Advanced series of full-function keypads that give complete control to wet fingers!

Aeware's new series of keypads features a high profile with a large LCD display, menu-driven interface and raised keys that let users easily control all in.xm functions and programming directly from spa side, creating a true and unique user experience.

Main Functions

- Start Pump 1
- Start Pump2
- Start Pump3
- Start Light
- Starting Blower
- Starting Superjet Blower
- Economy Mode
- Standby Mode
- Display Time
- Progress Bars

This menu allows control of all pumps, blower and spa light, as well as the activation of the Economy and Standby modes. Every time a device is on, its animated icon is displayed. All pump activity can be stopped at once by activating the Standby mode.

- Press Mode key to display the mode Selection window.

- Select Spa to view Spa menu.

Starting Light

- Select Light key to turn light on.
- Select Light key again to turn light off.

(120 minute built-in timer)

Starting Pump 1

- Select Pump 1 to turn Pump 1 on.
- Select Pump 1 repeatedly to control pump 1 speeds.

(20 minute built-in timer)

Starting Pump 2 *

- Select Pump 2 to turn Pump 2 on.
- Select Pump 2 once more to turn pump 2 off.

(20 minute built-in timer)

Starting Pump 3 *

- Select Pump 3 to turn Pump 3 on.
- Select Pump 3 once more to turn pump 3 off.

(20 minute built-in timer)

Next menu page

- Press Next key to display the next page in the spa menu.

Goes to blower option

Starting Blower 1 *

- Select Blower to turn Blower on.
- Select Blower once more to turn blower off.

(20 minute built-in timer)

Starting Superjet Blower 2 *

- Select Blower to turn Blower on.
- Select Blower once more to turn blower off.

(20 minute built-in timer)

Standby Mode

Stops all pumps at the same time by a simple click of a button!

- Select Standby to activate this mode.
- Select Standby to again to resume normal operations.

System automatically returns to Normal mode after a certain period of time, unless the Standby mode has been reactivated.

Spa light will flash for a few seconds before the exit of Standby mode and restart the pumps. The "Standby" message is also displayed during Standby mode.

* Pump will stay turned on if there is a request for more heat.

Displaying time

- Press Ok key to display the time.
- Press Ok key a second time to go back to water temperature display.

Viewing active progress bars

A progress bar is a visual indicator of the time remaining before a device is turned off or before the end of the Standby mode. Only one bar is displayed at the time.

- Use Left or Right keys to visualize the progress bar of each activated device.

* optional item

Programming

- Filter cycles
- Economy Mode
- Reminders
- Warnings

Programming spa system

To program the filter cycle, you must enter these parameters: start time, duration and frequency. During a filter cycle, pumps run for one minute to purge the plumbing, then Pump 1 runs for the programmed number of hours.

- Press Mode key
- Select Options menu
- Select Spa sub-menu
- Select Filter option

Setting filter cycles start time

The display will show the starting hour previously set.

- Use (+) or (-) key to select hour setting.
- Use Right key to set minutes.
- Use (+) or (-) key to change minutes.
- Select Next arrow on screen menu to go to the next parameter: filter cycle duration.

Setting cycle duration

Here we set a value for the filter cycle duration, in hours and minutes.

- Use (+) or (-) key to set hour setting.
- Use Right key to set minutes.
- Use (+) or (-) key to change minutes.
- Select Next arrow on screen menu to save changes and go to the next parameter: filter cycle frequency.

Setting filter cycle frequency

Here we set the number of filtering cycles that the system will perform per day.

- Use (+) or (-) key to select frequency setting.
- Select Enter option on screen menu to save changes and go back to spa options main menu.

Setting Onzen cycles start time

The display will show the starting hour previously set.

- Use (+) or (-) key to select hour setting.
- Use Right key to set minutes.
- Use (+) or (-) key to change minutes.
- Select Next arrow on screen menu to go to the next parameter: Onzen cycle duration.

Setting cycle duration

Here we set a value for the onzen cycle duration, in hours and minutes.

- Use (+) or (-) key to set hour setting.
- Use Right key to set minutes.
- Use (+) or (-) key to change minutes.
- Select Next arrow on screen menu to save changes and go to the next parameter: onzen cycle frequency.

Setting onzen cycle frequency
