VisionMate ST Overview

VisionMate ST 2D Barcode Reader		
Dimensions (W x D x H)	111 mm/4.37" x 87 mm/3.43" x 70 mm/2.76"	
Weight	1.76 lbs./0.8 kg	
Power Supply	USB	
Operating Temperature	4 °C to 30 °C	
Supported Barcode Type	Any Thermo Scientific 2D Barcode Storage Tube as well as virtually any other tube with high contrast 2D codes	
Computer Requirements	128 MB RAM PC with Intel [®] Pentium [®] 3 or Microsoft Windows 98 or higher (including WIndows Vista [®]) and 1 USB port	

What does the VisionMate ST Scanner do?

The VisionMate ST allows you to scan single data matrix coded tubes and export the tube data.

How do I scan different tube types?

The VisionMate ST scans all tube types automatically with no configuration required.

Which manufacturers' tubes are supported?

All Thermo Scientific 2D barcoded tubes are supported as well as most other manufacturers' tubes.

How can I store my data?

You can save data to Text file, CSV file, XML file. You can also export data via Keyboard Emulation and via a TCP/IP connection. The storage of data is designed to be very flexible and easy to configure. Data is exported as soon as a scan is complete without the need for user information.

How long does it take to scan a tube?

The scanner will read a single tube in less than one second.

What affects decoding speed?

All of the decoding takes place within the scanner's embedded decoding processor and so is not affected by PC speed and does not utilize PC data storage resources.

VisionMate ST Package Contents

the Your Thermo Scientific[™] VisionMate[™] ST Scanner package should contain the following items:

- One VisionMate ST Scanner
- One Installation CD
- One Printed Manual

NOTE: If your package does not contain the above items, please contact your supplier or Thermo Scientific Representative.

VisionMate ST Installation

In order to complete the installation you will need the scanner and installation CD or software downloaded from **www.thermoscientific.com/storagesoftware**.

You must have privileges on the computer to install software, hardware drivers and to write to the registry.

Ensure that you do **NOT** have the scanner plugged into a USB port.

- 1. Insert the CD into the CD drive. If the setup program does not auto-run, then start the installation program '**Thermo_VisionMate_ST_Setup.exe**' manually by double-clicking on it.
- 2. Click next on the welcome screen
- 3. Read the license agreement, and then click '**I Agree**' to continue, or '**Cancel**' to cancel the installation.
- 4. Click **next** after selecting your preferred installation location.
- 5. The installation will complete. Click **finish** to complete the installation.

Plug the scanner into an available USB port and allow the scanner drivers to install. Click **ok** to confirm any dialog messages regarding the hardware installation. Installation is complete.

Chapter 4

Operating the VisionMate ST Reader

After installing the software, follow these simple steps to get started with the VisionMate ST.

1. Start the software.

Start the VisionMate ST software using the desktop shortcut or the Start Menu shortcut from within the **Thermo -> VisionMate ST** program group.

When the software is started, it displays the **VisionMate ST icon**, in the form of a data matrix code, in the system tray near the Windows clock .

< 🧱 🕲 🐁 10:58

2. Display the Main Screen.

Double clicking the VisionMate ST icon displays the VisionMate ST software interface.

If the status is displayed as '**disconnected**', plug in the scanner. The scanner will beep three times once its fifteen second initialization process is complete.

Once the status is shown as '**Connected**' (and the initialization beeps have sounded if you have just plugged in), the scanner is ready.

Hold a tube over the scanner to read the tube. The decoded tube code will be displayed in the Code area.

3. Hide the Main Screen.

To hide the main screen, either click the green down arrow button at the top of the main screen, or double click the VisionMate ST icon in the system tray.

The software will continue to run in the background and all decoding and export functions will continue to function.

4. Exit the Software.

To exit the software, click the red cross exit button at the top of the main screen.

Export Functions

The VisionMate ST may be configured to export data directly to CSV files or XML files, or other applications using Keyboard Emulation or a TCP/IP connection.

1. Export Trigger Options.

Open the options window to specify how you want codes to be automatically exported. There are three options:

- 1. Every Code: Every code read is exported.
- 2. **Different Code**: Once a code is exported, the software will wait for a different code to be read before exporting again.
- 3. **Different Code**: Once a code is exported, the software will not export the same code again for a period of two seconds, but will export a different code. After two seconds, the software will reset and export any code read

2. Keyboard Emulation.

Keyboard emulation exports the code data exactly as if they were typed in using a keyboard.

Whichever application is open and has the cursor focus will receive the codes, so this function can be used to export to Notepad, MS Excel and many other applications.

Enable: Click enable to enable the keyboard emulation export.

Prefix String: The string entered here will prefix any outputted data. The string may be any combination of characters. To specify a control character, enclose its ASCII character in square brackets. E.g. To specify carriage return, use [13]. To specify carriage return, line feed, use [13][10].

Suffix String: The string entered here will suffix any outputted data and may be formatted in the same way as the prefix string.

2. TCPIP

TCPIP output allows you to output data to a receiving TCPIP port at a specified IP Address.

Within Windows XP, Hyperterminal may be used to test this function.

Enable: Click enable to enable TCPIP export.

IP Address: Enter the IP Address of the receiving application.

Port: Enter the port number which the receiving application is listening on.

Prefix String: The string entered here will prefix any outputted data and may be formatted in the same way as the Keyboard Emulation prefix string.

Suffix String: The string entered here will suffix any outputted data and may be formatted in the same way as the Keyboard Emulation prefix string.

Please see **www.asciitable.com** for a list of ASCII control character values.

🕑 🗆 Ena	5	
IP Address:	127.0.0.1	
Port:	40	
Prefix String:	[13][10]	
Suffix String:	[13][10]	

4. CSV

The CSV Export option allows you to write directly to comma delimited text files, text files or text files with a .log extension.

There are many options allowing the complete specification of the file location and format. Clicking on an option displays help information below.

Enable			GSV		
Ξ	CSV File Format		^		
	Directory	C:V			
	File Naming Method	Use Date			
	Filename Extension	.CSV			
	Filename Prefix				
	Fixed File Name	Thermo_ST			
🖻 Data Export 🛛 👻					
Data Prefix Character Optional prefix characters to write to the start of each data field. Use square brackets to enclose control characters e.g. [9] for Tab					

5. XML

The XML Export option allows you to write directly to XML files.

There are many options allowing the complete specification of the file location and format. Clicking on an option displays help information below.

Enable				
Ξ	File Format		^	
	Directory	C:WisionMate Results		
	File Naming Method	Use Fixed Filename		
	Filename Prefix			
	Fixed File Name	Thermo Rack		
🖃 Data Export				
	Export Date to each line	False		
	Export Time to each line	False		
	Data Format			
	Date format	ddMMyyyy	*	
Date format				
Presentation style for the date information (y = year; M = month; d = day; MMM = month abbreviation; MMMM = month full name)				

Disposal

The VisionMate ST reader is required to comply with the European Union's Waste Electrical & Electronic Equipment (WEEE) Directive 2002/96/EC, and is marked with the following symbol:

Thermo Fisher Scientific has contracted with one or more recycling/disposal companies in the European Union (EU), and these companies will dispose of or recycle this product.

Contact Thermo Fisher Scientific at **technicalsupport@thermofisher.com** for further information on compliance with these directives and the recyclers in your country.
