

The next generation of Motorola professional two-way radio communications solutions!

ETSI TS 102 361 DMR Standard-compliant digital technology provides new, unique benefits to increase workforce productivity and safety.

MOTOTRBO is ideal for professional organizations that need a customizable, business-critical communication solution using licensed spectrum.

The MOTOTRBO Professional Digital Two-Way Radio System, consisting of Portable and Mobile radios and Accessories, Repeaters and value-add Applications, delivers the following benefits:

- ✓ Digital Time Division Multiple Access (TDMA) technology doubles the system call capacity - two virtual channels are supported in one RF channel. This provides customers with double capacity with same infrastructure or license costs
- ✓ Provides clearer voice communications over a wider range compared to legacy analogue systems
- ✓ Longer battery life helps ensure more reliable and cost-effective communications for mobile workforces
- ✓ Integrated data capability, including built-in data modem in every radio, text messaging and IP packet data support, enables a wide portfolio value-added data solutions through the highly successful **Motorola Application Partner** Program
- ✓ **MOTOTRBO** radios can operate in digital or analogue mode to ensure compatibility with legacy radio systems. This provides our customers with a smooth and cost-effective migration path.
- ✓ A wide portfolio of intelligent accessories enhances the value of the radio - adding new capabilities and making the radio more convenient to use in different working conditions

Motorola uses best endeavours and commercially reasonable efforts to keep these price pages updated. Nevertheless, as the prices and articles are inserted manually and provided only for indication purposes, please do always refer to the "MOL Buying Center" in order to see the correct and most up-to-date price and availability information!

In case of any price discrepancies the prices shown in the "MOL Buying Center" will prevail.

DP 3400 Non-Display Portable Radio
