Premium Electronic Cigarettes

## User's Guide

INSIDE:

- Step-by-Step Guide
- FAQ
- Warranty Information

## HOW TO GET STARTED:

**Battery**

**USB Adapter**

**Cartridge**

**Chargers**  
*(sold separately)*

### Step 1: Review components of the Metro Electronic Cigarette

The METRO electronic cigarette is comprised of the hybrid cartridge (inhaler, liquid container and vaporizer are built as one piece), battery, and LED light.

## **Step 2: Charging the Batteries**

The first step to using the electronic cigarette is charging the special rechargeable lithium batteries. Insert the battery into a USB adapter, turning clockwise to secure. Plug the USB charger into a Wall or Car adapter or charge directly from a computer USB port (computer must be turned on). The initial charge can take 2.5 to 3 hours to fully charge. The battery is fully charged when the LED at the end turns off and the RED light on the charger turns GREEN.

## **Step 3: Connect Battery to hybrid Cartridge**

Once the battery component is fully charged, unscrew counterclockwise (turn to the left) from the charger. Remove the silicone plugs from each end of the METRO cartridge and dispose of properly. Then, screw onto the front of your battery (turn to the right).

The METRO hybrid cartridge is the consumable product combining a vaporizer and cartridge into the unit. Keep the cartridge out of reach of children and pets as it may be a choking hazard.

## **FACTS & FAQ:**

### **Using METRO**

To begin using, draw on the METRO electronic cigarette just as you would a tobacco-smoking product. When you draw, you will taste the flavoring. If you completely inhale, you will feel the warm vapor in your throat and will be less likely to see a vapor mist when you exhale. Inhaling to a lesser extent will allow more of the vapor mist to be visible upon exhale.

### **Monitoring Nicotine Consumption**

The electronic circuit will start and the indicator light on the tip of the METRO electronic cigarette will glow each time you draw. When you stop drawing, it will automatically terminate the vaporizer, and the device will go into a standby mode. There is no 'on and off' switch on the METRO Electronic cigarette.

### **METRO Electronic Cigarette Hybrid Cartridges**

METRO hybrid cartridges contain 4 major ingredients: water, nicotine, flavoring and propylene glycol. METRO hybrid cartridges are available with the following percentage of nicotine by volume: 1.8%, 1.2%, 0.6%, and 0.0% (no

nicotine). Visit [www.metroecigs.com](http://www.metroecigs.com) for complete selection of METRO refill cartridges. Replace METRO hybrid cartridges when the vapor volume is reduced below a satisfactory level.

### **METRO Cartridge Care and Disposal**

Your METRO hybrid cartridges should remain in the cellophane bag until you intend to use them. Do not leave unsealed cartridges out in the open, as the concentrated ingredients may dry out. Keep cartridges out of reach of children and pets. Used or unused open cartridges contain nicotine may be poisonous. If ingested, get medical help immediately or contact your Poison Control Center immediately. In the US call 800-222-1222.

### **Battery Charge Longevity**

The METRO battery will last approximately 12-24 hours before recharging is required, depending upon the intensity of usage. Longevity is impacted by the intensity of the puffs and will vary by individual. If customer consistently uses the METRO battery, when the battery power is under 3.3V or the battery is almost fully discharged, the battery LED will flash and repeat. The METRO

battery will then TURN OFF and enter the “METRO battery protection mode” or shut completely off until the battery is recharged. If customer vaporizes continuously for more than 7 seconds, the METRO battery will discontinue working for 10 seconds, to prevent the METRO hybrid cartridge from over-heating. Battery voltage: 4.0 – 4.1V. Battery Capacity: 180mAh

### **Water Vapor Mist**

A METRO electronic cigarette emits a virtually odorless mist that evaporates into the air within seconds, METRO leaves no visual residue in the air, whereas traditional smoking can leave an unsightly cloud known to irritate eyes and bother people's senses.

### **Can I Smoke METRO Anywhere?**

Since METRO is non-flammable, contains no tobacco and emits no second hand smoke, depending on your location, its use may not be prohibited by statutes or ordinances. METRO customers have used the product without issue or complaint in restaurants, workplaces, and many other locations. Still, do not be surprised when people ask you about METRO. After all, to the casual observer, using METRO creates curiosity. Customers report that simply

explaining to others how METRO works usually creates acceptance.

### **How Long do METRO Hybrid Cartridges Last?**

One METRO hybrid cartridge will last approximately +300 draws. Results will vary depending on the intensity of a person's average inhalation. Do not bite down on the METRO hybrid cartridge, or the METRO hybrid cartridge may be damaged and stop functioning. It is also possible if extremely high pressure is applied to the METRO hybrid cartridge by biting or other means to the outside of the METRO hybrid cartridge, for the cartridge lid to pop out and cause a potential choking hazard.

### **Is METRO a Smoking Cessation Product?**

METRO has never tested or proven to be a smoking cessation device and is not sold or marketed as such.

### **Metro Limited Warranty Details**

Subject to the conditions and limitations set forth on <http://www.metroecigs.com>, METRO's electronic cigarette is guaranteed against defects in workmanship and materials, if purchased from METRO or

an authorized METRO dealer, for a period of 12 months from the date of purchase. Visit <http://www.metroecigs.com> for more details.

**WARNING:** METRO batteries, as sold, meet all necessary safety tests required for the manufacturing of lithium ion batteries. The tampering with or modification of any METRO lithium ion battery is extremely dangerous. Any battery that has been tampered with or modified in any fashion will VOID THE PRODUCT WARRANTY and will release METRO Electronic Cigarette from any and all product liability.

METRO products are intended for use by persons of legal smoking age, not by nonsmokers or by children, women who are pregnant or breastfeeding, or persons with or at risk of heart disease, high blood pressure, diabetes, or taking medicine for depression or asthma. Consult a physician if you experience nicotine misuse symptoms such as nausea, vomiting, dizziness, diarrhea, weakness and rapid heartbeat. If you smoke tobacco products, you are encouraged to stop. METRO products are not a smoking cessation product and have not been tested as such. Please keep METRO products out of the reach of children and pets; ingestion of certain pieces can present a choking hazard, and ingestion of the non-vaporized concentrated ingredients in the cartridges can be poisonous. This product and the statements made

within have not been evaluated by the US Food and Drug Administration or any international health organization unless otherwise noted in METRO's materials. These statements and METRO products are not intended to diagnose, treat, cure, or prevent any condition, disorder, disease or physical or mental conditions and should not be used as a substitute for your own physician's advice. METRO is manufactured to Nicotek (USA) supplier standards, distributed globally, and made in China.

Warning: Nicotine is addictive and habit forming; very toxic by inhalation, in contact with the skin and if swallowed; danger of serious damage to health by prolonged exposure if swallowed; irritating to eyes and skin; may cause sensitization by skin contact; may cause harm to the unborn child; vapors may cause drowsiness or dizziness; very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment; after contact with skin, wash immediately with plenty of water and seek medical advise; in case of accident or if you feel unwell, seek medical advice (show the label where possible): this material and its container must be disposed of in a safe way; use appropriate containment to avoid environmental contamination. Warning for California Residents: This product contains nicotine, a chemical known to the State of California to cause birth defects or other reproductive harm.

## **Accessories available online at [www.metroecigs.com](http://www.metroecigs.com)**

- Mini Auto Charger
- Mini Wall Charger
- 2-in-1 AC/DC Charger
