecontrol reserves the right to change specifications without notice for product development and improvement.

**2014T8-CWM-ELB-PR-120** is a typical catalog number for a one-lamp (1 lamp in cross-section), 4-foot long T8 fixture with parabolic reflector, painted Matte White, electronic ballast, 120 volts.

notes: Lamp Count = the total number of lamps in fixture

For Ordering guide information in shaded areas, choose selection by reading ACROSS the shaded areas for correct specifications.

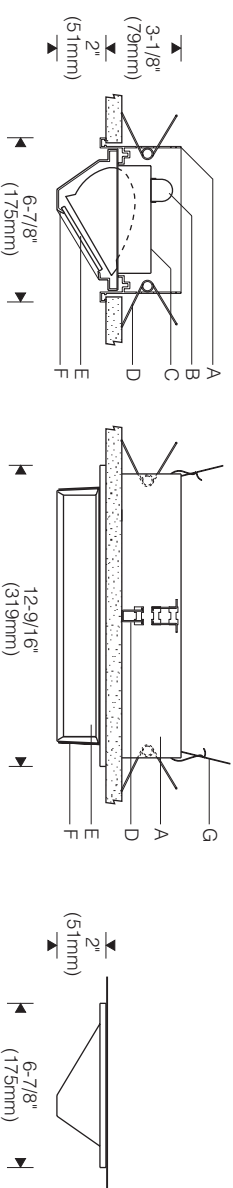

### Cross-section lamping

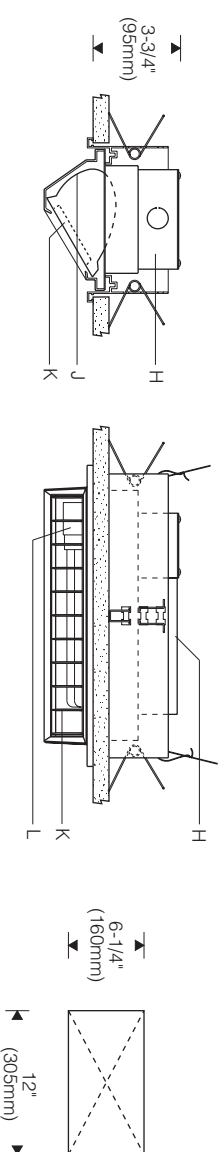

### Questions to Ask

1. 120 or 277 volt?
2. Row information, including desired fixture lengths?
3. Verify ceiling type?
4. Other options?

Style 201 1:8 Scale (Tungsten halogen, metal halide remote)

Style 205 1:8 Scale (Quad tube fluorescent, metal halide integral)\*

\* Diagram shows Style 205 for quad tube fluorescent. Snap-in baffle provided for quad tube only. Style 205 for metal halide is provided with lens as shown in upper Style 201 diagram.

Specifications

- |  |  |   |  |
|--|--|---|--|
| <b>A</b> Extruded aluminum mounting/trim frame | <b>D</b> Spring clips (4 incl.)  | <b>G</b> Supplemental wire supports (by others)               | <b>K</b> Snap-in polycarbonate cross baffle (matte gray), 15° shielding (quad tube only) |
| <b>B</b> Conduit connector (Style 201)         | <b>E</b> Micro-prismatic tempered glass lens (tungsten halogen and metal halide units) | <b>H</b> Integral ballast with splice compartment (Style 205) | <b>L</b> Twist and lock lampholder (quad tube)   |
| <b>C</b> Aluminum back box                     | <b>F</b> Die-cast aluminum hood  | <b>J</b> Specular extruded aluminum reflector                 |  |

Finish:

Semi-gloss white hood and ceiling trim. Black back box. Painted surfaces - 6 stage pretreatment and electrostatically applied thermoset powder coat. Reflector - extruded high purity aluminum with clear anodized specular finish. All luminaire hardware - stainless steel.

Mounting:

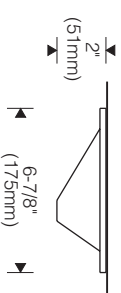

Mounting/trim frame installs from below finished ceiling. Retrofits into existing non-accessible ceilings. Spring clips provided for rigid ceilings (drywall, plaster) up to 1-3/4" (44mm) thick. Supplemental support wires, bar hangers, etc. (by others) required for accessible ceilings. Where wire suspension is prohibited, order accessory universal mounting brackets for use with 1/2" EMT, 1-1/2" lathing or C channel (by others).

Standard:

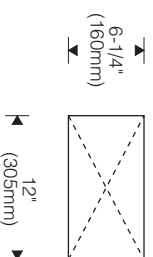

UL listed or CSA certified for damp locations. (TH and MH units with lens recommended for damp location use.) Minimum spacings for 200W/250W Style 201, all Style 205: 2" (0.6m) on center, 1" (0.3m) fixture center to side wall, 3" (76mm) to overhead building member.

REV. 11/02

Profile (below ceiling)

Ceiling Cutout

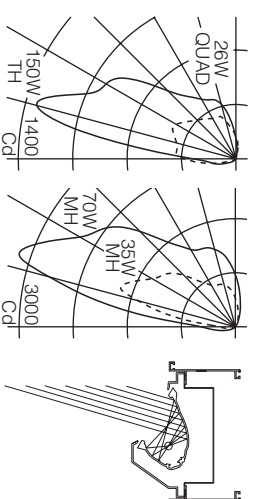

Features

- Low profile - minimal silhouette focuses attention on the luminous wall, not the luminaire
- Evenly lights entire wall - reflector aperture is shielded
- Shallow recessed depth - fits under ducts at core walls
- Durable construction - extruded reflector and trim frame; die-cast hood, aluminum back box

Performance

Two parabolic reflector sections drive light to the bottom of the wall. An elliptical section shields the lamp from normal viewing angles and redirects its light to a parabola. Glare is minimized and asymmetry of the beam is maximized resulting in high beam efficiency and superior surface uniformity.

For complete photometrics, visit [www.elliptipar.com](http://www.elliptipar.com).

Tungsten Halogen (Style 201)		Compact Fluorescent & Metal Halide Electronic* (Style 205)
A = 120V		1 = 120V
Metal Halide Magnetic (Style 201)		2 = 27V
A = 120V		3 = 347V (Canada)**
B = 277V		Compact Fluorescent Dimming (Style 205)
H = 347V (Canada)+		T = 120V
		V = 277V

\* Electronic ballast for 35 and 70W available in Style M205 integral only; for 150W in Style M201 remote only.

\*\*Electronic 347V available for quad tube compact fluorescent only.

+Not available for 35W metal halide.

7 Option (See Accessories Section for specifications)

- 00 = No options
- 0C = Style 201 modified to comply with Chicago plenum code. Not available for Style 205 integral units.
- 0E = Style 205 remote emergency battery pack for quad tube fluorescent. Maximum distance from battery pack to fixture is 5' (1.5m). For use with non-dimming ballasts only.
- 0H = Style 201 long distance remote metal halide ballast (encapsulated HX-HPF magnetic ballast only), 35W: 15' min. up to 50' max. (4.5m - 15m), 70W: up to 50' max. (15m), 150W: up to 50' max. (15m)
- 0Y = Style 201 modified to comply with New York City code. (Style 205 integral complies as is without modification.)
- XX = For modification not listed, include detailed description. Consult factory prior to specification.

8 Standard

- 0 = UL, Underwriters Laboratories
- J = CSA, Canadian Standards Association

Example

M205 - 035G - T - 02 - 1 - 000

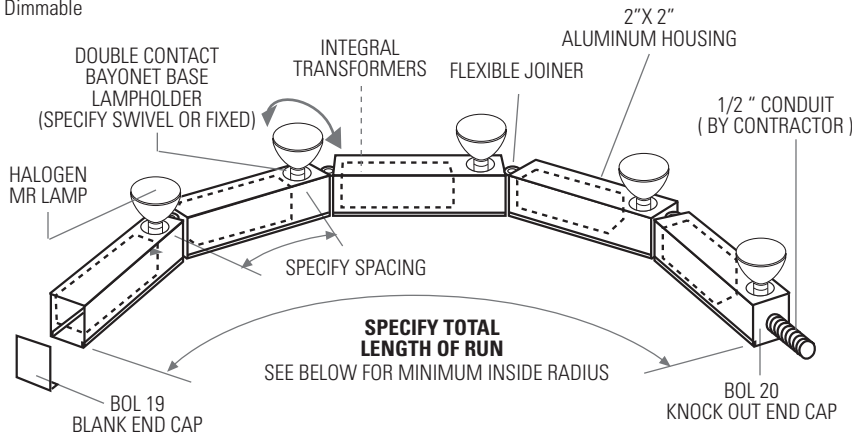

Small semi-recessed with hood for use with 35W metal halide lamp. Overlapping ceiling trim. Semi-gloss white. Integral 120V electronic ballast. UL.

## BOL 6000 QHX

- Ideal for wall wash or task lighting in curved spaces
- Uses high-performance ALR lamps for precise effect
- Also uses MR lamps (Refer to CL 119-A)
- Twist & lock DC bayonet base for safe lamping in lamp-down applications
- Listed for damp location
- Dimmable

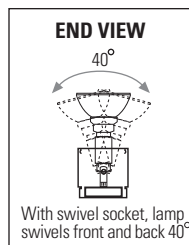

### RECOMMENDED LAMPS

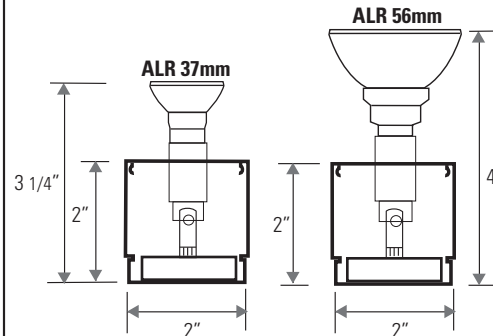

TYPE : ALR LAMP  
BASE : DC BAYONET BASE (B15d)  
BRAND : PHILIPS

CODE	WATTS	BEAM ANGLE	AVG. CENTER CANDLE POWER	RATED HRS.	COLOR TEMP.
ALR-37	20 W	6°	7000 cd	4000	3000 K
		18°	1000 cd	4000	3000 K
		32°	400 cd	4000	3000 K
ALR-56	50 W	10°	13000 cd	4000	3000 K
		25°	1900 cd	4000	3000 K

### LAMPS NOT INCLUDED

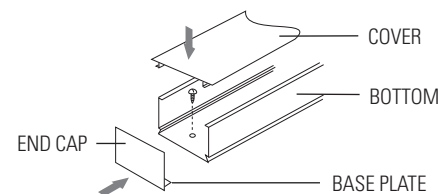

### END VIEW

### QUICK REFERENCE INSTALLATION INSTRUCTIONS

1. Remove cover piece from module, by removing screws and using flathead screwdriver to pry open.
2. Screw mount bottom piece directly onto secure surface.
3. Snap cover piece into bottom piece and replace screws.
4. To continue run, attach and mount next module and make electrical connections.
5. Attach end caps at beginning and end of run, sliding base plate into bottom piece and securing with screw.
6. Connect lead wires at beginning of run to power source and ground. Do not power until installation complete.
7. Insert lamps.

### Footnotes

- + Design Lumens are the approximate lamp lumen output at 40% of the lamp's Rated Average Life. This output is based upon measurements obtained during lamp operation on a reference ballast under standard laboratory conditions.
- + Approximate Initial Lumens. The lamp lumen output is based upon lamp performance after 100 hours of operating life, when the output is measured during operation on a reference ballast under standard laboratory conditions.
- + Rated average life under specified test conditions with Programmed Start ballasts with lamps turned off and restarted no more frequently than once every 3 operating hours. Lamp life is appreciably longer if lamps are started less frequently.
- + Features **ALTO®** Lamp Technology
- + High Color Rendering Lamp

## General

PRODUCT DATA	
Product Number	300426
Full product name	PL-L 40W/830 2G11/4P 1CT
Ordering Code	PL-L 40W/830/4P RS/IS
Pack type	1 Lamp in a Folding Carton
Pieces per pack	1
Packs per case	25
Pack UPC	046677111786
EAN2US	-
Case Bar Code	50046677111781
Successor Product number	-
Wattage[W ]	40W
Color Code	830 [CCT of 3000K]
Base	2G11 [2G11]
Base Information	4P
Execution	/4P [4 Pins]
Packing Type	1CT [1 Lamp in a Folding Carton]
System Description	Rapid Start
Packing Configuration	25
Rated Avg. Life[hr ]	20000
Avg. Hrs. Life[hr ]	20000
Lamp Voltage[V ]	126
Dimmable	Yes
Color Rendering Index[Ra8 ]	82
Color Designation	Warm White
Color Description	830 Warm White
Color Temperature[K ]	3000
Initial Lumens[Lm ]	3500
Overall Length C[mm ]	542
Diameter D[mm ]	38
Diameter D1[mm ]	18

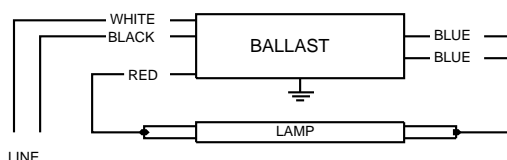

## ROP-2P32-SC

Brand Name	OPTANIUM
Ballast Type	Electronic
Starting Method	Instant Start
Lamp Connection	Parallel
Input Voltage	120
Input Frequency	50/60 HZ
Status	Active

## Eco-10 Overview

Eco-10 lighting management electronic dimming ballasts are designed to maximize the benefits of a lighting management system. Eco-10 offers 100% to 10% dimming, and is ideal for use in any space where saving energy is the primary goal of the design.

### Features

- Continuous, flicker-free dimming from 100% to 10%
- Standard 3-wire line-voltage phase-control technology for consistent fixture-to-fixture dimming performance
- Models available for T5 and T5-HO linear, T8 linear and U-bent, and T5 twin-tube lamps
- Programmed rapid start design preheats lamp cathodes before applying full arc voltage
- Lamps turn on to any dimmed level without flashing to full brightness
- Low harmonic distortion throughout the entire dimming range maintains power quality
- Frequency of operation ensures that ballast does not interfere with infrared devices operating between 38 and 42 kHz
- Inrush current limiting circuitry eliminates circuit breaker tripping, switch arcing, and relay failure
- End-of-lamp-life protection circuitry (for T5 and T5-HO linear models) ensures safe operation throughout entire lamp life cycle
- For linear lamps, ballasts maintain consistent light output for different lamp lengths, ensuring uniformity
- Ultra-quiet operation
- Protected from miswires of any input power to control lead
- 100% compatible with all Lutron 3-wire fluorescent controls
- 100% performance tested at factory
- Designed and assembled in the USA
- 5-year limited warranty with Lutron field service commissioning (3-year standard warranty) from date of purchase

## Compact SE Overview

For designs requiring the energy savings and aesthetic appeal of dimmed T4 compact fluorescent or T5 twin-tube lamps, Compact SE dimming ballasts are your solution. The Compact SE product family includes ballasts for nearly every type of dimmable compact fluorescent lamp.

### Features

- Continuous, flicker-free dimming from 100% to 5%
- Standard 3-wire line-voltage phase-control technology for consistent fixture-to-fixture dimming performance
- Models for 4-pin T4 compact lamps and T5 twin-tube lamps
- Programmed rapid start design will preheat lamp cathodes before applying full arc voltage
- Lamps turn on to any dimmed level without flashing to full brightness
- Low harmonic distortion throughout the entire dimming range maintains power quality
- Frequency of operation ensures that ballast does not interfere with infrared devices operating between 38 and 42 kHz
- Inrush current limiting circuitry eliminate circuit breaker tripping, switch arcing, and relay failure
- End-of-lamp-life protection circuitry ensures safe operation throughout entire lamp life cycle
- Ultra quiet operation
- Protected from miswires of any input power to control lead, or lamp leads to each other or ground
- 100% compatible with all Lutron 3-wire fluorescent controls
- 100% performance tested at factory
- Designed and assembled in the USA
- 5-year limited warranty with Lutron field service commissioning (3-year standard warranty) from date of purchase
- Ballasts that dim T4 compact fluorescent lamps are intended for factory installation by OEM fixture manufacturer.

#### Compact SE, case type A

3.00"w (76mm) x 1.00"h (25mm) x 4.90"l (124mm)

#### Compact SE, case type B

## GRAFIK Eye 3000 Series Control Unit

Cover (shown open)

### Description

- Provides pushbutton recall of four preset lighting scenes, plus Off.
- Allows setup of lighting scenes using buttons on the Control Unit.
- Controls many light source types directly, and others using power interfaces.
- Provides lockout options to prevent accidental changes.
- Includes built-in infrared receiver for operation with an optional remote control.

### Models available to:

- Accept 120V, 220-240V (non-CE), 230V (CE) and 100V input power.
- Control two to six zones of lighting.

### GRX-3100 Control Units

Provide setup using buttons on the Control Unit.

### GRX-3500 Control Units

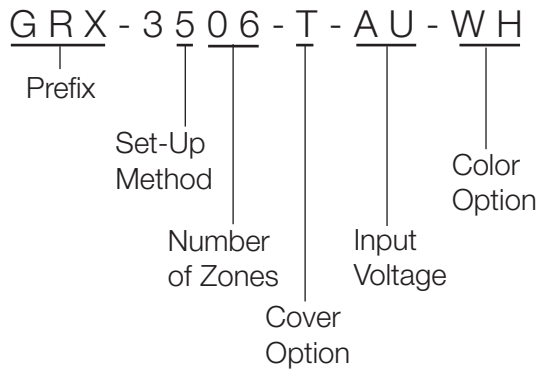

Provide optional setup using a PC, including setting lighting levels in 1% increments.

# GRX-4000 Control Units

Cover (shown open)

## DESCRIPTION

- Provide pushbutton recall of four preset lighting scenes.
- Control virtually any light source.
- Provide lockout options to prevent accidental changes.
- Include built-in infrared receiver for operation with an optional remote control.

### Models available to:

- Control two to 24 zones of lighting.
- Provide easy setup of preset lighting scenes:  
**GRX-4100 Control Units** provide standard setup via pushbuttons on the Control Unit.  
**GRX-4500 Control Units** provide optional setup via a PC, including setting lighting levels in 1% increments.

### GRX-4000 Control Units work with:

- GRAFIK Eye Wallstations
- GP and LP Dimming Panels
- XP Softswitch™ Panels

## SPECIFICATIONS

### Operating Voltage

- Low-voltage type Class 2 (PELV), 12VDC to 24VFW.
- Lightning Strike Protection: Meets ANSI/IEEE standard 62.41-1980. Can withstand voltage surges of up to 6000V and current surges up to 3000A.

### Sources/Load Types

Operates sources with a smooth continuous Square Law dimming curve or on a full conduction non-dim basis via GP and LP Dimming Panels and XP Softswitch™ Panels.

## Preset Controls

- 4 preset lighting scenes and off for up to 24 zones, accessible from Control Unit faceplate.
- 12 additional scenes stored in Control Unit, accessible via Wallstations and/or Control Interfaces.
- Light levels fade smoothly between scenes. Fade time: 0-59 seconds or 1-60 minutes. Can be set differently for each scene.

## Key Design Features

- Meets IEC 801-2. Tested to withstand 15kV electrostatic discharge without damage or memory loss.
- Provides power failure memory: Automatically restores lighting to scene selected prior to power interruption.
- Has faceplate that snaps on with no visible means of attachment.

## System Communications and Capacities

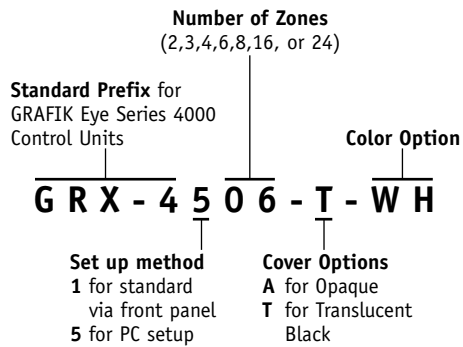

Low-voltage type Class 2 (PELV) wiring connects Control Units, Wallstations, and Control Interfaces:

- You can link up to 8 Control Units to control up to 64 zones.
- You can add up to 16 total Wallstations and Control Interfaces for a total of 24 control points.

## Environment

- 32-104°F (0-40°C). Relative humidity less than 90% non-condensing.

# GP Dimming Panels

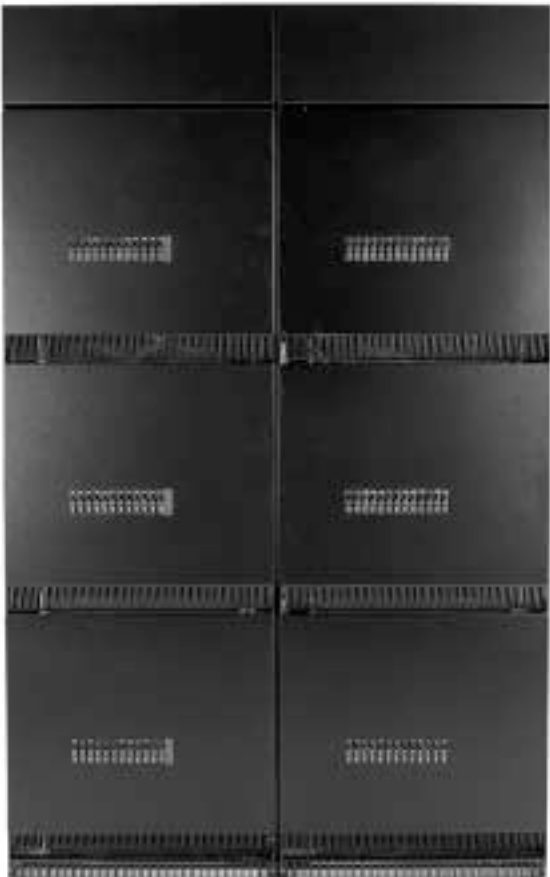

GP3/4  
Mini Panels

GP8-24  
Standard-Size Panels

GP36  
Large-Size Panels

GP48-144  
Large-Size Panels

## DESCRIPTION

- Provide power and dimming for up to 144 load circuits.
- Control any light source, including full-conduction non-dim.

### Models available for:

- 100-127V, 220-240V (non CE), 230V (CE), and 277V.
- 3 to 144 circuits.
- Different feed types and breakers.

### GP Dimming Panels work with:

- GRX-4000 Control Units
- GRAFIK 5000 and 6000 Systems
- LP Dimming Panels
- XP Softswitch™ Panels
- DMX512 dimming systems via the 2LINK™ option.

### Get a Panel Fast!

LISA (Lutron Integrated System Advantage)  
Program ships standard Panels 3 to 5 working days from receipt of approved drawings.

## NEW... seeTouch™ Wallstations

For GRAFIK Systems and HomeWorks Interactive Systems

MODEL NO. SGRX-4S-NL-BL

### **Big, backlit buttons**

Easy to find and press – even in a darkened AV presentation room. Buttons select preset lighting scenes or turn lights off.

### **Engraving on buttons**

Easy to use – the labels show what each button does. Easy to specify, too – simply order labeled buttons.

### **Optional Built-in infrared receiver**

Occupants can use a handheld Wireless Remote Control to

- Change scenes
- Temporarily adjust light levels
- Turn lights off

### **Optional Raise/Lower buttons**

For fine-tuning lighting

### **Colors/Finishes**

Faceplate and matching buttons are available in a variety of plastic colors. Metal finishes are also available.

### **Field Configurable Buttons**

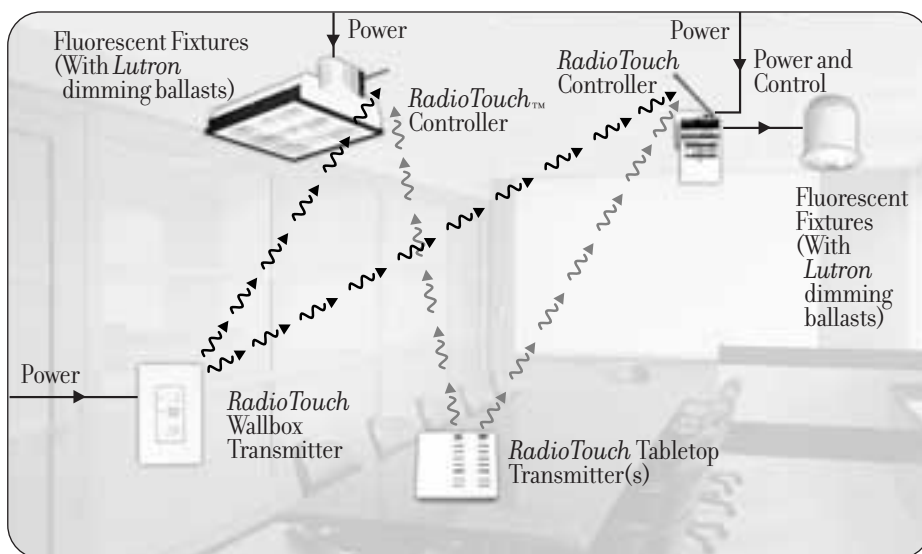

Just swap buttons and faceplates to change control

Consult Lutron for exact model numbers and detailed mounting and wiring information. 1-800-523-9466 [www.lutron.com/seetouch](http://www.lutron.com/seetouch)

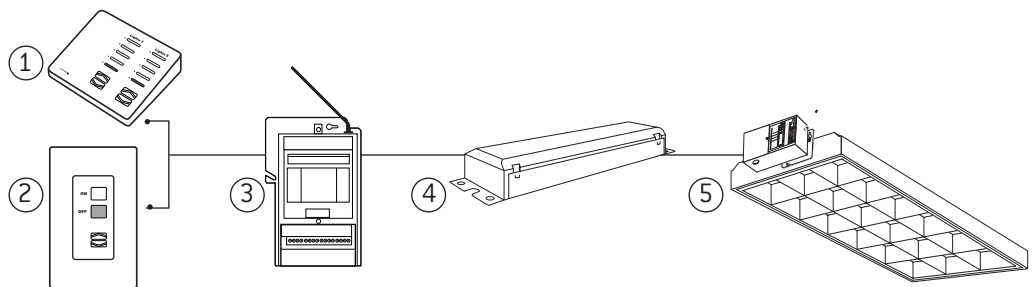

<b>JOB NAME:</b>  <b>JOB NUMBER:</b>	<b>MODEL NUMBERS:</b>

# SYSTEM OPERATION

## RADIOTOUCH™

By simply pressing buttons on a *RadioTouch* transmitter, radio frequency signals are sent to *RadioTouch* Controllers housed in the ceiling. These Controllers then send signals to *Lutron* dimming ballasts adjusting the light levels and also send signals to optional motorized window treatments and projection screens to adjust window treatments or screen levels. Add up to 16 transmitters in the room to meet your flexibility needs.

- ① *RadioTouch* tabletop or security mounted transmitters can be placed anywhere in a room.
- ② *RadioTouch* wallbox transmitters can replace any wall switch.
- ③ One Controller is required per lighting zone. The same Controllers are used to control motorized window treatments and projection screens.
- ④ Equip fluorescent lighting fixtures with *Lutron* 1% *Hi-lume*® dimming ballasts.
- ⑤ *Lutron* dimming ballasts can be installed in existing fixtures or can be ordered pre-installed in a *Lutron* fixture.

# CONTROLLERS

Controllers for lights, window treatments and projection screens

Switches one lighting zone, plus occupant sensing (requires sensor); can be fixture or junction box mounted

**RTA-RX-SW<sup>1</sup>**

- One required per lighting zone
- Accepts inputs from occupant sensors
- Operates at 120/277V
- Switches 16 Amps of high inrush lighting load

Regulates one lighting zone, plus occupant and daylight sensing (requires sensor); can be fixture or junction box mounted

**RTA-RX-F<sup>1</sup>**

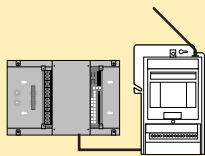

- One required per lighting zone
- Controls *Lutron Hi-lume*®, *Eco-10*™, and TVE ballasts directly
- Controls *Lutron Tu-Wire*® ballasts, incandescent and magnetic low voltage sources through an FDI Load Interface.
- Accepts inputs from occupant sensors and a daylight sensor
- Operates at 120/277V
- 16A continuous dimming capacity

Regulates one lighting zone, plus occupant and daylight sensing (requires sensor), and switch closure outputs; can be fixture or junction box mounted

**RTA-RX-F-SC<sup>1</sup>**

- All functions of RTA-RX-F plus the features below
- Controls *Sivoia*™ Motorized Window Treatments directly
- Provides up to five momentary output switch closures to *GRAFIK Eye*® products or equipment by others.

Includes one RTA-RX-F-SC and one WC-4M-GC for control of AC Motorized Window Treatments and projection screens

**RTA-RX-F-SC-ACM**

- All functions of RTA-RX-F-SC plus the features below
- Provides group control of up to 4 AC Motorized Window Treatments
- Additional motorized window treatments can be controlled by adding more WC-4M-GC or WC-1M-GC group controls

<sup>1</sup> Available in 347 Volt models

## LOAD INTERFACES\*

\*All load interfaces operate at 120 Volts

Load interfaces for control of lights, window treatments and projection screens

Interfaces for incandescent, magnetic low voltage, electronic low voltage and *Lutron Tu-Wire* ballasts

**FDI-INC-2000<sup>2</sup>**

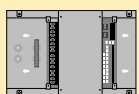

- Connects *RadioTouch*™ Controller to an incandescent or magnetic low voltage lighting circuit; 2000W capacity

**FDI-ELV-1000<sup>2</sup>**

- Connects *RadioTouch* Controller to an electronic low voltage lighting circuit; 1000VA capacity

**FDI-FTU-16A-120<sup>2</sup>**

- Connects *RadioTouch* Controller to one *Tu-Wire* ballast fluorescent lighting circuit; 16A capacity

Interface to AC Motorized Window Treatments and projection screen motors

**WC-4M-GC**

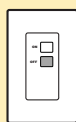

**WC-1M-GC**

- Provides individual or master control of one or up to four AC Motorized Window Treatments or projection screens
- Add to RTA-RX-F-SC-ACM for control of additional AC Motorized Window Treatments

# WALLBOX TRANSMITTERS\*

\*All Wallbox transmitters operate at 120/277 Volts

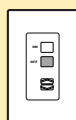

## Wallbox transmitters for control of lights

On/Off control of one or more switched lighting zones

**RTA-WX-2BSW-WH<sup>1</sup>**

- Use in multiples for multi-location switching
- Can communicate with multiple Controllers for master control of multiple lighting zones

On/Off and Raise/Lower control of one or more dimmable lighting zones

**RTA-WX-2B-WH<sup>1</sup>**

- Use in multiples for multi-location dimming
- Can communicate with multiple Controllers for master control of multiple lighting zones

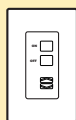

Four preset levels plus Off and Raise/Lower control of one or more dimmable lighting zones

**RTA-WX-5B-WH<sup>2</sup>**

- Use in multiples for multi-location control
- Can communicate with multiple Controllers for master control of multiple lighting zones

## Wallbox transmitters for control of *Sivoia*<sup>TM</sup> Motorized Window Treatments

Open/Close and Raise/Lower control of one or more *Sivoia* Motorized Window Treatment zones

**RTA-WX-S2LB-WH<sup>1</sup>**

- Use in multiples for multi-location *Sivoia* Window Treatments
- Can communicate with multiple Controllers for master control of *Sivoia* Motorized Window Treatment zones

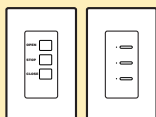

Three presets plus Open/Close and Raise/Lower control of one or more *Sivoia* Motorized Window Treatment zones

**RTA-WX-S5SB-WH<sup>2</sup>**

- Use in multiples for multi-location *Sivoia* Window Treatments
- Can communicate with multiple Controllers for master control of *Sivoia* Motorized Window Treatment zones

## Wallbox transmitters for control of AC Motorized Window Treatments and projection screens

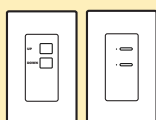

Open/Close/Stop control of one or more AC Window Treatment zones

**RTA-WX-C3LB-WH<sup>1</sup>**  
(large buttons)

**RTA-WX-C3SB-WH<sup>2</sup>**  
(slim buttons)

- Use in multiples for multi-location AC Window Treatments
- Can communicate with multiple Controllers for master control of AC Window Treatment zones

Up/Down control for one or more AC motorized projection screens

**RTA-WX-C2LB-WH<sup>1</sup>**  
(large buttons)

**RTA-WX-C2SB-WH<sup>2</sup>**  
(slim buttons)

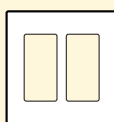

- Use in multiples for multi-location AC motorized projection screen control
- Can communicate with multiple Controllers for master control of multiple projection screen zones

# CLARO<sup>®</sup> WALLPLATES

## General Description

Lutron's microPS™ Photosensor provides automatic daylight control input to dim fluorescent lighting in response to changing daylight.

The Photosensor works with Lutron's microWATT® Lighting Controller, which integrates signals from it and other sensors, controls or building automation system inputs to automatically control lighting to the lowest level required.

## Photosensor Available Model

**MW-PS-WH** (White)

## Photosensor Features

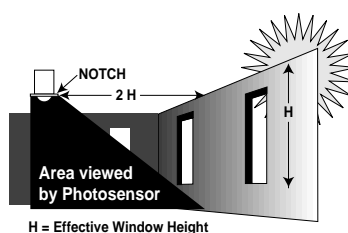

- Provides input to automatically dim fluorescent lights when available daylight is high, and raise fluorescent lights when available daylight is low
- Easily calibrated for daylight sensitivity
- Compatible with Lutron microWATT Lighting Controllers and Hi-lume® and Eco-10™ Dimming Ballasts
- Low voltage Class 2 wiring for simplified installation
- Simple ceiling tile mounting with one 2 inch (50mm) hole; all hardware provided

## Specifications

1. Provide Photosensor from a supplier with more than 25 years experience manufacturing electronic switches, fluorescent dimming controls, and electronic dimming ballasts.
2. Manufacturer shall take sole responsibility for the Photosensor, lighting controller, dimming controls and dimming ballasts.
3. Manufacturer shall provide a toll-free phone number, with 24 hour emergency access, to specifically service technical and application questions.
4. Manufacturer shall have ISO 9001 quality certification and factory employed service engineers.
5. The Photosensor shall provide open loop feedback to the lighting controller.
6. The Photosensor shall provide a Class 2 low voltage signal.
7. The Photosensor shall be color and spatially corrected and provide a true representation of changes in perceived lighting levels.
8. The Photosensor shall be partially shielded for accurate detection of available daylight.
9. The Photosensor shall have a 60° from vertical viewing angle for accurate daylight averaging.
10. The Photosensor's output shall remain stable over time and temperature from 0° to 40° C.
11. The Photosensor shall provide a linear response from 0 to 500 footcandles.
12. The Photosensor shall work in conjunction with a Lutron microWATT Lighting Controller, which shall provide remote calibration adjustment.

## Photosensor Placement and Sensitivity

For average size areas

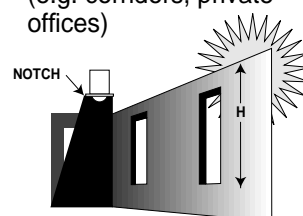

H = Effective Window Height

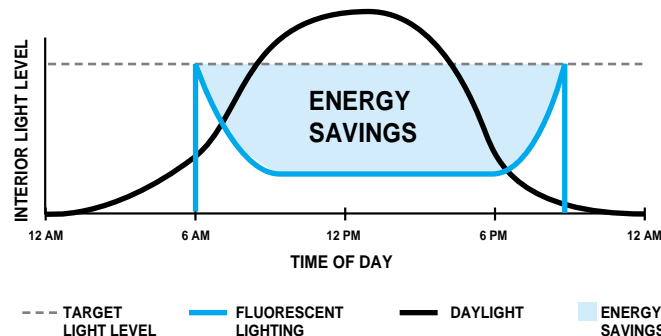

Place Photosensor two times window height from outside wall, and so that viewing area does not extend out of a window. Point notch as indicated.

Do not position Photosensor in the well of a skylight or above indirect lighting fixtures.

For narrow areas  
(e.g. corridors, private offices)

Point notch away from window when Photosensor can not be placed 2H away from window.

# LS-301 Dimming Photosensor

Automatic dimming based on ambient light levels

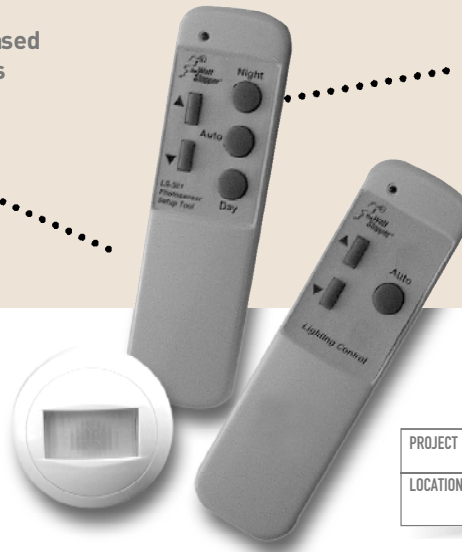

Controls standard 0-10 VDC electronic dimming ballasts

All setup performed remotely with handheld

Optional occupant adjustment via handheld remote

Single zone control

Closed loop daylighting control

PROJECT

LOCATION/TYPE

## Product Overview

### Description

The LightSaver LS-301 is a ceiling mount, low voltage indoor photosensor that works with standard, 0-10 VDC electronic dimming ballasts to dim lighting as daylight increases.

### Operation

The LS-301 mounts on a ceiling and utilizes a spectral filtering system to measure daylight and electric light levels. A closed loop daylighting system, the LS-301 measures the total light level from daylight and electric light in the controlled area to adjust electric lighting levels. As the daylight contribution increases, the lights dim down. The photosensor utilizes sliding setpoint control, which responds to the different spatial distribution qualities of electric light and daylight. The LS-301 calculates the required light level for current daylight contribution based on two setpoints. One represents the target level when no daylight is present (night setpoint) and the other when significant daylight is present (day setpoint).

### Adjustment via Handheld Remote Control

All LS-301 adjustments are made with one of two handheld remotes. The LSR-301-S provides five buttons for initial set-up, which is easily completed by first raising or lowering electric light levels to desired levels, then programming this target level into the photosensor. The LSR-301-P provides three buttons for occupants to adjust light levels. With this optional tool, users can increase target light levels by up to 25% or reduce them to the lamp/ballast minimum level. Pressing the "Auto" button returns the control to programmed levels.

### Applications

The LS-301 is designed to blend into its surroundings when installed in any environment. It provides one zone of daylighting control in a private office or classroom. In these applications, the LS-301 can be combined with an occupancy sensor. Often, it is possible for the LS-301 to share a single power pack with occupancy sensor(s).

## Features

- Provides precise control of lighting to maintain desired light level
- Extremely linear photocell response with greater than 1% accuracy
- Designed to measure light as the human eye perceives it, eliminating "overreporting" illumination levels provided by daylight

- Separate handheld remote controls for setup and occupant adjustment to prevent tampering
- Boosts energy savings by reducing maximum lamp output, often resulting in a 20% reduction or more compared with lights at full output
- Achieves lumen maintenance by holding target light level as lamp output decreases over time

# LS-301 Technical Information

## Specifications

- Full range dimming: .2 VDC (minimum) to 10 VDC (100% lighting) output voltage
- Current consumption: 30 mA @ 24 VDC
- In typical applications, setpoints are adjustable from 20-60 footcandles (210-640 lux)
- Controls up to 50 standard dimming ballasts in one zone
- Sensor leads: gray and violet to ballast, red and black to 24 VDC
- Dimensions: 2.35" diam. x 0.875" depth (60mm x 22mm), threaded piece extends 1.25" (31.8mm) from back, fits .5" knockout
- 5 year warranty

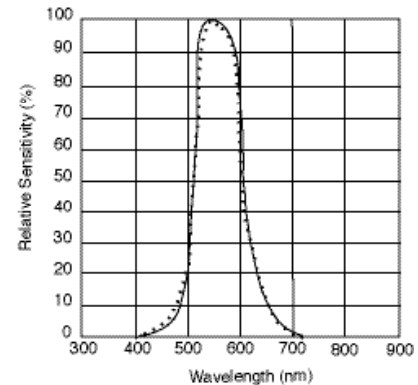

## Product Controls

### Remote Controls

Remote handheld (above left) enables easy set-up while optional occupant remote provides adjustability for individual lighting preferences.

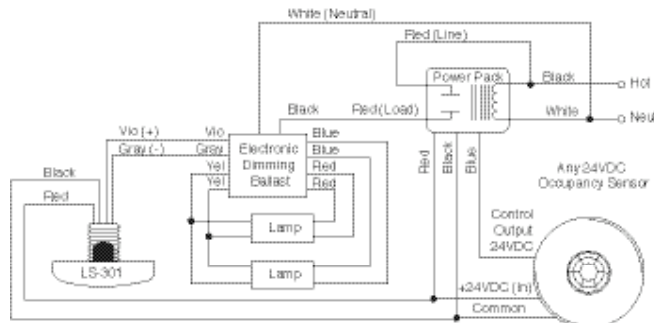

### Spectral Response Curve

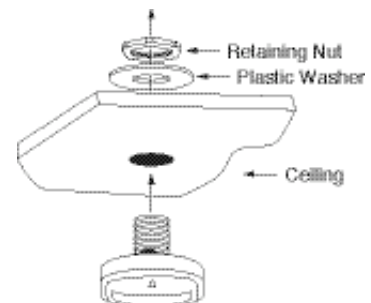

The spectral response of the LS-301 photocell closely matches the sensitivity of the human eye.

## Wiring & Installation

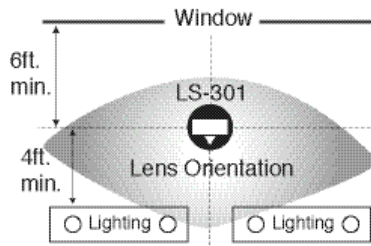

### Wiring

### Mounting and Installation

## Coverage

### Placement Guidelines

- Mount photocell between 6 and 12 feet (1.8m - 3.7m) from window.
- Do not mount directly above direct/indirect pendant fixtures. Mount at least 4 feet (1.2m) from pendant fixtures.

## Ordering Information

Catalog No.	Description	Output Voltage
LS-301	Dimming Photosensor	.2 VDC (min.) to 10 VDC (max.)
LSR-301-S	Setup Remote Control (2 AAA batteries included)	
LSR-301-P	Occupant Remote Control (2 AAA batteries included)	

# WT Ultrasonic Occupancy Sensor

*Ultrasonic technology  
with 32 KHz frequency*

*Utilizes advanced,  
omni-directional,  
Doppler technology*

*Advanced Signal  
Processing automatically  
adjusts detection threshold*

*User-adjustable DIP  
switch time delay and  
sensitivity settings*

*600, 1100, 2200 sq ft  
and hallway coverages  
available*

*Isolated relay allows sensor  
to interface with building  
control systems*

## Product Overview

### Description

The Watt Stopper WT sensors are advanced ultrasonic occupancy sensors with a 32 KHz frequency. The sensors are available in several models to control lighting in a wide variety of applications.

### Operation

The 24 VDC ultrasonic sensors utilize advanced, omni-directional, Doppler technology. When an ultrasonic sensor detects movement in a controlled area, it switches lighting on through a Watt Stopper power or auxiliary pack. The sensor controls the power pack through low voltage wiring. Once the area is vacated and the time delay has elapsed, lighting systems automatically switch off.

### Advanced Signal Processing

The sensors use The Watt Stopper's Advanced Signal Processing (ASP). ASP filters out moving air noise by checking for small cyclical changes found in turbulent air. This helps to eliminate false ON problems found in sensors without ASP.

### Applications

WT sensors offer excellent control of lighting for many areas of a building. The sensors are designed to effectively control offices, restrooms, storage areas, and open office areas and can control large partitioned office spaces when configured in zone patterns. The WT can be used with Watt Stopper AS-100 Automatic Control Switches to achieve manual-on/auto-off function when auto-on is not desired. The WT sensors' superior performance and ease of installation will provide fast paybacks and many years of energy savings.

## Features

- Advanced Signal Processing Circuitry helps to eliminate false ONs
- Utilizes advanced, omni-directional, Doppler technology for reliable occupancy detection
- Angled transmitter and receiver pairs help optimize sensitivity while eliminating unwanted detection from ceiling air movement
- Coverage ranges from 600 to 2200 square feet and 90 linear feet (for hallways)
- Isolated relay can interface with HVAC, EMS, or with an additional lighting load
- DIP switch adjustable time delay and sensitivity
- LED indicates occupancy detection

# WT Technical Information

## Specifications

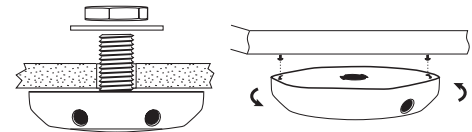

- Solid state, crystal-controlled (32.768 kHz  $\pm$  0.002%)
- Omni-directional transmission (360° coverage)
- Temperature and humidity resistant 32 kHz receivers
- Digital DIP switch time delay (15 seconds to 30 minutes)
- Isolated relay with N/O and N/C outputs; rated for 1 Amp @ 30 VDC/VAC
- Units per power pack: WT-605: up to 4 (B), up to 5 (BZ). WT-600: up to 3 (B), up to 4 (BZ). WT-1105, WT-2205, WT-2255: up to 3 (B), up to 5 (BZ). WT-1100, WT-2200, WT-2250: up to 2 (B), up to 3 (BZ).
- Dimensions: 4.8" diameter x 1.5" (122mm x 38mm)
- UL and CUL listed; Five year warranty

## Wiring, Installation & Placement

### Wiring & Controls

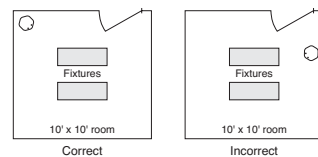

### Installation

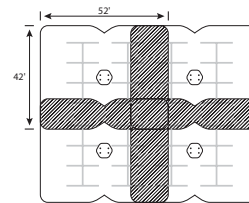

Attached to a vibration-free surface. Mount the sensors with the receivers facing the area of coverage. Note: Place 4' away from supply ducts, 6' from horizontal discharge ducts, and 6" from power packs.

### Enclosed Office Placement

For enclosed spaces, place sensors as in Figure A. Sensors placed as in Figure B may see out the door and cause false triggers.

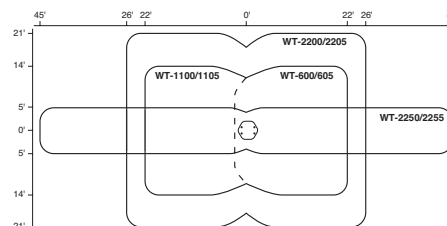

### Open Office Placement

For open office spaces, the WT-2200 is typically used because of its 360° coverage and capability to bounce ultrasound off of partitions, walls, floors and other reflecting objects. A typical layout place the sensors so they control the area in zones that overlap.

## Coverage & Settings

### Coverage

Coverages shown represent half-step walking motion. Actual coverages can vary for each application depending on the shape and use of space and the obstacles present.
