EXCLUSIVE FIREPLACE SURROUND PACKAGES

*T*he space in which you live is an expression of your individual style – and at the very heart of your home is the fireplace. It is a focal point that not only extends the warmest of welcomes to your family and friends, and one around which they will gather naturally, but it also offers you the opportunity to make a design statement that marks out the room even when the fire is not lit.

Many of today's contemporary fires, whether gas-fired or woodburning, are designed to fit into an existing chimney breast or specially built studwork structure. Accordingly, the wall itself can be used to enhance still further the impressive appliance you have already chosen. This unique collection of 12 ceramic and natural granite tiles has been carefully selected to help you create your ultimate look.

* Nominal dimensions subject to a tolerance of +/- 2.5mm within internationally accepted standards.

When calculating tile quantities, do not forget to make an allowance for cutting and wastage.

Tiles are only sold in box quantities which cannot be split.

IMPORTANT ADDITIONAL INFORMATION

Granite

Granite is a natural material with inherent variations in colour, marks and surface textures and this is most often considered an advantage from an aesthetic point of view. However, it does mean that you cannot assume a single sample tile will give you an accurate indication of a larger area. We also strongly recommend that you use a professional installer/ fixer who is experienced in fitting natural stone.

Ceramic tiles

Shade variation is an inherent feature of the manufacturing process. We recommend that tiles are loosely laid out and 'blended' prior to fixing to achieve the most pleasing distribution of shades. Differences between batches can be more marked, for this reason we recommend that you buy all the tiles at one time. No liability for shading issues can be accepted after installation.

Sealing

It is strongly advisable to seal granite and polished porcelain tiles before commencing installation. This protects the tiles from excessive adhesive or grout staining the tiles during the installation process.

Adhesives and grouts

Always use high quality adhesives and grouts following manufacturers' recommendations for their use and suitability for the type of tile, the application and the substrate being tiled.

Cleaning

Please note, the use of certain acid-based cleaning products may cause granite and polished porcelains to react and change character.

Photography

Owing to variations in studio lighting and printing inks, the tile colours shown in this catalogue may differ slightly from those of the actual tiles.

Limits of Liability

Stovax and Gazco accept no liability for the faulty installation of its products. In the case of any claim relating to the tiles themselves, Stovax and Gazco's liability, to the extent permitted by law, is limited to either the replacement of the product or a refund of the cost of the product, and does not extend to cover any consequential loss. Claims must be reported within seven working days from receipt of the tiles. Tiles must be inspected prior to installation and claims cannot be considered after the tiles have been installed.

Please be advised that installation constitutes acceptance of the quality, colour, texture and shade of the tiles. Stovax and Gazco warrants that its tiles conform to their description and are fit for their purpose. Stovax and Gazco makes no other express or implied warranty as to fitness or suitability of the products for particular installations. We extend no guarantees, express or implied, as to wear resistance or maintenance procedures.
