We congratulate to your choice of a Mocca BTB.

Please read this manual before you take the machine into operation for the first time.

The manual contains important instructions for a safe and proper use of the machine.

Always keep this manual within reach for the user!

All electrical installations must be done by a qualified electrician and within safety regulations that applies for each country where the appliance are installed.

All installations must be done by a qualified person.

Mocca BTB

- Making freshly coffee cup by cup
- Internal grinder for grinding of coffee beans
- Jug facility with key switch
- Brewing mechanism with coffee filter
- Electronically temperature controlled
- Adjustable coffee strength
- Illuminated cup while brewing

Facts:

Height + bean container	790 mm
Width	270 mm
Depth	530 mm
Weight	16 kg
Tank volume	2.0 litre
Electricity:	230V/2200W
Water connection:	½" outside thread
Capacity:	200 cups / filling

Options:

Base cabinet
with waste box

MOCCA BTB

Fuse holder

ON/OFF switch

Outlet hot water

Detail;	Ingredients;	Width;	Height;	Amount/unit
Canister;	Coffee beans	165	190	1

1. Place the brewer on a flat level and waterproof surface.

Connect the electrical plug to a separate grounded wall socket

90°

OBSERVE!

Make sure there is a space behind the machine for free flow of air.(minimum 10cm).

2. Connect attached water tube to cold water with an R 1/2".
Make sure that the water hose not are kinked anywhere when machine is pushed into place.
Please flush the water tube before connecting to machine, this to avoid any particles to damage the inlet valve.

3. Open the water inlet.
4. Turn on the ON-OFF switch

Water is been filled into the tank automatically with 2,0 litres of water. The heating will not start before the water level reaches the level sensor.

Set temperature is approx 97°C.

Fuse holder

ON/OFF switch

5. Close door.

6. Fill bean container with coffee beans.

1. Remove lid on bean container and fill bean container with coffee beans without additives (as tasted oils or sugar).
2. Open closing hatch on bean container.

When water in tank have the right temperature the message "low temp" will disappear and the machine is ready to use.

"low temp"

Important! Safety and maintenance of grinder.

Warning! Cleaning of grinder shall be done by qualified personnel only.
Exchange and basic adjustments of the grinder shall be done by an authorized service technician

See service manual: **Maintenance instructions** for grinder.

Never put your fingers or objects into the rotating grinding mechanism inside the input-shaft.

NOTE!

Coffee grinder is only constructed to grind coffee beans without additives (as tasted oils or sugar). Any kind of use apart from that is improper and therefore unauthorized, the producer refuses all responsibility for damages arising from improper use of the coffee grinder described in this instruction.

1. Place a cup in the centre of the cup holder.
2. The strength has a standard setting, if you wish to increase or decrease it, do as follows if not continue to point 3.

Stronger drink;
Increase by pushing + or ++ for 5% or 10%
 alternative
Weaker drink;
Decrease by pushing - or -- for 5% or 10%
 (the indication lamp will go up or down depending of choice).

3. Choose drink by pushing on the button of menu. The display will show; "Please wait", and the cup will be illuminated.

Wait until the light on cup and the message "Please wait" has been turned off before you take your cup.

4. Hot water.

Brewing of jug.

1. Place a jug in the centre of drip tray by lifting up the cupholder.
2. Turn on the key with jug symbol clockwise.
3. 3 cups of brewing is standard setting. Change amount of cups by pushing + or - button. Optional up to 12 cups or down to 1 cup brewing.
4. Push the button for drink 1.

Wait until the light and message "Please wait" has been turned off before you take out the jug.

Automatic cleaning of In/Outlet valves:

The In/Outlet valves can easily be cleaned with the key switch in "cup" (normal) position.

1. Place a jug in the drip tray.
2. Turn the key slowly ninety degrees and back again.
3. Push button for drink 1 and 2 at the same time for 6 seconds.

Keep buttons down.

All In/Outlet valves will now start to open and close with 2 pulses/second in 10 seconds or as long as you hold the buttons.

The display shows: "Cleaning valves".

4. Push button for drink 2 for making a brew cycle and flush remaining water and scale from the cleaning.

By cleaning is meant that valves "knocks" away eventual scale and other particles which has been attached in the cylinders and that they are flushed away with the water.

Rotate brew mechanism without water or ingredients:

The brew mechanism can be rotated without water and ingredients with the key switch in "cup" (normal) position. To be used when brew mechanism has been dismantled for washing and shall be remounted.

1. **Push "+" button for 6 seconds**
After 4 seconds the signal will go faster.

Push up on the rear of the screen assembly until it pops out of the cylinder. Fig. 2.

3. Soak the screen assembly in a solution of 25gr. cleaning agent in 3dl water for a maximum of 10 minutes. Fig. 3.

Fig. 3.

3

Fig. 2.

Fig. 1.

(Cleaning agent is supplied by your retail dealer)

(A)

4. Remount the screen assembly and close the door. Then the machine will return to start position and the machine is ready for use.
If machine not will go back in start position. Restart machine!
5. Make a cup of coffee and throw it out.
To make sure that there is nothing left of detergent.

Prolonged contact with cleaning agent may damage the screen assembly. Once this is done, the screen should then be thoroughly rinsed with dish soap and warm water to remove any leftover residue.

Cleaning agent: (brew mechanism)
Filter: (brew mechanism)
Tool: (dismantling filter)
