1 Operation

Warning:

Make certain cook tank is filled with water before turning this appliance ON.

1.1 To Turn Control ON:

Press the button. Display will show **b01 L**, **Sin n**, or **— — F**. Display may include alternating messages of **L0uu**, or **dr oP** depending on water temperature.

1.2 To Turn Control OFF:

Press and hold the button. Display will show **OFF**.

1.3 To Activate timers 1-4:

Press , , or .

1.4 To Activate timers 5-8:

Press key. Display will show **56 78**. Press , , or .

Note: Multiple timers may run together, but only one timer for a key. The shortest time running will show in the display in minutes and seconds format [mm:ss], with a flashing cook indicator above the key.

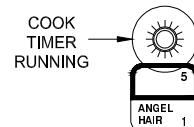

When cook time is done a beeper will sound. To silence the beeper, press the timer key with the flashing indicator and remove cooked product from the appliance.

1.5 To Cancel a Cook:

Press and hold the timer key until the cook indicator or light above the key is off.

1.6 To Enter Boil:

Press until **b01 L** is displayed.

1.7 To Enter Simmer:

Press  until **Si nn**. Is displayed. Note: displays may also include alternating messages of **Louu**, or **drop** depending on water temperature.

2 Programming:

To enter the programming menu, press and hold  key for 3 seconds.

The display will show **Pr --** for program entry, or **Loc** for locked entry.

If control is displaying [Pr--] skip the next step.

To Unlock:

With display showing **Loc**, press the  key once followed by  key. Display will show **Pr --**. Control is now unlocked ready for programming.

2.1 To Change Simmer Temperature:

With display showing **Pr --**. Press the  key, display will show **LENP**. Press the  to display the current simmer temperature setting as **183F**, or **84C**. To change this setting, use the  key or  key to adjust temperature, then press the  key to save value. Display will show **LENP**. Continue to the next step.

2.2 To Change Timers 1-4:

- 2.2.1 With display showing **LENP**, press the  key once. Display will show **1234**.
- 2.2.2 Press the timer key needing adjustment. The indicator above that key will illuminate, and the display will show the current timer setting, for example **10.15**. Use the  key or  key to adjust time. Press the  key to save value. Display returns to **1234** above. Repeat for other timer keys in this group. When all keys in this group are set, press the  key to continue.

2.3 To Change Timers 5-8:

- 2.3.1 The display will then show **5678**. Press the timer key needing adjustment. The indicator above that key will illuminate, and the display will show the current timer setting, for example **10.15**. Use the  key or  key to adjust time. Press the  key to save value. Display returns to

56 78 above. Repeat for other timer keys in this group. When all keys in this group are set, press **P SHIFT**. Display returns to **Pr --**.

2.4 To Exit Programming:

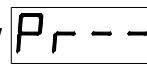

Press and hold **P SHIFT**. Display will return to **b01 L** or, **51 nn** or, **--- F**.

3 Level 2 Programming: (for technicians and factory use)

To enter Programming Menu: Press and hold  key for 3 seconds. The display will show  for program entry, or  for locked entry.

If control is displaying [Pr--] skip the next step.

3.1 To Unlock:

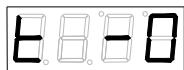

With display showing , press the  key once followed by  key. Display will show . Control is now unlocked ready for programming.

3.2 Password Entry to Level 2 programming:

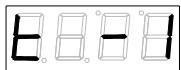

A password is always required to enter Level 2 programming. With display showing , press  +  +  +  . Display will show . Control is now ready for Level 2 programming. Press  to continue.

3.3 Display Types:

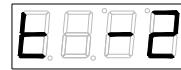

One of three possible display modes may be selected. *The factory setting for this part is [t-2].* Display shows:

With this selection, [boil] or [Sim] is displayed. *Display may also read [--F] when water temperature is below 70°F (21°C). This is typical for cold start-ups.*

With this selection, display will alternate between temperature display and mode; [boil] or [Simm].

While in **SIMMER** [Simm], display will show an alternating display depending on water temperature.

- When temperature is lower than 10°F below set point. Display will alternate between [Louu] and [Simm].
- When temperature is greater than 10°F below set point, display will alternate between [drop] and [Simm].

While in **BOIL** [boil], display will show an alternating display depending on water temperature.

- When temperature is lower than 205°F, display will alternate between [Louu] and [boil].
- When temperature is greater than 205°F, display will show [boil] continuously.

To change this setting, use and keys to adjust display type. Press key to save value and continue.

3.4 Password Set Option:

When locked, control will need a password key sequence to make future changes. Display shows:

or . To change this setting, use and keys to adjust the lock type. Press the key to save value and continue.

3.5 Display in degrees °F or °C:

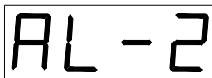

Display shows or . To change this setting, use and keys to adjust temperature scale. Press to save value and continue.

3.6 Number of Basket Lifts:

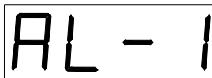

This setting is for the number of basket lift outputs in use. Display will show current setting of , or , or . Factory setting is for one basket lift output enabled. If basket lifts are not supplied, any setting is acceptable. To scroll through possible settings use and keys. Then press to save value and continue.

BASKET LIFT OUTPUT		
Setting	Left	Right
LIF0	none	none
LIF1	Any Cook key	none
LIF2	1/5 & 2/6 key	3/7 & 4/8 key

3.7 Cook Done Alarm Options:

With this factory default selection, control will signal the end of cook with a blinking timer light, and, and audible alarm. When the cook key is pressed, the alarm ends. Operators then remove food from the vat.

If the optional basket lifts are installed on this appliance, the cook done alarm may be change to this setting. When the cook is done, an audible alarm with sound for 5 seconds, and then auto cancel. The basket lift removes the food from the vat.

If the optional basket lifts are installed on this appliance, the cook done alarm may be change to this setting. When the cook is done, NO audible alarm sounds. 5 seconds later the cook key will auto cancel. The basket lift removes the food from the vat.

3.8 To Exit Programming:

Display shows **EELH**. Press and hold  key.

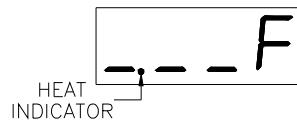

Display will return one of the normal operating displays, **Si nn**, or **boi L**. Display may also include alternating messages of **Louu**, or **drop** depending on water temperature.

4 Other Displays

4.1 Low Vat Temperature

When tank temperature is below 70°F (21°C), the display will show as blanks. This is normal for cold start-ups. **Heat Demand** indicator is located between the first and second digits of display.

4.2 Drain Valve Open

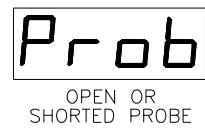

When drain valve is detected open, normal operations are suspended. The display will show Drain-Turn-Off message until reset. To reset, CLOSE the drain valve, turn the control OFF. Allow appliance to cool. After the tank is refilled with water, control may be turned on. Note: some applications do not use the drain valve input.

4.3 Equipment Fault Displays

4.3.1 Probe Faults

If temperature probe faults are detected, the display will show [Prob] and sound the alarm. All timer functions are disabled, and heat control shut off. To reset, turn control Off then On.

4.3.2 High Temperature Alarm

This display shows when the control detects a temeprature above the alarm limit of 230°F (110°C). A continuous alarm will sound. To reset, turn control Off. Allow appliance to cool. **Make certain cook tank is filled with water**, then turn on.

4.4 To Change Port Address

With display showing **P r --** (from section "To Enter Level 2 Programming"), press

ANGEL HAIR 1 and **P SHIFT** simultaneously for 2 seconds. Display show the current address setting.

Use **ANGEL HAIR 1** and **PENNE 4** to change address. Press **P SHIFT** to save selection and return to

P r -- display. This address setting has no effect on operations of the controller, and, is only meaningful when control is networked for data collection with other controls. In this case, controls must have different port addresses. Press and hold the **P SHIFT** to exit.

4.5 To View Software Revision

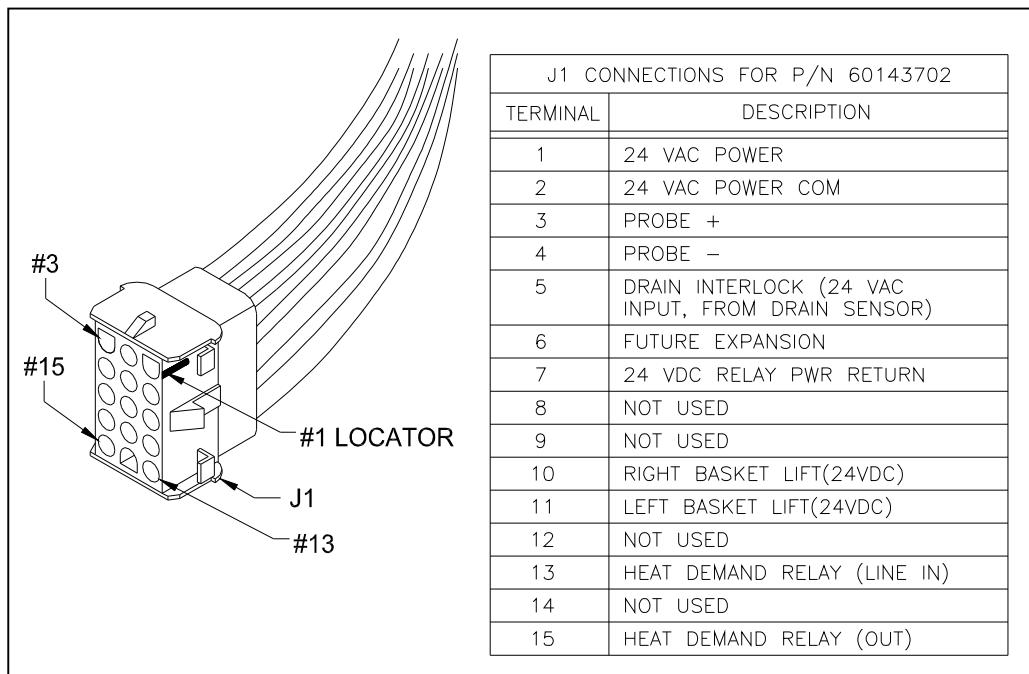

While display is showing one of the normal operator displays ([bOIL], [Sim], or $__^{\circ}\text{F}$]), press

and hold **ON/OFF** and the **FETTU 3** simultaneously for 2 seconds. Display will show a rotating display, 4 digits each, for 2 seconds each.

"FLSt" --- "1034" --- "1" --- "ECL" --- "C*"
"SoFt" --- "2034" --- "1" --- "ECL" --- "C*"
"dnLd" --- "3034" --- "1" --- "ECL" --- "C*"

Note: Displayed values will vary from those shown in this example, and are dependant on manufacturing date, and revision of the control.
