Grill assembly :

IMPORTANT:Read the instructions belowe cautiously before attempting to assemble the grill.

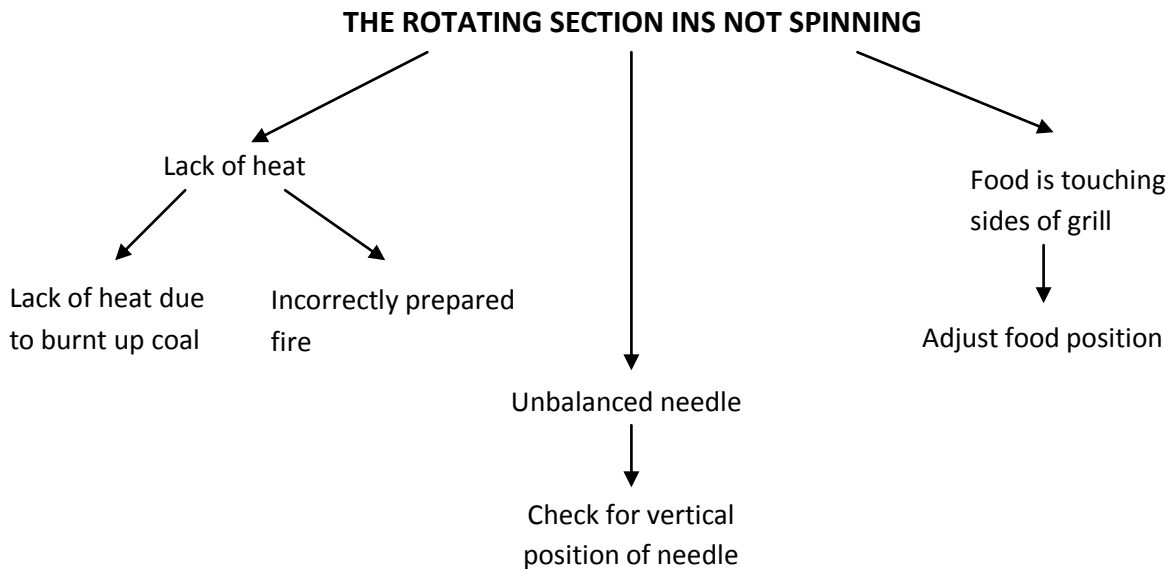

1. Unwrap all the parts from the plastic bags
2. Assemble the stabilising base legs and secure them with the wingnuts
3. Place the oil collector plate into the base section
4. Unblock the rotating part of the turbine
5. After unblocking, check if the rotation is without large friction by means of a gentle push
6. A dot is situated on the rotating part, which should be aiming at the center of the front openin on the grill. Then, the needle can be placed into the hanging loop into a vertical position.

Commissioning :

TIP:for easy heating up of the grill we advise the use of a natural based firelighter, which is intended for this purpose, alternatively a gas lighter.

1. Insert the opening handle into the back doors – fireplace. By rotating the handel by 90 deg. anti-clockwise open the fireplace.
2. Fill up the fire containment basket with coal, further use the liquid firelighter as advised.
3. By lightly moving the fire containment basket the coal will heat up.
4. Re-install the fireplace into the rear section of the grill. After 15 minutes or when the grill has started turning, it is ready for use.
5. Pierce the desired food onto the needle. Using a glove place the needle onto the loop in the rotating section.

BE CAUTIOUS ABOUT CORRECTLY PLACING THE FOOD TO ACHIEVE A BALANCE – THE NEEDLE SHOULD ALWAYS BE IN A VERTICAL POSITION.

Maintenance and cleaning of Jet Grill

NOTIFICATION :We advise that maintenance and cleaning is done after the complete cooling of the grill. It is prohibited to extract the ash unless all coal has burnt out.

1. Remove the needle and oil collector plate.
2. Oil and fat residue is easily removable.
3. The needle and accessories including the oil collector can be washed with conventional detergents or in a dishwasher.

We wish you many tasty dishes and satisfaction with the use of Jet Grill
