## I. Safety Precautions

To use your phone safely and effectively, please read the following information before use:

 Please turn off your phone when you are near a chemical plant, a gas station, an oil depot or other explosives.

 To ensure safety, please use earphone during driving; Otherwise, unless emergency, make a call after parking your car by the roadside. **DO NOT** use the phone during driving at high speed.

 Do not use your cell phone while in a plane. Please check whether Flight mode is set or not before boarding.

 Do not use your cell phone in a hospital to avoid interference with the normal operation of medical equipment which may result in a medical accident. If the cell phone is used near a pacemaker, audiphones and some medical electronic equipment, you should pay special attention that the cell phone may interfere with these devices.

 Auxiliaries and accessories not provided by us are excluded from the guarantee.

 Do not dismantle your cell phone by yourself. In case of a failure, please contact the service station specified by us. Only qualified person may install or repair this product.

 The phone should be charged in the environment which is well-ventilated, and should be kept away from inflammable substances and explosives. To avoid demagnetization, please keep your phone away from magnetic substances, such as magnetic disk, credit card, etc.

 Please be sure the phone isn't exposed to any liquid. In Case this situation occurs, please remove the battery and contact the service station specified by us. Please use your phone in the environment which is neither too hot nor too cold, do not expose your phone in strong sunlight and in high-humidity environment.

 All wireless devices may be susceptible to interference, which could affect performance.

 Your cell phone has photo and record functions, please use these functions following the related laws and regulations. You may violate the laws and regulations if you take photos and record without authorization.

**Note:**

- Do not dispose the worn battery as common domestic rubbish. Please dispose the worn battery according to the specified instructions where the disposal of a worn battery is clearly specified.
- The Company will not undertake any responsibility for any consequences caused by

failure to observe the above-mentioned suggestions or improper applications.

- If any content described in this manual goes against that of your cell phone, it is subject to the real cell phone.

## II. Cell Phone Outline

### **III. Operation of menu functions**

In the standby mode, select **Menu** and the desired menu and submenu. Select **Exit** or **Back** to exit the current level of menu. Press the end key to return to the standby mode directly.

#### **1. Call Center:**

Your mobile phone will automatically store the information of call history so as to facilitate viewing; you can call phone number in the call history; it supports saving phone numbers in the call history into the phonebook, or adding it to the blacklist; supports deleting single item call history and rapidly delete all contents in call history list.

#### **2. Phonebook:**

You can add the new contact by selecting menu “Option->New”. You can save the contacts in the mobile phone and SIM card; it depends on the SIM card memory capacity. You can quickly see number from the phonebook; each Phonebook record in the mobile phone can match as many as two phone numbers, the phone can store as many as 500 pieces of phonebook record, the number of phonebook record that SIM card can store varies based on SIM card capacity; you can send short messages in phonebook; you can copy phonebook records between SIM card and mobile phone; it supports rapid deletion of phonebook records in the SIM card and the mobile phone.

### **3. Settings:**

This menu option lets you view and edit your phone base settings; SIM, Phone, display, user profiles, network and security settings. You can customize user profile option to set your desired ringtones or message tones. The default password for Phone lock, Privacy & Restore factory settings is “1234” you can personalize the password.

### **4. Multimedia:**

You can access your camera, video recorder/player, audio player, sound recorder and FM Radio. Your mobile phone can play MP3 music files as well as the music format of \*.wav, \*.mp3, etc. you can record sound or a call, the file generated by recording will be saved in \*.wav format, and stored under [Audio] sub-directory of the memory card as your inquiry. You can play videos with \*.MP4, \*.3GP formats. Also the phone has the FM radio option so you can play the FM radio channels as you want.

### **5. Messages:**

The SMS function is a network service. You may need to apply to the network operator first before you can send and receive a message. The phone supports saving short messages on the mobile phone for as much as 500 pieces, it can insert preset short messages on templates while writing a short message; you can view message storage capacity of SIM card and mobile phone as well as occupied space.

## **6. Organizer:**

Your mobile phone has various practical functions. It supports 3 alarms, calendar, calculator, E-book reader, etc. Another feature for the phone is the torch with its Strong light.

## **7. File manager:**

This menu enables you to access the File Manager, where folders or files in the memory card or the phone can be managed

**Caution:** You will lose all the data stored in the memory card after format.

## **8. Connectivity:**

Phone supports STK function (But it requires support from SIM card service provider). Connect to other Bluetooth devices to send / receive / share files.

## **9. Fun & Games:**

Fun & Games option lets you play game provided in the phone .

#### **IV. Application of USB storage function**

The phone can use USB function under switched off mode and switch on mode.

In switch off mode, when you plug in the USB cable, you need not select function; the phone can be connected to the PC and used as a USB Flash Disk. You can also use the USB cable as a charger.

In switch on mode, when you plug in the USB cable, you need to select the “Mass Storage” function; the phone can be connected to the PC and used as a USB Flash Disk. You can also use the USB cable as a charger.
