TROUBLESHOOTING GUIDE

Sometimes a performance problem can be easily solved by checking seemingly apparent but often overlooked possibilities. Before arranging for service, check these items. It could save your time and money.

QUICK SERVICE CHECK LIST

Problem	Possible Remedy
Remote Control Doesn't Work	1 ...Try a new channel, if OK, then possible station trouble.
Bars on Screen	2 ...Is TV plugged in? Power at outlet?
Picture Distorted	3 ...Is TV's power on?
Picture Rolls Vertically	4 ...Is antenna or cable connected to terminal on the back of the set?
No Color	5 ...If outside antenna is being used, check for broken wire or loose connection.
Poor Reception on Some Channels	6 ...Check for local interference.
Weak Picture	7 ...Turn off the TV and then turn it on after about a minute.
Lines or Streaks in Picture	8 ...Adjust COLOR control.
Ghosts in Picture	9 ...Adjust CONTRAST & BRIGHT control.
Picture Blurred	10...Check batteries in remote control.

Picture OK, Sound Poor	12...Check if there is an obstacle between the sensor and the remote control.

Different Color Marks on Screen	

*Additional Remote Test

Tune an AM radio to a station with no broadcasting. Press a button on the remote control toward the radio. Sound will be fluttering when you press any key and the radio receives the signal. This means the remote control unit is working.

Closed Caption Problem	Possible Remedy
Misspelled captions are shown.	Spelling errors may pass through uncorrected by the closed captioning production company in a live broadcast.
Text is not shown in its entirety or there is a delay of what is being said.	Captions that are delayed a few seconds behind the actual dialogue are common for live broadcasts. Most captioning production companies can display a dialogue to a maximum of 220 words per minute. If a dialogue exceeds that rate, selective editing is used to insure that the captions remain up-to-date with the current TV screen dialogue.
Captions are scrambled with white boxes on the TV screen.	Interference caused by building, power lines, thunderstorms, etc. may cause scrambled or incomplete captions to appear.
No captions are displayed in a program which must contain closed caption.	Broadcasters may use a time compression process to the actual program so that additional advertising time can be given. In this case, captions will be lost since the decoder cannot read the compressed information.
No captions are displayed when playing a prerecorded videotape with closed caption.	The videotape may be either an illegal copy or the tape duplicating company may accidentally have left out the captioning signals during the copying process.
The TV screen shows a black box.	You are in TEXT mode. Select [CAPTION1], [CAPTION2] or [OFF].

The LCD panel is manufactured to provide many years of useful life. Occasionally a few non active pixels may appear as a fixed point of blue, green or red. This is not to be considered a defect in the LCD screen.
