4 Getting Started

Please read the safety instructions in the "Safety Information and Notices" section before use.

4.1 Inserting the SIM Card, Memory card and the battery

Remove the back cover

Make sure the phone is switched off. You need to remove the back cover of your phone before you can insert the SIM card and Memory card. Hold the phone with the front facing downwards; pull the battery cover downwards and lift the cover upwards to remove it.

Remove the battery

Put your finger on the black holder located at the bottom of the battery slot and lift the Battery up to remove it.

Insert the SIM card

Make sure that the clipped corner of the SIM card is facing the correct direction (clipped corner at top right) and the metallic contacts are facing downwards. Slide the SIM card into the card slot until it stops; To install the Memory Card, open

its latch, place its indented side downward, insert the card into the card slot, and then close the latch.

Install the battery

With the metallic contacts of the battery facing the metallic contacts in the battery slot, tap the battery down until it locks into place.

Install the back cover

Align and hook the back cover to the top of the battery slot and then push the cover upwards until it locks into place.

4.2 Turning the phone on

To turn the phone on, tap and hold the Power on/off key. If you have already enabled the SIM Lock function then enter the PIN code (the 4 to 8 digit secret code of your SIM card). It is preconfigured and provided to you by your network operator or retailer. If you enter an incorrect PIN code 3 times in succession, your SIM card will be locked. To unlock it, you must obtain a code from your network operator.

If the phone lock is enabled then you must enter the 4 to 8 digit phone lock code to unlock the handset. By default this code is based on the operator

4.3 Charging the Battery

Ensure the battery inserted in the handset. To charge the battery, plug in the charger connector at the top of your phone (USB interface) and then plug the other end into an AC power socket.

The battery symbol indicates the charging status. While charging, the charge indicators will scroll. When all the scroll bars are steady, the battery is fully charged.

Disconnect the charger from the phone.

Disconnect the charger from the AC power socket.

Note: If the battery is powerless, the battery icon will reappear after a few minutes of charging.

4.4 Important Password

Default password for phone lock and restore factory settings is 4321.

4.5 Keypad Lock and Unlock

In the standby mode, press power on/off key to lock the keypad manually, and tap the lock icon slide to unlock the keypad.

5. Text Entry

5.1 Input Method

Your mobile phone supports several input methods, which includes:

Multi-Tap (ABC/abc/Abc/Hindi)

Numeric(123)

Changing the input modes

During text editing, you can tap the icon  to change input methods, and press and

hold the icon  to switch input modes: abc/Hindi

Entering Symbols

In any input mode, tap the icon  to insert symbol. Tap the desired symbol to input it.

5.2 Multi- ABC Input

During text editing, press and hold the icon  to switch input modes, then press the

Icon  to switch on(off) Multi-ABC Input method.

This method requires multiple key taps to reach the desired character: the letter "h" is the second letter on the 4 key of soft keypad, so you must tap 4 twice quickly to enter "h". Using this mode requires you to tap a key as many times as needed to enter the desired letter.

Example:

To enter the word «home» in Multi-tap input mode "abc", tap key 4(GHI) twice, tap key 6(MNO) thrice, tap key 6(MNO) once and key 3(DEF) twice.

5.3 Numeric Input

In "123" input mode then you can enter the numbers by soft keypad.

6. Calling

6.1 Making a Call

In idle mode, tap the phone icon to enter dial pad, input the phone number.

Press the Call icon to dial the number.

Press the End Call icon to end the call.

Note: During a call, press the volume key to adjust the volume.

Making an International Call, in dialpad mode:

1. Press and hold the '0' Key to enter "+".
2. Enter the country code.
3. Enter the area code (normally without the 0 before it) followed by the phone number.
4. Tap the Dial icon to call directly.

6.2 Answering a Call

Tap the Accept icon to answer it.

Tap the Reject icon to reject it.

7. Menu Functions

7.1 How To Use

Tap Menu icon in Idle mode.

Tap the icon to choose desired operation or slide the screen to choose to enter the menu.

You can exit a menu and return to idle mode by taping the Back key or Idle Mode Key.

7.2 Dialler

Touch the Dialer icon on the Home screen or in the Main menu to open dial pad screen. In dial pad screen, you can input phone number to originate a call.

7.3 Message

Creating a text message

1. Select New message > Text message.
2. Write a message, please refer to the **Text entry** section of this manual for detailed information.

Create a new multimedia message

1. Select New message.

You can enter Facebook interface through this access.

8. Frequently Asked Questions and Troubleshooting

Frequently Asked Questions	Cause and Solution
Unable to turn on phone	Tap the power on key for over 1 second. Check if the battery is properly connected. Please remove and install it again, retry to turn on; Check if battery is appropriately charged
Unable to connect to a network	Weak signal. Please Try and move to a location with strong signal and try connecting to the network again; Please ensure that you are not beyond the network coverage of service providers; Please ensure you have a valid SIM card. Please contact your network provider for further information;
Poor quality of calling	Please check if the sound volume is tuned improperly In an area with poor receiving condition, example: basement, the signal might be weak. Try reaching a location with stronger Signal reception and call again. While using the mobile phone in the peak period of Communication, like commute time, you may be unable to call because of line congestion.
Standby duration shortened	The standby duration is relative to the system setting of network. While the mobile phone is in an area with poor signal strength and cannot receive the signal, the handset will continuously search for a base station. This will significantly reduce battery charge. It is recommended that you turn off your mobile in area with no signal reception to save battery.

	Need replacing the battery. Please change a new battery.
SIM Card Error	Dirt on the metal surface of an SIM card. Use clean cloth to wipe the metal touch point on an SIM card. The SIM card is not installed. The SIM card is damaged. Please contact your Web provider.
Unable to dial out	Please confirm if you tap the dial key after dialing. Please confirm if calling is forbidden because of defaulting. Please confirm if the SIM is valid. Please confirm if the call barring is set. Please confirm if the fixed dial function is set.
Callers unable to contact you	Please confirm if the mobile phone is on and connected with the network. Please confirm if calling is forbidden because of defaulting. Please confirm if the SIM card is valid. Please confirm if the call barring is set.
Unable to charge handset	Poor contact. Please check if the plug is connected well. Please confirm if the environment temperature is within the range of 0°C ~40°C while charging. The battery or charger is damaged. You need to replace it.
Unable to set some functions	Wrong operation. The network provider does not support the function, or you have not applied for it.

Note: If the instruction above cannot help you solve problems, please record:

Mobile phone model and serial number

Specific content of warranty

Clear statement of problems

Then contact your local dealer or a **LAVA** authorized service center in your area.

9. Safety Information and Notices

Using the Mobile Phone and Charger

Only use authorised battery and charger. Using other brands may cause battery leakage, overheating, explosion or even fire.

Caution:

Keep the phone away from dust, water and damp areas. Dust, water or other liquids may cause overheating, electrical leakage, and/or phone failure.

The phone, battery, charger and AC adapter are not waterproof. Keep them away from rain and liquid.

Warning:

Do not bump, shake or tamper with the phone or charger. This may cause battery leakage, overheating, explosion or even fire.

Do not place the battery, phone or charger near a microwave or high-voltage device. This may cause battery leakage, overheating, explosion or even fire; also prevent the phone and AC adapter from overheating, smoking or short circuiting.

Do not use the phone around volatile oil. This may cause fire, breakdown or damage.

To avoid any damage or breakdown, do not disassemble the phone, battery, charger or internal components by yourself.

Using the Mobile Phone

Warning:

Do not use the phone while you are driving. Pull over and stop your automobile to dial or listen to a phone call.

Usage of mobile phones in aircrafts or hospitals is prohibited. Switch the phone off to prevent interference with electronic medical devices. Follow any rules or regulations in such places.

Do not use the phone at a gas station, near fuel or near chemicals.

Do not use the phone near electronic medical devices such as hearing aids, pacemakers and auto-control devices such as fire detectors and automatic doors.

If you have to use your mobile phone near an electronic medical device such as a pacemaker, please contact your manufacturer or dealer for information about preventing interference.

Caution:

Electronic systems in automobiles such as anti-lock brakes, speed control, or fuel spraying systems, are usually not influenced by wireless devices.

Manufacturers of these systems will tell you whether they are provided with good screening functions. If you suspect that an automobile failure is caused by a wireless wave, please contact your automobile dealer.

Avoid using your phone in crowded places.

Do not store your mobile phone near or with a credit card, disk or other magnetic materials. This may effect information stored on your phone.

Keep your phone away from pins. Pins can be absorbed by the phone's receiver magnet, which may cause harm.

Using the Battery

Do not dispose of the battery into a fire. Doing so may cause battery explosion or even fire.

If you have difficulties installing the battery, do not force the installation. This may cause battery leakage, overheating, explosion or even fire.

Keep metal objects away so they do not come in contact with the battery or its connectors as it may cause the battery to short circuit, overheat or explode.

Do not weld the polarities of the battery directly together. This may cause battery leakage, overheating, explosion or even fire.

Battery liquid is severely harmful for your eyes. If battery liquid gets in your eyes, do not rub them. Instead, wash your eyes with water first and then go directly to a doctor for help.

Do not use or store your phone in high temperature areas. This may cause battery leakage, overheating, explosion or even fire.

Warning:

Replace the battery when the normal usage time begins to decrease or if you notice the battery is overheated or has changed shape or color.

If battery liquid leaks onto your skin or clothes, immediately wash the affected parts with water.

If the battery begins to leak or emits a strange odor, properly dispose of the battery according to local regulations. Do not throw it into a fire.

Caution:

Do not leave the product or its battery inside a vehicle or in places where the temperature may exceed 60°C (140°F), such as on a car dashboard, window sill, or behind a glass that is exposed to direct sunlight or strong ultraviolet light for extended periods of time. This may damage the product, overheat the battery, or pose a risk to the vehicle.

Cleaning and Maintenance

The mobile phone, the battery and the charger are not waterproof. Do not use them in places with high humidity like a bathroom and also avoid spilling any liquids on them.

Use a soft cloth to clean the mobile phone, the battery and the charger.

Do not use alcohol, diluted liquid or benzene to clean the mobile phone.

If dust gets in the sockets the phone can be damaged, short-circuit or even the lose the ability to be re-charged. Be sure to clean the socket regularly.

10. SAR declaration

The highest SAR value for this mobile phone is **< 1.6 W/Kg**, in accordance with the requirements of the ICNIRP, which recommended the limit for exposure to radio waves is 1.6 watts/kilogram(W/kg) averaged over 1 gram of tissue. For more information, please visit (www.lavamobiles.com) to query Safety precautions:

- Use a wireless hands-free system (Headphone, headset) with a low power Bluetooth emitter
- Make sure the cell phone has a low SAR
- Keep your calls short or send a text message (SMS) instead. This advice applies especially to children, adolescents and pregnant women
- Use cell phone when the signal quality is good
- People having active medical implants should preferably keep the cell phone at least 15cm away from the implant.

All the configurations mentioned in this user manual is only for reference; please refer to the actual phone.

E-waste Disposal Mechanism

'E-waste' means waste electrical and electronic equipment (WEEE). In other words E-waste is a popular, informal name for electronic products nearing the end of their "useful life". For more details about e-waste please refer e-waste rules, 2011 www.moef.nic.in

Do's and Don'ts for disposal e-waste

Do's:

Ensure that an Authorized Person repairs your Lava products
Call Our Local Authorized Collection Centers to Dispose Lava products

Always drop your used electronic products, batteries or any

accessories thereof after the end of their life at nearest Authorized Collection Point or Collection Center.
Separate the packaging material according to responsible waste disposal options and sorting for recycling.
Always remove the battery from the product, when you do not intend to use the product anymore it in future.

Don'ts:

Do not dismantle your Lava Product on your own
Do not give your e-waste to Kabbadi Wala / Scrap Dealer/ Rag Pickers.
Do not dispose-off the e-waste in landfills.
Never dump E-waste in garbage bins.
Do not dispose of your product at municipal waste bins or rooms.
Do not throw used batteries into household waste.
Consequences of improper handling and disposal of E-Waste
Improper disposal of waste prevents natural resources from being re-used.
Some waste contains hazardous chemicals and if not disposed of properly may release toxins into the soil and water, and also releases greenhouse gases into the environment
If e-waste is not properly disposed of, it can threat to the health and well-being of humans and animals and it also has adverse effect on the environment.
Placing of batteries or devices on or in heating devices, such as microwave, ovens, stoves, or radiators and improper disposal of batteries may lead to explosion.
If the battery terminals are in contact with metal objects, it may cause a fire.
For more details on how to dispose of your Lava products at the end of life, Please refer the list of our Services Centers on

Pan India basis on our website www.lavamobiles.com or
please view this link for the details of Service Centers
<http://www.lavamobiles.com/support-services>.

Lava warranty certificate

Limited warranty:

LAVA international Ltd. (LAVA) provides limited warranty for your mobile phone and original accessories delivered with your mobile phone (hereinafter referred to as "product")

The warranty period for the transceiver is one (1) year and for battery, charger and headset is six (6) months from the date of purchase.
