VideoCAM EYE

100K Pixel Internet USB Web Camera

Genius

Compatible with MSN Messenger,

Yahoo Messenger, AIM®

Transform your notebook computer into a round the world mobile video studio since **it's small enough to travel with you**. Or just stay in touch with family by adding video to your instant messages.

The 100K pixels image sensor provides a resolution of *352 x 288* pixels. Compatible with MSN Messenger, Yahoo Messenger and AIM®, VideoCAM EYE also has an "easy touch" snapshot button for quick image capturing with just one click. ***The smartly designed 360° adjustable base along with the zoom in/out function allows you to capture any movements around you with a lot more clarity.*** The most important thing is you can also use VideoCAM EYE as a security camera to help keep an eye on your surroundings when you're not around.

✴ **Easy touch snapshot button for quick image capture**

✴**Special ID design:**

Adjustable base swivels 360° smoothly

Camera rotates 120°

Base clips to notebooks
