1 Safety

1.1 Safety Precautions

⚠ Please read through the following briefings carefully, and act in accordance with these rules, so as to prevent causing any danger or violating any law.

Safe driving

1) Do not use the phone while driving. When you have to use the phone, please use the personal hands-free kit.

2) Please put the phone safely in the phone stand. Do not put it onto any passenger seat or any place from which it may fall down in case of vehicular collision or emergency braking.

Turn off during a flight: Flight is influenced by interference caused by the phone. It is illegal to use a phone on the airplane. Please turn off your phone during a flight.

Turn off the phone when within an area where blasting takes place: Be sure to strictly observe the related laws and statutes by turning off the phone when you are within, or in the vicinity of, an area where blasting takes place.

Turn off the phone when any dangerous goods are in vicinity: Please turn off your phone when you are close to a gas station or in the vicinity of any place where fuel and chemical preparations, or any other dangerous goods are stored.

In hospital: Please obey the related rules or bylaws of the hospital when using your phone in a hospital. Be sure to turn off your phone when near any medical equipment. Your use of any wireless transmission equipment, inclusive of the phone, will interfere with any medical equipment that is not protected fully, and other electronic equipment items, too. Should you have any question in this regard, please consult a related physician or medical equipment supplier.

Interference: Each and every phone’s performance may be affected due to radio interference.

Professional service: The phone must be installed or repaired by no other personnel than professionals. You are likely to suffer a huge risk when you install or repair this phone by yourself, which also goes against the warranty rules.

Fittings and battery: You shall use the fittings and battery acknowledged by the phone manufacturer only. Using unauthorized accessories may tamper the warranty of the device.

Emergency call: You may enter a telephone number (112, etc.) to ask for emergency help after making sure that the phone has been turned on and is in the service status. Press the Send Key to call out.

Disclaimer: Micromax will not bear any responsibility for any incompliance with the above mentioned guidelines or improper usage of the mobile phone. Micromax keeps the right to make modifications to any of the content here in this user guide without public announcement in advance. The content of this manual may vary from the actual content displayed in the mobile phone. In such case, the latter shall govern.

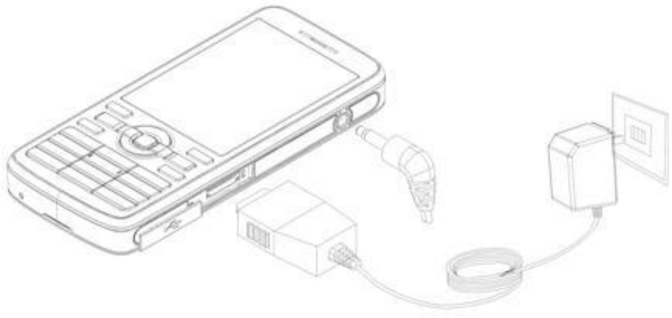
	G/E	GPRS/EDGE is in use.
	1X	CDMA 1x is in use.
12	🔔	It appears when the alarm is activated.
13	🔒	It appears when the key lock is activated.
14	☎	There are any missed numbers.
15	✉	It appears when there are any unread messages in the GSM voice mailbox.

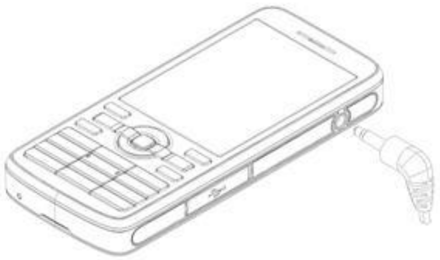
16	✉	It appears when there are any unread messages in the CDMA voice mailbox.
17	⏱	The stopwatch is counting.
18	C1	The GSM chat room 1 is in use.
19	C2	The GSM chat room 2 is in use.
20	ᛒ	Bluetooth connectivity is on

2.4 About SIM Card and the Battery

Please store the cards out of childrens reach.
The card and the contacts are vulnerable to damage~~s~~ due to scratching or bending. Therefore, be careful when using, inserting or removing the cards.
Be sure to switch off the phone before you insert or remove the battery or the card, otherwise, the phone may be damaged.

Charging the battery & Connecting the Hands-Free





1. Insert the plug of the charger into the interface of the phone, and insert the charger into the power socket carefully. The battery icon will blink.
2. The red light is lit during charging. When the battery icon stops blinking or the green light is lit, it indicates that charging is finished.
3. After the charging, unplug the charger from the socket, and press and hold the left and right buttons on the plug of the charger to pull out the plug from the phone.

Tips:
The battery icon ▭ displayed on the screen indicates that the battery power is low. Please charge the battery following the steps above.
Please charge the battery before you use the newly purchased phone. We suggest you charge the battery for 4 hours continuously for the first time.
We suggest you recharge the battery when the power is used up so as to increase the life of the battery.

2.5 To switch ON and OFF

To switch on: Long press **End key** when the phone is in the OFF mode.
If the phone lock has been activated, you need to enter the 4-digit password to unlock. (The preset unlock code is 0000.)
If the SIM card has been inserted in the phone, and the related PIN code protection is activated, you need to enter the 4-8 digit password to unlock.
Warning: If you enter three wrong PIN codes in a row, the SIM card will be locked and you need to enter the PUK code to unlock. Both the PIN code and PUK code are provided by the network operator.
To switch off: In the standby mode, long press **End key**.

3 Phonebook

You can store names and phone numbers in the memory of the phone or SIM card. The phone memory stores up to 1000 entries, each of which contains name, 4 phone numbers (mobile, home, office and fax), address, e-mail address and birthday. You can set photo caller ID, ringtone and groups for each.

Menu > Phonebook

3.1 To add a Contact

In idle, enter phone numbers.
Options > Save To Phone book > Select the location for saving
Or: **Menu > Phonebook > Add new entry >** Select the location for saving
You can edit the name, mobile phone number, home phone number, address, e-mail address, office phone number, fax number, birthday, photo caller ID, ringtone and group of each contact. (The number of columns may be set by you in the **[Fields]** in the **[Settings]**.

3.2 To search contact

Menu > Phonebook > Search Entry > Input characters
Press **Ok Key**

3.3 To dial a number from the Phonebook

Menu > Phonebook > Search Entry > Input characters
Press **Ok Key**
The desired contact will be highlighted. Press **Send key** to make a call.
Tip: If the entry contains more than one numbers, the number selection screen will be displayed. You can select one and press **Send key** to dial.

3.4 To view a Contact

In the contact list of the Phonebook, select the required name card:
Options > **View**

3.5 To edit a Contact

In the contact list of the phonebook, select the name card to be modified:
Options > Edit

3.6 To delete a Contact

In Contacts list, select the entry you want to delete: **Options > Delete**

You can delete all entries from SIM(/UIM) card or Phone by:
Menu > Phonebook > Delete All > From SIM(/UIM/Phone).

And, you can also delete the name one by one:
Menu > Phonebook > Delete All > One by One**.**

3.7 To copy / move

In the contact list of the Phonebook, select the name card to be copied/moved:

Options > Copy / Move
Tip: "Copy" means copying to other storage location. You can copy the entry stored in the SIM(/UIM) card to the phone memory and vice versa

You can copy all entries from SIM(/UIM) card to Phone and vice versa:
Menu > Phonebook > Copy All > From SIM to Phone(/UIM to Phone/Phone to SIM/Phone to UIM).

3.8 Caller groups

Menu > Phonebook > Caller Groups
Select the group to be set:
To edit the name: Highlight the name and select **Edit.**
To select a ringtone: Press **Navigation key (Left/Right)** to select a ringtone for this group. If you select **none**, when a call from the number of a group comes in, the default ringtone designated by system will be played.

3.9 Speed dial

You can specify speed dial numbers to frequently used phone numbers.
Long press the number keys **2**-**9** on the dial plate to display a corresponding phone number on the screen, (The **1 key** corresponds with Voice Mailbox.)
Tip: You must have set a speed dial number for that number key, and the Speed Dial function has been activated.

3.10 SOS Number

Menu > Phonebook > SOS Number
Allows you to make emergency calls to important numbers like 112, 100 (Police) and 101 (Fire Brigade).

3.11 Import and Export

Menu > Phonebook > Import & Export
This feature allows you to Import and Export contacts between your phone and the memory card.

3.12 Phonebook Settings

Menu >Phonebook> Settings
Under this feature you can view the following options: ceiling

- Memory Status
- Preferred Storage
- Fields
- My vCard

4 Calling

4.1 To dial from the Phonebook

Enter the **Phonebook**, select an entry from the entry list and press **Send key** to dial.
Tip: If the entry contains more than one number~~s~~, the number selection screen will be displayed. You can select one and press **Send key** to dial.

4.2 To activate ‘mute’ during a call

During a call, you can prevent the other party from hearing you:
Go to options during active call to Mute

4.3 To view contacts during a call

You can search a phone number from the Phonebook during a call:
Options > Phonebook

4.4 DTMF (Dual Tone MultiFrequency) tone

During a call, you can select to turn ON or turn OFF the DTMF tone. When the DTMF tone is turned off, the digits entered will not be regarded as a DTMF signal response.

4.5 Call divert

With the Call Divert function (needs network support), you may divert incoming calls to another mobile phone or a direct line telephone, but not to any extension~~s~~ of a fixed telephone.
Menu > Settings > Call Setup > GSM(/CDMA) Call Divert

4.6 Call waiting

This function allows you to put the current call on hold and then answer the second one.

Menu > Settings > Call Setup > GSM(/CDMA) Call Waiting
The function needs the support from the local network. In some districts, you can use the function only after you apply to the local network operator.

4.7 Conference Call

The phone supports Three-party Calling. A Three-party Calling, also called a multiparty call or a conference call, is a service based on call waiting.

The function needs the support from the local network. In some districts, you can use the function only after you apply with the local network operator.
Tip: After a conference is formed, if you press End key, you will end all the calls.

4.8 Call Barring

The function is a GSM network service and can restrict outgoing and incoming calls selectively. If you need to change the settings of Restrict Calls, please contact your network operator to obtain the password for opening this service.

Menu > Settings > Call Setup> GSM Call Barring

5 Call Logs

5.1 Missed Calls/Dialed Calls/Received Calls

Menu>Call Logs

When view the call log, you may select from option:

Delete: to delete the entry.
Save To Phone book: to save the number to the Phonebook
Call: Call the desired entry
Send GSM Message: to write GSM SMS and send to the number.
Send CDMA Message: to write CDMA SMS and send to the number.
Send GSM MMS: to write GSM MMS to send to the number.
Add To Call Guard: add a number you wish to avoid/ignore in the call guard list.

5.2 Delete Call Logs

Menu > Call Logs > Delete Call Log
You may select to delete **Missed**, **Dialed, Received** or **All** calls.

5.3 Call Timer

Allows you to view CDMA and GSM call timers.

6 Messages- GSM/CDMA

6.1 Write SMS

To write the GSM SMS:
Menu > Messages > GSM SMS > Write Message
Write the content of the SMS, select **Options:**
Send by GSM: send this SMS by GSM network.
Send by CDMA: send this SMS by CDMA network.

Send by GSM: send this SMS by GSM network.
Save: allows you to save a message that you wish to send later to 'Drafts'
Edit Number: allows you to edit the target number.
Use Templates: select a phrase from the list and insert it into the SMS.
Insert Contact: insert the number of the selected Contact into the SMS.
Send to Group: select the group to send.
Priority: set the current CDMA SMS priority.

6.2 SMS Inbox

For the GSM Inbox:
Menu > Messages > GSM SMS > Inbox
To read a message, move to the entry and press **Central Soft Key (Ok Key)**

When reading a SMS, you can select **Options :**
Reply: allows you to reply to the SMS received.
Forward: forward this message to others.
Delete: delete this message.
Multi delete: select multiple SMS and delete
Copy to SIM(/Phone): copy this message to SIM(/Phone).
Move to SIM(/Phone): move this message to SIM(/Phone).
Chat: start to chat with the sender.
Use Number: allows you to **Call/Save To Phonebook/Send SMS** the number which include in this message.
Use URL: allows you to browse the URL in this message by **GSM/CDMA Connect**, or **Add to Bookmark.**
Copy to: copy this message to memory card.

Move to: move this message to memory card.

Tip: The **Service Messages** is used to save the push message.

For the CDMA Inbox:
Menu > Messages > CDMA SMS > Inbox
To read a message, move to the entry and press **Central Soft Key (Ok Key)**

When reading a SMS, you can select **Options :**
Reply: allows you to reply to the SMS received.
Call Back: allows you to call the number from which the SMS was received.
Forward: forward this message to others.
Delete: delete this message.
Use Number: allows you to **Call/Save To Phonebook/Send SMS** the number which include in this message.
Use URL: allows you to browse the URL in this message by **GSM/CDMA Connect**, or **Add to Bookmark.**
Copy to: copy this message to memory card.
Move to: move this message to memory card.

6.3 SMS Outbox

SMS that have been sent and saved are stored in Outbox.

For the GSM Outbox:
Menu > Messages > GSM SMS > Outbox
To read a message, move to the entry and press **Central Soft Key (Ok Key)**

When reading an SMS, you can select **Options:**
Send: send this message again.
Forward: forward this message to others.
Delete: delete this message.
Use Number: allows you to **Call/Save To Phonebook/Send SMS** the number which include in this message.

For the CDMA Outbox:
Menu > Messages > CDMA SMS > Outbox
To read a message, move to the entry and press **Central Soft Key (Ok Key)**

When reading an SMS, you can select **Options :**
Send: send this message again.
Forward: forward this message to others.
Delete: delete this message.
Use Number: allows you to **Call/Save To Phonebook/Send SMS** the number which include in this message.

6.4 SMS Drafts

Menu > Messages > GSM(/CDMA) SMS > Drafts
This allows you to read the Messages that failed to send and those saved during editing, the

same available operations as Outbox in 6.3 above.

6.5 SMS Settings

For the GSM SMS:
Menu > Messages > GSM SMS > Message Settings
Message Center: allows you to view/edit the message center number.
Validity Period: allows you to choose the validity period for the new sending SMS.
Delivery Report: get the delivery report when the message is successfully delivered to the recipient.
Save Sent Message: allows you to choose the option of saving the sent messages.
Enable Service Message: allows you to enable/disable receiving the service message.
Preferred storage: Select preferred storage.
Memory status: Check the message memory status.

For the CDMA SMS:
Menu > Messages > CDMA SMS > Message Settings
Validity Period: allows you to choose the validity period for the new sending SMS.
Delivery Report: get the delivery report when the message is successfully delivered to the recipient.
Save Sent Message: allows you to choose the option of saving the sent messages.
Preferred storage: Select preferred storage.
Memory status: Check the message memory status.

6.6 Send MMS

MMS, which contains text, picture, video and ringtone, is sent through the MMS center to another mobile phone or an e-mail account.
The phone supports sending and receiving MMS by EDGE, and multiple-sending.

Menu > Messages > GSM MMS > New MMS

Select **Options**:
Add Text: write text.
Add Audio: select an Audio from **File Manager** and add to the MMS.
Add Image: select an image from **File Manager** and add to the MMS.
Add Video: select a Video from **File Manager** and add to the MMS.
Use Templates: select a phrase from the list and insert it into the MMS.
Input Number: enter the number edit screen.
Send: send the MMS.
Tip: The phone supports multiple-sending (up to 20 numbers). You can also send MMS on.

6.7 MMS Inbox

Menu > Messages > GSM MMS > Inbox

Select **Options**:
View: read the highlighted MMS.
Delete: delete the highlighted MMS.
Multi Delete: select multiple MMS to delete.

Delete All: delete all the MMS from the Inbox.

Tip: there have another inbox of **MMS Notify** which used to save the MMS push notification message.

6.8 MMS Outbox

MMS which have been sent or can't be sent are stored in the Outbox.
Menu > Messages > GSM MMS > Outbox

Select **Options**:
View: read the highlighted MMS.
Delete: delete the highlighted MMS.
Multi Delete: select multiple MMS to delete.
Delete All: delete all the MMS from the Outbox.

6.9 MMS Drafts

MMS saved during editing are stored in the Draft.

Menu > Messages > GSM MMS > Drafts

Select **Options**:
View: read the highlighted MMS.
Delete: delete the highlighted MMS.
Multi Delete: select multiple MMS to delete.
Delete All: delete all the MMS from the Draft.

6.10 MMS Settings

Menu > Messages > GSM MMS > MMS Settings

Connect Type: choose the connection type–HTTP/WSP.

MMS Access: allows you set the access – Choose from Registering/Always On/ Always Off.

When receive MMS: choose from – Retrieve At Once/Retrieve Later/Do not Retrieve

Receive Anon.: select the ON/OFF option to allow anonymous people to send or not send an MMS.

Receive Ads: select the ON/OFF options to receive and not receive advertisement.

Expiry Period: choose the time period which MMS stay in server when do not be received (Maximum Period, 1 hour, 6 hours, 1 day, 2 days, 1 week).

Memory Status: Allows you to check the available and used memory.

6.11 Templates

Menu > Messages > Templates
The phone has preset frequently used phrases which may be selected and added to the text when you are editing SMS/MMS. Preset phrases may be modified.

6.12 Chat

The phone provides two chat rooms for SMS. The contents of chat will be sent as SMS. If the receiver's mobile phone does not support the chat function, the chat messages you send will be received as common SMS.
Menu > Messages > GSM Chat
Select either chat room and enter the setup screen. Edit **My Nickname**. During the chat, this nickname will be used and sent with the text to the person you chat with. Edit the number of the person you want to chat with.
After setting, you can begin chatting. The chat contents between you and the other party will be displayed in lines on the screen, and the screen will also display the number of the other party.

6.13 Voice Mail

The phone supports Voice Mail.

For the GSM voice mail:
Menu > Messages > GSM Voice Mail
Set the voice mail numbers. When connecting by GSM network, you can call and listen to the voice mail.

For the CDMA voice mail:
Menu > Messages > CDMA Voice Mail
Set the voice mail numbers. When connecting by CDMA network, you can call and listen to the voice mail.

6.14 My Folder

The folder is used to save the SMS in the memory card.
Menu > Messages > My Folder

Select **Options**:
Open: open the highlighted folder.
Add: add the new folder.
Edit: edit the highlighted folder.
Delete: delete the highlighted folder.

Tip: you can add the folder which include the number you wish, when you receive the SMS from this wished number, this message will be moved to this folder automatically. The other operation please refer to the SMS inbox.

6.15 Broadcast Message

Menu > Messages > Broadcast Message
The phone supports Broadcast Message. It is supported by GSM network. Broadcast messages are single-way messages sent to the users of the network operators by the message service center. For the contents and channel setup of broadcast messages, consult your network operator.

You need to set Receive Broadcast Message to **On** before you can use Broadcast Message.

Tip: If you have opened and turned on Broadcast Message, you can select **Read Message** to browse the broadcast messages received. The phone will display 5 broadcast messages at most, since old messages will be replaced by the messages newly received.

WAP settings are required for surfing the web with WAP. Follow the steps below to set up a WAP account:

•Connectivity > Connection Setup (GSM/CDMA) > Choose desired GPRS account (Click on status for ON/OFF)
•Connectivity >Browser Setup > Select HTTP/WSP
You can now begin to surf!

For New Account:
•Menu >Connectivity > Connection Setup (GSM/CDMA)> Choose desired GPRS account > Choose MMS/WSP/HTTP >Save the settings of the account >Go to the created account & activate.

14 STK/ UTK

14.1 STK /UTK Services

If your SIM/UIM card supports STK/UTK, you may use the corresponding value-added services.

Menu > Connectivity > STK/UTK

15 Maintenance

Use a dry soft cloth to wipe general dirt.
Do not use a hard cloth, benzene or thinner to wipe the phone, otherwise, the surface of the phone will be scratched or could even result in the fading of colour.

16 Taking Care of your Device

•Your device is a product of superior design and craftsmanship and should be handled with care: The following suggestions will help you protect your phone:

•Always keep the small parts of the phone away from children.

•Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will rust electronic circuits. If your device does get wet, remove the battery, and allow the device to dry completely before replacing it.

•Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.

•Do not store the device in high or cold temperature. High temperatures can shorten the life of electronic devices and damage batteries.

•Do not attempt to open the device other than as instructed in this guide.

•Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.

•Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft, clean, dry cloth to clean the surface of the device.

•Do not paint the device. Paint can clog the moving parts and prevent proper operation.

•Use chargers indoors

17 After Services

For details, see the After Service Guide supplied with the phone.

18 Inputting Text

You can enter text in English and digit.
