PULSETRACK II START-UP REQUIREMENTS

Inspector's
 Initials

For Ransburg Technical Service Call: (800) 233-3366

Before Start-Up (Site Inspection)

- PulseTrack installed in a convenient area, located in a suitable environment (see manual for more details) .
- Make sure the customer's main disconnect that supplies power to the PulseTrack is off.
- Verify the incoming voltage at the disconnect.
- Remove fuses in the PulseTrack.
- Check incoming voltage wiring inside the control panel for correct termination point.
- Check all I/O terminations for proper connections.
- Grounding checked to a known earth ground (flat braid and conventional).
- Verify and document all dip switch settings for all cards.
- Check all pneumatic tubing connections for tightness.
- Required air available. 100 psi max. filtered to 40 Microns.
- All cards seated properly.
- Atomization to bearing air interlocks in place (if applicable).
