TABLE OF CONTENTS

SAFETY PRECAUTIONS

Please read the following safety guidelines before using the device.

- Do not use the phone while you are driving.

- Do not place magnetic storage media near your phone. Radiation from the phone may erase the information stored on them.

- Keep your phone and its accessories away from children.

- Mobile phones can interfere with the functioning of medical devices such as hearing aids or pacemakers. People having active medical implants should keep their cell phone at least 15 cm away from the implant.

- Permanent hearing loss may occur if you use earphones or headphones at high volume.

- Use a wireless hands-free system (headphone/ headset) with a low power Bluetooth emitter.

- Make sure the cell phone has a low SAR.

- Keep your calls short or send a text message (SMS) instead. This advice applies specially to children adolescents and pregnant women.

- Use cell phone when the signal quality is good.

Notice:

- Do not dismantle the device or accessories otherwise, manufacturer is not liable to pay for damages as the device and accessories are not covered by warranty.
- Use only original batteries and charging devices.
- Please back up your important data timely and keep them properly. The company is not liable for any failure to call or loss of data due to mis-operation, poor signal or power cut, etc.
- All the screens in this manual are for reference only, and some contents actually displayed may depend upon the presetting of the service provider or the network operator, or the SIM card. If any functions referred to in this manual are different from those of your device, please follow your device.
- Do not put use it in a place with flammable gas such as a petrol pumps. The temperature recommended for using the device is 5-35℃. Do not touch the charger, power cable or socket with wet hands. This may cause an electric shock.

SAR (Specific Absorption Rate)

Your device conforms to the Indian guidelines for exposure to radio waves. The limits are given in terms of a unit referred to as the Specific Absorption Rate (SAR), which is a measure of the amount of radio frequency energy absorbed by the body when using a mobile phone. The SAR value as per the Indian guidelines standard is 1.6 watts per kg (Watt/kg), averaged over a 6 minutes period and taken over a volume containing a mass of 1 gram of human tissue. The highest SAR value of this device when tested is maximum **1.123 Watt/kg**. You can check the SAR value of your handset by pressing ***#07#.**

UNDERSTANDING YOUR DEVICE

General Information

Your device encloses features, such as **Digital Camera, Video Player, Audio Player, FM Radio** etc. The SIM card inserted in the slot1 is called Master SIM, and other one in the slot2 is known as Slave SIM.

Technical Specifications

Battery	LI-Ion 850mAH
Charger	Input: AC100V~240V/50Hz~60Hz/0.15A Output: DC5.0V/500mA
Dimensions	119mm*14.4mm*13.9mm
Weight	82 g
Screen	1.8 inches/4.6cm/QQVGA/128*160
Standby Time*	7 Days
Maximum Talk Time *	8 Hours

*** The standby time and maximum talk time depend upon the network signals and settings.**

Device Overview

Position of Keys

End/Power Key	End an ongoing call. Press and hold this key to turn on or off the device.
Navigation Keys	In the editing mode, use the keys to move the cursor. In the standby mode, press the keys to access the function assigned to these keys.
Keypad	Use to enter numbers, letters and special characters. In the standby mode, long press 0 Key to switch on the FM Radio. Press RSK and # key to lock/unlock keypad. Long press * key to switch on the torch.

Status Icons

The table below lists various icons that might appear on the status bar while using the device. Apart from the icons for signal strength level and the power, other icons are displayed as per the current mode and priority of the device.

Icon	Description
	Indicates the network signal strength of Master SIM.
	Indicates the network signal strength of Slave SIM.
	Indicates the current battery capacity.
	Indicates that there is an unread SMS in Master SIM.
	Indicates that there is an unread SMS in Slave SIM.
	Indicates that there is a missed call in Master SIM.
	Indicates that there is a missed call in Slave SIM.
	Indicates that Alert type of current profile is Only Ring.
	Indicates that the current profile is Headset mode.
	Indicates that alarm clock is set as activated.
	Indicates the current keypad-locked state.

GETTING STARTED

Please switch off your device before inserting or removing the battery/SIM card or memory card.

Installing SIM Card and Battery

Your device is provided with two SIM slots for two different SIM cards. The SIM card inserted in the slot1 is called Master SIM, and the other one in the slot2 is known as Slave SIM.

- Remove the back cover of the device.
- Hold the phone with the front facing downwards; pull the cover.
- Insert the SIM cards and battery in the device.
- Attach the battery.
- Push the battery cover until it clicks into place.

Installing Memory Card

Your device supports T-Flash card, which is a multimedia memory card used to multiply the memory of the device. The T-flash card is small and should be pulled out and installed carefully and prudently in order to avoid any kind of damage.

- Switch off your device.

- Remove the battery cover.
- Slide the T-Flash card into the slot.
- Attach the battery.
- Push the battery cover until it clicks into place.

Charging the Battery

The device prompts a warning tone and message stating insufficient battery when the battery power of your device is low.

Please follow the instructions mentioned below to charge your device:

- Plug the connector of the charger into the jack of the device.
- Plug the charger into a standard AC wall outlet.

Note: When ☐ is shown on the screen, it indicates that there is not enough power and you should now charge your device. When charging is complete, the battery icon will stop flashing. You must fully charge the battery before using the device for the first time. It is recommended to charge the battery for four hours before using the device for the first time. If the device is turned on during charging, you can still make or answer calls, but this will consume battery power, thus will extend the charging time of the device.

Switch On/Off the Device

To turn on/off the device, press and hold the **End/Power Key.** If you have enabled the SIM Lock function then enter the PIN code (4 to 8 digits secret code of your SIM card). It is preconfigured and provided

to you by your network operator or retailer. If you enter an incorrect PIN code 3 times in succession, your SIM card will be locked. To unlock it, you must obtain a code from your network operator.

Automatic Customer Registration

After 4 hours of usage a SMS from the device will be sent automatically for the customer registration. *Note: standard SMS charges apply.*

BASIC OPERATIONS

To Make Calls

If the icon   appears on the screen, then you can make or receive calls.

- Input the phone number (should affix the international/ national/regional code or district code if necessary) and then press the Master/Slave SIM key to make a call.
- You can select a number from Contacts and call the Contacts person.

Tip: The signal strength may influence the quality of connection.

To Dial International Number

Your device supports dialing the international emergency phone number, such as 112. With the device, you can dial an emergency

call in any country or region under the normal situation regardless of SIM card inserted when the device is located within the coverage of the GSM network. Input the emergency phone number and press **Master/Slave SIM Key** to dial. The device will select the main network automatically after powered on if it is located within the coverage of the main network. The device can use other network, called as roaming, if the device is not located within the coverage of the main network when the network operator protocol permits. You can dial or answer a call when the symbol of the network operator appears on the screen.

Answer/Reject an Incoming Call

- Press **Call/Master SIM Key** to receive the incoming call. You can use the earphone to answer the call when the generic headset is inserted in the device.
- Press **End Key** to reject an incoming call.

Options during a Call

Press **<Options>** to use the following functions during the call:

- **Hold**: temporarily hold the current call.
- **End**: end the current call.
- **New call:** make a new call.
- **Phonebook**: access the Contacts menu.
- **Call logs**: view call logs.
- **Messages**: enter in the SMS menu.
- **Mute**: on/off the mute mode.

MAIN MENU

Menu guides you to the various applications, features and utilities available in your device. In the idle mode, press OK key to access the Main Menu. Use the navigation keys to choose the desired operation and press Ok to enter the selected operation.

Contacts	Messaging	Call logs
Multimedia	Mobile Internet	Settings
Organizer	Games	Internet

CONTACTS

Contacts menu refers to the directory wherein all the Contacts are stored in an alphabetical order. You can view, edit, delete, send message and perform various other functions on each contact of your phonebook.

Add New Contact

You can visit **www.si2imobility.com/spicemobiles/** for additional information, downloads and services related to your Spice handset.

For further assistance or queries, you can call on SPICE customer care number **011-42921000** or mail at **customercare@smobility.in or product@smobility.in.**

Note: After sales service of the device is confined to the country in which the purchasing is done.

ENVIRONMENTAL CONCERN

Help us save Our Environment...GO GREEN..!!

All our endeavors are directed towards providing environment friendly products to you. The material used in our devices are recyclable and can be reused to make new products. We strive to make products that are safe for our consumers as well as the environment. Come join hands with us and make world a better place to live.

Preserve natural resources for future generations by recycling your phone. The phone contains some metals, when recycled properly; these can be put back into circulation, decreasing the need for new metal mining. Recycling reduces the need for raw materials, saves energy, helps mitigate Global Warming and reduces pollution, reduces waste products in landfills; therefore preserving natural resources for the future and saving the planet.

Follow some simple steps and contribute towards saving the planet.

DOs

- Recycle your handset and its accessories.
- To protect natural resources and to promote re-use of the material, kindly separate batteries from other type of waste.

DONTs

- Do not dispose off your mobile and its battery in fire.
- Do not dispose your mobile with the regular waste.
- Do not over charge your handset. Remove the charger when battery is full.

    Don't trash your phone, instead RECYCLE it

This logo signifies that this product and/or its consitituents should not be disposed off with other household waste.

Hazards of Improper handling, accidental breakage, damage and /or improper recycling of hazardous elements

If this product is improperly handled, broken or damaged or carelessly recycled or disposed off in the fire, can result in environmental and data security concerns, including the following:

- Affect nearly every system in the human body and result in birth defects, brain, heart, liver, kidney and skeletal system damage. They will also significantly affect the nervous and reproductive systems of the human body ;
- When burned, create cancer-producing dioxins which are released into the air we breathe ;
- If thrown in landfills, may leach into groundwater affecting your local community ;
- In warm climates, the oxidation of mercury in the environment can be accelerated, leading to the creation of oxidized Hg atoms that are known to be associated with ozone depletion; and
- Improper recycling additionally results in data security issues, as private electronic information remains on hard drive, if not properly removed before disposal.

How to Recycle

Please get your electronics products recycled only through authorized recyclers, approved by Pollution Control Board. We provide facility of recycling of our products. For details of our collection centers, please visit our website or call our customer care. **Help us to GO GREEN.**

Constitution of Hazardous Elements in your Device:

Your device does not contain the following hazardous elements in a proportion higher than the limits provided hereunder:

- maximum concentration value of 0.1% by weight in homogenous materials for lead, mercury, hexavalent chromium, polybrominated biphenyls and polybrominated diphenyl ethers ; and
- maximum concentration value of 0.01% by weight in homogenous materials for cadmium.
