

Setting Up Email Accounts

Setting Up Gmail

1. Touch  in the home screen and select **Gmail**.  
**NOTE:** If another Gmail account is already set up, touch the **Menu Key > System settings > Add account**.
2. Touch Existing to sign in to your existing Google Account. If you have no Google Accounts, touch New to create one.
3. Follow the instructions on the screen to set up the account.

Setting Up Email

1. Touch  in the home screen and select **Email**.  
**NOTE:** If another email account is already set up, touch the **Menu Key > System settings > Add account**.
2. Enter the email address and password.
3. Touch **Next** and follow the onscreen instructions.

Setting Up Corporate Exchange Email

1. Touch  in the home screen and select **Email**.

- NOTE:** If another email account is already set up, touch the **Menu Key > System settings > Add account**.
2. Enter the email address and password.
  3. Touch **Manual setup > Exchange**.
  4. If necessary, edit **Domain\Username, Password,** and **Server** information.
  5. Read the onscreen activation disclaimer and, if prompted, touch **Next**.
  6. If prompted, touch **OK** to allow the server to remotely control some of your phone's security features.
  7. Configure the settings on the screen, such as **Days to sync**, and then touch **Next**.
  8. If prompted, touch **Activate** to activate the Email app as a device administrator.
  9. Identify your new account with a unique name and then touch **Next**.
- Contact your server administrator for more help.

Connecting With a Bluetooth Headset

1. Turn on the Bluetooth headset and switch it to pairing mode. Refer to the headset's user guide for more information.
2. Touch  in the home screen and select **Settings > Bluetooth**.

3. Slide the **ON/OFF** switch if Bluetooth is off. When Bluetooth is on, the  icon appears in the status bar.  
**NOTE:** Your phone automatically scans for and displays the IDs of all available Bluetooth devices in range. You could touch **SEARCH FOR DEVICES** if you wanted to scan again.
  4. Touch the ID of the headset, or any other device you want to pair with your phone. Enter a passcode if prompted.
  5. If necessary, touch the ID of the paired headset to connect with it. Once connected, the  icon in the status bar turns blue.
- TIP:** Touch the ID again to end the connection.

Installing Apps From the Google Play Store

There are tens of thousands of games and applications in the Google Play Store for you to download and install. You can send feedback or comments on an application. Before you begin, make sure that you have signed in to your Google account.  
**NOTE:** The content you can access in the Play Store depends on your region and your service provider.

1. Touch the **Home Key >  > Play Store**. The first time you launch **Play Store**, accept the Google Play Terms of Service.
2. Find the apps you need either by category or by touching .
3. Touch the app to see detailed description.
4. Touch **INSTALL** (free apps) or the price (paid apps). If the app is not free, you need to sign in to your Google Wallet account and select a payment method.  
**CAUTION:** Once installed, some apps can access many functions or a significant amount of your personal data. The Play Store will show you what the app can access. Touch **ACCEPT** to proceed, or touch the **Back Key** to cancel.
5. Wait for the app to be downloaded and installed automatically. Payment needs to be authorized before paid apps start downloading.

The app is successfully installed when the  icon appears in the status bar. You can find the new app after touching the **Home Key > .**

Taking a Photo

1. Touch  in the home screen and select **Camera**.
2. Aim the camera at the subject and make any necessary adjustment.

Number	Function
1	View photos and videos you have captured.
2	Capture a photo.
3	Switch to the camcorder or panorama camera.
4	Set color effect.
5	Set scene mode.
6	Change the camera settings.
7	Hold the dot and slide to zoom in or out.

3. Lightly touch  or press either end of the **Volume Keys** to take a photo.

Recording a Video

1. Touch  in the home screen and select **Camera**, or switch to the camcorder from the

- camera screen.
2. Aim the camera at the subject and make any necessary adjustment.

Number	Function
1	Change the camcorder settings.
2	View photos and videos you have captured.
3	Start or stop recording a video.
4	Switch to the camera or panorama camera.

3. Touch  to start and  to stop recording. You can also press either end of the **Volume Keys** to start and stop.

**TIP:** While the recording is in progress, you can touch the preview screen to save the frame as a photo.

Playing Music

1. Touch  in the home screen and select **Music**.
2. Touch a category, such as Artists or Albums, to find the song you want to play.
3. Touch the song to play it back. When the song is playing, touch the album artwork to display more options.

2. Choose one of the following options:
  - **USB mass storage:** Transfer files between PC and internal virtual SD card and external SD card on your phone.
  - **Connect to PC software:** Connect to PC to sync data and install apps via PC software.
  - **Media device (MTP):** Transfer media files on Windows, or using Android File Transfer on Mac.

Number	Function
1	Song and artist information.
2	Touch to toggle repeat mode: Repeating all songs, Repeating current song, Repeat is off.
3	Playback control. Skip songs or pause and resume playback. Drag the slider to jump to any part of the song.
4	Touch to open the current playlist.
5	Touch to add the song to the Favorite.
6	Touch to play the current playlist in shuffle mode, where tracks are played in random order.
7	Album artwork.

Connecting to PC

You can connect your phone to a computer with a USB cable and transfer music, pictures, and other files in either direction. Your device stores these files in internal storage or on a removable microSD card.

1. Connect your phone to a computer with a USB cable and then the **Connect to PC** screen pops up.

- **Camera (PTP):** Transfer photos using camera software, and transfer any files on computers that don't support MTP.
- **Share mobile network:** Turn on USB tethering and share your phone's mobile data with the PC.
- **Install driver:** Install the driver needed for connecting your phone to your PC.

To disconnect the device from the computer, simply unplug the USB cable when you're finished.

Connecting to the Internet

Connecting via Wi-Fi

1. Touch the **Home Key > Menu Key > System settings > Wi-Fi**.
2. Slide the ON/OFF switch if Wi-Fi is off. Your phone automatically searches for Wi-Fi networks in range and displays their names and security settings. Your phone also connects to previously linked networks when they are in range.
3. Touch a network name to connect to it. If the network is secured, enter a password or other credentials. (Ask your network administrator for details.)

Connecting via Mobile Network

To connect to the Internet via mobile network you

can use the default Access Point Names (APN). If you want to add a new APN, please contact the service provider to get the necessary information. Do not change the default settings unless instructed by the service provider. Otherwise the service might stop working.

1. Touch the **Home Key > Menu Key > System settings > More > Mobile networks > CDMA Network Settings > Access Point Names**.
2. Touch the **Menu Key > New APN**.
3. Touch each item to enter the information you get from your service provider.
4. Touch the **Menu Key > Save** to complete.

Connecting via Bluetooth Tethering

You can connect to a device that supports Bluetooth tethering to share the device's Wi-Fi or mobile data service with your phone.

1. Enable the device's Bluetooth and Bluetooth tethering capabilities. Make sure the device is 'visible'. Refer to the device's user guide for more information.
2. Touch  in the home screen and select **Settings > Bluetooth**.
3. Turn Bluetooth on and touch the device's ID to pair the phone with the device. Enter a passcode if prompted.

4. Touch the ID of the paired device to connect with it. As the  icon in the status bar turns blue, your phone is able to use data connection shared by the device.

Extending Battery Life

There are several things you can do to make your battery last longer.

- Turn on Wi-Fi, Bluetooth, GPS, mobile data, auto-sync only when you need to.
- Lower the screen brightness.
- Use Bluetooth tethering or USB tethering (when you have a cable) instead of portable Wi-Fi hotspot to share your phone's data service.
- From the home screen, touch  > **Task Manager** and close the apps you do not need but still run in the background.
- From the home screen, touch  > **Settings > Sound** and uncheck **Vibrate on touch**.

Freeing Up Memory Space

Use **Task Manager** to free up memory space and optimize system speed.

1. From the home screen, touch  > **Task Manager**.
2. Touch the **TASKS** tab and touch the  next to the application you do not need.

You can also touch **CLOSE ALL** to stop all running applications.

Managing the Phone Storage

Deleting Old Messages

You can manually delete old messages to free up some storage space. You may also set up auto deletion of the oldest messages when the limits are reached.

1. From the home screen, touch  > **Messaging**.
2. Touch the **Menu Key > Settings**.
3. Check **Delete old messages** to enable auto deletion.
4. Touch **Text message limit** or **Multimedia message limit** to set the maximum limit.
5. Touch **Set**.

Clearing Browser's Local Content

1. From the home screen, touch  > **Browser**.
2. Touch the **Menu Key > Settings > Privacy & security**.
3. Touch **Clear cache**, **Clear history**, and **Clear all cookie data**.

Product Safety Information

	Do not use hand-held while driving
---	------------------------------------

	Do not use while re-fuelling
	For body-worn operation maintain a separation of 15 mm
	This device may produce a bright or flashing light
	Small parts may cause a choking hazard
	Do not dispose of it in a fire
	This device may produce a loud sound
	To prevent possible hearing damage, do not listen at high volume levels for long periods.
	Avoid contact with magnetic media
	Avoid Extreme Temperatures
	Keep away from pacemakers and other personal medical devices
	Avoid any contact with liquid, keep it dry
	Switch off when instructed in hospitals and medical facilities
	Do not attempt to disassemble

	Switch off when instructed in aircrafts and airports
	Only use approved accessories
	Switch off in explosive environments
	Do not rely on this device for emergency communications

SAR

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg and the highest SAR value for this device when tested was 0.293 W/kg. As mobile devices offer a range of functions, they can be used in other positions, such as on the body. As SAR is measured utilizing the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum power required to communicate with the network.

E-Waste Management What is E-waste?

'E-waste' means waste electrical and electronic equipment (WEEE).

How harmful is e-waste?

E-wastes are considered dangerous, as certain components of some electronic products contain materials that are hazardous, depending on their condition and density. If improperly disposed, they can leach lead and other harmful substances into soil and groundwater.

Govt. of India vide notification dated May 12, 2011 has announced E-waste (Management and Handling) Rules, 2011 ("Rules").

According to these Rules, the consumer now has the legal responsibility to dispose of the waste electrical and electronic equipment (popularly known as "WEEE") in the prescribed manner and not by just throwing it into a dustbin or giving/selling it to scrap dealer.

V RECYCLE , is an initiative by ZTE where we recycle your old and no longer useful phones.

There are 3 easy steps to begin playing your part: Step 1: Grab your old and useless phone (or its accessories).

Step 2: Locate a ZTE Collection Point near you, available at [www.ztedevice.com](http://www.ztedevice.com) .

Step 3: Drop your old phone into the designated collection boxes.

Lets join hands today to celebrate the glory of nature earth & help in making it a better & healthier place for all of us.
