Solution Ask for a key

Use the "**Add a Key**" button (screen1) on the homepage of the app. Choose your car, start and end time of your booking (screen2), and that's it! Your key will appear on your homepage (screen 3).

Connect to the car

When your key is active (screen 4—green indicator), simply press the key. The authentication screen shows the process (screen 5).

Fill-in the check-in

Before using the car, you must check current state of the car and add any potential new damages (screen 6). Pressing the "Open Doors" button will unlock them (if not automatically done).

Open and close the doors Start the engine

When you access your virtual key on your smartphone (screen 7), you can lock and unlock the doors. The green LED informs you that you are ready to go.

Extend your key

Are you expecting running out of time? Use the "Extend" button (screen 7) located at the bottom of the screen and extend your current booking. (screen 8).

Fill-in the check-out

When your booking is over, you need to fill in the check-out form. Check the state of the car and add any new damages (screen 9). A blue LED on the key (screen 10) will indicate you have further access to the car for a limited period of time (10min) but the engine will be secured.
