Getting started with eZee Configuration

This is the first important step in using "eZee FrontDesk NextGen". You will need to configure the software with your property information. Basically you will enter all information like Room Type, Rate Type, Room Information, Tax, Amenities, and Room Rate etc.

Depending on the size and amount of information you enter, it may take 30 minutes to 2 hours to configure.

To start configuring your property follow the below mentioned steps:

To launch "eZee Configuration" Module, click on this icon *(* from Start Menu or else launch from your Desktop.

| Select Use | r | |
|------------|----------|-------|
| No L | ser Name | |
| 1 A | dmin | |
| Password | | |
| | Login | Close |

"eZee NextGen Configuration" Login window will appear. Upon successful installation we create Admin user, by default we do not set up any password. Following screen will display:

Select the Admin user from 'User List' and click on 'Login' button. This will Login you to "eZee Configuration Module" to perform various configurations of your property. Once logged in, you will see a screen as below.

Note: When you run "eZee Configuration" for the first time, it will bring property configuration wizard. This wizard helps you quickly configure all basic information.

Property Setup Tab

Property Information

Hotel Information

Enter your hotel contact information on this screen. This information will be used to print on your reports, guest registration card, folio, receipt and invoice.

| Property Name | eZee Technosys Pvt. Ltd. | Other Informatio | n | |

| Email | support@ezeetechnosys.com | back ground ima only in eZee Froi | ge. This image will be displayed ntDesk that too on Room View. | |
| Web Site | www.ezeetechnosys.com | | | |

Click on 'Hotel Information' \rightarrow 'Property Information' screen will open as shown below:

Enter all basic information in the above screen \rightarrow 'Save'.

Special Settings:

Registraton1: As a statutory requirement you may need to display your business registration number like VAT, TRN, ABN, CST, etc. on your invoices. - Enter such registration number in this box. You will be able to set such three numbers in Registration1, Registration2 and Registration3.

Note: You may set different caption then Registration1, Registration2 and Registration3. You can set this caption to eZee Icon (located on top left corner) Option Notice.

Logo: You can upload your logo in eZee database. This logo will be used to print on your folio, registration card, folio, invoice and report. Click on 'Browse' button and select your logo from your local machine. If you want to remove your logo, click on 'Remove' button.

Back Ground Image: You can use a background image to be displayed in eZee Front Desk. This is something similar like what you have as windows desktop wall paper.

Floor Management

It is used to Add Floor. In order to navigate rooms easily "eZee Configuration" offers you a way by which you can define Floors. Optionally you can also define sections as floors like Beach View, Mountain View, and Street View etc. Normally this setting is helpful for big properties. It is compulsory to define one floor. Floors will be displayed in 'Room View' option available in eZee Front Desk.

| Click on 'Floor Management' -> | • 'Floor List' | will open as sh | nown below: |
|--------------------------------|----------------|-----------------|-------------|
|--------------------------------|----------------|-----------------|-------------|

| lias | Name | Description | Sort Key |
|------------|-----------------------------|--|----------|
| NDF 5TF | Ground Floor First Floor | Reception, Swimming Pool, 7 Super Deluxe, 7 Presidential, 7 Kung Suite and Conference Center, Gym, 9 King Suite Rooms and 9 Presidential Rooms. | |
| | | | |
| | | | |
| | | | |
| | | | |

In order to define new floor, click on 'New' button \rightarrow 'Add/Edit Floor Information' screen will open as shown below.

| [Add/Edit Flo | or | Be | X | |
|-------------------|--------------|---|-----|--|
| Floor Information | | | | |
| Alias | GNDF | Sort Key | 0 🚔 | |
| Name | Ground Floor | | | |
| Description | |) Pool, 7 Super Deluxe, Suite and 7 Twins room | | |
| | | Save Clo | se | |

Enter all the information such as Alias, Sort Key, Name and Description \rightarrow 'Save'. Enter all floors and then press 'Close' button. You will see all floors listed in 'Floor List' screen.

Tariff Operation

Room Type

This option is used to add new 'Room Types' to your property.

Enter your room type on this screen. Define all room types you have in your property. This room types will be further used to define your rooms. Room type will also be used in feeding room rate into "eZee Configuration".

| jearch | Criteria | | | | | | 9 |

| | | | | |
| | | | | Save Close |
| | | | | |

Enter all information such as Alias, Sort Key, Name and Description and press 'Save' button. Enter all room types and then press 'Close' button. You will see all room types listed in 'Room Type' screen.

Default Rate Settings:

You can define default rate for the room type by entering related information in this fields for Rate, Adult rate and Child rate as per your requirements.

Pax Settings:

Base Adult: This represents total adult guest who can stay in this type of room at default rate.

Base Child: This represents total child who can stay in this type of room at default rate.

Max Adult: This represents maximum adult guests this type of room can accommodate.

Max Child: This represents maximum child this type of room can accommodate.

Web Settings: Contact eZee Support for 'Default Web Inventory', this setting is used in 'eZee FrontDesk' and 'eZee Reservation' integration.

Booking Settings:

Let's say you have 100 King rooms and you want to take booking of 110 King rooms, to avoid sales loss due to cancellation you can specify 'Over Booking Percentage'.

Over Booking Percentage:

Mention the percentage by which you want to over book this particular room type and the system will remember the same while accepting booking requests.

Display Settings:

Back Color: If you wish to visually distinguish your room type, then you can set the

| | box. The Color screen will open as |
|--------|------------------------------------|
| below. | |

| Color | |
|-------------------------|----------------------------|
| Basic colors: | |
| | |
| | |
| | |
| | |
| | |
| | |
| Custom colors: | |
| | Hue: 160 Red: 0 |
| | Sat: 0 Green: 0 |
| Define Custom Colors >> | Color Solid Lum: 0 Blue: 0 |
| OK Cancel | Add to Custom Colors |

Select the required color and click on 'OK' button. We recommend you to select light shaded of color to avoid mix up with 'Room Status' color.

Options Button:

Web Room Type Mapping: This option is used for the integration between eZee Frontdesk and eZee Reservation module, to map the room types to retrieve the reservation from web. You can always contact the <u>eZee Support Live Chat Desk</u> for more information regarding the same.

Always Charge Mapping: User can use this option to define the extra charges which are always charged when there is a transaction done on a particular room type.

Rate Type

Rate Type is used to add new Rate Types to your property.

Enter your Tariff Plan/Rate Type on this screen. Define all tariff plans you offer. This rate types will be further used to define your room rate into "eZee Configuration".

Note: You can define different rates for your travel agents, corporate accounts and other business sources. Your rate types can be Rack Rate, Weekly, Monthly, Government etc.

Click on 'Rate Type' \rightarrow 'Tariff Plans' list will open as shown below:

| iearch Cri | teria | | | | <u> (</u> |

In order to define rate type, click on 'New' button \rightarrow 'Add/Edit Tariff Plan' screen will open as shown below:

Enter all information such as Alias, Sort Key, Name and Description \rightarrow 'Save'.

Enter all rate types and then press 'Close' button. You will see all rate types listed in 'Tariff Plans' screen.

Page 11 of 79

Special Settings:

Plan Types:

Hours: Select this option only if you are having rate plan which is based on hourly charges. Once you click on this option it will show you another option to set how many hours this rate type is applicable for. **Days:** Let say you have a rate type weekly, which you offer to guest staying for 7 days, then you should set seven in day's box. When you will select this rate type to Check In/Reserve a guest in 'eZee FrontDesk', the guest's stay will set for seven nights by default.

Week Days: Select this option if you want to apply this rate type on week days. So if you have selected this option, this rate type will be applicable to your guest for all his week days stay.

Note: Only one rate type can be set as 'Week Days'.

Week End: Select this option if you want to apply this rate type on week end. So if you have selected this option, this rate type will be applicable to your guest for all his week end stay.

Note: Only one rate type can be set as Week End.

Contact eZee Support for Web Tariff Plan. This setting is used in 'eZee Front Desk' and 'eZee Reservation' integration.

For 'Week Days' and 'Week End' settings, check Edit Check In/ Edit Reservation: Over Write Seasonal Rate by Week End setting on Configuration Options \rightarrow Rental \rightarrow Rent Option.

Options Button:

Revenue Break down Settings: We have provided this feature for customers who want to know the breakup of the revenue generated when a room is sold. For that you will have to map the rate type with the revenues. User can create the headings for the breakups of the Revenue as per their requirement, by selecting the revenue break down option from configuration tab. To configure the Revenue Break Down settings, one must select the rate type and click on the down arrow on the 'Options' button and select Revenue Break Down Settings.

| Break Down | Per Night | Per Stay | On Arrival | On Departure | On Room | Cost/Adult | Cost/Child | Day Use Cost/Adult | Day Use Cost/Child | Cost / Room | Amt. | Per. |
|----------------|-----------|----------|------------|--------------|---------|------------|------------|-----------------------|-----------------------|-------------|------|----------|
| Breakfast | V | | | | | 2.0000 | 2.0000 | 2.0000 | 2.0000 | 0.0000 | | V |
| Dinner | V | | | | | 8.0000 | 8.0000 | 8.0000 | 8.0000 | 0.0000 | | 1 |
| Evening Snacks | V | | | | | 2.0000 | 2.0000 | 2.0000 | 2.0000 | 0.0000 | | |
| unch. | V | | | | | 8.0000 | 8.0000 | 8.0000 | 8.0000 | 0.0000 | | V |
| Room Tariff | V | | | | | 70.0000 | 70.0000 | 70.0000 | 70.0000 | 0.0000 | | V |
| Гах | V | | | | | 10.0000 | 10.0000 | 10.0000 | 10.0000 | 0.0000 | | V |

Special Settings:

Per Night: User can select this option if revenue break up is to be done based on each night of guest stay.

Per Stay: User can select this option if revenue break up is to be done based on full stay of guest stay.

On Arrival: User can select this option if per stay option is ticked, if revenue break up is to be done at the time of arrival of guest.

On Departure: User can select this option if per stay option is ticked, if revenue break up is to be done at the time of departure of guest.

Cost/Adult: User can define the cost that should be calculated per adult.

Cost/Child: User can define the cost that should be calculated per child.

Day Use Cost/Adult: User can define the cost that should be calculated per adult when it is a day use.

Day Use Cost /Child: User can define the cost that should be calculated per child when it is a day use.

Amt.: User can define the values entered is amount.

Per.: User can define the values entered is percent value.

Meal Plan Settings:

This option is used to map the meal plans you have created with the rate types. To map a particular meal plan with the rate type, first select the rate type you have created. Now, click on the options button and select 'Meal Plan Settings' and select the meal plan that you want to provide with the selected rate type. Save the changes.

Define Tariff

Configure/set the rates of your rooms that you will rent to guests.

There are two types in which you can configure the Tariff for the room types you have created.

- 1. Linear Rate Type (This is set as the default way of setting Rate type)
- 2. Non Linear Rate Type

"eZee Configuration" offer you to define your room rates for different room type, seasons and business sources. At this point we have not yet defined seasons and business source.

Note: The room rate which you will configure has to be 'RATE BEFORE TAX'. Also the rate has to be per night, meaning if you have rate type weekly, and total room rate for seven days is 700, and then you will need to configure 100 as a rate.

Linear Rate Type configuration

Click on 'Define Tariff' option \rightarrow 'Room Rate Definition' screen will open as shown below:

| Veekday Rates 🛛 🛶 | eekend Rates | s | | | | | | | | |
|-------------------|--------------|-----------|--------|------------|--------|----|----------|-------------|---------------------|---|
| Weekday Rates | | | | | | | | Т | ariff Inclusive Tax | |
| Room Type | | Rate Type | | Business : | 5ource | | Season | | | _ |
| All | • | All | - | N/A | | • | ALL | • | Get Tariff | |
| Room Type | Rate 1 | Гуре | Source | | Season | T. | ariff | Extra Adult | Extra Child | ī |

| King Suite | Daily | | | | | | 503.5000 | 132.5000 | 42.4000 | 1 |
| Twins | Weeke | end | | | | | 238.5000 | 84.8000 | 21.2000 | 1 |
| Super Deluxe | Weeke | end | | | | | 296.8000 | 95.4000 | 21.2000 | 1 |
| Presidential | Weeke | end | | | | | 360.4000 | 116.6000 | 31.8000 | 1 |
| King Suite | Weeke | end | | | | | 514.1000 | 137.8000 | 53.0000 | 1 |
| Twins | Americ | an Plan | | | | | 275.6000 | 84.8000 | 21.2000 | 1 |
| Super Deluxe | Americ | an Plan | | | | | 339.2000 | 106.0000 | 31.8000 | 1 |
| Dracidantial | 0 meric | an Dlan | | | | | 402 8000 | 132 5000 | 42 4000 | 1 |

Enter appropriate room rate in 'Tariff' column. You can also enter charges for Extra Adults and Extra Child. Press 'Save' button once done.

Select Option: Use this box if you want to search and edit rates for room type, tariff plans, and season or business source.

Note: You will have to define Season and Business Source to define special rate for them.

Tariff Inclusive Tax: As per default setting the rates are not including tax. If you want to define the rates with tax then user can check this option and enter the rates.

Non-Linear Rate Type configuration

Uncheck the liner Rate Type settings from eZee Configuration>> eZee Icon >> configuration settings >> Rental tab >>Rent Option. Save the changes.

Now when you click on the Define Tariff option, you will see the below shown screen for configuring tariff for the room types you have created.

| /eekday Rates | Weekend Rates | | | | | | | | | | | | |

This screen is same as the one that you get when setting Tariff for Linear Rate Type, except for the fact that you can define rates for up to 4th adult and 4th child.

As shown in the above screen shot, for room type – Twins and rate plan – Daily, you can configure tariff for each adult and child to accommodate in the room as per the maximum adult/child setting you have set for that particular room type.

This way of configuring the rates helps reducing the rate plan/rate types you have to create in the liner rate type configurations and many hotels prefers this type of configuration as they have different rates for 1 adult + 1 Child, 2 Adult + 1 Child, 2 Adult + 2 Child and so on. For more clarification and guidance on how this works, you can anytime contact our support desk person.

P.S.: Users need to define different rates for Week Days and Weekends. This option can be useful, when a property wants to sell room Hotel Rooms for Different rates during the Weekends.

Source/Season

Season Types

As seen in the Hospitality Industry, Hotels offers different rates during different seasons. Using the Season Types options, Users can define different Season types they offer in their Hotels. For example, for seasons like Christmas, Easter, Users can create Season Type as Festivals, for seasons like Summer Vacations, Winter Vacations, Users can create seasons Like Vacations.

| | C Season T Season Ty Define all | | | <u>ع</u> ا |
|---|---------------------------------------|------|----------------------------|--------------|
| | Alias | Name | Description Normal Type | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| _ | L | | New Edit | Delete Close |

Users can Click on "New" and create different Season Types as provided in the Hotel, and the same can be Edited or Deleted using the "Edit" or "Delete" Button.

Season

Many times property offer different rates during different seasons like Peak Season, Low Season, festive Season, etc. You can define all such seasons applicable to your installation and further define rates applicable to these seasons. eZee Front Desk will use this rate automatically for all 'Check In' and 'Reservations'.

Note: Season definition is optional information.

Click on the 'Property Setup' tab and then click on 'Season'. 'Seasons' screen will op en as shown below:

In order to define new Room, click on 'New' \rightarrow 'Add/Edit Room' screen will open as shown below:

Enter all information such as Alias, Sort Key, Name, Room Type, Floor and Remark \rightarrow 'Save'.

Enter all rooms and then press 'Close' button. You will see all rooms listed in 'Rooms' list.

Special Settings:

Top: This is top display position of the box representing this room in Room View.

Left: This is left display position of the box representing this room in Room View.

Height: This is height of the box representing this room in Room View.

Width: This is width of the box representing this room in Room View.

Room Amenities: Select few/all room amenities available in this room.

Connect Room: Sometimes we have connector between rooms and we may sell them together. Select connecting room from a drop down. In "eZee FrontDesk" when we use 'Suite With' option such rooms will be checked in together.

Room Owner: When Management Company manages condominiums and apartments; they would like to enter information of the owner of apartment/condominium. This owner information will be used to generate monthly owner statements.

Phone Extension: Enter phone extension of this room. If you have multiple extensions in this room separate them by comma. This information will be used by eZee Call Logging interface.

Data Extension: This is a feature developed for internet usage on computer and is reserved for future purpose.

House Keeping: Select days for House Keeping to be done on this room.

Inactive Room: Once room is sold, this sale is recorded in reports and has to be kept in record; hence eZee doesn't allow user to delete the rooms. But in case you are not using this room, then to take it off from the list you can make it active.

Room Images: If you wish to enter some of images of room. These images will be available to show to guest from "eZee FrontDesk". In "eZee FrontDesk", right click on any room from 'Room View' and 'Room List', and select 'Room Property', these images will be displayed there. Make sure you only use small images; else software performance can be affected.

Room Size

"eZee Configuration" offer you a way by which you can arrange rooms on your screen. On 'Room View' in "eZee FrontDesk", rooms will be displayed in this order. To arrange rooms you can simply drag and drop rooms to appropriate position. By doing this it will set 'Top' and 'Left' positions to selected rooms. We suggest you to arrange your rooms as your floor plan, so it becomes very intuitive for user to work on it.

You can also modify size of the box which represents room on 'Room View'. Click on the 'Property Setup' menu and then click 'Room Size'. A 'Room Size' screen will open as shown below:

| [Room Size | | 🔒 💌 |
|-------------|---------------|------------|
| Room | Set Room Size | e |
| 101 | | |
| □ 102 = | Floor | All 🔻 |
| 103 | Room Type | All 🔻 |
| 104 | | |
| 105 | | |
| 402 | Height | 50 🚖 Pixel |
| 401 | 1112-Jul | 50 📄 Pixel |
| 403 | Width | 50 🚖 Pixel |
| 201 | | |
| 202 | Move Room | n to Floor |
| 203 | | |
| 204 | N/A | * |
| 205 💌 | | |
| | | Save Close |

Select rooms/floor/room type and set desired size and press 'Save' button. Move Room to Floor: This option can be used to move rooms from one floor to other.

Auto Arrange

If you want to arrange your rooms in rows and columns you can use 'Auto Arrange' option. If you have defined multiple floors, you will need to 'Auto Arrange' rooms on each floor.

Save Position

As soon as you arrange rooms manually/auto hit 'Save Position'.

Tariff Information

Tax Information

This option is used to Add Tax.

As a statutory requirement, you will be collecting tax from your guests as per government rules. You will need to configure your tax structure in "eZee Configuration". Collect all information about applicable tax in your city/state/country and enter it in "eZee Configuration". Tax applicable on room rate is referred as 'Rental Tax'. Rental Tax configuration is different than tax applicable on 'Extra Charges'. "eZee Configuration" offers three taxes to configure, so if you have only two taxes applicable in your region, keep Tax3 caption as blank.

Click on 'Tax Information' \rightarrow 'Tax Information' screen will open as shown below:

| Tax Inform | nation | | | | | | | | B | × |

Exchange Rate

This option is used to add Exchange Rate.

Some property accepts multiple currencies from their Guests. In order to allow this you will need to define all such currencies in "eZee Configuration". At the time of first run, "eZee Configuration Wizard" asks for your base currency. The base currency is normally your local currency.

Click on 'Exchange Rate' \rightarrow 'Exchange Rates' screen will open as shown below:

| | | | E 1 D 1 | |
|-------------------------|----------|---------------|---|-----------------------|
| Country | Currency | Currency Sign | Exchange Rate | Date |
| United States | \$ | \$ | 1.000000000 | 1/1/2001 |
| Jnited Kingdom | £ | £ | 0.6178860000 | 1/1/2001 |
| India United Kingdom | Rs £ | Rs £ | 40.000000000000000000000000000000000000 | 1/1/2001 1/24/2010 |
| - | | | | |
| | | | | |
| | | | | |

In order to define Exchange Rate, click on 'New' button \rightarrow 'Add/Edit Exchange Rate' screen will open as shown below:

| 🕻 Add/Edit Exchange Rate 🛛 🔂 🔤 🔀 | | | | |

| Sign As | Prefix | Suffix | | |
| Decimal Places | 2 | × | | |
| 1.0 | \$ = | 40.0 Rs | | |
| | Sav | re Close | | |

Enter all information such as Country, Currency, Sign and Exchange Rate and press 'Save' button.

Note: Formula for calculating exchange rate will be base currency (divided or multiplied) by exchange rate of foreign currency.

Enter all Exchange Rates and then press 'Close' button. You will see all Exchange Rates listed in 'Exchange Rates' screen.

Note: The Exchange Rate shown in red color is a base currency. All your reports in eZee Front Desk will be in base currency. Please note that you cannot delete base currency. If the base currency is not your local currency, you can edit.

- The Exchange Rate defined in this section will be used when your Guests makes payment in foreign currencies.
- The Exchange Rate will also be used if you want to print Folio in foreign currency. More information on foreign currency folio is available in eZee Front Desk user manual.
- As we all know, currency rates are subject to change frequently, as soon as it is effective for your case, please change it in system.

Settlement Type

In your hotel you may offer different payment options to your guests. Define all such Payment Types and you can use it when you settle your guest folio.

Click on 'Payment Type' \rightarrow 'Payment Types' screen will open as shown below:

| [Paymen | t Types 🔂 🛃 🛃 |
|---------------------|--|
| Payment Define a | Types all Payment Types you may accept at your Property. As for example Cash, Credit Card, Check etc. |
| Alias | Name |
| CASH | Cash |
| CHEQU | Cheque |
| VISA | Visa |
| MAST | Master Card |
| DISC | Discover |
| AMREX | American Express |
| ATM | ATM Card |
| Inactive | <u>N</u> ew <u>E</u> dit <u>D</u> elete Close |

In order to define payment type, click on 'New' button \rightarrow 'Add/Edit Payment Type' screen will open as shown below:

Enter all information's such as Alias and Name and press 'Save' button.

Enter all payment types and then press 'Close' button. You will see all payment types listed in 'Payment Types' screen.

Payment Options:

Credit Card: Select this option if your payment type is a credit card.

Process Credit Card: eZee offers integration with credit card payment gateways, if you have availed such integration and if you want this payment type to be processed by your payment gateway, select this option.

Open Cash Drawer: eZee offers you integration with cash drawer and if you want to give command of opening cash drawer while taking payment from this payment type, select this option. So in eZee Front Desk whenever payment is taken from this payment type, it will open cash drawer.

Surcharge Settings: This setting will help you in scenario where you want to collect surcharge from those guests paying by credit card.

Other Charge: The surcharge will be posted to guest folio as this Extra Charge.

Receipt No. Generation Details: This setting will allow you to generate receipt number as per selected configuration. You can select either of the option:-

Generate general voucher number.

Generate private/manual voucher number.

If you select the manual option, you have the option to check mark "Notify for Blank Receipt No." to avoid generating receipts without the voucher number.

Extra Charge

Extra Charges

You may offer extra services to your guests like Internet service, Phone Calls, Extra Bed, and Airport Transportation etc. You can define all such services under Extra Charge and you can post them to guest folio/invoice.

Click on 'Extra Charges' \rightarrow 'Extra Charges' screen will open as shown below:

| iearch Cri | torio | | | | 6 |

Enter all information such as Alias, Sort Key, Name, Description, Rate, Applicable Tax and press 'Save' button. Enter all extra charges and then press 'Close' button.

You will see all extra charges listed in 'Extra Charges' list.

Other Settings:

Reoccuring: Charge like Extra Bed is a charge normally posted for each night of the guest stay. Please select 'Reoccur' options for such extra charges so if applied they will be posted automatically for each night. Reoccur charge for the day will be posted during 'Night Audit'.

Always Charge: Let us say you have a flat city tax of 2\$ per guest stay. Select 'Always Charge' option for such extra charges which are compulsory per guest stay. 'Always Charge' Type' of extra charge will be applied automatically to all guest check in.

Phone Call Charge: This option will be useful, if you are using eZee Call Logging – integration between PABX/Call Accounting Software and "eZee Front Desk". Contact eZee Support for more information's on eZee Call Logging interface.

Payable: This option is useful, to define charges which are to be used as an Account Payable for the Hotel. Please contact eZee Support for information regarding the same.

Receivable: This option is useful, to define charges which are to be used as an Account Payable for the Hotel. Please contact eZee Support for information regarding the same.

Voucher Number: You can select either of the option:

Generate general voucher number.

Generate private/manual voucher number.

If you select the manual option, you have the option to check mark "Notify for Blank Receipt No." to avoid generating receipts without the voucher number.

Note: If you are using "eZee Burrp" for your restaurant/bar/gift shop, and if you transfer POS bill to Room, they will be posted under 'Extra Charges' section of "eZee Front Desk". A 'Folio Transfer' from one room to other room will appear in 'Extra Charges' section of "eZee Front Desk".

Package:

Package is a collection of extra charges or services or facilities bundled together. The charges of package do not include lodging charges and does not adjust the rate.

For example: Sightseeing can be a group of services of Breakfast, travelling fare, Entrance fees to monuments, etc. which can be offered to guest. This package will be posted under Extra Charges section of eZee Front Desk.

| Alias | Name | Description |

Enter all information such as Alias, Name, Description, select associated extra charges and press 'Save' button. Enter all Deposits and then press 'Close' button.

You will see all Deposits listed in Deposits list.

User Management

User

It is important to create separate account for all users who are going to use this software. All users should log in using their username and password. You can give different set of rights to different users depending on their roles. Depending on these rights, different users will have access to different functions of the software.

Click on 'User' \rightarrow 'Users' list will open as shown below:

| User Name | User Role | Select 🔹 | 🔽 Sh | ow InAct | ive Users |
|--------------|-----------|-------------------------|------|----------|-----------|
| User Name | | User Role | | FD | POS |

| Rental Discount | 0.00 0.00 | |
| Flat Discount | 0.00 | |
| Note : Enter -1 t | o set unlimited discount amount | |
| Enroll Card 🔻 | | Save Close |

In order to define new User, click on 'New' button \rightarrow 'Add/Edit User' screen will open as shown below:

Enter all information such as User Name, Password, Verify Password and User Role. Select/Unselect Operational Privilege and Report Privilege and press 'Save' button.

Enter all users and then press 'Close' button. You will see all user listed in 'Users' screen.

Related Settings:

User Role: You can group functions for different user role. By default those functions will be available to users who are assigned those 'User Role'. Click 'Configuration' menu 'User Role' to modify default user roles.

Access POS: If you want to allow this user to work in eZee Point Of Sale Module, check mark this option.

Notification Setting: Using this option, Administration can define the contact details of the User, when they are needed to notified regarding any messages.

Right to Left Interface: This setting is for users using software in Arabic language.

Language: eZee NextGen is operational in any language that is written on planet earth. You can have a set up, where one of your users runs the software with English interface and the other runs with Spanish or any other language. Contact eZee Support for more information.

Discount: Enter discount percentage this user can offer to guest (sentence to be changed). User will only be able to offer discount if he has been given "Allow to give discount (General Settings)" and "Change Tariff (General Settings)" rights.
Minimum payment required to check in guest: Set this value in percentage, if you want your user to collect minimum payment before doing a check in for any guest.

Discount Settings: Administration can use this option to define the maximum amount or percentage

Operational Privilege Tab: While using eZee FrontDesk Software many important functions are accessible only if the user has the rights; like payment related all functions, editing back date entry, etc. Checkmark the privileges to give additional privilege than the defined set of privilege.(To be changed) To define the set of privilege \rightarrow go to User Role \rightarrow user can modify default user roles.

Report Privilege Tab: eZee Front Desk Software generates many reports. Checkmark the report viewing privileges which you want to assign to this user.

User Role/Ability Level:

In Hotels, we normally find various groups/levels of users like Front Office Manager, Reservation Manager, and Cashier etc. As you have seen in 'Add User' section of this user manual, eZee Front Desk comes with very flexible yet strong user management which allows System Administrator to configure user rights to allow/limit only specific part/function of the system. Normally management gives equal rights to a group of same users, like all Front Desk Clerks should have equal ability level/access of the system. eZee Front Desk comes with predefined User Role, when you can further customize it as per your requirement and can use when you create users.

Click on 'User Role' \rightarrow 'User Role' screen will open as shown below:

As per your requirement, please select/unselect any of the user privilege for any of the User Role. Once you are done with all such changes, please click on 'Save' button.

Note:

Changes in User Role will not affect all existing users.

When you add new user, as per User Role selected, all applicable user privileges are assigned by default. However, you can further unselect some of the user privileges if you want.

Others

DNR (Do Not Rent) Reason:

In order to offer best Guest Services, when you want to record guest information like contact information, rate offered, birth date, guest history and other. It will be equally important to record information about misbehaving guests whom you don't want to provide service again in future. eZee offers very simple yet powerful tool as DNR to handle this.

Click on DNR Reason \rightarrow Do Not Rent (DNR) List screen will open as shown below:

| lias | Name | Description | |
|---------|-----------------------------------|-------------|--|
| В | Mis Behave | | |
| NP [| Money Not Paid Stole Inventory | | |
| | , | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |

In order to define DNR Reason, click on 'New' button \rightarrow 'Add/Edit DNR Reason' screen will open as shown below.

| Alias | МВ | |
|-------------|------------|---|
| Name | Mis Behave | |
| Description | | • |
| | | * |

Enter information such as Name and Description and press 'Save' button. Enter all DNR reasons and then press 'Close' button.

You will see all DNR reasons listed in 'DNR List' screen.

Note:

Information on how to use DNR reason is available in eZee FrontDesk user manual guide.

Room Status Color

eZee FrontDesk uses color codes for easy visual representation of data. Like we have learned in Room Type section, that you can set different back ground color for different room type, allowing the user to easily determine Room Type. Same way, you can also set up different colors of your choice for room status. These colors will be used in eZee FrontDesk section.

Click on 'Status Color' \rightarrow 'Room Status Color' screen will open as shown below:

| 🕼 Room Status Color 🛛 🛃 💻 🔀 | | | | | | | |
|-----------------------------|--------------------------------|----------------|--|--|--|--|--|
| Room | Room Status Color | | | | | | |
| | Vacant Room | O/O Room | | | | | |
| | Occupied Room | Reserved Room | | | | | |
| 2 | Dirty Room | Due Out Room | | | | | |
| | Checked Out Room | | | | | | |
| Room | Room Type Inventory Color | | | | | | |
| | Low Inventory Medium Inventory | | | | | | |
| | High Inventory | | | | | | |
| Click or | the colored box to change | default color. | | | | | |
| | Default Save Close | | | | | | |

Click on color box, as for example click on to set up room status color for Vacant Room. This will open a color palette screen where you can select color of your choice.

Select the color of your choice and press 'OK' button. Optionally you can click on 'Define Custom Colors' for more choice.

Set up colors for each status and press 'Save'.

Special Settings:

Default Button: Press Default button to restore room status to system colors.

Note: It is recommended to select darker shades of colors for Room Status for better visibility.

Identity Types

In recent time it is very important (compulsory in most of the countries) to record guest identification. Define all such Identification Types you may record.

| Click on 'Identity Type' \rightarrow 'Identity Types | ' screen will open as shown below: |
|--|------------------------------------|
|--|------------------------------------|

| lias | Name | Description | Sort Key |
|-----------|-------------------------|-------------|----------|
| IC ASS | Driver License | | 0 |
| TATE | Passport National ID | | 0 |
| | Employee Card | | 0 |
| [| State ID | | 0 |
| | State 15 | | |
| | | | |
| | | | |

| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |

In order to define Identity Type, click on 'New' button \rightarrow 'Add/Edit Guest Identity' screen will open as shown below:

| [Add/Edit Gu | est Identity | Be | x |
|---------------|--------------------|----------------------------|-----|
| Identity Info | ormation | | |
| Alias | LIC | Sort Key 0 | |
| Name | Driver License | | |
| Description | Driver's License a | as Issued by the Governmen | t 🔺 |
| | | | |
| | | Save Clos | e |

Enter information such as Name and Description and press 'Save' button. Enter all Identity Types and then press 'Close' button.

You will see all Identity Types listed in 'Identity Types' screen.

Note:

eZee Front Desk offers a way to scan Passport, Driving License and many such documents directly at the time of check in. Such scanned images will be stored with Guest Record for future reference. More

information is available in eZee Front Desk user manual.

eZee Front Desk also offers a way by which you can directly read guest information from Passport, Driving License, Business Card and National ID. These options are available for some countries only. Contact eZee Support for more information.

Follow-up Types

You can add all the follow up types for your staff to be used as Reminder which will alert Front Desk staff or leave a follow-up comment to give instructions to another staff.

For Example: Payment.

Further these can be used to appear as color bars at the bottom of concerned screens. More information is available in eZee Front Desk user manual.

Click on 'Follow-up Type' \rightarrow 'Follow-up Type' screen will open as shown below:

| C Follow Up | | | | e e | - X |

| Color | | |
| | | |

Enter Type Name and select display color of bar and press 'Save' button. Enter all Follow-up Types and then press 'Close' button.

You will see all Follow-up Types listed in 'Follow-up Types' screen.

GRM Master

eZee Front Desk has a module named "Guest Relationship Module" which is used to handle guest relations. More information on GRM module is available in "Guest Relationship Module" user manual.

The information that you configure here will help you to create and maintain your guest's database easily. For starters, we can configure salutation, which is used when you enter the guest name while checking them in. You can select master option \rightarrow salutation \rightarrow define all the prefixes you will be using before guest name from 'New' button.

will open as shown below:

Enter Alias, Name and Description and press 'Save' button. Enter all Revenues Types and then press 'Close' button. You will see all Revenue Break Downs listed in 'Revenue Break Down' screen.

These Revenue Breakdowns are mapped on Rate Type which is mentioned on page 12 of the manual.

Meal Plan

Many times property offers Lunch, Breakfast, City tour, Pick up and others with stay. When such offers are applicable; property issues vouchers to guests. Also hotel management needs to print reports for various departments like kitchen, pick up department, city tour department to do needful arrangements. Note: To apply Meal plan you will have to map the 'Rate Type' with 'Meal Plan Settings'.

Click on 'Meal Plan' \rightarrow 'Meal Plan' screen will open as shown below:

| Name American Plan | Description | Sort Ke |

| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| L | | |
| | New Edit Delete C | lose |
| | | |

In order to define Account Type, click on 'New' button \rightarrow 'Add/Edit Account Type' screen will open as shown below:

| | City Ledger Ty | /pe 🧧 | 50 | × | | |
|------------------|----------------|-------|------|---|--|--|
| City Ledger Type | | | | | | |
| Alias | CL . |] | | | | |
| Name | Ledgers | | | | | |
| | | | | | | |
| | | Save | Clos | e | | |
| | | | | | | |

Enter information such as Alias and Name and press 'Save' button.

Enter all Account Types and then press 'Close' button. You will see all Account Types listed in 'Account Types' screen.

Account

Most of the hotels sign contract with Corporate companies, Travel Agents, and Websites where these accounts gives regular business and these accounts will pay on behalf of the guests staying in the hotel. The Account is offered a specific credit limit for a specific time frame. The city ledger account holder/corporation can clear the dues by the agreed time frame; say for example on monthly basis. The dues are added to the account whenever the corporate employee is provided the service and the company can have the convenience of paying it once every month. Basically these are credit sales.

New: Allows you to define Numerous City Ledger accounts.

Click on 'New' button \rightarrow 'Add/Edit Account' screen will open \rightarrow enter all information such as Account Name, Address, Contact Information and Other Information. **Credit Limit** can be defined to mention the maximum credit to be allowed to this Account. **Opening Balance** option can be used to define the pending balance as on date. Also, Users can keep a tick on the option "**Create a Business Source**" option to create a Business Source for this City ledger account.

You will see all Accounts listed in Account List.

Edit: Allows you to edit the City Ledger. Highlight the City Ledger and hit on 'Edit' button.

Delete: Deletes the selected City Ledger. Highlight the Business Source and hit on 'Delete' button.

Options Button:

Account Type (Ledger): Select the account type (Ledgers) you want to create.

Invoicing: Allows user to print the visible Invoice details.

Payment Posting: Allows you to see the history of the guest who stayed under this account. This field is for reference only and not editable in this screen.

Explanation of Payment posting form:

Number: Displays Folio number.
Date: Displays date of stay of the guest.
Description: Displays name of the guest.
Amount: Displays payment posted in FD against the folio.
Paid: it displays actual cash paid amount under this account mentioned against the folios.
Open: Balance amount to be taken.
Pay: Allows you to pay the actual collected amount from this Account.

Merge Profile: If information for one account has been created twice or more by mistake or sometimes the companies merge, then it is possible to merge the Accounts together to combine the statistical information and revenues.

Note: This is Irreversible process, so one has to be very sure while you merge.

Steps to merge profile:

Select two Accounts from the combo box and hit on 'Merge' Button. By default sets the first record as master record. You can make any source as Master through 'Make Master'. Select the Account which you want to make as Master. Master record is displayed in bold font.

Hit on Consolidate button.

Market Place

Some of the hotel may want to keep track of the market place their guest belongs to. Such information can be further used by Sales and Marketing department.

Click on 'Market Place' \rightarrow 'Market Codes Types' screen will open as shown below:

| iearch C | Criteria | (() |
|----------|--------------|-----|
| Name | | |
| Alias | Name | |
| ome | Domestic | |
| ast | East Africa | |
| 5A | South Africa | |
| Val | Walk In | |
| [ax | Taxi | |
| A | Travel Agent | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |

In order to define Market Place, click on 'New' button \rightarrow 'Add/Edit Market Place' screen will open as shown below:

| [Add/Edit | t Business Source Types 🔒 🗾 | |
|--------------------------|-----------------------------|---|
| Business Alias | Source Type | Enter Alias and Name and press 'Save' button. |
| Name | Domestic | |
| | Save Close | Page 50 of 79 |

Enter all Market Segments and then press 'Close' button. You will see all Market Segments listed in 'Market Segments' screen.

Business Source

Sales and Marketing department would like to do sales analysis of the source of the business. Such information and analysis would be helpful to design promotion campaign, marketing budget or even helpful to determine what rate to offer to which travel agent. You can define your entire business source here and associate this business source with Check In/Reservation.

You can see the commission in 'Business Source Commission Report'.

New: Allows you to create new Business Source.

Click on New button \rightarrow Add/Edit Business Source screen will open \rightarrow enter all information such as Company Information, Address, Contact Information, Commission Plan and Other Information \rightarrow press 'Save' button. You will see all Business Source listed in Business Source list.

Special Settings:

Commission Plan Information:

Plan: Plan is to define the commission of the Business Source.

% of all Night: This will give commission based on the full stay of guest.

% of First Night: This will give commission based on the first night rate of guest.

Fixed amount per night: This will give a commission based on the whole stay of guest.

Fixed amount per stay: This will give a commission based on the first night information of guest.

Value: Based on the plan selected in Commission field, you can select either xx% or xx amount in this field; **Define Special Rate**: To define commissionable/special rate for the source, check mark this option. It will allow you to set up special rates for this Business Source.

Steps To Define Special Rate:

To make this source visible in the Define Tariff menu, check mark this option.

From Define Tariff menu configure Commissionable rate for Business Source.

At the time of Check In you can select this special rate.

Create an Account: Select this option if you are going to offer credit sales for this Business Source. Selecting this option, an Account will be created for this Business Source; same can be used to post credit sales. This account can be found in City Ledger. It will copy all information from Business Source to create an Account. **Print Summary**: Allows you to print the Summary of count and finances of Guests coming from that Business Source. To view the summary \rightarrow highlight the account \rightarrow select the Date range \rightarrow hit on 'Display' button, which shows the full amount of the stay of the Guest with total Tax.

Merge Profile: To combine, incorporate or unite the financial attributes of two or more profiles into a single enterprise is called merging. To merge the sources Check Mark the sources and hit on Merge Profile.

Note: This is Irreversible process, so one has to be very sure while you merge.

Steps to merge profile:

Select two Business Sources from the combo box and hit on 'Merge' Button. By default set the first record as master record. You can make any source as Master through Make Master. Select the Account which you want to make as Master. Master record is displayed in bold font. Click on finish button.

Edit: Allows you to edit the Business Source. Highlight the Business Source and hit on 'Edit' button.

Delete: Deletes the selected Business Source. Highlight the Business Source and hit on 'Delete' button.

Transport:

Hotels many a times offer Pick-up and Drop Off facilities to the guest. Using these options, Hoteliers can keep a track of the pickups and drops offs to be done regarding the transportation modes available.

Mode

This option can be used to define different modes of transportations available for transportation which is offered to the guest for the transportation.

Users can click on "*New*" to define all the modes provided by the hotel.

Transport Name

Users can use this option to define the different companies providing transportation facilities as per the modes defined. It can be used to provide a list of transportation to the guest as per there convenience.

Stations

Hoteliers can use this option to define the nearby Station for transportation which can be later used to keep a track of the hotel transport facilities provided for pickup and drop if provided by the hotel.

Schedule

Users can use this option to define the schedule of the transportation as requested by a guest to keep a track of the facilities being provided.

Others

Cash Drawer

At the time of closing shift, user prints Cashier Report, where they hand over Cash for the shift. The normal practice is to print the denomination of cash. This screen offers you to define such currency denomination which can be used on Cashier Report.

Click on 'Cash Drawer' \rightarrow 'Cash Drawer' screen will open as shown below:

| (Cash Drawer | 8 | x |
|---|-------------------------|---|
| Cash Drawer Define denomination of all currencies yo | ur property may accept. | C |
| Currency | Sign | |
| 100.00 | \$ | |
| 50.00 | \$ | |
| 20.00 | \$ | _ |

In order to define Reason/Remark, click on 'New' \rightarrow Add/Edit Reason/Remark screen will open as shown below:

Enter Alias, reason and select the Category for which this void reason is configured. After saving you will find all the reasons listed in the Reason/Remark list.

Language

By default eZee FrontDesk Software comes in English language, but eZee Software supports any language. Example: Arabic, Spanish, French, Vietnamese, etc.

By simply importing the XML of language, eZee Software will be displayed in your local language.

Import Language

User can import the language pack and can see the software labels and language in your local language.

Click on import language \rightarrow Import language screen will open \rightarrow Browse the path from this icon \longrightarrow select the XML file \rightarrow Import.

Note: To see other language user language should be selected as 'Custom language'. To select custom1 language >> go to 'Configuration' Tab \rightarrow user \rightarrow edit/new user \rightarrow language setting \rightarrow custom1 \rightarrow save \rightarrow restart application.

Export Language

After making changes in language user can save a copy of the changed language by exporting the language.

Click on 'Export Language' \rightarrow 'Export language' screen will open \rightarrow Browse the path from this icon \longrightarrow and Export.

Master Language and Other Languages

This option is used to change the language in various screens. The basic purpose of this window is to change the text of the default screen to 'Changed Language'.

Export Master

This is to export booking data and is customized for one client. Contact eZee Support desk for further details.

Configuration Option

eZee Front Desk Configuration provides some features which you can customize and do the settings so that the features function properly as per your requirement.

)

Click on Income Icon located at top left corner. A drop down menu will display \rightarrow select 'Configuration Settings' Menu \rightarrow another screen named Options will display; here users will need to do the customization as per their requirements.

Type of Number: User can specify the number style which can be either eZee FrontDesk default numbering or auto increment.

Reset: User can specify the period of reset for the numbering. Clicking allows user to specify the period, it can be none, yearly, monthly or daily. If monthly option is selected the reset will be done on 1st of every month. A prefix will be like first four digits shows year and next two digits shows month, so for July 2010 a number like 201007 will be a prefix.

Prefix: User can specify a text which should be kept as a prefix before the number. For example: For Registration Number, one can mention the prefix as RZN. So whenever a reservation is done, the number generated will be RZN1234. This will help you to understand which number was generated from which operation.

Start From: User can specify a starting number. The basic reason for this option is that, if a property is using software and also has some data in some other software. For example: previous software had 55 reservations then user can specify the number in starting as 56.

Image Settings:

Image Path: User can define the path where images need to be stored. User can click on to select the path.

Night Audit Settings:

| Night Audit Settings | |
|----------------------|--|
| Night Audit After | 12:01:00 AM 🚔 🔲 Show Night Audit Reminder |
| Dirty after Days | 0 🚔 Make occupied room dirty at Night audit |
| 👿 Enable Quick Night | Settings Mandatory Post Reoccur Charge |
| Enable Print Report | Settings Upload Report On FTP Host |
| Auto Backup | C:\Documents and Settings\Jitendra\Des 🔜 🔲 Upload Backup On FTP Host |

Night Audit After: User can select this option if the user wants to define a time after which the night audit process can be done.

Show Night Audit Reminder: If you keep a tick on this option, system would give you a pop-up at the start of the software if the Night Audit is not done as per the time mentioned for the Night Audit, so that the user does not do any transaction on the past date.

Dirty after Days: This option can be used to define the number of days after which a vacant room is to be shown as dirty, so that the Housekeeping department can take the necessary steps regarding it.

Make Occupied Room Dirty at Night Audit: User can keep a tick on this option, so that the Housekeeping department is notified regarding the necessary actions to be taken on an Occupied room each day. **Enable Auto Night Audit:** User can select this option if the user wants to do night audit quickly and do not

want to go through the whole wizard. **Settings**: User can define the settings for booking and reservation. The step to be executed for booking and reservation which did not arrive is: mark as 'No Show', mark as 'Void' or mark as 'Cancel'.

- **Post room Rate for Suspense room**: User can specify if the room rate has to be posted for suspense room during night audit.
- Freeze Data after day close: User can specify if the data need to be freeze after the day close process is completed.
- **Post Mean Plan Charges**: Check this option if you want to post the meal plan charges when the night audit is done.

Mandatory Post Reoccur Charge: User can keep a tick on this option, so that the Extra Charges applied to a room, which are marked as "Reoccurring" to be posted mandatorily, even if the Night Auditor forgets to do so.

Enable Print Report: Using can select this option, if they want to auto print certain reports after the Night Audit has been done. The Settings option can be useful to define the reports which are to be printed, previewed or exported.

Upload Report on FTP Host: User can keep a tick on this option to upload the reports on FTP Host, so that they can be accessed by the User from the Internet anytime or anywhere they want. You can contact the eZee Support Live Desk for more information on the same.

Auto backup: User can select this option if an automatic backup needs to be done at the time of night

audit. User can click on **even** to select the path.

Upload Backup on FTP Host: User can select this option to upload the Database Backup to be uploaded on the FTP host, so that even this there is a system crash, and the database can be recovered, Users can download the database from the FTP Host and restore it, so that there is no lose of database. You can always contact the eZee Support Live Desk for more information regarding the same.

Rental Tab

Rent Option:

| Rent Option | | | | |
|---|----------|---|--|--|

| Remarks is mandatory for payment. | | | | |

Round off Type: User can specify the setting that needs to be used to do a round off for the value. A few pre-defined options are available. User can select from those, or can select 'manual', if the user wants to do a round off manually.

Round off Limit: User can specify a value of the round off type as per their requirement. This setting will convert the folio amount in Round off figures. If you do not want it to be auto rounded off, keep it manual. **Minimum rental age**: User can specify the age of the guest whom the room should be rented. Age calculations are done based on the date of birth entered at the time of check in.

Check In through wizard: User can specify if a wizard (step by step screens to help you take the walk-in) should be displayed when the user directly clicks on the room to do a check in.

Reservation through Wizard: User can specify if a wizard (step by step screens to help you take the reservation) should be displayed when the user clicks on New Reservation Button on the Front Office Tab. **Default Inclusive rate on Wizard Dialog**: User can specify the rate when entered on the first step of check in wizard and that should be considered default as inclusive of rate.

Enable Reservation Serializable: This feature if checked; will help to put your reservation on hold and go for some other urgent task if required to be attended and continue entering the details of the same reservation when you return. A window pops up asking to resume the previously saved reservation. If cancelled, you can take a new reservation.

Linear Rate Setting: This feature in checked marked by default. When this is de-activated, it will change the way you can configure the rate type and tariff for a room type based on the pax you allow to accommodate in a room while check-in. We will see the detailed explanation of this feature when we learn how to define Tariff Under Tariff Operation group of functions.

Permit only zero balance check out: Activate this setting if you do not want your users to check out if the folio balance is not zero.

Show Checkout Button Before One Day: User can keep a tick on this option, so that the Checkout Button is showed in the Guest Room before one day of the departure date as mentioned while doing the check in.

Note: The checkout button in the Guest Room will only show on the departure date, if users want to check out the guest before the departure date, you will first need to change the stay of the guest. Apply Defined Rates on Business Source Selection: Users can keep a tick on this option, if they have defined special rates to be applied for a guest checking in via any business source.

Minimum Balance Required to Extend Stay: User can keep a tick on this option is they do not want users to extend the stay of a guest, if there s no minimum balance to extend the stay as defined while doing the check in.

Edit check in/edit reservation over write seasonal rate by weekend rate: User can specify if the seasonal rate should be replaced by weekend rate. Considering that the property has a different rate for weekdays and weekend.

Remarks is Mandatory For Payment: Administration can keep a tick on this option if they want user to mention remarks on doing any payment in the software.

Check In and Check Out Time Settings:

| Check In & Checkout Time Settings | | | |
|-----------------------------------|--|--|--|
| Check In Time | 11:00:00 AM 🔄 🗹 Enable Day Use feature | | |
| Check Out Time | 2:00:00 PM 🔄 🕅 Night Posting for day used | | |
| 24 Hours Checkout Time | Consider Same day CheckIn CheckOut Day Use | | |
| | Grace Period 00:00 | | |

Note: If 24 Hours Check out Time option is unchecked then the user can specify the 'Check In' and 'Check Out' time.

Check In Time: User can specify what should be the standard check in time.

Check Out Time: User can specify what should be the standard check out time.

24 Hours Check out Time: User can specify if the check out time should be calculated as 24 hours from the time of check in. When this setting is activated, system time will be taken as the check in time.

Enable day use feature: User can specify if the system should allow hourly rentals.

Night posting for day used: User can specify that posting of rent should be done for day use. Hence room will be available for same day check in and check out.

Consider same day check in check out day use: User can specify if same day check in and checkout should be termed as day used.

Grace period: User can specify the time in hours that should be given extra when checking out. The system will show the late checkout message only after the grace period is exceeded.

Check Point Setting:

| Check Point Settings | | |
|-------------------------|--|--|
| Use Check Point Feature | Zero Balance POS House Keeping Laundry Minibar | |

Use check point feature: User can specify which options should be considered in check point. The options available are mini bar, laundry, House Keeping, POS, Zero Balance. If you activate this feature, the system will verify with the heads of all the checked departments if anything is due for the checking out client. This empowers the front desk to hold the check out procedure if anything is due from any of the department.

Weekend Setting

User can specify the days that need to be considered as weekend.

| Weekend Se | ettings | | | | | |
|------------|---------|-----------|----------|----------|------------|----------|
| Monday | Tuesday | Wednesday | Thursday | 🔲 Friday | 🔽 Saturday | 🔽 Sunday |

Identity Setting:

| Identity Settings | |
|------------------------------------|--|
| Check In Only when Identity exists | |

Check In only when ID exist: User can specify that a check in is possible only after the ID information is entered. This feature is useful in regions/countries where id information is mandatory for check in procedure.

Extra Charge Credit Limit Setting:

| Extra Charge Credit Limit Settings | | |
|------------------------------------|--------------------------|---|
| Extra Charge Posting Type | Unlimited Daily Credit | : |
| Extra Charge Credit Limit | 0 | |
| POS Posting Type | Unlimited Daily Credit | : |
| POS Credit Limit | 0 | |

Extra charge posting type: User can specify the limit for the extra charges. Available options are 'unlimited', 'up to folio balance' and 'up to credit limit'.

Extra charge credit limit: User can specify the credit limit; this option is useful if the above option is selected as 'up to credit limit'.

Daily Credit: User can specify if the value should be considered as credit on daily basis or for the full stay. **POS posting type**: User can specify the limit for the charge from POS. Available options is 'unlimited', 'up to folio balance' and 'up to credit limit'.

POS credit limit: User can specify the credit limit; this option is useful if the above option is selected as 'up to credit limit'.

Meal Plan Setting:

| Meal Plan Settings | | | |
|--|-------------------------------------|-------------------|--|
| Posting Settings | Printing Settings | | |
| Post Meal Plan Charge Separately | Print Duplicate C | Caption on coupon | |
| Move checkin date charges to checkout | Duplicate Caption | Duplicate Copy | |
| Enable Meal Plan Settlement | Print only one coupon for all guest | | |
| Allow Checkout With Pending Posting | | | |
| 🔲 Bifurcate Meal Plan And Tariff On Wizard | | | |
| Show default meal plan settings to add | | | |

Posting Settings:

Post meal plan charge separately: User can specify if the meal plan charge should be calculated separately from rent or should be part of rent.

Move Check In date charges to Check Out: Enabling this option will move the charges posted on Check In date to Check Out date for the meal plan offered.

Enable Meal Plan Settlement: When you check mark this option, you will be able to settle the meal plan charges (if offered) from the extra charge tab of the room. You will see a 'Settle Meal Plan' button in the bottom of the extra charge tab which when clicked will give you more options to settle the meal plan.

Allow Check Out with pending posting: As it mentions, if you check mark this option, the system will allow you to check out the guest even if the Meal Plan posting is not done on the room.

Bifurcate Meal Plan and Tariff On Wizard: If any meal plan is assigned to a room type, when a user does a new checkin and mention the Room Rate while doing the Checkin through the Checkin Wizard, keeping a tick on this option bifurcates, the room rate with the meal plan rate extensively.

Show Default Meal Plan settings to add: Keeping a tick on this option shows pop up to the users to add the default meal plan configuration to a guest.

Printing Settings:

Print Duplicate Caption on Coupon: Check mark this option if you want to print the duplicate caption on the duplicate coupon that you print.

Duplicate Caption: Mention the caption that you want to print on the coupon when you print a duplicate copy.

Print only one coupon for all guest: If there is more than one PAX staying in the room, keeping a tick on this option, print only one meal plan coupon for all the guests.

Reservation/Check In Mandatory Setting:

| Reservation/CheckIn Mandatory Settings | | | |
|--|---------------------------|---------------------------|--|
| Reservation Settings | CheckIn Settings | Booking Settings | |
| First name is mandatory | First Name is mandatory | | |
| Last Name is mandatory | Last Name is mandatory | | |
| Buss. Source is mandatory | Buss. Source is mandatory | Buss. Source is mandatory | |
| Phone is mandatory | Phone is mandatory | Phone is mandatory | |
| Email is mandatory | Email is mandatory | Email is mandatory | |

You can specify if the first name, last name, business source, Phone and or Email information is suppose to be mandatory or not from here for Reservation, Check In and Booking. This means, if the detail of the type specified is not given then the Reservation, Check In and Bookings won't be possible.

Purge Guest Data Setting:

Purge guest data after: User can specify the number of days after which the guest data should be deleted completely from the system.

| V Purge Guest Data Settings | |
|-----------------------------|--------|
| Purge Guest data after | 1 Days |

Allowance Setting:

Allowance as extra charge: User can specify the heading under which the allowance should be considered as extra charge.

| Allowance Settings | | |
|---------------------------|------------------------------|--|
| Allowance as Extra Charge | Charges | |
| | Allowances | |
| | American Plan | |
| | Charges from Online Reservat | |
| | Continental Plan | |

City Ledger/ Business Source Mandatory Settings:

| City Ledger/Business Source Mandatory Settings | | |
|--|-------------------------------|--|
| City Ledger Settings | Business Source Settings | |
| First name is mandatory | First name is mandatory | |
| Last name is mandatory | Last name is mandatory | |
| Registration no. is mandatory | Registration no. is mandatory | |
| Registration no1 is mandatory | Registration no1 is mandatory | |
| Registration no2 is mandatory | Registration no2 is mandatory | |

User can specify the details to be mandatorily mentioned while creating a Business Source or City Ledger account in the software.

Inclusive Tax Settings:

| Inclusive Tax Settings | |
|------------------------|----------------|
| Luxury Tax | Service Charge |
| VAT | |

User can define the Taxes which are inclusive in the Room Rate using this option

Business Source Wise Room Type Allocation:

| Business source wise room type allocation | |
|--|--|
| Enable Business source wise room type allocation | |

Keeping a tick on this option, allows user to allocate Room types to a business Source, which can be allocated from the eZee Configuration Business Source option. This can be useful, if a hotel has more Transaction done via any Business Source.

Yield Settings:

Please contact eZee Live Support desk for more information regarding it.

| Vield Settings | | |
|----------------------|--------|--|
| Yield Rates Based On | | |
| Occupancy | RevPar | |

Display Tab

Localization

User can specify the details about country name, currency, country alias, state province caption and zip/postal code caption.

| Localization | | |
|-------------------------|-----------------|-------------------------------|
| Country Name | United States 🔹 | Default Currency 💲 🔻 |
| Country Alias | USA | Enable City/State Auto Lookup |
| State/Province Caption | State | Text Alignment Right to Left |
| Zip/Postal Code Caption | Postal Code | Auto Backup Settings |

Enable city/state auto lookup: User can enable the city and state lookup based on available country and state.

Text alignment right to left: User can specify the orientation of text; this is of help for Arabic, Hebrew and many other languages which are written right to left, if user wants to use that language in the software then the user can use this option.

Auto Backup Settings: User can use this option to define a Windows scheduled task so that the system takes an Auto Backup of the software database automatically.

Financial Period

User can specify the setting based on which financial period is counted. User can specify 'From Date' and month and 'To Date' and month.

| Financia | al Period | | | |
|----------|----------------|------------------|---------------|------------|
| From | 1 🚔 From Month | January 🔻 To Day | 31 🛓 To Month | December 💌 |

Room Layout

User can specify the setting to display room type on the room. User can also specify the setting to display guest name on the room.

| Room Layout | | | |
|-------------------|----------------------|-----------------------------------|--|
| Display Room Type | 📝 Display Guest Name | V Status Color As Room Back Color | |

Guest Name Setting

User can specify the setting in what way the guest name should be displayed in Folios. User can specify either first name or the last name should be displayed first.

| Guest Name Settings | |
|---------------------------|-----------------------------|
| First name then last name | ◎ Last name then first name |

View Option

User can specify the number of days that needs to be displayed in grid view. User can also specify the number of digits to be displayed after decimal point. You can keep a tick on the options mentioned as to Notify the user if there is balance due for a guest on the stay view, or change the Stay View Date Format, and or to show the checkout status color after the checkout of a guest.

| View Option | | |
|--|------------------------------|----------------------|
| Show Tool Tip On List View | No of Digit(s) after Decimal | Point 2 🚔 |
| Stay View | | |
| Days to display in grid view | Stay View Date Format | dd - ddd |

| Display Room Type wise inventory color on Inve | entory View | |

MyKad Setting

Please contact eZee support to get this setting done. This setting enables you to read the MyKad card. MyKad is the compulsory <u>identity document</u> for <u>Malaysian</u> citizens aged 12 and above. Introduced by the National Registration Department of Malaysia, besides the main purpose of the card as a validation tool and proof of citizenship other than the birth certificate, MyKad also serves as a valid <u>driver's license</u>, an <u>ATM card</u>, an <u>electronic purse</u>, and a <u>public key</u>, among other applications, as part of the Malaysian Government Multipurpose Card (GMPC) initiative.

| V MyKad Settings | | | |
|-------------------|------|---------------|------------------|
| MyKad Reader | None | | |
| License Key | | Reader Name | |
| Time Out Interval | 5 | Identity Type | Select ID Type 🔹 |

Extra Charge Setting

User can specify the captions for Tax1, Tax2 and Tax3.

| Extra Charge Settings | | | | |
|-----------------------|-----------|--------------|------|--|
| Tax1 caption | VAT | Tax3 caption | Tax3 | |
| Tax2 caption | C.T. Levy | Tax4 caption | | |
| | | | | |
| | | | | |

Forex Module:

Enable this to see Forex tab along with others in eZee Front Desk.

Note: Forex Module is an Add-on which is not available with the Basic eZee Frontdesk software. It is to be0020purchased additionally and can be used to deal in Multiple currencies.

Auto Update:

Keeping a tick on this option, enables system to automatically check for any new version of the software and update the version.

| Auto Update | |
|--------------------|--|
| Enable Auto Update | |

Auto Reminder on Reservation/Booking:

| Auto Reminder on | Rese | rvation/Booking | | |
|-------------------------|------|-----------------|-------------------------|---|
| Users to get reminders | | User | User Role | |
| | | Accountant | Night Auditor | Ξ |
| | | Admin | Administrator | |
| | | Back Office | Back Office Manager | |
| | | Cashier | Front Office Desk Clerk | - |

Administration can set reminders for User's for a booking or reservation arriving at the hotel.

Frontdesk User Message Box Setting: This option can be used to define the period after which a message for a user can be marked as read

Screen Saver: This option can be used to define the period after which the screen saver can be turned on, so that when a user is not around the computer screen, it locks the software, and no other can operate the software as it requires User password to re-login.

Registration no. Caption: This option can be used to define the caption of the Registration Numbers to be printed on Guest Folio's/Bill's.

Integration Tab

Note: These are some integration provided by eZee Software which is customized on case to case basis. Hence user is requested to contact eZee support to get the settings done. These integrations will not work in demo version, as it has to be customized on individual basis.

Call Posting: This integration will acts as a bridge between a call accounting software and eZee NextGen software. It will read the call charge information from call accounting software and post it to eZee NextGen. Calls will be directly posted to room folios. All calls that are made from rooms not rented are posted in a special location for your review.

Accounting Interface: This integration works as a bridge between eZee NextGen and your Financial Accounting software. This interface transfers financial transactions like Sales, Purchase, Account Receivable, Accounts Payable, Receipt, Vouchers etc. from eZee NextGen to Financial Accounting Software. Interface to Quick Books, Sage Accounting (Peach Tree) and Tally are readily available. However, we can write interface to any other financial accounting software provided that the technical information is available from the Vendor.

Web Reservation: eZee Reservation enables your website to offer web based reservation. Further we offer integration between eZee Reservation and eZee Front Desk NextGen. Having this interface all Reservation you receive on your website will be directly fetched to eZee Front Desk NextGen. Optionally you can also upload your room inventory and room rate from eZee Front Desk NextGen to eZee Reservation database.

Electronic Key Lock Interface (Door Lock): Typically, all door locks come with a software so when a guest checks in, desk clerk checks in guest in Hotel Software and Door Lock software. Having this interface in place, you only have to check in guest in eZee Front Desk NextGen and it will send necessary signals to Key Card encoder to make Room Key for the guest for given check in and checkout date. This further adds control to the hotel operation. As such, eZee Front Desk NextGen can be integrated with any door locks, provided that their technical information are available from Vendor. Interfaces to INHOVA System, VingCard Vision System, Digicard Mifare System, Digicard Temic System, CISA System, Smart Card System, RF Lock, Hune Lock, BT Lock, Saf Lok, etc are readily available.

Report Any Where Settings (RAW): Report Any Where is an add-on which allows the top level management to look at all important report over internet using a simple web browser in real time. Data from Hotel Database is uploaded to Web Server in real time, and reports can be accessed using an internet connection from any corner of the world. You do not need expensive broadband connection to upload data from Hotel to Web; it can work even on a dial up connection.

Shomoos Integration: Shomoos is a unique and modern web based electronic service that is designed and offered by AI-EIm to link all tourist companies with each other as well as provide a centralized database on tourist information. Tourist companies can use and share information with each other for statistical and business cooperation purposes.

This integration is available only for customers from Middle East region.

Cash Drawer: Play safe by integrating your cash drawers with eZee NextGen. Upon integration, the cash drawer can be accessed only when cash related transaction happens in the software. Cash Drawer remains locked in all other cases.

Internet Interface: This interface will act as a bridge between your internet billing software and eZee FrontDesk. It will seamlessly transfer and post the charges from the internet billing software to guest rooms for the time and bandwidth usage made by the guests.

Notification Tab

Notification is a module which helps the admin with email and sms notifications of various predefined actions. There are two types of notifications predefined in this module; One for Guests and the other for the user of this software. The admin has to simply set the email server settings to send email notifications and select the service provider and set the user name and password details for sending SMS notifications.

| V Notification Settings | | | | <u>Settings</u> |
|---|--------|---|-----|-----------------|
| | Email | | SMS | |
| Notification For Guest | \geq | Ø | | X |
| Reservation Confirmation | | | | |
| Booking Confirmation | | | | |
| Cancel Reservation Confirmation | | | | |
| Cancel Booking Confirmation | | | | |
