Features and Benefits

DKVM-16

**16-Port
19" Rackmountable
KVM Switch**

● **Microprocessor Emulation**

Each DKVM-16 port is controlled by a dedicated microprocessor that intelligently manages port traffic and allows simultaneous boot-ups for all attached PCs. This ensures accurate mouse and keyboard detection for a seamless user experience.

● **Daisy Chain Ports**

The DKVM-16 features a daisy chain port for cascading up to 8-server computers, allowing you to connect and control up to 128 computers, protecting your investment and giving you flexibility in upgrading and adding to your network.

● **Quick Switching and Computer Access**

The DKVM-16 gives you three options to access your computer: keyboard hot keys, front-panel push buttons and on-screen display. Switch quickly among your computers at the touch of a button. The front panel display provides at-a-glance feedback on PC status.
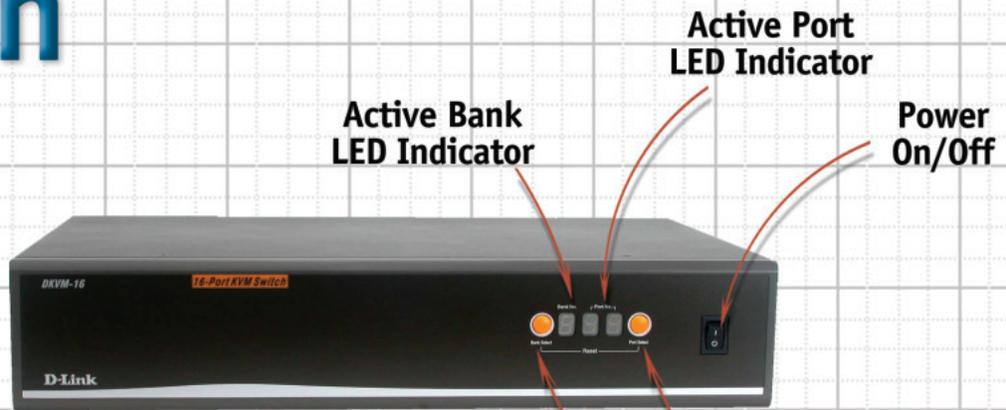

● **Operating System Compatibility**

The DKVM-16 is compatible with virtually any operating system including DOS, Win3.X, Win95/98/98SE/2000/ME, WinNT, Netware, Unix, Linux, making it easy to integrate into your existing network infrastructure.
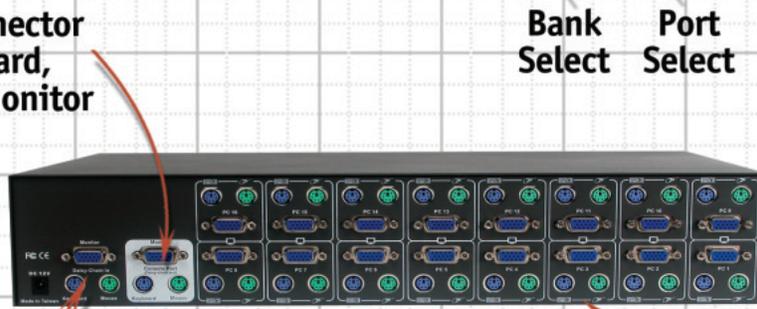

● **On-Screen Display Menu**

The on-screen display menu is intuitive and easy to use, allowing you to name each PC, switch between your PCs, enable auto-scan, and set up password protection for accessing your PCs.
