# Get Started

## Import files from iCloud & Finder

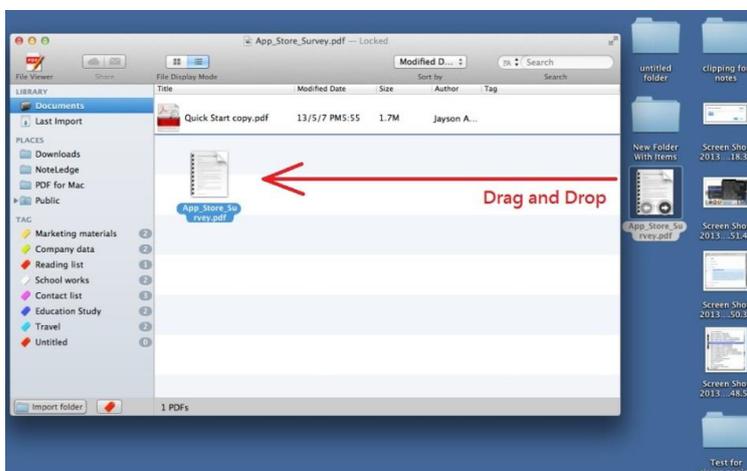

### From iCloud

1. Find the PDF file that you'd like to use. You may open the file directly from iCloud.
2. If you'd like to open a new PDF file, you may click the "New Document" button on the bottom left.

### From Mac's Finder/Desktop

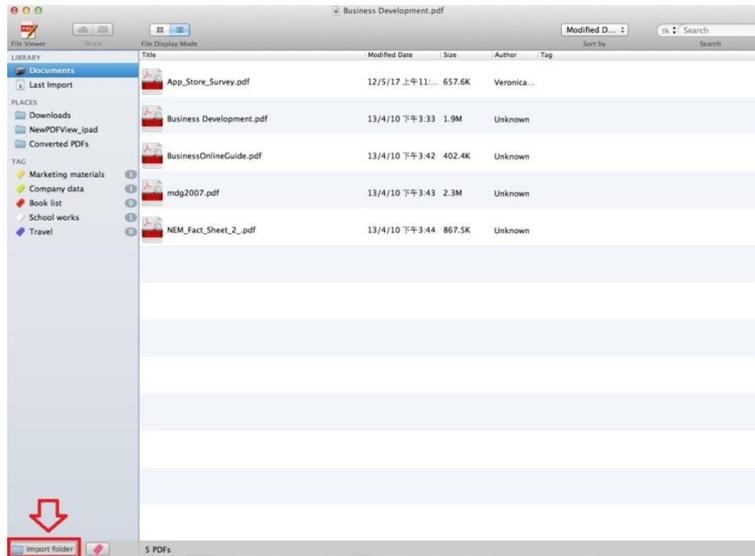

1. Find the PDF file that you'd like to import to PDF Reader.
2. Drag the file and drop to PDF Reader's Management.
3. The file will appear in the **Last Import** (under LIBRARY section).

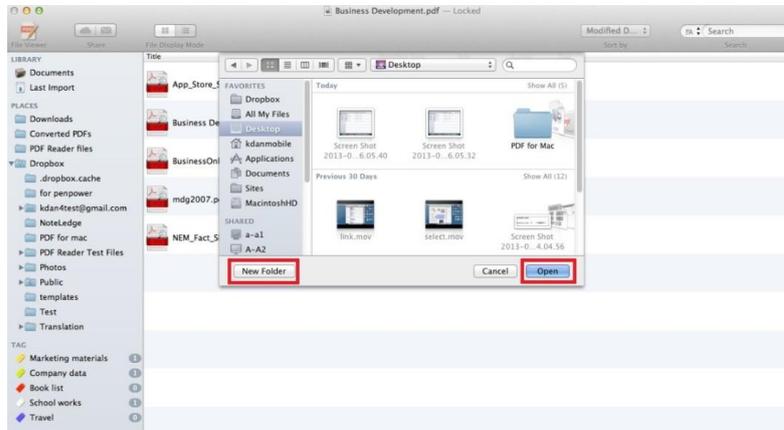

[\[TOP\]](#)

# Add folders to PLACES as shortcuts

1. Click “Import folder” at the left bottom of the sidebar.

2. Find the particular folder you want to import and click “Open.” You may as well create a new folder by clicking “New Folder” at the left bottom of the window.

3. You will see the folder assigned and all the PDF files within appear under PLACES.

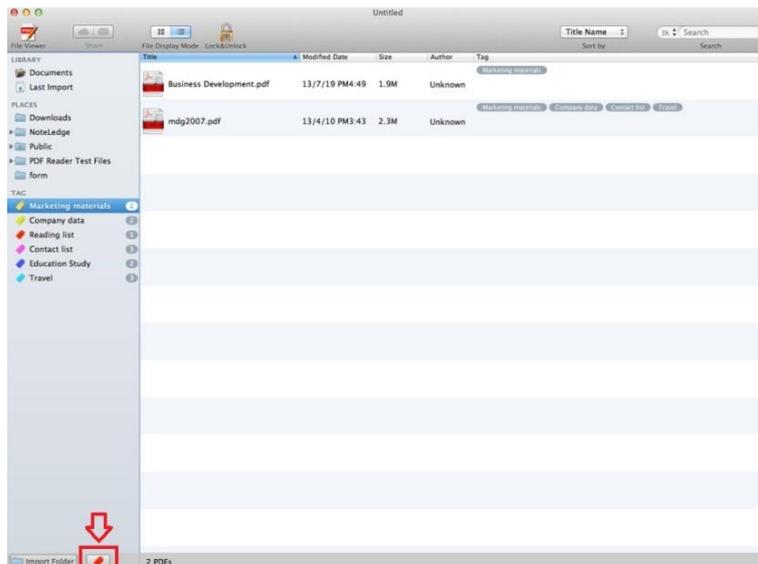

[\[TOP\]](#)

# File Manger

## Add tags

### 1. If you're at Management, Sidebar section:

1.1 Click the tag button to create a new tag.

1.2 Use the right click to rename/edit/change color of your tags.

### 2. If you're viewing the file list in Management:

2.1 Find the file you'd like to categorize.

2.2 Click on the right and copy the file.

2.3 Go to the tag you'd like to place and paste the file.

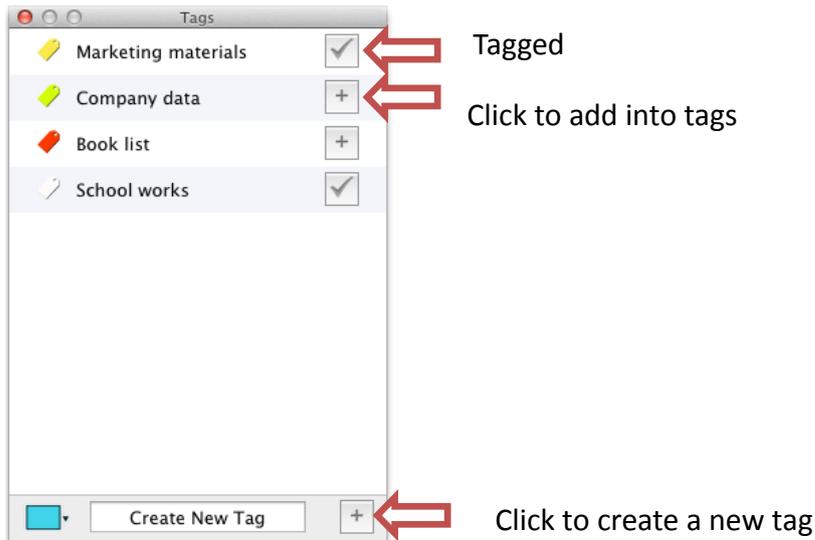

2.4 The file will be automatically tagged under the category.

### 3. If you're viewing the PDF file in File Viewer:

3.1 Click the tag icon on the upper annotation toolbar to add tag(s) to your file.

3.2 You may choose the existed categories or create a new one.

[\[TOP\]](#)

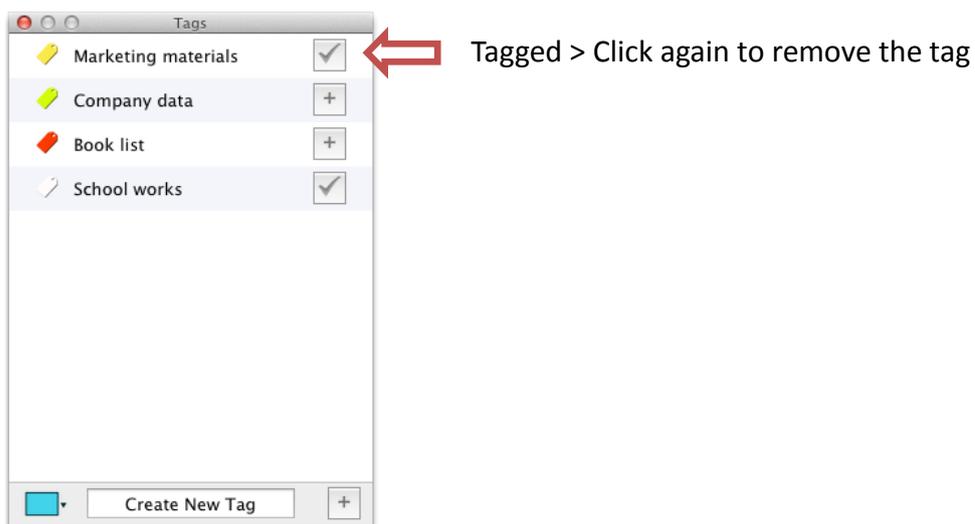

## Manage tags

### To remove a tag from a PDF file

1. Open the PDF file and click Tag on the upper annotation toolbar.

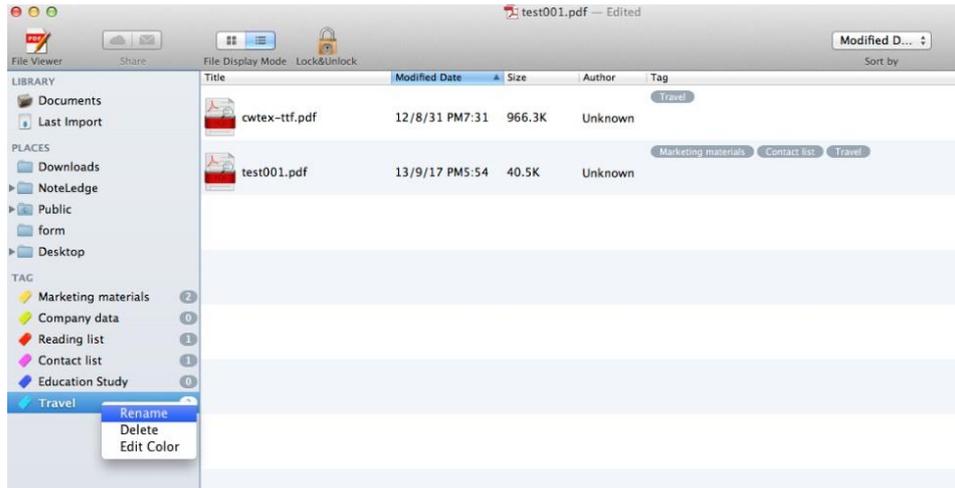

2. Uncheck the box to remove the tag.

### To delete a tag from PDF Reader

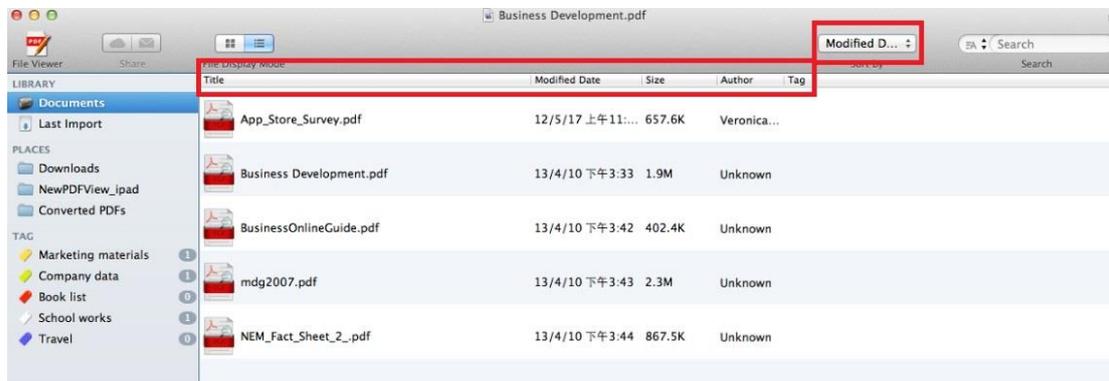

1. Go to Management, Sidebar section.
2. Use the right click and click "Delete" at the tag you'd like to delete.

[\[TOP\]](#)

## Sort PDF files

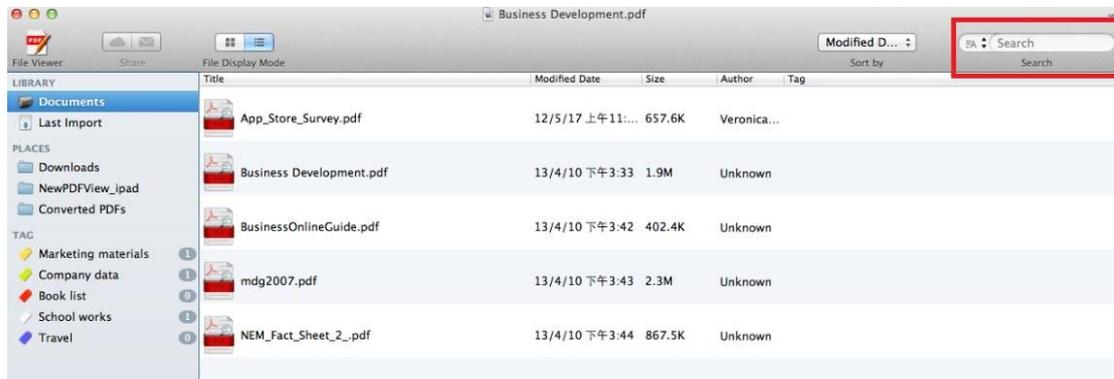

There are 5 categories to sort your PDF files, including title, modified date, size, author and tag. Go to Management and click at the category to quickly sort out the files in order.

[\[TOP\]](#)

# Keyword search

Go to Management, and you will see “keyword search” on the upper right corner. Type in the assigned keyword to search the particular PDF file you need.

[\[TOP\]](#)

# Get file information

1. Go to MENUS, click “Window” and find “Get Info.”
2. You will see a window appear with the detailed information of the file.
3. You may rename the name of Author.

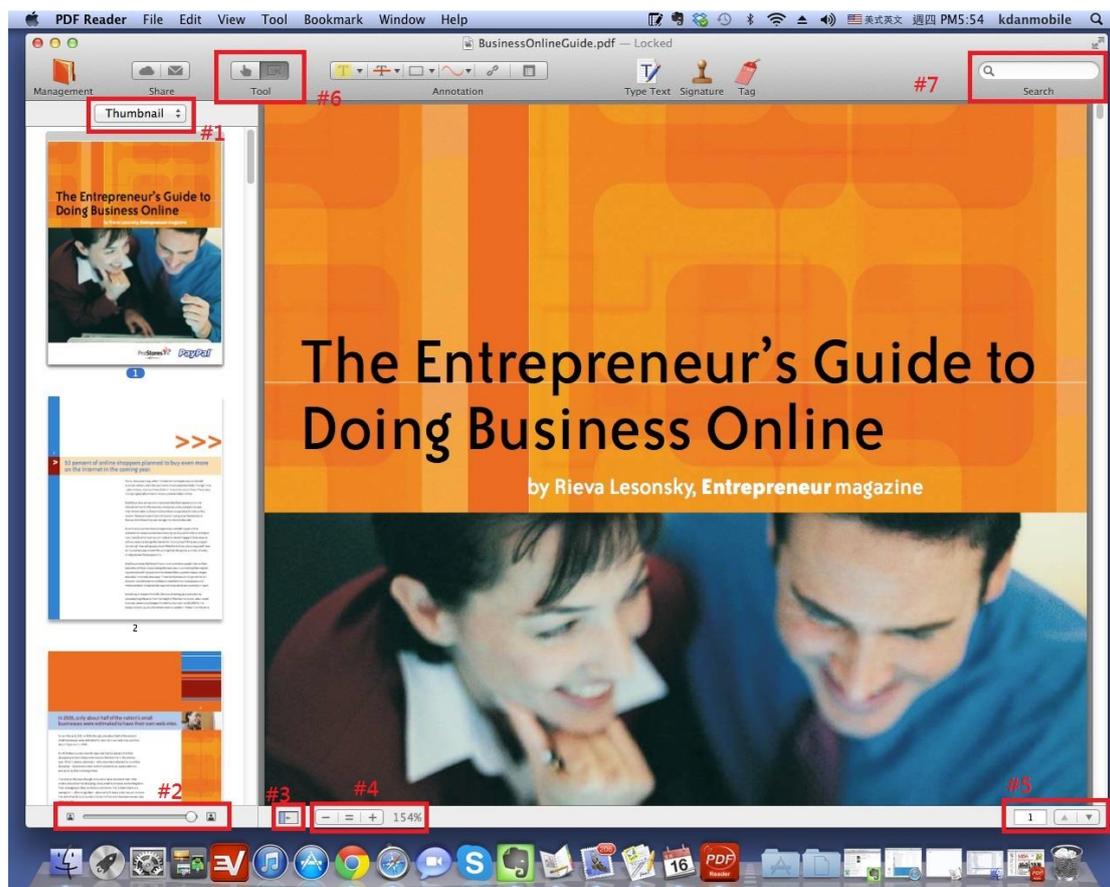

[\[TOP\]](#)

# File Viewer

## General overview

PDF Reader provides you multiple tools to quickly take control of your document while viewing. Here is a general overview of File Viewer:

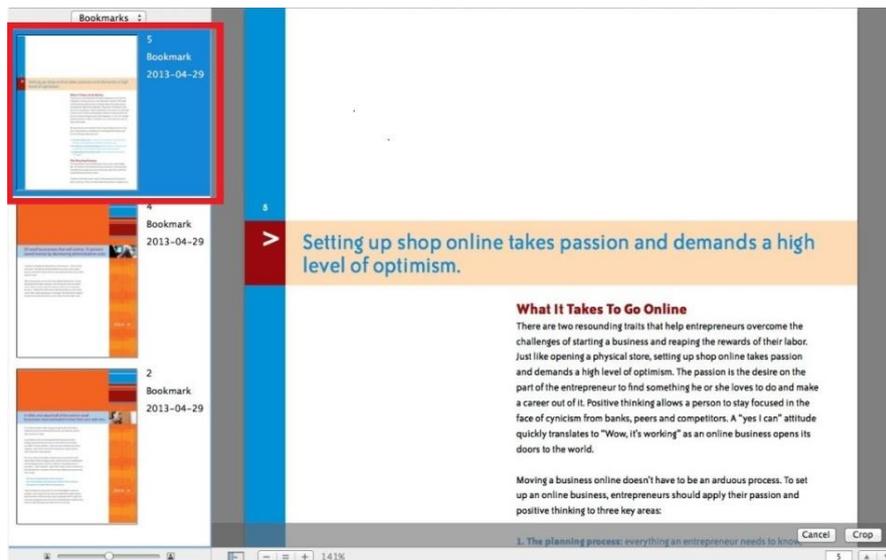

1. B/O/T/A viewing: Bookmark, Outline, Thumbnail and Annotation
2. Enlarge/ Shrink the thumbnails (only available in Thumbnail mode)
3. Hide/Show the SideBar
4. Adjust the page width : Zoom In/Out/Fit to Window
5. Next Page/Previous Page/Jump to Page
6. Drag/ Select tools: used when viewing the PDF file/ selecting part of the content
7. Keyword search

[\[TOP\]](#)

# Add/ Remove bookmark

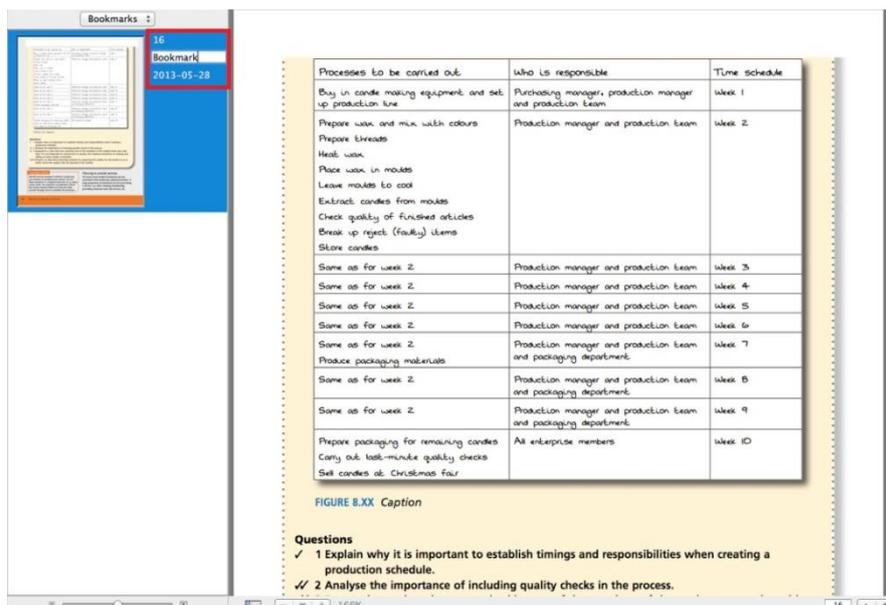

## Add a bookmark:

1. Open a PDF file, and switch to File Viewer mode.
2. Go to MENUS and click "Bookmark" to add the current page as bookmark.
3. The bookmark(s) will be saved to Bookmark section on the left.

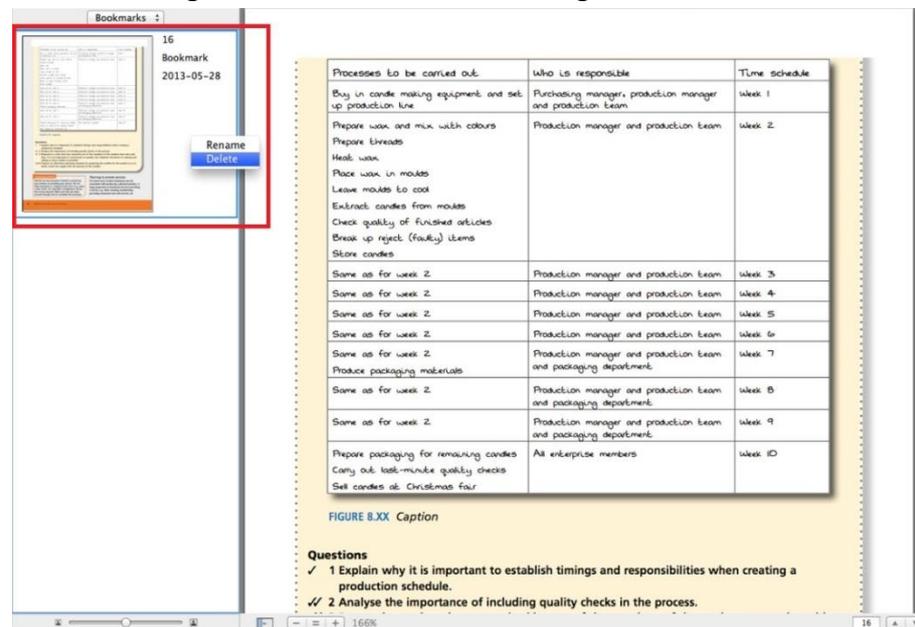

## Rename a description

1. Go to File Viewer >Bookmark section
2. Click on the title of an existing bookmark to add a description.
3. Or you may also use the right click to rename it.

### Remove a bookmark:

1. Go to File Viewer >Bookmark section
2. Use the right click to remove the existing bookmark.

3. Or you may go to MENUS and click on “Bookmark” to remove the current bookmark.

[\[TOP\]](#)

## Jump to page

1. Open the PDF file and find the page number appeared in the bottom right corner. (Please refer to the general view above for location.)
2. Click at the number box, insert the page you'd like to arrive at and press enter.

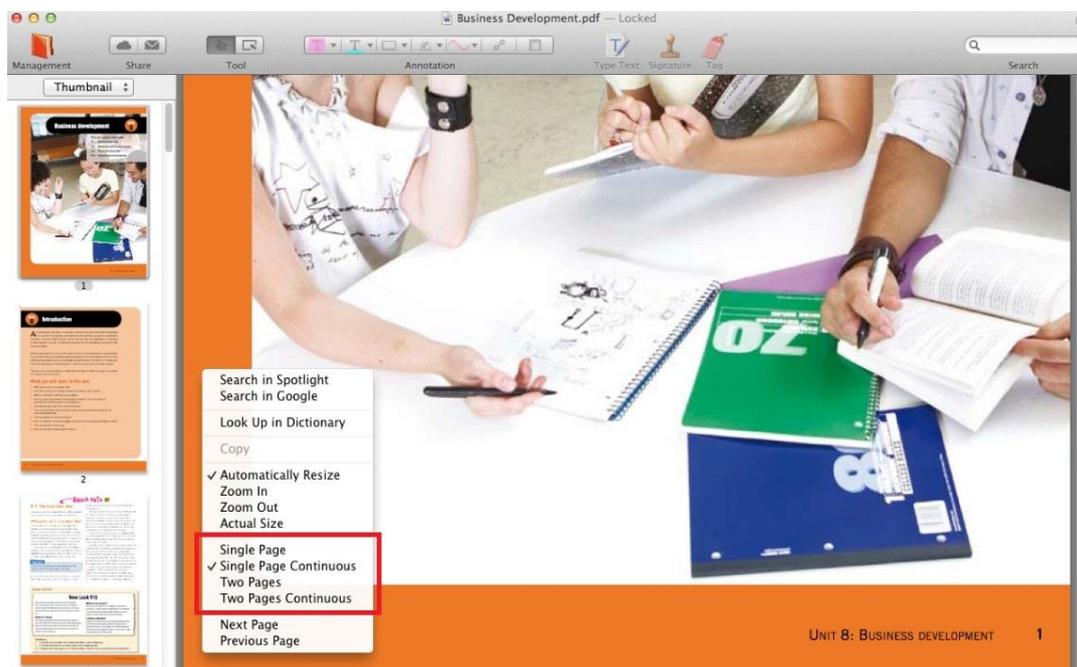

[\[TOP\]](#)

# Page view (Single/Two page)

1. Go to MENUS, click "View" and select the options you'd like for page viewing.

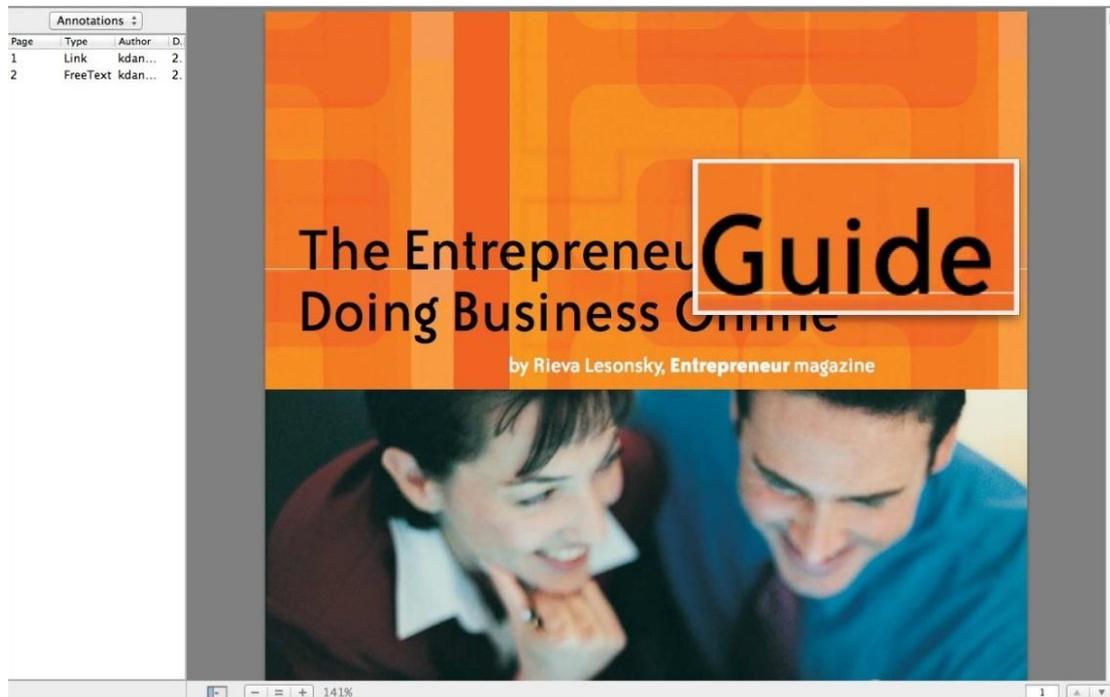

2. Or you may use the right click to adjust the settings as well.

[\[TOP\]](#)

# Magnifier viewer

1. Go to PDF Reader's MENU.
2. Click on "Tool" and choose Magnifier.
3. You may use the Magnifier to have a closer look of the content.

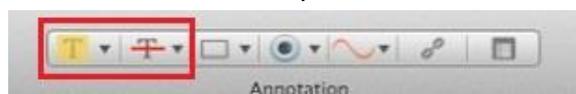

4. If you'd like to cancel the function, go to MENU > Tool > Magnifier.

[\[TOP\]](#)

## Annotation

### Highlight, underline & strikethrough

1. Open a PDF file you'd like to add markup on.
2. Click on the markup tools and select the colors you like.

3. You may change the markup anytime using the right click and select Properties.

## 8.1 The business idea

Coming up with an original idea is only one part of coming up with a successful business idea.

### What gives rise to a business idea?

The inventor Sir Clive Sinclair is perhaps best known for the development of a good idea that didn't sell. He was aware of the problems caused by petrol-guzzling large motor vehicles, as well as the difficulties of parking them and driving them in urban environments. So, in the 1980s he invented and launched the C5 battery-powered vehicle.

The idea was a celebrated failure. The product suffered from technical limitations and was hurt by marketing that appeared to position the product as a rival to cars rather than as a fun leisure 'toy'.

what is great to them is not n other people'.

We can contrast the C5 with James Dyson's vacuum cleaner revolution. Dyson's vacuum cleaner was a different product that would now be sold worldwide.

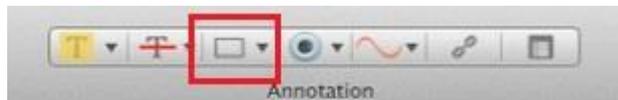

Another example is the iPod. The idea created by Apple's contractor and developer

[\[TOP\]](#)

## Add shapes

1. Open a PDF file you'd like to add markup on.
2. Click on the shapes (**Rectangle, Rounded Rectangle, Circle, Arrow and Line**) and select the colors you like.

3. You may change the markup anytime using the right click and select Properties.
