

COUNTRYSIDE MULTIFUEL CORN AND WOOD PELLET STOVE

WHY BUY A MULTIFUEL STOVE?

You're tired of hauling in pile after pile of wood and then carrying out the piles of ash. The fuel man has just delivered another load of fuel that equals your house payment. You're just plain tired of having to put up with turning the thermostat down to conserve heat, put on another sweater and it still is just too cold !!!! Last but not least you would like to feel the warmth that you had with wood and yes you miss the romance of watching a fire burn.

These are just a few of the reasons that the **Countryside Multifuel Stove** is right for you. Modern technology has joined up with good old fashioned warm radiant heat to give you an affordable alternative to high heat costs.

The **Countryside Multifuel Stove** has the capabilities of burning a wide variety of fuels including, shelled corn - wood pellets - cherry pits - olive pits and a host of other fuels that normally would fill up our landfills as waste. The cost savings for burning these types of fuels is substantial over conventional means of heating depending on the area that you live in and the type of fuel available.

Shelled Corn is the lowest cost alternative allowing you to save over 50% on your heating bills while burning the Farmers own friend. This helps the local economy and is renewable in a few short months.

The **Countryside Multifuel Stove** is designed to be installed with a direct vent system so that you will save thousands of dollars on not having to put up a new chimney. The negative draft combustion allows you to open the door without getting smoke into the home.

Sounds good doesn't it? Why not check it out. We have dealers across the nation ready to help you decide where to install your new **Countryside Multifuel Stove**. Call our **TOLL FREE** customer service number at **1-800-495-3196** to find out how you can be enjoying the warmth and beauty of a **Environmentally friendly Stove or Fireplace Insert**.
