Laboratory Balances

98648-019-79

User Information

Warning │ danger symbols used in these instructions:

WARNING!	These notes identify hazards which have a high probability of resulting in death or serious physical injury if not avoided.
CAUTION!	These notes identify hazards that can result in moderate or mild injuries if not avoided.
IMPORTANT!	These notes identify hazards associated with the risk of material damage.

Explanation of Symbols
The following symbols are used in these instructions:
▶ Indicates a required action
▷ Describes what happens after you have performed a particular step

Perform steps in the specified order:
1. First action
2. Second action
3. ...
– Indicates an item in a list

Conventions for this User Manual:
– The illustrations in these instructions are based on "Standard" balances.

Applications Advice │ Technical Support
Addresses for applications advice and technical support can be found on the website at:
http://www.sartorius.com

2

Contents

Intended Use

This high-precision balance is designed to be used exclusively indoors under normal atmospheric conditions.

It was developed specifically for the exact determination of the mass of materials in liquid, paste, powder, or solid form. Appropriate containers must be used for each type of sample material.

Safety Instructions

Guidelines and General Information

– The balance complies with EU Directives and standards for electrical safety and electro-magnetic compatibility*. Improper use or handling can, however, result in damage and | or injury.
Any improper use or operation of the balance, i.e., that is not consistent with the instructions, will result in forfeiture of all claims under the manufacturer's warranty.

– Personnel need to have read and understood these installation instructions, including the safety instructions.

– In the event of use in systems and ambient conditions which have greater safety requirements, you must observe the requirements and provisions applicable in your country.

– Always keep the equipment and balance freely accessible.
Any installation work or balance operation that does not conform to the instructions will result in forfeiture of all claims under the manufacturer's warranty.

* = see "Specifications"

| ⚠ WARNING! | **Danger of explosion**
Do not use this equipment in hazardous areas in which explosive materials are present. |

| ⚠ WARNING! | Make sure that the voltage rating printed on the AC adaptor is identical to your local mains voltage. |

| ⚠ WARNING! | **Installation Instructions**
Do not operate the device if the housing or AC adaptor is damaged. Immediately disconnect the damaged device from the power by pulling the plug. |

| IMPORTANT! | Do not expose the balance, its power supply or accessories supplied by Sartorius to extreme temperatures, aggressive chemical vapors, moisture, shock, vibrations or strong electromagnetic fields.
Observe the conditions of operation described in the "Technical Data"! |

| IMPORTANT! | Note on Installation:
The operator shall be solely responsible for any modifications to the equipment and for connecting any cables or equipment not supplied by Sartorius. Information on operational quality is available upon request from Sartorius. Only use original Sartorius accessories! |

Note the IP protection class of the balance and its power supply! Do not allow liquid penetration. The protection class specifies the suitability of equipment for various environmental conditions (moisture, foreign bodies).

| ⚠ WARNING! | Before cleaning the AC adapter or the balance: Unplug the power cord. |

The balance may only be opened by specialized personnel trained by Sartorius.
Do not open the AC adaptor.

| ⚠ CAUTION! | If glass breaks, there is a risk of injury posed by cuts on glass edges. |

| ⚠ CAUTION! | Lay the cables where they pose no risk of causing someone to trip. |

Observe the additional safety and danger information in the following chapters.

4

Getting Started

Storage and Shipping Conditions
– Do not expose the balance to extreme temperatures, moisture, shocks, blows, or vibration.

Unpacking the Equipment
▶ After unpacking the device, check it immediately for any external damage.

▷ If you detect any damage, proceed as directed in the "Care and Maintenance" chapter, "Safety Inspection" section.

▷ Save all parts of the original packaging for any future transportation. During shipment, please do not leave cables plugged in!

Equipment Supplied
– Balance
– Weighing pan
– Pan support only for models with a round weighing pan
– Mains power supply unit

   Additional equipment on the following models:
   Entris64-1S, Entris124-1S,
   Entris224-1S, Entris64i-1S,
   Entris124i-1S, Entris224i-1S
– Sliding panel draft shield
– Shield disk
– Shield plate
– Dust cover

Additional equipment on the following models:
Entris153-1S, Entris323-1S,
Entris423-1S, Entris623-1S,
Entris153i-1S, Entris323i-1S,
Entris423i-1S, Entris623i-1S
– Round glass draft shield (with shield plate and cover)

Setup
Choose a location that is not subject to the following negative influences:
– Heat (heater or direct sunlight)
– Drafts from open windows and doors
– Extreme vibrations during weighing
– Extreme humidity

Conditioning the Balance
Moisture in the air can condense on cold surfaces whenever the equipment is moved to a substantially warmer place. Allow the device to acclimatize for about 2 hours at room temperature, leaving it unplugged from the power supply.
5

Installation
Setting up the Balance
Balances with Sliding Panel Draft Shield

▶ Place the components listed below inside the
weighing chamber in the order given:
– Shield plate
– Shield disk
– Pan support
– Weighing pan

Balances with Round Glass Draft Shield

▶ Position the components listed below in the order
given:
– Place lid on top of the balance with the rim facing
upwards and rotate until it is securely in place
– Pan support
– Weighing pan
– Glass cover
– Cover with the rim facing downwards
Balances with a Round Weighing Pan
▶ Position the components listed below in the order
given:
– Pan support
– Weighing pan

Balances with a Rectangular Weighing Pan
▶ Place the weighing pan on the balance

6

Power Connection | Safety Precautions

– Use only an original AC adapter 6971991

▶ Insert the right-angle plug into the jack
▶ Select a country-specific power cable and attach to the AC adapter
▶ Connect the device to the power

Mains connecting lead:

Item No.	Region	Country
6971953	Europa	EU (except United Kingdom)
6971954	USA	Canada	China	Japan
6971955	United Kingdom
6971956	Australia, New Zealand
6971957 6971964	South Africa India
6971998	Brazil
6971999	Argentina
6900931	South Korea

Safety Precautions
Desktop power supply 6971991:
An adaptor rated to Class 2 can be plugged into any wall outlet with no additional safety precautions required.

A ground or earth terminal is connected to the balance housing. The balance housing can be additionally grounded, if required for certain functions.
The data port is also galvanically linked to the balance housing (mass).

Connecting Electronic Peripheral Devices
▶ Make sure that the balance is unplugged from the power supply before connecting | disconnecting a peripheral device (printer or PC) to or from the interface port.
Warm-up Time

In order to provide accurate results, the instrument must warm up for 30 minutes. Only after this time will the required operating temperature have been reached.
Anti-theft Locking Device

To fasten an anti-theft locking device, use the lug located on the back of the balance.

▶ Secure the balance at the place of location, e.g., with a chain or a lock.

8

Levelling the Balance
Purpose:
– To compensate for unevenness at the place of installation

Always level the balance again any time after it has been moved to a different location. Only the 2 front feet are used for leveling.

▶ Screw in both rear support feet (only on models with a rectangular weighing pan).

▶ Turn the front levelingfeet as shown in the illustration until the air bubble is centered within the circle of the level indicator.

> Normally, several leveling steps are required.

▶ On models with a rectangular weighing pan: Screw out both back leveling feet until they touch the setup surface.
Below–Cell Weighing

A port for a below-cell weighing hook is located on the bottom of the balance.

▷ Not permitted for applications in legal metrology.

▶ Lift cover plate out of the bottom of the balance. Attention: Place the balance on its side, do not turn over completely!

▶ Secure hook **1**: Use a wire, for example, to suspend the sample on the hook.

▷ Install a draft shield if necessary.

9
Operation

Overview of Display and Control Panel

| Item	Description
1	Weight units
2	Displays the menu level
3	Taring
4	Symbol for "GLP printing mode active"
5	Symbol for "Printing mode active"
6	Application program active
7	Data output: Press this key to send readout values to the built-in data interface.
8	Calculated-value indicator: not a weight value
9	Start the application program
10	Symbol: Gross or net
11	Select an application program | open the operating menu
12	Symbols for active application (⊼⊼, ⠿, %, ⏻, ⬇, A, C)

Item	Description
13	Delete (Clear Function) This key is generally used to cancel functions: – Quit application program – Cancel calibration | adjustment routine | Exit menu
14	Start calibration | adjustment routine
15	On | Off
16	Symbol: Calibration | adjustment function
17	Symbols for "zero range« (verified models only)
18	Level indicator
19	Weight value displayed in selected weight unit

Symbol:

<<	Exit the operating menu
<	One menu level higher
V	Scroll throughmenu items
>	Next item on current menu level
↵	Select a parameter setting

10

Basic Weighing Function

Features
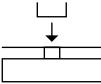

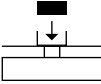

– Tare the balance
– Printing weights

Preparation

▶ Switch on the balance:
Press the ⊙ (I/⏻) key

▶ Tare the balance, if necessary:
Press the (Tare) key

▷ If necessary, change the configuration settings:
see the chapter entitled "Configuration"

▷ If desired, load the factory settings:
see the chapter entitled "Configuration"

Additional Functions:

▷ Switching off the balance:
Press (I/⏻)

Example
Simple Weighing

Step	Press key	Display │ Printout
1. Switch on the balance Self-test is performed, followed by automatic initial tare function.	(I/⏻)	0.0 g
2. Place container on weighing pan (in this example 11.5 g).		+ 11.5 g
3. Tare the balance	(I/⏻)	0.0 g
4. Place sample in container (in this example: 132 g)		+ 132.0 g
5. Print weight	(🖶)	N + 132.0 g

Calibration and Adjustment

Purpose
Calibration is the determination of any difference between the measured value displayed and the true weight (mass) of a sample. Adjustment is the correction of this difference, or its reduction to an allowable level within maximum permissible error limits.

Features
Calibration | adjustment can be performed only when
– there is no load on the balance
– the balance is tared
– the internal signal is stable
– the weight displayed for the sample on the balance must not differ from the nominal weight by more than 2%.

If these conditions are not met, an error message is displayed "$ERR\ 02$".

Following calibration | adjustment, the application program is cleared.

Internal Calibration | Adjustment

Note:
Only for models with the label
Entris...i–1S !

In the operating menu, select
$CAL.JUST.-CAL.INT.$ before beginning. The built-in motorized calibration weight located in the housing is applied and removed automatically for internal calibration.

▶ Select calibration | adjustment:
Press ⟨Cal⟩

> The internal calibration weight is applied automatically
> The balance is adjusted | calibrated
> The built-in calibration weight is removed

Internal Calibration | Adjustment

Note:
Only for models with the label **Entris..i–1S** !
Set the following parameters:
SETUP - BAL.SCAL.- CAL.JUST.- CAL.INT. (Code 1.1.9.4)

The built-in motorized calibration weight located in the balance housing is applied and removed automatically for internal calibration.
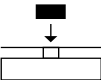

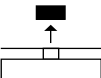

Step	Key (or instruction)	Display
1. Tare the balance	Tare	0.0 g
2. Start calibration	Cal	CAL.INT.
The internal calibration weight is applied automatically.		CAL.RUN.
3. Adjustment carried out		CAL.END
4. The internal weight is defined automatically		0.0 g

13

External Calibration

Set the following parameters:
SETUP - BAL.SCAL.- CAL.JUST.- CAL.EXT. (Code 1.1.9.1)
The required calibration weight is configured at the factory (see "Specifications").

Step	Key (or instruction)	Display
1. Tare balance	(Tare)	0.0 g
2. Start adjustment routine	(Cal)	CAL.EXT.
Once you store the zero point the display prompts for the required calibration weight (flashing display)		- 5000.0 g
3. Apply the prompted calibration weight (in this example 5000 g). Weight too low: a minus sign "-" is shown Weight too high: a plus sign "+" is shown		5000.0 g
The display stops flashing as soon as the weight value is within the defined limit.		
4. Calibration/adjustment executed; then the calibration weight is displayed		CAL.END + 5000.0 g
5. Remove the calibration weight		0.0 g

14

Configuration (Operating Menu)
You can configure the balance; i.e., adapt it to individual requirements.

Functions of the Keys during Configuration:

Symbol	Key	Function
V	(Select Menu)	Scroll through menu items
>	(Enter)	One menu level lower (use right cursor to scroll through up to 4 menu levels)
↵	(Enter)	Confirm menu item
	(CF) (Press and hold)	Save settings and exit menu from any position
<<	(CF)	At the top level: Save settings and exit menu:
<	(CF)	One menu level higher (left cursor)
[••••]		Indicates menu level

15

Menu Navigation

Example: Setting the Language

Step	Key (or instruction)	Display
1. **Open the menu**: Open the menu in weighing mode	(Select/Menu) hold	APPLIC.
2. Scroll upward within themenu level; After the last menu code, the first code is displayed again	Repeatedly (Select/Menu)	INPUT ... LANGUAG.
3. Select the next menu level (scrolls to the right)	Repeatedly (Enter)	ENGLISH o
5. **Change setting:** Scroll until the desired setting is shown	(Select/Menu)	GERMAN
6. **Confirm the menu code**; "o" indicates the active setting	(Enter)	GERMAN o
7. Return to the next higher menulevel	(CF)	LANGUAG.
▷ Set other menu items as desired	(Select/Menu), (Enter)	
8. **Save settings** and exit menu or	Repeatedly: (CF)	
▷ Exit menu without saving changes	(I/ö)	
> Restart your application		0.0 g

16

Application Programs

Counting
Display symbol: ⠿

Purpose
With the Counting application, you can determine the number of parts that each have approximately equal weight. To do this, a known number of parts (the reference sample quantity) is weighed first, and the individual piece weight (reference weight) is calculated from this result. Thus the number of parts subsequently placed on the balance can be determined from their weight.

Changing the Reference Sample Quantity
Activate function:
Press the (Select/Menu) key
Select the desired reference sample quantity (1 to 100):
In increments of 1: Press the (Select/Menu) key briefly
In increments of 10:
Press and hold the (Select/Menu) key.
The quantity is stored in battery-backed

memory.

Reference Sample Updating
Automatic reference sample updating optimizes the counting accuracy. You can activate or deactivate this function in the menu.

Automatic reference sample updating is performed when the requirements, including the specified stability criterion, have been met.

The abbreviation *OPT* for "optimizing", is displayed briefly with the new reference sample quantity.

Preparation
▶ Select the Counting application in the menu:
see "Configuration"

▶ Set the following parameters:

APPLIC.ation programs
└ *COUNT.*
  ├── *RESOLUT*.ion
  │   ├── o *DISP.ACC*.Display accuracy
  │   └── *10-FOLD* 10-fold higher

23

Example: Counting parts of equal weight
Parameter settings: $APPLIC. - COUNT.$ (menu code 2. 3.)

Step		Key (or instruction)	Display/Data output
1.	Place empty container on the balance		+ 22.6 g
2.	Tare the balance	(Tare)	0.0 g
3.	Add reference sample quantity to container (in this example: 20 pcs)		
4.	Changing the reference sample quantity	(Select Menu)	REF 10pcs
5.	Select reference sample quantity: In increments of 1 (1, 2, 3, ..., 100) In increments of 10 (10, 20, ..., 100)	Repeatedly: (Select Menu) Press briefly (Select Menu) press and hold	REF 20pcs
6.	Confirm selected reference sample quantity and start the application. The current reference weight remains saved until a new reference is set or the power supply is interrupted.	(Enter)	+ 20pcs * nRef 20 pcs wRef 1.07 g
7.	Add desired number of pieces		+ 500pcs
8.	If desired, print quantity	(printer)	Qnt + 500 pcs
9.	Toggle display between mean piece weight, weight, quantity	Repeatedly: (Select Menu)	+ 1.07 g △* + 535.0 g * + 500pcs *
10.	Unload the balance		– 2 pcs *
11.	Repeat as needed, starting from Step 7		
12.	End "Counting"	(CF)	0.0 g

24

Weighing in Percent

Display symbol: %

Purpose
This application allows you to obtain weight readouts in percent which are in proportion to a reference weight.

Changing the Reference Percentage
Activate function:
Press the (Select/Menu) key
Select the desired reference (1 to 100):
In increments of 1: Press the (Select/Menu) key briefly
Increments of 10: Press and hold the (Select/Menu) key.

The percentage is stored in battery-backed memory.

Preparation
▶ Select the Weighing in percent application in the menu:
see "Configuration"

▶ Set the following parameters:

APPLIC.ation programs

└─ PERCENT Weighing in percent

  └─ DEC.PLCS Decimal places

   ├─ NONE Decimal places
   ├─ o 1 DEC.PL. 1 decimal place
   ├─ 2 DEC.PL. 2 decimal places
   └─ 3 DEC.PL. 3 decimal places

o = Factory setting
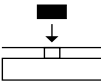

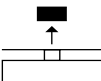

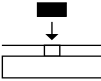

Printout: Weighing in percent

pRef	100	: Reference percentage
Wxx%	111.6 g	: Reference weight for selected reference percentage xx%
Prc	+ 94.9 %	: Calculated reference percentage

25

Example: Determining residual weight in percent
Parameter settings: APPLIC. - PERCENT (menu code 2. 4.)
Reference percentage: REF 100%

Step	Key (or instruction)	Display/Data output
1. Tare the balance	(Tare)	0.0 g
2. Changing the reference: (see the previous page)	(Select Menu)	REF 100 %
3. Place sample equal to 100% on the balance (in this example: 111.6 g)		
4. Start the application. The current reference weight remains stored until a new reference is set or power to the power supply is interrupted.	(Enter)	+ 100.0 % * pRef 100 % Wxx% + 111.6 g
5. Remove sample (e.g. for drying)		
6. Place weight on the balance (in this example 322.5 g)		+ 94.9 % *
7. If desired, print percentage		Prc + 94.9 %
8. Toggle display between weight and percentage	Repeatedly: (Select Menu)	+ 105.9 g * + 94.9 % *
9. Clear display of residual weight and reference percentage Exit application	(CF)	+ 105.9 g
10. If desired, print net residual weight		N + 105.9 g

26

Animal Weighing/Averaging

Display symbol: 🐁

Purpose
This application is used to determine the weights of unstable samples (e.g., live animals) or to determine weights under very unstable ambient conditions. With this program, the balance calculates the weight as the average of a defined number of individual weighing operations (also referred to as "subweighing operations").

Changing the Number of Subweighing Operations
Activate function:
Press the (Select Menu) key
Select the desired number of measurements (1 to 100):
In increments of 1: Press the (Select Menu) key briefly
Increments of 10: Press and hold the (Select Menu) key.

The selected number of measurements is stored in battery-backed memory.

Preparation
▶ Select the Animal weighing application in the menu:
see "Configuration"

▶ Set the following parameters:

APPLIC.ation programs
└─ ANIMALW. Animal weighing
     ├─ ACTIVTY. Animal activity
     │   ├─ CALM Stable readout
     │   ├─ o ACTIVE Unstable
     │   └─ V.ACTIVE Very unstable
     └─ START
          ├─ MANUAL
          └─ o AUTOM.atic
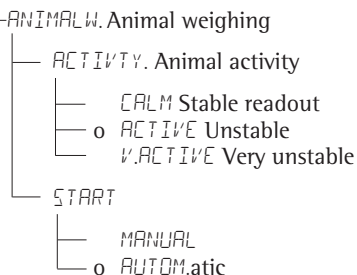

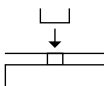

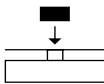

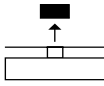

o = Factory setting

Printout: Animal weighing

mDef 20	: Number of subweighing operations
x-Net + 410.1 g	: Calculated average

Example: Determining animal weight with automatic start and 20 subweighing operations
(measurements)

Parameter settings: $APPLIC. - ANIMALW.$ (menu code 2. **7.**)

Step	Key (or instruction)	Display/Data output
1. Place animal weighing bowl on the balance		22.6 g
2. Tare the balance	(Tare)	0.0 g
3. Change the number of subweighing operations:	(Select Menu)	REF 30
4. Select number of measurements: In increments of 1 (1, 2, 3, ..., 100) In increments of 10 (10, 20, ..., 100)	Repeatedly: (Select Menu) Press briefly (Select Menu) press and hold	REF 20
5. Confirm number of measurements and start automatic animal weighing. The number of measurements remains stored in battery-backed memory until the setting is changed.	(Enter)	+ 0.0 g $_*$
6. Place first animal in bowl. The balance delays the start of measurements until the difference between 2 measurements meets the criterion.		888 19 20 1
7. Read off the result. The result is displayed with the "*" symbol (= calculated value) and remains displayed until the sample (animal) is removed from the load plate (bowl).		+ 410.1 g $_{\triangle*}$ m D e f 20 x - N e t + 410.1 g
8. Unload the balance		+ 0.0 g $_*$
9. Weigh next animal (if des.)		

Next weighing series begins automatically.

28

Toggling between Weight Units
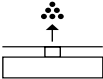

Purpose
With this application program you can change the weight value displayed from the basic weight unit to any of 4 application weight units (see table on next page).

Features
– Set the basic unit and display accuracy in the Setup menu:
  see "Configuration".
– Set the application weight units and display accuracies in the Application menu.
– These settings are stored in battery-backed memory.
– The basic unit is active when the balance is powered up.

Example: Change display from the basic unit (in this example, grams [g]) to pounds [lb] and Troy ounces [ozt].
Set the following parameters: $APPLIC.-UNIT$ (code 2. 2.)

Step	Press key	Display | Printout
Preparation:		
1. Begin selection of an application weight unit	Select Menu	NONE ° [•]
2. Select an application unit, in this example "pounds" (see table on next page)	Repeatedly: Select Menu	POUNDS
3. Confirm the weight unit (pounds)	Enter	POUNDS °
4. Select the next application weight unit, in this example: Troy ounces (see table on next page)	Enter, Repeatedly: Select Menu	NONE ° [••] TROY.OZ.
5. Confirm weight unit (Troy ounces)	Enter	TROY.OZ. °
6. Select other application units if desired (max. 4 total) (otherwise, confirm "NO" by pressing Enter)		[•••]
7. Store selection	CF	0.00 g
Conversion:		
8. Place sample on balance		+ 100.00 g
9. Toggle unit for weight value	Repeatedly: Enter	+ 0.22046 lb + 3.5275 ozt

29

The following weight units are available in your balance: :

Menu item	Unit	Conversion factor	Display symbol
1) USERDEF. [1])	Grams	1.00000000000	o
2) GRAMS (Factory setting)	Grams	1.00000000000	g
3) KILOGR.	Kilograms	0.00100000000	kg
4) CARATS	Carats	5,00000000000	o
5) POUNDS	Pounds	0.00220462260	lb
6) OUNCES	Ounces	0.03527396200	oz
7) TROY.OZ.	Troy ounces	0.03215074700	ozt
8) HK TAEL	Hong Kong taels	0.02671725000	tl
9) SING.TAEL.	Singapore taels	0.02645544638	tl
10) TWN.TAEL.	Taiwanese taels	0.02666666000	tl
11) GRAINS	Grains	15.4323583500	GN
12) PENY.WT.	Pennyweights	0.64301493100	dwt
13) MILLIGR.	Milligrams	1000.00000000	mg
14) PT.P.LB.	Parts per pound	1.12876677120	o
15) CHINA.TAEL	Chinese taels	0.02645547175	tl
16) MOMMES	Mommes	0.26670000000	m
17) AUST.CT.	Austrian carats	5.00000000000	Kt
18) TOLA	Tola	0.08573333810	o
19) BAHT	Baht	0.06578947436	b
20) MESGHAL	Mesghal	0.21700000000	o
21) TONS	Tons	0.00000100000	t
22) LB / OZ [2])	Pounds : ounces	0.03527396200	lb oz
23) NEWTON	Newton	0.00980665000	N

[1]) = User-defined weight unit; can be loaded in the balance over an optional RS-232 or
USB interface using a computer program.

[2]) = The format for display of pounds: ounces is xx:yy.yyy; x=lb, y=oz

30

Density Determination

Display symbol: ⊻⊻

Purpose
This application program lets you determine the density of solid substances using the buoyancy method.

Features
To enter the density of the buoyancy liquid(g/cm^3) at the corresponding temperature, press $\boxed{\substack{\text{Select}\\\text{Menu}}}$. See the next page for a table of density values for water. The factory setting is 1 g/cm^3.

The following formula is applied:

Density of sample =

$$\frac{\text{Weight in air}}{\text{(Weight in air} - \text{weight in water)}} + \text{density of liquid}$$

When you start the density determination routine, the density of the liquid is displayed briefly.
Positive and negative values can be stored for weight in air and weight in water.
The weight in water must be less than the weight in air; otherwise, an error message is displayed.
The results can be displayed with 0 to 3 decimal places: see "Configuration". Not part of the scope of delivery: sample holder and suspension wire.

Preparation
▶ Select the Density Determination application in the menu:
see "Configuration"

▶ Set the following parameters:

APPLIC. ation programs

   DENSITY determination

      DEC.PLCS Decimal places

         NONE   No decimal places
      o   1 DEC.PL.   1 decimal place
        2 DEC.PL.   2 decimal places
        3 DEC.PL.   3 decimal places

o = Factory setting

Note on using 3 decimal places: Using three decimal places for density can result in a high measurement error rate because corrections to the air density and the density calculation sets are not taken into account, for example.

Printout for Density Determination

RhoFl 0.99823 o	: Density of liquid (g/cm³)
Wa + 20.0 g	: Weight in air
Wfl + 15.0 g	: Weight in liquid
Rho 4.0 o	: Result: density of the sample

Parameter settings:
APPLIC. - DENSITY - DEC.PLCS. - 1 DEC.PL. (menu code 2. 9. 1. 2)

Example: Determining the density of a solid using water as the buoyancy liquid.
The density of water at 20°C is 0.99823 g/cm^3.

Step	Key (or instruction)	Display/Data output
1. Attach sample holder and suspension wire		
2. Tare the balance	Tare	0.0 g
3. Edit the stored density value	Select Menu	_ 1.00000
4. Enter the density of the liquid (in this example: 0.99823): Enter numerals in increments of 1	Repeatedly: Select Menu, briefly or press and hold ; Enter, etc.	_0.99823
5. Save density value and start application. The density value is stored in battery-backed memory until the setting is changed.	Enter	
6. Confirm "AIR" display	Enter	AIR ?
7. Determine the weight of sample in the air: Place sample on the balance		+ 20.0 g ?*
8. Store value for weight in air	Enter	
9. Remove sample from the balance		WATER ?
10. Determine weight in liquid: Place sample in holder.		
11. Confirm "WATER" display	Enter	0.0 g ?*
12. Immerse sample in liquid		+ 15.0 g ?*
13. Store value for weight in liquid, view and print result	Enter	+ 4.0 o ?*

```
RhoFl   0.6237 o
Wa    +     20.0 g
Wfl   +     15.0 g
```

| 14. Delete result | CF | Rho   4.0 o |
| 15. Repeat as needed, starting from Step 5. | | |

Data Interface

Purpose

Your balance comes equipped with
an interface port for connection to a
computer or other peripheral device.
You can use an on-line computer to
change, start and/or monitor the functions
of the balance and the application
programs.

Female interface connector
Pin Assignment Chart, 25-pin, RS-232:
Pin 1: Shield
Pin 2: Data output (TxD)
Pin 3: Data input (RxD)
Pin 4: Internal ground (GND)
Pin 5: Clear to Send (CTS)
Pin 6: Not connected
Pin 7: Internal ground (GND)
Pin 8: Internal ground (GND)
Pin 9: Not connected
Pin 10: Not assigned
Pin 11: + 12 V (operating voltage
         for Sartorius printer)
Pin 12: Reset _ Out
Pin 13: + 5 V
Pin 14: Internal ground (GND)
Pin 15: Universal remote switch
Pin 16: Not connected
Pin 17: Not connected
Pin 18: Not connected
Pin 19: Not connected
Pin 20: Data Terminal Ready (DTR)
Pin 21: Not connected
Pin 22: Not connected
Pin 23: Not connected
Pin 24: Not connected
Pin 25: + 5 V

For remote switch*)

*) = Hardware restart

Preparation

You can set these parameters for other
devices in the Setup menu:
see "Configuration".

You will also find a detailed description

of the available data interface commands
in the file "Data Interface Descriptions for
Entris Models", which you can download
from the Sartorius website:
(www.sartorius.com
"Download Center".)

Troubleshooting Guide

Error codes are shown on the main display for approx. 2 seconds.
The program then returns automatically to the previous mode.

Display	Cause	Solution
No segments appear on the display	No AC power is available The power supply is not plugged in	Check the AC power supply Plug in the power supply
HIGH	The load exceeds the balance capacity	Unload the balance
LOW or ERR 54	Something is touching the weighing pan	Move the object that is touching the weighing pan
APP.ERR.	Cannot store data: Load on weighing pan too light or no sample on pan while application is active	Increase load
DIS.ERR.	Display error: Data output not compatible with output format	Change the configuration in the operating menu
PRT.ERR.	Interface port for printer output is blocked	Reset the menu factory settings or Contact your local Sartorius Service Center
ERR 02	Calibration parameter not met, e.g.: – Press (Tare) to tare the balance – load on weighing pan	Calibrate only when zero is displayed Unload the balance
ERR 10	The (Tare) key is blocked for active application programs; Only 1 tare function can be used at a time	After the tare memory has been deleted using the (CF) key, the (Tare) key can be used again
ERR 11	Tara memory not allowed	Press (Tare)
The weight readout changes constantly	Unstable ambient conditions (excessive vibration or draft) A foreign object is caught between weighing pan and housing	Set up balance in another area Adjust Setup configuration Remove the foreign object
The weight readout is obviously wrong	The balance was not calibrated/adjusted Balance not tared before weighing	Calibrated/adjust the balance

If any other errors occur, contact your local Sartorius Service Center.
Web address: http://www.sartorius.com

Care and Maintenance

Service
On request, Sartorius can offer you an individual service contract.

Repairs
Repair work must only be carried out by trained service technicians. Repairs performed by untrained persons may result in considerable hazards for the user.

Cleaning

⚠ **CAUTION!** Unplug the AC adapter from the wall outlet (mains supply). If you have an interface cable connected to the balance port, unplug it from the port.
Make sure that no liquid enters the balance housing.

▶ Clean the balance with a cloth lightly moistened with soap solution.
▷ The plastic top and bottom parts of the balance housing have a special coating that allows acetone to be used to clean these parts.

⚠ **CAUTION!** Do not clean the following parts with acetone or aggressive cleaning agents: foil-covered keypad, power connector port, data interface, or any other plastic parts.

▶ Wipe the balance with a soft, dry cloth.
On analytical balances remove and clean the weighing pan as follows:

⚠ **CAUTION!** Reach beneath the shield disk and lift it up carefully together with the weighing pan to avoid damaging the weighing system.
Make sure that no liquid enters the balance housing.

Cleaning Stainless Steel Surfaces
Clean all stainless steel parts regularly. Remove the stainless steel weighing pan and thoroughly clean it separately. Use a damp cloth or sponge to clean stainless steel parts on the balance.
You can use any household cleaning agent that is suitable for use on stainless steel. Clean stainless steel surfaces only by wiping them down. Then rinse the equipment thoroughly, making sure to remove all residues.
Afterwards, allow the equipment to dry. If desired, you can apply oil to the cleaned surfaces as additional protection.

36

Recycling

Safety Inspections
If there is any indication that safe opera-
tion of the balance is no longer warranted:

▶ Disconnect the equipment from the
AC power: Unplug the power cord.

> Lock the balance in a secure place to
ensure that it cannot be used for the time
being

Inform Sartorius Service Center.
Maintenance and repair work may only be
carried out by trained service technicians.

We recommend that the device be
inspected by a certified electrician
at regular intervals, according to the
following checklist:

– Insulating resistance > 7 megaohms
measured with a constant voltage of at
least 500 V at a 500 kohm load
– Leakage current: < 0.05 mA measured
with a properly calibrated multimeter

Recycling
The packaging is made of environmentally
friendly materials that can be used as
secondary raw materials. If you no longer
need this packaging, bring it to your
local recycling and waste disposal facility
according to the regulations applicable in
your country .
(Contract number D-59101-2009-1129).
Otherwise you should dispose of the
material in accordance with the waste
disposal regulations that are applicable
in your area.

The equipment, including
accessories and batteries, does
not belong in your regular
household waste. The EU legis-
lation requires its Member
States to collect electrical and
electronic equipment and disposed of it
separately from other unsorted municipal
waste with the aim of recycling it.

For more information regarding disposal
and recycling, please contact our local
service representatives. Our partners
listed on the following website will also
be able to provide assistance within the
EU:

1) Go to http://www.sartorius.com.
2) Select the "Services" tab.
3) Then select "Disposal Information".
4) Addresses for the local Sartorius
disposal contacts can be found in the
PDF files available for download on this
page.

Sartorius will not take back
equipment contaminated with
hazardous materials (ABC
contamination) – either for repair
or disposal.

Service address disposal:
Please refer to our website (www.sartorius.
com) or contact the Sartorius Service
Center for more detailed information
regarding repair service addresses or the
disposal of your device.

Response time (average)	s	2,5	2,5	2,5
Sensitivity drift within +10 ... +30 °C	<±/K	$2 \cdot 10^{-6}$	$2 \cdot 10^{-6}$	$2 \cdot 10^{-6}$
Adaptation to ambient conditions		By selection of 1 of 4 optimized filter levels; display update: 0.1–0.4 (depends on filter level selected)		
External calibration weight (of at least accuracy class...)	g	200 (E2)	100 (E2)	50 (E2)
Net weight, approx.	kg	4.4 │ 4.8	4.4 │4.8	4.4 │ 4.8
Weighing pan size	mm	90 ⌀	90 ⌀	90 ⌀
Whg. chamber height	mm	230	230	230
Dimensions (W × D × H)	mm	230 × 303 × 330		

Modele: Entris		623–1S 623i–1S	423–1S 423i–1S	323–1S 323i–1S
Weighing capacity		620 g	420 g	320 g
Readability		0.001 g	0.001 g	0.001 g
Tare range (subtractive)		620 g	420 g	320 g
Repeatability (standard deviation)	< ±	0.001 g	0.001 g	0.001 g
Linearity	<±	0.002 g	0.002 g	0.002 g
Response time (average)	s	1	1	1.1
Sensitivity drift within +10 ... +30 °C	<±/K	$2 \cdot 10^{-6}$	$2 \cdot 10^{-6}$	$2 \cdot 10^{-6}$
Adaptation to ambient conditions		By selection of 1 of 4 optimized filter levels; display update: 0.1 – 0.4 (depending on the set filter level)		
External calibration weight (of at least accuracy class...)	g	500 (F1)	200 (F1)	200 (F1)
Net weight, approx.	kg	3.2│3.6	3.2│3.6	3.2│3.6
Weighing pan size	mm	115 ⌀	115 ⌀	115 ⌀
Dimensions (W × D × H)	mm	230 × 303 × 136		

Modele: Entris		153–1S 153i–1S	822–1S 822i–1S		
Weighing capacity		150 g	820 g		
Readability		0.01 g	0.001 g		
Tare range (subtractive)		150 g	320 g		
Repeatability (standard deviation)	< ±	0.01 g	0.001 g		
Linearity	<±	0.03 g	0.002 g		
Response time (average)	s	1.3	1.3		
Sensitivity drift within +10 ... +30 °C	<±/K	$4 \cdot 10^{-6}$	$5 \cdot 10^{-6}$		
Adaptation to ambient conditions		By selection of 1 of 4 optimized filter levels; display update: 0.1–0.4 (depends on filter level selected)			
External calibration weight (of at least accuracy class...)	g	100 (F1)	500 (F2)		
Net weight, approx.	kg	2.6|3.0		2.0|2.6	
Weighing pan size	mm	150 ∅		150 ∅	
Deviations (W × D × H)	mm	230 × 303 × 91	230 × 303 × 87		

Modele: Entris		6202–1S 6202i–1S	4202–1S 4202i–1S	3202–1S 3202i–1S	2202–1S 2202i–1S
Weighing capacity		6200 g	4200 g	3200 g	2200 g
Readability		0.01 g	0.01 g	0.01 g	0.01 g
Tare range (subtractive)		6200 g	4200 g	3200 g	2200 g
Repeatability (standard deviation)	< ±	0.01 g	0.01 g	0.01 g	0.01 g
Linearity	<±	0.03 g	0.03 g	0.03 g	0.03 g
Response time (average)	s	1.5	1.5	1.5	1.5
Sensitivity drift within +10 ... +30 °C	<±/K	$2 \cdot 10^{-6}$	$2 \cdot 10^{-6}$	$2 \cdot 10^{-6}$	$2 \cdot 10^{-6}$
Adaptation to ambient conditions		By selection of 1 of 4 optimized filter levels; display update: 0.1–0.4 (depends on filter level selected)			
External calibration weight (of at least accuracy class...)	g	5000 (F1)	2000 (F1)	2000 (F1)	2000 (F1)
Net weight, approx.	kg	3.1|3.5	3.1|3.5	3.1|3.5	3.1|3.5
Weighing pan size	mm	180 × 180	180 × 180	180 × 180	180 × 180
Dimensions (W × D × H)	mm	230 × 303 × 91			

Modele: Entris		8201–1S 8201i–1S	5201–1S 5201i–1S	2201–1S 2201i–1S
Weighing capacity		8200 g	5200 g	2200 g
Readability		0.1 g	0.1 g	0.1 g
Tare range (subtractive)		8200 g	5200 g	2200 g
Repeatability (standard deviation)	< ±	0.1 g	0.1 g	0.1 g
Linearity	<±	0.1 g	0.1 g	0.1 g

3202	F1	2000	YCW623–AC–02
2202	F1	2000	YCW623–AC–02
822	F2	500	YCW554–AC–02
8201	F2	5000	YCW654–AC–02
5201	F2	5000	YCW654–AC–02
2201	F2	2000	YCW624–AC–02

Product	Order No.
Data printer	**YDP20–0CE**

with date, time, statistics evaluation, transaction counter functions and LCD display

Remote display,
reflective **YRD03Z**
(for connection to
data interface port)

**External rechargeable
battery pack** **YRB11Z**
With battery-level indicator (LED);
can be recharged using the AC
adapter (charge time for completely
discharged battery pack: 15 hours);
see "Specifications" for hours of
operation.
To recharge the battery pack:
Unplug the AC adapter from the balance
and plug it into the battery pack

Product	Order No.
Density determination kit	**YDK01LP**

– for Entris 224
– for Entris 124
– for Entris 64

Data cable
– for connection to a
PC mit USB port **YCC01–USBM2**
– for PC connection,
25-pin **7357312**
– for PC connection,
9-pin **7357314**

Adapter cable **6965619**
from D–Sub 25-pin
male connector to
D–Sub 9-contact
female connector;
length: 0.25 m

Product	Order No.
Ionizing blower for eliminating static electricity	
– 220 V	**YIB01–0DR**
– 110 V	**YIB01–0UR**
Stat–Pen antistatic device for eliminating electrostatic charges on samples and containers (100 V bis 230 V, 50/60 Hz)	**YSTP01**
Weighing Table	
– made from wood with synthetic stone	**YWT09**
– weighing table made from synthetic stone, with vibration dampening	**YWT03**
Wall console	**YWT04**
Weighing pans	
– 1000 ml, EG 240 g, stainless steel	**641211**
– 500 ml	**641212**
– 110 ml, 90 mm ∅, aluminum	**69GP0003**
– 270 ml, EG 62 g, 137 mm ∅, stainless steel	**YWP03G**
– 62 mm ∅, stainless steel	**6910848**
– 85 ml, 70 mm ∅, aluminum	**YWP06G**
– 180 ml, 90 mm ∅, aluminum	**YWP05G**
– 174 mm d, stainless steel	**YWP04G**

Diese Erklärung bescheinigt die Übereinstimmung mit den genannten EG- und EU-Richtlinien, ist jedoch keine Zusicherung von Eigenschaften. Bei einer mit uns nicht abgestimmten Änderung des Produktes verliert diese Erklärung ihre Gültigkeit. Die Sicherheitshinweise der zugehörigen Produktdokumentation sind zu beachten.

This declaration certifies conformity with the above mentioned EC and EU Directives, but does not guarantee product attributes. Unauthorised product modifications make this declaration invalid. The safety information in the associated product documentation must be observed.
