

# i-LIST

## The i-LIST Interactive Data Projector!

*The final barrier to interactive education has been overcome!*

Traditional interactive touch boards and associated hardware are extremely expensive, bulky, and immobile. High hardware costs have been a major concern for users such as schools, colleges, universities, churches, companies, and private users wanting to engage with interactive programs.

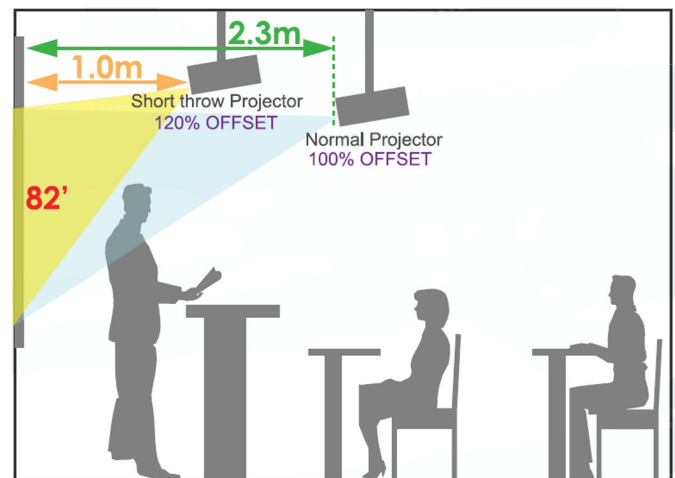

LIST Premier now introduces the revolutionary i-LIST Interactive Projector!

- The i-List projector is up to 8 times cheaper than traditional interactive touch boards!
- i-List can be used and mounted in any desired configuration. These include: in front, upside down from the ceiling, set up as a rear image projector, or simply as a stand-alone projector!

- i-List is mobile and portable and weighs only 4.1kg! It can be carried to meetings, or separate venues with superb ease.
- i-List can be used for normal slide presentations, movies, or as an additional monitor!
- i-List projects onto any smooth white (or light coloured) surface! The surface will become interactive when used with an interactive wand or stylus.
- i-List hardware packages include the i-List projector, an i-List Interactive Stylus and the extendable i-List Interactive Wand!
- i-List with its wand or stylus turns any surface into an interactive surface using clever infra red technology.

- Turn the wall, floor, pull down screen, ordinary white board, etc. into an interactive screen.
- i-LIST includes licence free software with multiple interactive tools that can be used as desired. Useful tools include write, draw, colour, draw lines, shapes, move and drag items, resize them, save them, erase them, and clear the screen, to name a few.
- The i-List is a 'short throw' projector (positioned close to the screen), this means brighter and larger images than other data projectors. For example, one meter from the screen will give an image size of 82 inches. A normal projector will need to be 2.3m from the screen to provide the same size. This also helps to eliminate glare spots when projecting onto shiny surfaces, such as white boards.

- i-List interactive data projectors are ideal for strategic planning, management meetings, brain storming, consultation, training, or any other presentations.

# How the i-LIST Works

- Simply connect the i-LIST to a power socket using the cable supplied.
- Connect the i-LIST to a computer via a USB cable and either a HDMI, or RS 232 cable.
- Simply install the accompanying driver on your computer or laptop.
- Install the optional "Light Pen 3" licence free software.
- You are almost ready to go! Place the projector where desired. Simply focus the lens and adjust the projected image by using the supplied remote control or buttons on top of the i-LIST projector. Finally calibrate the wand or stylus in seconds and you are done!
- The i-LIST is able to turn any surface into an interactive surface through the use of Infra red technology. The wand or stylus position is picked up by a receiver in the i-LIST projector allowing a user to draw and or write, touch, move drag in a real time situation.

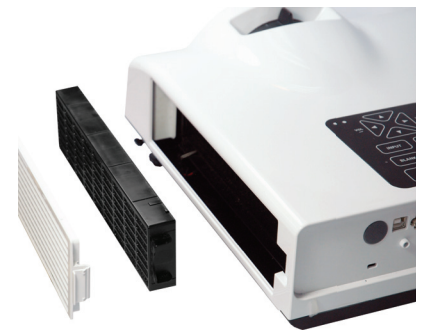

## Common Questions

### Q Will the i-LIST work with any computer?

A Yes, all necessary drivers are included to make the i-LIST work with your Windows, Linux, or Macintosh computer.

### Q What are the OS requirements?

A Microsoft Windows XP (SP2)/ Vista/ Windows 7 or above;  
Mac OSX v 10.5 or above; Linux OS Ubuntu 10.04,  
Debian 5.0, and Suse 11  
Core Due (Windows/ Linux); Intel (Mac)  
512 MB or more;  
30MB (Windows); 10MB (Mac)  
USB 2.0 port  
CD-Rom Driver

### Q Will all my usual programs and software work with the i-LIST?

A Yes, the i-LIST simply becomes your monitor and the wand or stylus becomes your PC mouse. If desired you can still have your usual monitor, keyboard and mouse also connected at the same time.

### Q What is the expected life of the bulb?

A The average expected life of the bulb is 3000 hrs(normal) or 5000 hrs (ECO mode). Lamp warranty is 1000 hrs or 1 year depends on which comes first.  
Normal mode means lamp operation at the default setting with full output of 245W; Users can select power saving mode to reduce lamp output from 245W (full drive) to 180W (Economic) . This setting of course will reduce the projector brightness by approximately 30%.

### Q What features are included with the i-LIST?

1. A user manual in: English, French, German, Italian, Japanese, Korean, Portuguese, Russian, Simplified Traditional Chinese.
2. Dress up Design
3. Designed for tough environment
4. Side change lamp
5. Side change filter
6. Quick off
7. Advanced Anti-theft features
8. Five auto features (Auto Search, Auto Sync, Auto Ceiling, Auto Keystone and Auto Filter Alert)
9. Seven display modes (Natural, Cinema, Daylight, Green board, White Board, Black Board and User)
10. Built-in 8W speaker
11. Logo capture
12. Image freeze function
13. Digital zoom adjustment
14. Network control and connections
