Easily produce high-quality color output with HP's lowest-priced Color LaserJet ever.

### Efficient operation

The perks of color are within your budget with the HP Color LaserJet CP1215 Printer—thanks to our next-generation ColorSphere toner, ImageREt 2400, and specialty papers. And you don't have to compromise when it comes to black-and-white printing. With this Color LaserJet, you can print black-only pages for the same price as on an HP black-and-white LaserJet.<sup>1</sup>

Achieve great quality easily. With our new ColorSphere toner formula in every Original HP print cartridge, you'll consistently see vibrant, bold color, clean lines, and photo-quality resolution.

### Effortless printing

Get quality HP LaserJet printing that won't let you down. This printer has impressive desktop print speeds of up to 12 pages per minute (ppm) black-and-white and up to 8 ppm color.

Start and finish jobs in less time with the printer's Instant-on Technology.<sup>2</sup> The Time To Completion (TTC) of a typical office print job is faster from low power mode on devices with Instant-on Technology than on devices without it.<sup>3</sup> Instant-on Technology in HP LaserJet devices provides up to 50 percent energy savings over traditional fusing while providing a first-page-out in seconds. Instant-on Technology has reduced emissions by 5.25 million tons of CO<sub>2</sub> to date—the equivalent of removing 1.1 million cars from the road for one year.<sup>4</sup>

### Convenient, space-saving design

Get the results you want for a variety of media types with the print driver's new, radically simple task-based interface. With a single click, select from a collection of pre-configured Printing Shortcuts—including settings for envelopes, cardstock, glossy paper, and more.

Make the most of your work space—HP innovation makes it possible. With its compact size and exceptionally quiet operation, this printer is a welcome addition to any desktop.

<sup>1</sup> Compared to HP LaserJet P1505 Printer.

<sup>2</sup> Instant-on Technology uses cutting-edge fuser technology to produce the first page faster when a printer is coming out of low power mode so your print job is done sooner.

<sup>3</sup> An InfoTrends study shows the typical office print job is three to five pages long:

<sup>4</sup> The tons of CO<sub>2</sub> avoided is based on power plant emissions that otherwise would occur to generate the electricity saved; cars removed is based on annual emissions from cars burning gasoline.

<sup>10</sup> HP recommends that the number of printed pages per month be within the stated range for optimum device performance, based on factors including supplies replacement intervals and device life over an extended warranty period.

<sup>11</sup> Duty cycle is defined as the maximum number of pages per month of imaged output. This value provides a comparison of product robustness in relation to other HP LaserJet or HP Color LaserJet devices, and enables appropriate deployment of printers and MFPs to satisfy the demands of connected individuals or groups.

<sup>12</sup> Introductory cartridges: average continuous composite cyan/yellow/magenta cartridge yield 750 pages and average continuous black cartridge yield 750 pages.
