# Boiler Steam Iron GC8330

## **Philips Consumer Lifestyle**

# ServiceManual

# **PRODUCT INFORMATION**

# Features

# Iron

- SteamGlide Soleplate
- Continuous steam in horizontal & vertical position
- Adjustable steam rate up to 120 g/min
- Shot Of Steam up to 180 g/min
- Steam activator lock
- Automatic drip stop
- Soft touch hand grip
- Steam tip for hard-to-reach places
- Steam hose length : 1.7 m

#### Stand

- Anti-corrosion Inox boiler
- Boiler sensing : Electronic
- Boiler pressure : 5.0 bar
- Fast heat-up : steam ready in 2 mins.
- Cord length : 2.5 m
- Hose cord storage
- Easy to rinse
- Iron lock for safe storage
- Detachable tank : 1.4 L

## Safety Information

- This product meets the requirements regarding interference suppression on radio and TV.
- After the product has been repaired, it should function properly and has to meet the safety requirements as officially laid down as this moment.

# **TECHNICAL INFORMATION**

Voltage		:	220 - 240 V
Frequency		:	50 - 60 Hz
Power	Iron	:	800 W
	Boiler	:	1370 W
Dimension (F-box)		:	350 x 350 x 250 mm (L x W x H)
Weight (with packing)		:	6.4 kg

## Water advice

If the tap water in your area is very hard, it is advisable to mix the tap water with an equal amount of demineralised water.

## SteamGlide Soleplate

Scratch resistant, non-stick, easy to clean & very durable.

#### Fast ironing

Steam ready in 2 minutes & up to 5 bar of steam pressure penetrating deeper into the fabrics.

## Iron lock

Safely store the iron on the stand.

#### Easy to rinse

The new design of the rinse cap makes it very easy to rinse the boiler regularly. Simply unscrew the cap and pour out the "dirty" water into the sink. No hassle with coins, extra tubes or anything of this sort.

### Large detachable water tank

1.4 Liter water tank allows up to 3 hours freedom of ironing without refilling.

## **REPAIR INSTRUCTIONS**

- Due to the high wattage of the iron, only the specified cord set must be used.
- Should damage be observed on the HOSE-CORD ASSY 19 or CORDSET 40, they must be replaced. Continued usage is not allowed.
- When replacing the MICROSWITCH ASSY 11, please dress the 2 attached wires such that they are free of tension. Pulling force on the wires may affect the steam triggering.
- To avoid damage to the sealing & components of the BOILER ASSY 20, NEVER clean the boiler assy with vinegar, descaling agent or other corrosive chemicals.
- When replacing ELECTROVALVE 21 or PUMP ASSY 27, please be reminded to apply loctite at the joints for good sealing.
- After the product has been repaired, it should function properly and has to meet the safety requirements & legal regulations as laid down & officially established at this moment.
- The following tests are common checks that are conducted on a repaired product before it is returned to the consumer.

#### 1. Soleplate temperature

Check that soleplate temperature is within IEC requirement.

Measure the temperature of the soleplate after the iron has reached steady state i.e connected to the mains for at least 15 minutes. The table below shows the temperature requirement.

Maulaina	Soleplate temperature (Deg C)		rature (Deg C)	Material, for example	
Marking	Minimum	Maximum	Nominal + Tolerance	Material, for example	"MANNA"
• (1 dot)	70	120	95 ± 25	Acetate, elastane, polyamide, polyproylene	x z Test- point
•• (2 dots)	100	160	130 ± 30	Cupro, polyester, silk, triacetate, viscose, wool	······································
••• (3 dots)	140	210	175 ± 35	Cotton, linen	

#### 2. Leakage current

Check that leakage current is within IEC requirement.

Measure leakage current between LIVE/NEUTRAL & EARTH. IEC requirement is that at 230 V supply, the EARTH leakage current must be less than 0.75 mA.

## 3. Water leakage / Functionality

Check that there is no water leakage from any part of the product during operation.

Check that the functionality of the product (product dependent) eg. steaming, variable steam, SOS, ASO etc is working properly.

#### 4. Loose part

Check that there are no loose parts eg. extra screw in the product that can cause short-circuit or product malfunction.
