Limited Warranty Statement

All new packaging equipment manufactured and supplied by Douglas Machine Inc. is warranted to be free from defects in materials and workmanship for the period of time specified in this statement. The warranty period commences from the date the equipment is shipped from our facility.

- Base Frame: Lifetime
- Douglas Standard Components: 3 years
- Buyer Specified Components: 1 year

The following limitations and restrictions apply to this warranty:

1. The base frame limited lifetime warranty applies to structural and welding failures such as breaking, cracking or bending.
2. Douglas Standard Components include all non-wear parts that are fabricated or purchased by Douglas Machine and incorporated into the supplied equipment.
3. Buyer Specified Components include all non-wear parts that differ from Douglas' Standard Components and are incorporated into the supplied equipment per Buyer's specification requirements.
4. Most wear components shall not be warranted. However, select wear components are warranted for 1-2 years depending upon the original manufacturer's warranty. A warranty claim against a wear part may be made if it is determined the part failed due to a factory defect. If it is determined the part failed due to a factory defect, the claim will follow the normal returns process. Consult with Douglas Machine for complete listings of non-warranted and warranted wear components.
5. Wear and tear on the equipment that is considered standard in the industry shall not be warranted.
6. Equipment that is purchased by Douglas Machine and incorporated into the supplied equipment shall be subject to the original manufacturer's standard warranty. Such equipment includes, but is not limited to, conveyors, accumulators, inspection systems and coders.
7. Unless specified otherwise, frame and component finishes shall not be warranted if the equipment is installed in a wet environment, or exposed to harsh cleaners or high-pressure wash downs.
8. Equipment that has been misused, poorly maintained, neglected, or improperly moved, repaired or altered by anyone other than Douglas Machine or its authorized agents shall not be warranted.
9. Douglas Machine shall not be responsible for any removal, handling, or shipping charges (including applicable duties, taxes and inspection fees) that the Buyer incurs to return a component for warranty evaluation.

10. Douglas Machine shall be responsible for the repair or replacement of components that are, in its sole determination, defective and covered by warranty. This responsibility includes handling and non-expedited shipping charges to return a component to the Buyer, but excludes all applicable duties, taxes and inspection fees. Douglas Machine shall not be responsible for any labor costs to reinstall components or for line downtime during repair.
11. This warranty is for the sole benefit of the original Buyer and is not transferable.
12. This warranty is in lieu of all other warranties, expressed or implied, or merchantability, or fitness for a particular purpose, performance or otherwise.

Working with Douglas Documentation

Machine Documentation

Every machine comes with the following documentation:

Operator Manual: This manual contains the following information: machine description, operator controls, start-up and shutdown procedures, and safety.

OEM Manual (Original Equipment Manufacturers): This manual contains a collection of all the slips, brochures, etc. that are packed with the various purchased components.

Program Schematic CD: This CD contains the electrical programs, electrical and pneumatic drawings (dwg and pdf formats), and the operator screens (pdf format).

Service Manual: This manual contains the following information: theory of operation, machine specifications, machine adjustments, maintenance, factory settings, troubleshooting, spare parts, bill of materials.

Documentation CD: This CD contains the operator and service manuals (pdf format), factory settings, machine adjustment number settings, recommended spare parts, and bill of materials (excel format).

Assembly Drawings: The assembly drawings are furnished either on paper or on a CD (pdf format).

Identifying Machine Parts

The machine components appear in the following pages. These pages contain information regarding specific parts of the machine.

- **Purchased Parts** consist of parts purchased from outside vendors. Each purchased part is listed in the bill of materials with its class code number, computer number, description, vendor code, and quantity used.
- **Stock Purchased Parts** consist of commercial parts stocked in our in-house inventory. These parts are kept in stock and are used in the construction of Douglas equipment. These parts are listed in the bill of materials with no prefix and under the class code number that identifies the part category. Below is a part number example for a purchased part that is stocked.

- **Non-Stock Purchased Parts** consist of commercial parts used in the construction of Douglas equipment. We do not stock these parts in our in-house inventory. These parts are listed in the bill of materials with an “N” prefix and are assigned a class code number. Below is a part number example for a purchased part that is not stocked.

- **Electrical and Pneumatic Parts** are purchased parts and are listed under the appropriate class code numbers on the bill of materials and are designated stock or non-stock as described above.
- **Stock Manufactured Parts** are Douglas parts which are stocked in our in-house inventory. These parts are kept in stock and are used in the construction of Douglas equipment. These parts are listed in the bill of materials with no prefix and under class code 91 or 92. Below is a part number for a manufactured part that is stocked.

- **Non-Stock Manufactured Parts** are Douglas parts which are used in the construction of Douglas equipment but are not stocked in our in-house inventory. These parts are shown on the assembly prints with an “F” prefix and are not assigned a class code. Below is a part number example for a manufactured part that is not stocked.

- **Modified Stock Parts** are stock parts (manufactured or purchased) modified according to the print number listed with each part. These parts are shown on the assembly prints with an “F” prefix and are not assigned a class code.

For further information, please contact your Douglas Service Representative.

Ordering Replacement Parts

When ordering parts for your Douglas equipment, please follow these guidelines:

1. When your instruction manuals were shipped, a print package was included with them. It will be necessary to use the main machine assembly drawing(s) to identify part numbers for the various parts of the machine.
2. Mail or telephone your purchase order number. List all parts by item number (computer number) or print number, and include a name or description of the part.
3. On the assembly blueprint, all parts are called out by an item number. If any part cannot be found on the assembly print, please describe the part as fully as possible, indicating location on the machine, length, width, bore, diameter, voltage, etc.
4. Always give the machine serial number (Douglas number only). This number is found at the upper left of each page of the bill of materials (under order no.). This number is also on the serial number plate attached to your machine (M-100000, for example).
5. **Remember**, we are unable to make shipments without your purchase order number. Please include on your purchase order the name of a contact person; this will allow us to provide you with better service in handling your order.
6. Please note, when ordering non-stock manufactured parts, allow two weeks plus shipping time for delivery. Also note that non-stock purchased parts ("N" prefix) require extra lead time.
7. We will make every effort to expedite shipment of your parts order in an emergency — please inform our **Replacement Parts** personnel if your order is to be handled as an emergency.
8. Please contact our **Replacement Parts** representative for current price quotations and parts availability.

Douglas Machine Information

Telephone:	Technical Support: 320.763.5507 Main Line: 320.763.6587
Fax:	320.763.9666
Address:	Douglas Machine Inc. 3404 Iowa St. Alexandria, MN 56308
Website:	www.douglas-machine.com
E-mail:	service@douglas-machine.com

We appreciate the opportunity to serve you.

Refer to the following documents when ordering parts:

1. **Assembly Prints** to determine whether parts are stock (no prefix) or non-stock ("F" or "N" prefix). Note: Some components may have a "P" prefix number; these are phantom numbers and it will be necessary to refer to the subassembly print to identify the individual part numbers.
2. **Bill of Materials** for description of manufactured stock or non-stock parts (class code 91 or 92) or purchased stock and non-stock parts (class code other than 91 or 92). The description will be found by referring to the item number called out on the assembly print.

Class Code Numbers

The class code number categories listed below are those that are included on the standard list of recommended spare parts for Douglas packaging equipment. The recommended spare parts list that follows is based on the bill of materials for your machine. You may wish to add to or delete from this list, based on your experience with the operating conditions in your own facility.

Recommended Spare Parts Class Code Numbers and Descriptions

Class Code #	Description	Class Code #	Description
10	Gearboxes	65	Relays (All)
15	Bearings, Cam Followers, Bushings, Thrust Washers (Cam Followers, Cam Yoke Rollers, only)	67	Micro Switch (Limit Switches)
16	Belts, Gear Belts (all gear belts, V-belts, etc.)	68	Spectrol (Potentiometers only)
17	Helicoils	69	Solenoid (All)
21	Clutch/Brakes (FormSprag Clutch only)	71	Timer (All)
30	Glue Systems	77	Square - D (Switches, Pushbuttons, Lenses, etc.)
35	Rod Ends (All)	79	General Electric (Resistors, etc.)
40	Tubing (Plastic Vacuum Tubing, including VacuFlex)	81	Regulator - Wilkerson Combination (All Regulators)
42	Vacuum Cups, Vacuum Pumps (all cups; filters)	82	Mufflers (All)
43	Springs (All)	83	Valves (All)
51	Allen Bradley - (Relays, Switches, Pushbuttons, Lenses, Servo Motors)	85	Gauges (All)
58	Fuse (All)	86	Filters (All)
59	Electric Eye (All)	87	Lubricators (All)
60	Heater (All)	98	Electric Misc. (Resistors, Fuses; also Switches, Pushbuttons, Lenses, etc. other than A-B or Sq. D)
64	Electric Motors	99	Miscellaneous

The last two digits of the item numbers on the bill of materials consist of the class code numbers. The following key will help locate parts on the inventories:

Bill of Materials Class Code Numbers and Descriptions

Number	Description	Number	Description
