4. Body, Eyes, & Mouth 1876
5. Seam Stitch 0941

1. Print out the necessary pages from the PDF of the appliquè pattern(s).
2. Mark the right side of the pattern pieces so you'll know which direction to lay the pattern on the fabric.
3. Lightly spray the wrong side of the pattern pieces with temporary adhesive spray and allow it to set for a few minutes.
4. Place the pattern pieces on the right side of the fabric and carefuly cut them out. **PHOTO 1**
5. Sew the placement stitch on you hooped fabcric. **PHOTO 2**
6. With the paper still stuck to the right side of the appliqué fabric, spray the wrong side of the fabric with temporary spray adhesive.
7. Place the fabric inside the sewing placement stitch so that it matches the stitching line then remove the paper pattern. **PHOTO 3**
8. Sew the tackdown. **PHOTO 4**
9. Sew the remainder of the design and repeat for any remaining pieces. **PHOTO 5**
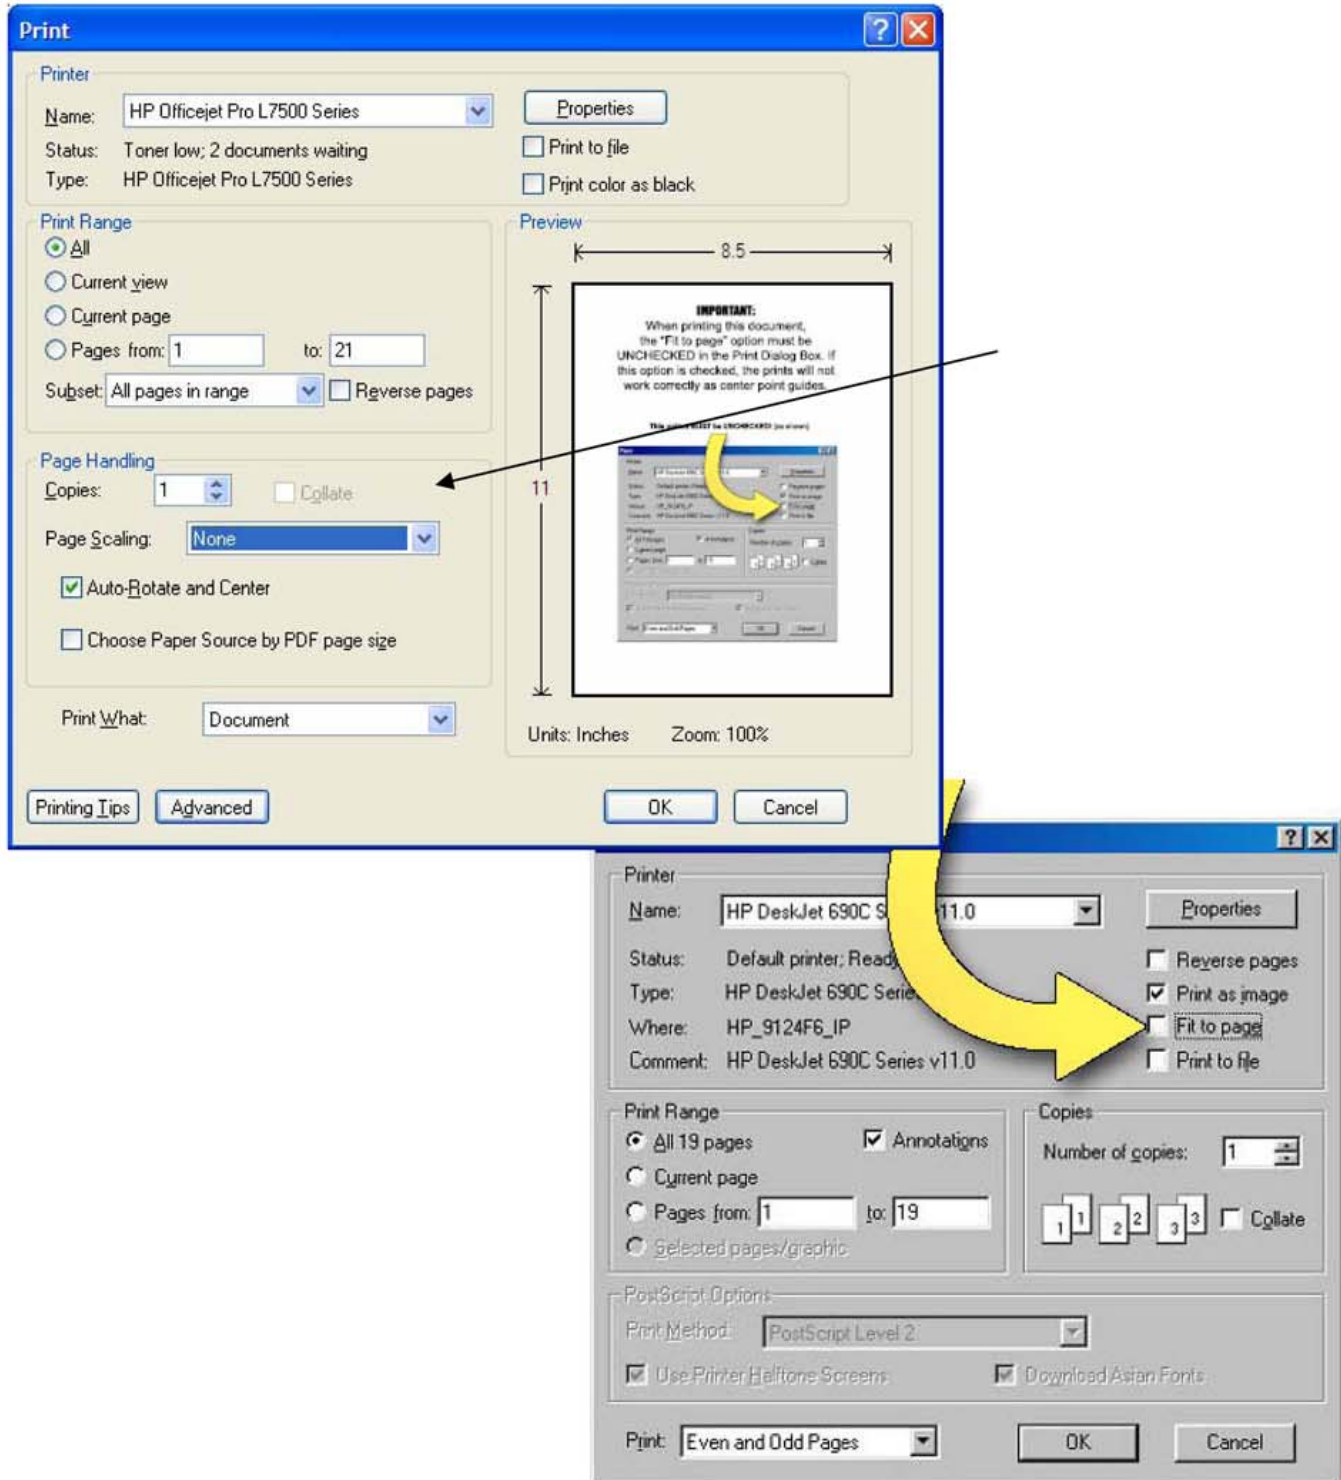

NOTE: The patterns are sized for the designs as they were made. If you resize the design, you will need to resize the pattern the same amount. You can print out the pattern at the normal size then copy it on a copy machine at the changed size, i.e. resize the designs to 80%, resize the printed pattern to 80%.
TIP: When Printing the patterns, make sure that the "Fit to page" option is UNCHECKED in the Print Dialog Box. If this option is checked the printed patterns will not be actual size.
IMPORTANT:

When printing this document, the "Fit to page" option must be UNCHECKED or the "Page Scaling" option must be set to NONE depending on your printers options. If this option is set incorrectly, the prints will not work correctly as patterns because they will not print at actual size.

Instructions

1. Hoop a single layer of Mesh Cut–Away stabilizer.
2. Spray the stabilizer lightly with Temporary Adhesive Spray.
3. Stitch the first color, which is the "Placement Guide Stitch". Use a thread color that blends with your fabric choice.
4. Place a piece of fabric right side up onto the Mesh Stabilizer, being sure to cover the "Placement Guide Stitch". **See Photo 1.**
5. Note: if using fabric with pile, lightly spray a piece of Wash–Away topping with Temporary Adhesive Spray. Place the topping sprayed side down onto the fabric.
6. Attach the hoop to the machine and select the design of your choice to stitch. Embroider all but the last color of the design. See Photo 2.

Supplies:
- 2 pieces of fabric one inch larger than chosen design
- Mesh Cut–Away Stabilizer
- Wash–Away topping (if using fabric with pile such as Minkee® or terrycloth)
- Temporary Spray Adhesive
- Embroidery Thread
- Polyester bobbin thread
- Embroidery machine
- Polyester stuffing
- Hand needle or Stitch Witchery® fusible webbing

Photo 1

Photo 2

7. Remove the hoop from the machine, but DO NOT remove the fabric from the hoop.
8. Clip all jump threads.
9. Gently tear away excess Wash–Away topping. (Do not wet to remove at this time).
10. Place another piece of fabric right side down directly over the first piece. If desired, pin or tape at corners to secure.
11. Reattach the hoop to the machine and stitch the final color change (through both layers of fabric). Use a thread color that blends with your fabric color. For photography purposes we've purposely used a contrasting thread.
12. Remove the hoop from the machine and the fabric from the hoop.
13. Using embroidery scissors, carefully cut out the stitch 'n' turn project close to the stitching line. Cut around the stitches at the opening to create a tab. See Photo 3.
14. Clip curves and corners as needed.
15. Turn the animal right side out. Use a chopstick to turn out corners and curves.

Photo 3

1. Stuff with polyester stuffing. Hint: To speed up the stuffing process cut the bottom off of a cone shaped cup such as the ones from a water cooler and use it as a funnel to insert the stuffing. See Photo 4.
2. Fold tabs in and slip stitch the slit closed with hand needle or insert a piece of Stitch Witchery® and fuse closed.

For Extra Fun:
• Add definition stitching with a sewing machine or by hand.
• Stitch ribbon bows or embellishments on your projects to dress them up. Please keep in mind the age of the person to be using them then plan (or omit) addons accordingly.

Photo 4

NOTE: Some designs may contain a Ribbon Placement Guide. This is an optional feature that allows you to turn your designs into ornaments if you so wish. To create a hanging loop, after stitching the Ribbon Placement Guide, create a loop out of 1/4" ribbon and place it within the guide with loop facing in and tails of the ribbon facing out. Lightly spray ribbon with Temporary Adhesive Spray to hold in place.

MAKING PRECUT APPLIQUÉ USING BERNINA© CUTWORK ACCESSORY

> **SUPPLIES**
> - Cut-Away Stabilizer
> - Temporary Spray Adhesive
> - Appliqué Fuse & Fix Stabilizer
> - Embroidery Thread
> - Stabilizer that is appropriate for your project
> - BERNINA® CutWork Accessory

PREPARE APPLIQUE FABRIC

1. Starch appliqué fabric 2-3 times following manufacturer's instructions.
2. Appliqué fabric should be crisp.
3. Iron Appliqué Fuse & Fix to the wrong side of the starched appliqué fabric following instructions on product packaging.

CUT APPLIQUÉ PIECES

1. Hoop one layer of Cut-Away Stabilizer.
2. Send first CWA file to the embroidery machine. (CWA files are the pre-cut appliqué files to use with the CutWork Accessory; these files will end in CWA01, CWA02, and CWA03 etc. The number of CWA files available for each design will depend upon how many separate appliqués each design contains.)
3. Stitch the first color, this will be the placement stitch.
4. Remove the hoop from the machine but do not remove the stabilizer from the hoop. Spray the hooped stabilizer with temporary spray adhesive. Lay prepared appliqué fabric over the placement stitch, being sure to completely cover the stitching. Apply pressure to appliqué fabric to ensure it is adhered.
5. Stitch the second color, this will be the basting stitch. It is meant to baste the appliqué fabric to your hooped stabilizer.
6. Replace normal stitch plate with the CutWork stitch plate.
7. Unthread the machine.
8. If necessary, turn off the upper thread control on your machine. Refer to your machine's user manual. Note that the most recent version of the 830 will perform this task automatically.
9. Replace embroidery needle with the CutWork Accessory.
10. Replace embroidery foot with foot #44 (If you do not have foot #44 you can leave foot #15 on the machine; foot #44 will simply keep the cut fabric from flagging as much).
11. Attach the hoop to the machine.
12. To cut the first appliqué piece follow the "thread changes" on your machine screen and turn the dial on the CutWork tool as required.
13. Remove the hoop from the machine.
14. Gently remove cut appliqué piece, trimming any thread that may have not been cut completely.

PHOTO 1

15. Repeat as needed for designs with multiple appliqué pieces.

TACKDOWN APPLIQUÉ AND COMPLETE EMBROIDERY DESIGN

1. Replace the embroidery needle and rethread the machine.
2. Replace the embroidery foot #15.
3. Spray hoop sized piece of stabilizer that is appropriate for your project and adhere to wrong side of background fabric or project that is to be hooped.
4. Hoop fabric/project and stabilizer.
5. Attach hoop to machine.
6. Send the embroidery file to the machine (this is not a CWA file).
7. Stitch design as normal following the thread changes on the provided thread chart stopping after each Appliqué Placement Stitch.

1. After stitching an Appliqué Placement Stitch, take the precut appliqué pieces required and peel off the cutaway backing and the release paper revealing a sticky backing. **PHOTO 2**
2. Remove hoop from machine, but do not remove the fabric from the hoop.
3. Adhere precut appliqué piece evenly over the Appliqué Placement Stitch; use pressure to make sure pieces stick well. **PHOTO 3**
4. Reattach hoop to machine.
5. Continue stitching design until all appliqué pieces are placed and all stitching is complete. **PHOTO 4**

NOTE: Design pictured is for instructional purposes and may not be included in this collection.
