SUZUKI MODULAR INSTRUMENT SYSTEM

SUZUKI MODULAR INSTRUMENT SYSTEM (SMIS) uses an easy to connect and expandable cable system to transmit graphic and numerical data to multifunction gauges. Easy to set up and install, this system can be used with almost all boats and DF300 SUZUKI outboards. Connected to the NMEA2000 compatible system, the gauges can display real time readings from compatible electronic probes and the exclusive SMIS engine interface to monitor all engine functions. (engine monitor with 4" gauge only)

APPLICABLE MODELS: DF9.9BR/15AR/20AR/40AT/50AT/60AT/70AT/80AT/90AT/100A-300A

SMIS MULTIFUNCTION GAUGE

The 4" multifunction gauge uses a state of the art high contrast, dot matrix display to monitor real time graphic and numerical digital data. When connected into the SMIS system, it can monitor all engine functions, act as a speedometer, tachometer, GPS*, and many others. (*GPS requires additional hardware.)

The 2" multifunction gauge provides all the functions of the 4" gauge except for diagnostic information. When connected to the SMIS system, it can be programmed to monitor all other functions.
