YZF-R1

Performance

1. GYTR® Carbon Fiber Dual Slip-On Mufflers

a. Fits '09~'11 R1

Provides a significant increase in power throughout the rpm range with a 4-hp maximum gain while providing up to a 2 ft-lb increase in torque. Carbon fiber muffler shell with brushed stainless steel inlet pipe and end cap. Billet aluminum muffler mounts. Completely rebuildable. 2.4 pounds lighter than stock. Meets 2010 AMA® sound requirements.

For closed-course competition only (see Important Note below).

14B-E47A0-V0-00 \$999.95

b. Fits '07~'08 R1

Provides a significant increase in power throughout the rpm range with a 4-hp maximum gain while providing up to a 3 ft-lb increase in torque. Carbon fiber muffler shell with brushed stainless steel inlet pipe and end cap. Aluminum muffler mounts. Completely rebuildable. 2 pounds lighter than stock.

For closed-course competition only (see Important Note below).

GYT-4C893-80-CF \$999.95

2. GYTR High Flow Air Filter

Offers increased air flow and excellent filtration for performance applications. Washable and reusable. Service with Genuine Yamaha Gauze Filter Cleaner and Filter Oil, both available from your Yamaha dealer.

a. Fits '09~'11 R1

14B-E41D0-V0-00 \$79.95

b. Fits '07~'08 R1

GYT-4C895-00-00 \$104.95

3. GYTR Sprockets by Talon

Front sprockets are manufactured from heat-treated chromoly steel, are CNC-machined to extremely high tolerances, and have a yellow zinc finish to avoid corrosion. Rear sprockets are black anodized and made from 7075-T6 billet aluminum (1/3 the weight of steel). CNC-machined for maximum fit accuracy and long-lasting durability.

Track/Race application: aluminum sprockets and 520 Series conversions are best suited for track or racing applications but can also be used for street use if the stock number of sprocket teeth is used. For a 520 Series conversion on an R1, gearing selection will vary from one track to another, but a good starting point would be a 15T front and 45T rear. To change gearing based on your particular track, a 16T front with 44T and 46T rears would provide a wide range of gearing selection. See the Stock Gearing Reference Chart and Recommended GYTR Performance Chain Chart on facing page to determine the sprockets and chains that best fit your needs. Also, see chart on pg. 2-30 for full GYTR Performance Chain details.

IMPORTANT NOTE:

All street-legal motorcycle models are regulated by the EPA and state law. This accessory affects exhaust emissions and is for closed-course competition only. Use on public roads constitutes illegal tampering punishable by law.

Sprocket sizes other than stock are for closed-course competition only. Changing the final drive ratio affects exhaust emissions and also affects speedometer readings.

GYT-2C095-02-00 \$104.95

3. GYTR Sprockets by Talon

Front sprockets are manufactured from heat-treated chromoly steel, are CNC-machined to extremely high tolerances, and have a yellow zinc finish to avoid corrosion. Rear sprockets are black anodized and made from 7075-T6 billet aluminum (1/3 the weight of steel). CNC-machined for maximum fit accuracy and long-lasting durability.

Track/Race application: aluminum sprockets and 520 Series conversions are best suited for track or racing applications but can also be used for street use if the stock number of sprocket teeth is used. For a 520 Series conversion on an R6, gearing selection will vary from one track to another, but a good starting point would be a 15T front and 45T rear. To change gearing based on your particular track, a 16T front, 44T and 46T rears would provide a wide range of gearing selection. See the Stock Gearing Reference Chart and Recommended GYTR Performance Chain Chart on facing page to determine the sprockets and chains that best fit your needs. Also, see chart on pg. 2-30 for full GYTR Performance Chain details.

IMPORTANT NOTE:

All street-legal motorcycle models are regulated by the EPA and state law. This accessory affects exhaust emissions and is for closed-course competition only. Use on public roads constitutes illegal tampering punishable by law.

Sprocket sizes other than stock are for closed-course competition only. Changing the final drive ratio affects exhaust emissions and also affects speedometer readings.

Performance

3. GYTR Slip-On Exhaust

Designed to improve the performance of your FZ1 from idle to redline. Features a lightweight carbon fiber muffler shell with polished stainless steel tubing, stamped inlet cap, new cone-style outlet cap and a billet aluminum mount. 70% lighter than stock.

For closed-course competition only (see Important Note below).

Fits '06~'11 FZ1

GYT-3C393-01-CF \$469.95

Repack Kit for GYTR Slip-On Exhaust

(Not shown)

Repack Kit for 16" GYTR® Slip-On Exhaust for the FZ1. High-quality fiber packing cartridge. Comes on a cardboard sleeve for easy installation.

GYT-5TA93-33-KT \$26.95

4. GYTR Sprockets by Talon

Front sprockets are manufactured from heat-treated chromoly steel, are CNC-machined to extremely high tolerances, and have a yellow zinc finish to avoid corrosion. Rear sprockets are black anodized and made from 7075-T6 billet aluminum (1/3 the weight of steel). CNC-machined for maximum fit accuracy and long-lasting durability.

Track/Race application: aluminum sprockets and 520 Series conversions are best suited for track or racing applications but can also be used for street use if the stock number of sprocket teeth is used. For a 520 Series conversion on an FZ1, gearing selection will vary from one track to another, but a good starting point would be a 15T front and 45T rear. To change gearing based on your particular track, a 16T front, 44T and 46T rears would provide a wide range of gearing selection. See the Stock Gearing Reference Chart and Recommended GYTR Performance Chain Chart below to determine the sprockets and chains that best fit your needs. Also, see chart on pg. 2-30 for full GYTR Performance Chain details. *Sprocket sizes other than stock are for closed-course competition only. Changing the final drive ratio affects exhaust emissions and also affects speedometer readings.*

STOCK GEARING REFERENCE CHART

GYTR® Performance Chains

GYTR ULTRA-HIGH PERFORMANCE SPORTBIKE RACING CHAINS

520GDX (Chain Type B = X-Ring®) – The GDX model is a premiere GYTR X-Ring® chain. This chain offers the ultimate balance of performance and durability. It has up to 50% longer life and less friction than a traditional O-ring-type chain. The GDX chain comes with one clip-type and one rivet-type master link. Individual master links also available separately. Tensile strength = 8500 lb.

525GDX (Chain Type B = X-Ring®) – The GDX model is a premiere GYTR X-Ring® chain. This chain offers the ultimate balance of performance and durability. It has up to 50% longer life and less friction than a traditional O-ring-type chain. Available in both 120 and 130 links. Individual master links also available separately. Tensile strength = 8800 lb.

530GDX (Chain Type B = X-Ring®) – The GDX model is a premiere GYTR X-Ring® chain. This chain offers the ultimate balance of performance and durability. It has up to 50% longer life and less friction than a traditional O-ring-type chain. Individual master links also available separately. Tensile strength = 9400 lb.

520GDXL (Chain Type C = X-Ring® Lite) – The GDXL model is a premiere GYTR X-Ring® chain. It has all the exceptional features of the GDX model but with significant weight savings. Like the GDX, this chain offers the ultimate balance of performance and durability. It has up to 50% longer life and less friction than a traditional O-Ring-type chain. The GDXL chain comes with one clip-type and one rivet-type master link. Individual master links also available separately. Tensile strength = 8000 lb.

520GPX (Chain Type B = X-Ring®) – The GPX Pro Race model is a premiere GYTR X-Ring® chain. It's a great replacement for race applications and also offers significant weight savings. Individual master links also available separately. Tensile strength = 8630 lb.

520/525/530GTS (Chain Type B = X-Ring®) – The GTS model is a premiere GYTR X-Ring® chain. It has all the same exceptional "X-Ring®" features of the GDX model. These chains are a great replacement for race applications. 525GTS and 530GTS models are available in both 120 and 150 links. Individual master links also available separately.

520GTS Tensile strength = 9400 lb.

525GTS Tensile strength = 10,300 lb.

530GTS Tensile strength = 11,100 lb.

520GDO (Chain Type A = O-Ring) – The GDO model is one of the finest O-ring chains on the market. The GDO chain is extremely durable. Chain comes with one clip-type and one rivet-type master link. Individual master links also available separately. Tensile strength = 8000 lb.

Welcome to our “Distributed by Yamaha” Product Line

Our product team has worked with some of the finest companies in the world to bring you proven accessories to bolt onto Yamaha Sportbike models. In the following pages, you’ll find exciting “Distributed by Yamaha” accessories from the following suppliers:

ASV Inventions®

Russell® Performance

StompGrip®

Marchesini

HT Moto™

Harris Performance Products Ltd.

Axio®

ChatterBox!®

Graves™ Motorsports

Akrapovic™

PIAA®

McCuff™ Industries, Inc.

Brembo®

GPR®

BRAKING™

Goodridge®

Vortex®

Dynojet®

SHAD®

Y's Gear

RoadLoK®

Flash2Pass™

HelmetSecure™

Your parts department now has one convenient source for all of your Yamaha accessory needs. And here's more great news: All of these accessory purchases count toward—and will help you achieve—higher levels in our lucrative Gold Rewards program!

1. Unbreakable Pivoting Levers

C/5 Sport Series Levers by ASV Inventions®. Unbreakable, with a 5-year guarantee to the original owner from the manufacturer. Provides tool-less micro-adjustable reach (about 180 clicks for 4 inches of adjustability), stainless steel bushing at pivot, and a chrome-silicon high-tension spring. CNC-machined from 6061 billet aluminum. Made in U.S.A.

Stealth Black

a. Brake Lever

Fits '04~'11 R1, '05~'11 R6

ABA-OSS56-20-23 \$139.95

b. Clutch Lever

Fits '04~'11 R1, '05~'11 R6, '06~'11 FZ1, '04~'09 FZ6, '09~'11 FZ6R

ABA-OSS56-20-24 \$139.95

Yamaha Blue – Yamaha Exclusive!

c. Brake Lever

Fits '04~'08 R1, '05~'11 R6

ABA-13S55-50-26 \$129.95

Fits '06~'11 FZ1, '04~'09 FZ6, '09~'11 FZ6R

3. Russell® Brake Lines

Russell® Performance Cycleflex® Street Brake Hose Kits incorporate the convenience and reliability of factory assembly for trouble-free installation, no additional components required. Precision double-crimp technology ensures permanent end attachment and precise alignment for uncompromised fit. Street brake hose kits are engineered utilizing a Teflon® inner liner, supported by a rugged 308 stainless steel braid. Cycleflex® street bike brake hose kits duplicate the routing of factory brake hoses and come complete with all necessary hardware. The stainless steel braid enhances the overall appearance and meets all the guidelines for the DOT MVS-571.106 requirements. 50-state legal.

Front

Fits '03~'04 R6, '06~'09 R6S

GYT-OSS55-50-52 \$59.95

GYT-OSS55-50-59 \$29.95

Fits '01~'05 FZ1

GYT-OSS55-50-58 \$29.95

4. Russell® Front 2-Line Racer Kit

Russell® Performance Cycleflex® Two-Hose Racer Kits utilize a Teflon® inner liner supported by a stainless steel outer jacketing to eliminate brake hose expansion for a firm brake lever time after time. These kits consist of two brake hoses that connect directly to the master cylinder using a double-length banjo bolt (supplied), with the longer hose attaching to the left caliper, shorter to the right caliper. This eliminates the OEM hose set-up and brake junction, making brake services at the track simpler while providing excellent brake performance. All two-hose racer kits come with extruded clear coat to protect against abrasion of painted surfaces. 50-state street legal.

Fits '04~'08 R1

GYT-OSS55-50-63 \$79.95

1. StompGrip® Traction Pads

These tank and side cover traction pads are made of a clear, pliable elastomer material molded to shape with "traction knobbies" that provide functional, non-abrasive grip. These kits come pre-molded for the tank and side cover of your R1, R6, or FZ1. These traction pads make gripping your bike incredibly easy.

Fits '09~'11 R1

ABA-OSS56-21-79 \$48.95

Marchesini Wheels

These Marchesini wheels are manufactured by plastic deformation aluminum alloy forging. They provide a high lateral and torsional resistance plus a good weight reduction compared to stock wheels. Come complete with wheel bearings and spacers. Sprocket required for rear wheel (see sprockets made specifically for these Marchesini wheels on next page). Suitable for track and street use.

4. GYTR® Sprockets by Talon for Marchesini Wheels

Yamaha has developed a line of performance sprockets made specifically for the Marchesini H-Spoke and T-Spoke Wheels shown. Sprockets are made from 7075-T6 billet aluminum and CNC-machined for maximum fit accuracy.

Sprocket sizes other than stock are for closed-course competition only. Changing the final drive ratio affects exhaust emissions and also affects speedometer readings.

1. Harris Adjustable Rear Sets

These “factory style” footrest kits were developed on the race track by Harris Performance Products Ltd. These are the racer’s choice and are fitted to many of the world’s leading race bikes. Kits are CNC-machined from solid 6082 T6 billet aluminum. Standard shift pattern is the same as the road version. Levers run on self-lubricating bearings and the lever position is adjustable on rod-end spherical bearings. Footpeg position is variable back and/or up from standard by means of a matrix.

ABA-0SS56-22-78 \$24.95

2. Harris “MotoGP® Style” Slip-On Silencer

Developed by Harris Performance Products Ltd., this lightweight, direct replacement silencer for the R6 is designed to replicate the sharp and aggressive look of current MotoGP® bikes. Get that race track look and sound without compromising reliability or performance. Handcrafted from stainless steel and left as manufactured for that authentic “works” look. No engine modifications necessary. Comes with all fittings and instructions.

For closed-course competition only (see Important Note below).

Fits '08~'11 R6

ABA-62B55-50-21 \$274.95

IMPORTANT NOTE:

All street-legal motorcycle models are regulated by the EPA and state law. This accessory affects exhaust emissions and is for closed-course competition only. Use on public roads constitutes illegal tampering punishable by law.

GYT-OSS55-50-73 \$149.95

*NOTE: Master cylinder activator pin must be replaced with shorter pin for use on '09~'11 R1. Shorter pin is included with lever assembly. Simply pull out the long pin and replace with the shorter pin.

6. Harris Front Wheel Stand

Developed by Harris Performance Products Ltd., this front paddock stand locates under each fork leg and facilitates all front-end work including wheel cleaning and removal. Main tubes are satin-finished stainless steel with mild steel zinc-plated swing plates with PVC anti-scuff sleeves. Two high-load wheels are incorporated into the design. A universal stand, the under fork leg probes swing into the correct position for any fork application. This one-piece welded structure comes with all necessary fixtures, fasteners, and fitting for immediate use. Must be used in conjunction with rear stand.

Fits R1, R6, and FZ1 models

ChatterBox!® Bluetooth® Intercom Helmet Headsets

5. XBi

Communicate rider to passenger via CDMA crystal-clear technology, using either voice activation or push-to-talk. Both rider and passenger module is capable of pairing with up to two accessory devices at the same time (i.e. iPod®, MP3, satellite radio, GPS, cell phone, radar detector), SMART technology will automatically prioritize the transmission of the paired devices. The XBi is so far advanced that it can even stream music from one module to the other. Each module is also capable of being used by itself to pair accessories when riding alone. Other features include a lithium-polymer rechargeable battery with 6 to 8 true hours of power, 1-hour express charge, noise suppression, Hi-Fi headset, and a compact aerodynamic module design. Each kit sold includes module, battery, wall charger, headset, and mounting hardware.

Check all local laws and regulations regarding the use of in-helmet speakers while operating motorized vehicles.

**GRAVES[™]
MOTORSPORTS**

1. Full "Low Mount" Exhaust System

For the rider that is looking for something a little different, the stainless steel Low Mount exhaust. This system features mandrel-bent stainless tubing, billet aluminum flanges, and our full carbon fiber side exit silencer. It is extremely light yet offers the amazing horsepower increases Graves[™] is known for. An O₂ bung (with plug) is provided for use with the stock Yamaha O₂ Sensor or the Dynojet[®] Auto Tune module which allows for live, closed-loop EFI tuning. Graves[™]-spec packing produces an exhaust note like no other and holds up longer to the extreme conditions of a high-revving motorcycle. This full exhaust system delivers exactly what this revolutionary R1 deserves: big power, lasting durability, style, and sound. System gives an overall weight savings of 15 lb. compared to stock exhaust system.

For closed-course competition only (see Notice below).

Fits '09~'11 R1

1. "Race Spec" Exhaust Systems for R6

Graves™ Motorsports hand-made-in-the-U.S.A. full exhaust systems for the Yamaha YZF-R6. This high performance exhaust system features head pipes, billet aluminum flanges, and silencer. O₂ bung is provided for use with the Yamaha O₂ Sensor. The "Race Spec" full exhaust system includes an added cross-over head pipe feature along with a more aggressive head pipe taper. These features allow for an increased throttle response and low-to-mid range power delivery without affecting the peak power output. The exhaust system's cores are altered in size and taper length specifically for the R6. By doing so Graves™ can maximize the performance of the exhaust system.

For closed-course competition only (see Notice below).

2. Cat. Eliminator Exhaust System

The Graves™ Motorsports Cat. Eliminator exhaust system is a perfect mix of form and function. Eliminating the catalytic converter from the stock exhaust removes significant weight, reduces stored up exhaust heat, and increases the flow of exhaust gases. When all of these factors are combined it equals POWER. It features mandrel-bent tubing and silencers with tapered conical outlets. An O₂ bung (with plug) is provided for use with the stock Yamaha O₂ sensor. Graves™-spec packing produces an exhaust note like no other and holds up longer to the extreme conditions of a high-revving motorcycle.

For closed-course competition only (see Notice below).

1. Adjustable Rear Sets for R1

These rear sets feature billet aluminum construction, M1 footpegs, double roller bearings in the brake and shifter pivots, and left-side carbon fiber heel guard. Includes shift rod and shift knuckle. Our unique adjustable M1 footpegs offer excellent grip via the large CNC-machined "teeth" and comfort due to their large contact patch and ability to be rotated to any desired angle. The lever tips are collapsible and feature a high-grip rubber cover for positive grip and feel when shifting and braking. The carbon fiber heel guard is designed to be functional as well as look great. The right side is an optional upgrade (purchased separately). Their sturdy, lightweight construction makes them last, even when digging your heels into them. Rider can select from either reverse or standard shift pattern by rotating the stock shift knuckle on the shift shaft. In order to use a Dynojet® Speed Shifter you will need to use the Dynojet® Ignition Module along with the Power Commander® PCIII USB. If you are using reverse shift, you will need to order the Shift Rod Tension Sensor (Pull Type) and 246mm Shift Rod. If you are using standard shift, you will need to order the Shift Rod Tension Sensor (Push Type) and 246mm Shift Rod. See your Yamaha dealer or go to gravesport.com for optional equipment.

2. NEW! Rear Sets for R6

These rear sets feature billet aluminum construction, M1-style footpegs, double roller bearings in the brake and shifter pivots, and carbon fiber heel guards. Includes 302mm shift rod (not shown). Our unique adjustable (not adjustable on fixed-type rear set) M1 footpegs offer excellent grip via the large CNC-machined "teeth" and comfort due to their large contact patch and ability to be rotated to any desired angle. The folding lever tips feature a high-grip, rubber cover for positive grip and feel when shifting and braking. The carbon fiber heel guards are designed to be functional as well as look great. Their sturdy, lightweight construction makes them last, even when digging your heels into them. Rider can select from either reverse or standard shift pattern by rotating the stock shift knuckle on the shift shaft. In order to use a Dynojet® Speed Shifter you will need to use the Dynojet® Ignition Module along with the Power Commander® PCIII USB. If you are using reverse shift, you will need to order the Shift Rod Tension Sensor (Pull Type) and 246mm Shift Rod. If you are using standard shift, you will need to order the Shift Rod Tension Sensor (Push Type) and 246mm Shift Rod. See your Yamaha dealer or go to gravesport.com for optional equipment.

Fits '06~'11 R6

3. NEW! Rear Sets for FZ1

These rear sets feature billet aluminum construction, M1-style footpegs, double roller bearings in the brake and shifter pivots, and carbon fiber heel guards. Includes 290mm shift rod and shift knuckle. Our unique adjustable M1 footpegs offer excellent grip via the large CNC-machined "teeth" and comfort due to their large contact patch and ability to be rotated to any desired angle. The lever tips are collapsible and feature a high-grip rubber cover for positive grip and feel when shifting and braking. The carbon fiber heel guards are designed to be functional as well as look great. Their sturdy, lightweight construction makes them last, even when digging your heels into them. Rider can select from either reverse or standard shift pattern by rotating the stock shift knuckle on the shift shaft.

Fits '06~'11 FZ1

DBY-ACC56-23-45

4. NEW! Rear Brake Return Spring

This billet aluminum spring plate and spring install easily onto the rear brake master cylinder rod and keep the brake pedal pushed up.

Fits R1 and R6 models with stock or aftermarket rear sets

DBY-ACC56-23-52

\$19.95

5. Velocity Stacks

The Graves™ Motorsports Velocity Stack Kit is specially designed to suit the fuel-injected Yamaha motor.

a. R1/ FZ1 Application

Fits '04~'06 R1, '06~'11 FZ1

The kit of four injection-molded plastic intake stacks mount directly into the stock airbox without modification and are designed to smooth out the power curve, increase horsepower throughout, and improve fuel efficiency. Power gains of 4 hp in the mid range and 2 hp at the top end are to be expected.

For closed-course competition only (see Notice below).

ABA-OSS56-20-71

\$149.95

Fits '02~'03 R1

The kit of two rubber intake stacks replaces the stock intake stacks on the #2 and #3 cylinders. These intake stacks mount directly into the stock airbox without modification and are designed to smooth out the power curve, increase horsepower throughout, and improve fuel efficiency. Power gains of up to 6 hp in the mid range and 2 hp at the top end are not uncommon.

For closed-course competition only (see Notice below).

ABA-OSS56-20-68

\$99.95

b. R6 Application

Fits '03~'04 R6

The kit of four billet aluminum intake stacks mount directly into the stock airbox without modification and are designed to smooth out the power curve, increase horsepower throughout, and improve fuel efficiency.

For closed-course competition only (see Notice below).

1. Smog Block-Off Plugs/ Plates

Removes the air injection system A.I.S. from your bike for closed-course competition.

a. Smog Block-Off Plates

Designed to seal off the ports on the valve cover used by the air injection system. Once these are capped off, the air injection system can be safely removed. These Smog Block-Off Plates are made from CNC-machined billet aluminum and feature the Graves™ Motorsports "G" logo.

For closed-course competition only (see Notice below).

Fits '04~'11 R1, '03~'11 R6, '06~'09 R6S

ABA-OSS56-20-70 \$36.95

b. Smog Block-Off Plugs

Designed to seal off the ports on the cylinder head used by the air injection system (a.k.a. smog pumps or A.I.S.). Once these are capped off, the air injection system can be safely removed. These Smog Block-Off Plugs are made from machined aluminum. Set of 4.

For closed-course competition only (see Notice below).

Fits '98~'03 R1

ABA-OSS56-20-69 \$24.95

PIAA

PIAA® Powersports Replacement Headlight Bulbs

Durable, dependable, and reliable, PIAA® Powersports Anti-Vibration bulbs are specifically designed for powersports to significantly increase bulb life and performance. By utilizing quartz glass which is stronger than a standard H4 bulb, PIAA's® Anti-Vibration bulbs allow better dissipation of heat. A thicker diameter filament support is fixed to the glass tube allowing the bulb to withstand a large range of motion. (Please refer to the 2010 PIAA® Bulb Application Guide at www.piaa.com/Powersports/guide.html.)

Super Plasma GT-X – A new addition to PIAA's® line of high-performance bulbs is the Super Plasma GT-X, with a unique twin beam design. The low beam is a purple color shining at 5000K, while the High Power Halogen high beam maintains Xtreme White performance at 3800K. A purple colored topcoat gives the headlamp a purple look even when the lamp is turned off. At 5000 Kelvin, the Super Plasma GT-X bulbs offer an unmatched combination of fashion and performance.

Xtreme White Plus – PIAA's® most popular headlight bulb by far. The Xtreme White is the favorite combination of color and performance. The addition of the anti-vibration characteristics makes this the perfect bulb for every application. The blue top coat on this series of bulbs adds a slight blue tint to a lamp with no loss of performance. Xtreme White Plus bulbs are whiter, brighter, and close to the color of sunlight.

Star White – Star White bulbs are significantly whiter and brighter than normal halogen bulbs. Star White bulbs feature PIAA's® exclusive XTRA Technology, which increases bulb performance without taxing your bike's electrical system. Star White technology approaches the color and intensity of H.I.D. color temperature, 3800 Kelvin.

4. PIAA® H4 Star White Bulb

Fits all H4 applications

ABA-OSS58-40-06 \$39.95

Brembo® High-Performance Brake Systems

For over thirty years, Brembo® has been at the forefront of the motorsports racing arena, winning over 200 world championships including the 2009 MotoGP® Championship with Yamaha's Valentino Rossi. The experience accumulated through years of intensive research in the competitive arena has allowed Brembo® to create application-specific product lines as well as different research and development procedures.

Motorcycle racing enthusiasts who insist on replacing original brake systems with Brembo® High-Performance products look to improve their track day riding style in terms of performance while also enhancing the overall aesthetic appeal of their bikes.

Brembo® and Yamaha Parts & Accessories have formed a partnership to sell these high-performance products for YZF-R1 and YZF-R6 models through the Yamaha dealer network.

4. 19 RCS Master Cylinder

This master cylinder has a hard-anodized forged aluminum alloy body with a MotoGP®-inspired piston assembly. The patented RCS device allows the brake lever ratio to be adjusted for either race or street applications. A micro-switch is included for brake light operation along with complete installation instructions.

Fits '07~'11 R1, '05~'11 R6

ABA-OSS56-22-41 \$365.00

5. Radial CNC Caliper Kit

Calipers are CNC-machined from aerospace-grade billet aluminum with 2x30mm and 2x34mm pistons. 108mm radial fixing centers. Surfaces are hard-anodized to achieve close working tolerances for unsurpassed performance and accuracy. This two-caliper kit comes complete with sintered pads for street or race use and is a direct replacement for the stock radial calipers. Includes thermo-tape caliper stickers, spacers, screws, and complete installation instructions. Requires installation of 19 RCS Master Cylinder (ABA-OSS56-22-41), sold separately.

BRAKING

1. NEW! Radial Master Cylinder CAM Control

The radial design means less lever force and greater power and feel, for outstanding overall brake feeling and stopping power, reducing lap times. Forged aluminum construction provides excellent strength and durability. Now features a folding lever with cam control technology. The master cylinder uses the stock reservoir.

Fits '07~'11 R1, '06~'11 R6

ABA-0SS56-23-32

\$349.99

2. NEW! Replacement Levers for Master Cylinder

CNC-machined from billet aluminum, these levers replace the stock levers and are fully adjustable including a unique design that allows the lever to be lengthened or shortened to suit you and your riding style. The hinged points allow the levers to break away to prevent damage in the event of a tip over. Clutch and front brake levers sold separately.

Fits '04~'11 R1, '05~'11 R6

3. NEW! SK Series Front Discs

The SK Series front race rotors represent an evolution of the original BRAKING™ rotors, but with precise direction of rotation, meaning the left and right rotors are side-specific. Precise direction of rotation is designed to permit better ventilation capability, maintaining the coolest temperature possible during aggressive use. The lower outer braking track, which is designed for today's radial calipers, lessens weight, reducing unsprung mass leading to better overall handling and performance. 40~50g lighter per rotor than our STX Series rotors and nearly 1 lb. lighter per set than other brands. The SK rotors provide fast reaction and improved lever feel during racing conditions. (Left and right hand rotors sold separately.)

GOODRIDGE
FLUID TRANSFER SYSTEMS

All kits feature premium black PVC-coated, PTFE-lined stainless steel braided hose with black zinc-plated mild steel fittings. All kits come complete with bolts and crush washers.

1. "Superbike Pro" Brake Line Kits

These high-performance kits were developed working along-side AMA® Factory Race Teams on the track and in the race shop. These brake lines provide the same benefits top AMA® riders achieve through traditional Superbike line routing. Benefits include tighter tolerances, which increase clearance at the master cylinder, fork leg, and gauge cluster areas, and a more precise fit by routing the lines directly to the calipers. In addition to the powerful braking performance characteristic in all Goodridge® products, these premium kits simplify installation, providing the unique and unmistakable look of "Superbike" routed brake lines.

NOTE: Goodridge® "Superbike Pro" brake lines were specifically developed for use with the Brembo® calipers available through Yamaha Parts & Accessories (see pgs. 2-61~2-62). Not compatible with stock calipers unless all three stock banjo bolts are used.

Race-Routed Brake Line Kits

Black PVC-coated, PTFE-lined, stainless braided hose and black zinc-plated mild steel fittings and bolts. The clear PVC cover provides abrasion protection and simplifies cleaning. The PTFE inner liner is an inert material, which is compatible with all brake and clutch fluids. Kits bypass the brake tee, routing both lines directly to the calipers from the master cylinder, fastening at the master cylinder with the provided double banjo bolt. Benefits are reduced weight and simplified installation.

NOTE: Goodridge® "Race-Routed" brake lines are designed to be used with stock Yamaha calipers.

4. Clip-On Bars

Vortex® Clip-Ons are strong, light, and adjustable. They are machined from solid billet aluminum with removable handlebar tubes, so in the event of a crash you simply replace the handlebar tube instead of the entire handlebar. Clip-Ons sit at a 7° angle, giving racers and street riders the ultimate position for rider comfort and leverage. Stainless steel fasteners and Delrin® plastic ends add the finishing touch.

Fits '98~'11 R1, '05~'11 R6

2. Rear Sets

Vortex® rear sets are CNC-machined from solid, lightweight billet aluminum and finished with a black anodize for looks and durability. Built with professional racing in mind, these rear sets are designed to improve clearance, traction, positioning, and control. They are fully adjustable for clearance and comfort and the dual bearings in each lever offer precision shifting and braking. Tested and used by AMA® Superbike teams. Race grip footpegs offer superior traction.

1. Power Commander® V

The Power Commander® V is loaded with tons of new features:

- Reduced size from PC III USB (less than half of the size of PC III)
- USB-powered from computer (9-Volt adaptor is no longer needed for programming)
- 2-position map switching function built in (map switch not included)
- Gear input (allows for map adjustment based on gear and speed)
- Analog input (allows user to install any 0-5 Volt sensor and build an adjustment table based on its input such as temperature)
- With gear position input connected, the PC V is capable of allowing each cylinder to be mapped individually and for each gear (example: on a 4-cylinder motorcycle with a 6-speed transmission there could be up to 24 separate fuel tables)
- Unit has a -100/ +250% fuel change range (up from -100/ +100%)
- 10 throttle position columns (up from 9 on PC III USB)
- Enhanced "accel pump" utility (increased adjustment and sensitivity ranges)

For closed-course competition only (see Important Note below).

Fits '09~'11 R1

Fits '09~'11 R6

ABA-OSS56-21-69 \$359.95

Fits '09~'11 FZ1

ABA-OSS56-21-71 \$359.95

2. AutoTune for Power Commander® V

Once installed, the AutoTune Kit monitors the fuel mixture (by installing the included Wide Band O₂ sensor in the exhaust). It then sends this information to the Power Commander® V and automatically corrects it while you ride. Each map has preset Air/ Fuel ratio values included that have been found to be the best overall settings. This lets you simply plug in the unit and let it do the work. For advanced users that would like to change the Air/ Fuel ratios from baseline, they are fully adjustable. Each throttle opening/ rpm combination is individually adjustable. For most models of bikes it is also possible to adjust the Air/ Fuel ratios "per gear." This gives you total control of the fueling in every gear and throttle/ rpm area if required. *For closed-course competition only (see Important Note below).*

AutoTune is for use with the Power Commander® V (sold separately) for the following models:

'09~'11 FZ1 (ABA-OSS56-21-71), '09~'11 R6 (ABA-OSS56-21-69), and '09~'11 R1 (ABA-OSS56-21-74).

IMPORTANT NOTE:

All street-legal motorcycle models are regulated by the EPA and state law. This accessory affects exhaust emissions and is for closed-course competition only. Use on public roads constitutes illegal tampering and punishable by law.

STR-OSS56-10-67 \$249.95

3. Power Commander® III USB

The Dynojet® Power Commander® III USB plugs in-line with your bike's stock fuel-injection system. It uses OEM-style connectors, making installation quick and easy. It allows a full range of fuel adjustment, as much as +/- 100% over stock. Adjustments can be made either with a Windows®-based computer or by using the face plate-mounted button adjusters. No permanent changes are made to the bike's system. Once the unit is removed, the bike reverts to its stock settings.

For closed-course competition only (see Important Note below).

4. Power Commander® III EX USB

The Dynojet® Power Commander® III EX offers virtually the same tuning functionality as the "race only" Power Commander® line, while at the same time complying with the California ARB regulations (EO No. D-619). The PC III EX is compatible with Tuning Link® Software. Custom maps can be developed in much the same way as the "race only" version. The PC III EX works with any exhaust, provides increased horsepower and torque, is dynamometer tested, has "Rev X-tend" (increases stock rev limiter), individual cylinder mapping, ignition timing adjustment, and decel popping is either reduced or completely eliminated.

NEW! RoadLoK® Anti-Theft Systems

The RoadLoK® anti-theft locking system is specifically engineered for your specific make and model motorcycle. It completely immobilizes the front wheel, unlike disc locks, padlocks, or cables. The RoadLoK® is permanently mounted to the caliper, which eliminates the need for in-transit storage, and the pin removes completely so it cannot accidentally engage while riding. Each RoadLoK® system is 100% American-made. Additionally, vehicles equipped with the RoadLoK® anti-theft system are eligible for an insurance discount* from most major insurance providers (the amount varies by insurer and state).

1. Flash2Pass™ Garage Door Remote System

The Flash2Pass™ is the ultimate garage door opener for your motorcycle, ATV, scooter, Rhino, snowmobile, car, or any other vehicle with High/Low beam headlights. A simple double flash of your headlight high beams opens or closes your garage door. No remote transmitter to get stolen or lost. Digital encrypted signal and rolling code technology for ultimate security. Up to six transmitters may operate a single receiver, and additional transmitters can be purchased separately (ABA-0SS58-40-15). Additional receivers (ABA-0SS58-40-16) may be installed elsewhere and programmed to your Flash2Pass™-equipped vehicle. Works with virtually any garage door opener manufactured since 1982. This complete set consists of the patented transmitter, corresponding receiver, and all installation hardware. Easy do-it-yourself installation instructions.

1. NEW! HelmetSecure™ Helmet Locks

The HelmetSecure™ lock attaches permanently to a round handlebar, or other bar (cruisers and standards) or triple clamp stem nut (sportbikes), so you only need to fit it once. After that, the lock is always available for use, without having to carry or store it. The lock incorporates an integral, pre-coiled, steel cable to go through the face of the helmet or D-ring and back into the lock. If you have the key, you can un-bolt the lock from the handlebar. The design makes the bolts that secure the lock to the handlebar/triple clamp inaccessible when the cable is locked, so the locking mechanism not only locks the cable, but also prevents the lock itself from being removed from the bike. Locking your helmet to the center of your handlebar or triple clamp means that the helmet rests high on the bike, away from dirty/hot exhausts, and usually upright so that rain will not fall into it. Two models available; the Classic (for cruiser, standard, and touring bikes) and the Sportbike Lock (for sportbikes).

a. Sportbike Lock

The Sportbike lock comes with a replacement stem nut – simply replace the stock stem nut and, using the included Allen/hex key, bolt the lock around the stem nut. You will also need a wrench to fit the 36mm stem nut.

Matte Black

DBY-ACC58-41-22

\$79.99

b. Classic Lock

The Classic HelmetSecure™ lock has two rubber inserts so that it can be fitted, as standard, to the commonly-sized handlebars or other bars (7/8", 1", and 1-1/4" diameter). Allen/hex key included – no other tools are needed.
