

Allen Spine

Spine Surgery Patient Positioning Tailored To Your Needs

Service You Can Count On

A Company You Can Trust... *See page 8*

Let us take care of your Allen® Advance Table with our nationwide network of service centers. As a company, we understand that our role is to provide services and equipment that are flexible enough to meet the needs of your patients, while assisting you in controlling and reducing cost.

Premium Spine Solutions

Allen® Advance Table *See page 13*

Allen's premium solution for complex spine surgical procedures. Designed with a new safety feature to ensure that if the pin that connects the "H-Bracket" to the table base is accidentally pulled out, the patient support top will not fall to the floor. In addition, this solution offers a modern and intuitive user interface with convenience features such as central locking casters – all at a desirable cost.

Adaptive Spine Solutions

Allen Spine System *See page 19*

An innovative OR table extension that turns your OR table into a table capable of positioning patients for complex spine surgical procedures at a fraction of the price of a stand-alone spine table. It also offers the added advantage of saving space, storing in less than 6 sq ft (.5 sq m).

Table Attachments

See pages 25 - 31

Allen offers innovative table attachments for spine surgery that are compatible with standard OR tables, Allen Advance Table, Allen Flex Frame, or Mizuho OSI Modular Table System*.

*Compatible with rails that are 1.25" (3.2 cm) wide x 1.5" (3.8 cm) tall with a 14.5" (36.8 cm) space between.

You Can Count On...

A Company You Can Trust

Let Us Take Care Of Your Allen® Advance Table With Our Nationwide Network Of Service Centers

As a company, we understand that our role is to provide services and equipment that are flexible enough to meet the needs of your patients, while assisting you in controlling and reducing cost.

- ✓ On-site Repairs
- ✓ Over 150 Service Centers Nationwide
- ✓ Over 1500 field service employees
- ✓ Technical Support Line dedicated to Allen Advance Table
- ✓ Detailed service manual sent with every table
- ✓ Immediate response
- ✓ 1,000,000+ product deliveries and removals performed annually

On-site service/repair is only available for the Allen® Advance Table.
Advance Table service is available in US only.

Care Continuum Services

Delivery Assist

Once your Advance Table arrives at your facility a trained and certified technician will set up your table to be ready for use at no cost to you.

Immediate Response

With over 150 repair centers nationwide, a service technician is never too far away.

On-site Repairs

All of our Advance Table repairs are conducted at your facility by one of our trained and certified repair technicians.

On-site service/repair is only available for the Allen® Advance Table.
Advance Table service is available in US only.

“Upon realizing that we had a problem moving our Allen Advance Table we contacted our local Allen Sales Rep. He noticed that the table wouldn't roll due to a broken or stuck caster. He was unable to move the table as well so he immediately called Allen Medical. Allen in turn contacted Hill-Rom Service to set up a service call. A Hill-Rom Service Tech was on-site in a day and repaired what happened to be a broken caster. We were very pleased with the service provided by our Sales Rep, Allen Medical and Hill-Rom Service.”

- Dave Knoblock | BioMed Tech
Scripps Memorial Hospital, Encinitas, CA

180° Rotation Capabilities

Modern Intuitive User Interface

EZ-Roll, Centrally Locking Casters

Safety
Designed In...

Allen® Advance Table CE

A Premium Solution For Complex Spine Surgical Procedures Designed With Improved Safety Features

The Allen Advance Table is designed with a new safety feature to ensure that if the pin that connects the “H-Bracket” to the table base is accidentally pulled out, the patient support top will not fall to the floor. In addition, this solution offers a modern and intuitive user interface with convenience features such as central locking casters — all at a desirable cost.

- Modern user interface helps the user understand the “state” that the table is currently in e.g. locked, unlocked, tilted, trend or reverse trend
- Central locking casters controlled directly from the pendant
- EZ-Roll casters help the caregiver when transporting the table around the OR
- Numbered H-Brackets help with communication between caregivers when attaching the different tops to the base
- 180° rotation capabilities
- Patient weight capacity: 600 lbs (272 kg)

- Innovative “H-Bracket” design ensures that if the pin connecting the H-Bracket to the table base is accidentally pulled, the patient support top will not fall to the floor

Advance Table Package #A-71001

The Advance Table Standard Package includes everything you need for standard prone and supine spine surgical positioning. The package also includes a convenient rolling accessory cart so you can store your tops, rails, supports, etc. all in one place. If you wish to upgrade your table for special positioning needs, we offer a Premium and a Complete package with additional accessories included. *See page 17*

Advance Prone Support Set #A-71300

Included With All Advance Table Packages

The Advance Table Prone Support Set is a comprehensive patient support system for the prone position. Although it was developed with the Allen Advance Table, this prone support system is also compatible with the Allen Flex Frame and the Mizuho OSI Modular Table System*. The hip pads have been developed in several sizes to help accommodate different patient shapes and sizes. In addition, the chest, hip and thigh support pads are constructed using a patented multi-layer foam construction similar to that of the popular Allen Wingsets, which is designed to aid in reducing sheer pressures on the skin.

Advance Premium Package Upgrade

#A-71002

#A-70700
C-Flex Head Positioning System
1 Included

Upgrade your Advance Table to the Premium Package with the addition of the C-Flex® Head Positioning System.

The C-Flex Head Positioning System can be used in all types of spine surgery including posterior cervical surgery that utilizes skull clamps with pins. The quick-connect coupler makes connecting to a skull clamp easy. Ability to “squeeze and position” supports readjustments intraoperatively. An extensive range of motion makes the C-Flex system ideal for use with extremely kyphotic patients, anterior artificial discs and lateral procedures.

See page 29 for more information on the C-Flex Head Positioning System

Advance Complete Package Upgrade

#A-71003

#A-70700
C-Flex Head Positioning System
1 Included

Upgrade your Advance Table to the Complete Package with the addition of both the C-Flex Head Positioning System and the Allen® Bow® Frame.

The C-Flex Head Positioning System can be used in all types of spine surgery including posterior cervical surgery that utilizes skull clamps with pins. The quick-connect coupler makes connecting to a skull clamp easy. Ability to “squeeze and position” supports readjustments intraoperatively. An extensive range of motion makes the C-Flex system ideal for use with extremely kyphotic patients, anterior artificial discs and lateral procedures.

See page 29 for more information on the C-Flex Head Positioning System

#A-70800
Allen Bow Frame
1 Included

The Bow Frame's shape creates the desired reverse lordosis needed to open the intervertebral spaces. The Bow Frame enables the patient's abdomen to hang free during procedures. It is also radiolucent and allows for unrestricted C-arm access. The removable crank is used to adjust the amount of flex and tension in the patient supports.

See page 25 for more information on the Allen Bow Frame

- B Standard Wingset
- C Flex Frame

- D Flex Frame Armboard Rail
- E Flex Frame OR Table Clamp Set
- F Prone Arm Supports

- G Easy Lock® Socket
- H Supine Top Pads
- I Supine Top Set

Allen® Spine System

An Innovative Table Extension That Turns Your Existing Standard OR Table Into A Spine Table For Complex Spine Surgical Procedures

The Allen Spine System is an extension for your OR table that enables you to perform spine surgery with the positioning benefits of a stand alone spine table such as the Allen Advance Table. In addition it offers intraoperative lumbar flex and a small storage footprint. The advanced accessories adjust to fit the individual patient's anatomy.

- Intraoperative Flex: Use the power of the table to flex and reposition the patient
- Radiolucent Extension 48" x 17" (1220 mm x 430 mm): Provides excellent C-Arm and O-Arm access
- Optimized Pressure Management: Chest, hip and head supports
- Versatile: Prone, lateral and supine positioning
- Range of Motion: Provides 20° lateral tilt, trend and flex powered by the OR table
- Height: 25" to 38" (635 mm - 965 mm)
- Fits OR tables with outside rail width 20" - 24" (510 mm - 610 mm)
- Lateral Package available *See page 21*
- Patient Weight Capacity: 500 lbs (227 kg)
- Saves Space: Stores in less than 6 sq ft (.5 sq m) and accessories can be stored on the frame

Spine System Packages

The Allen® Spine System includes everything below. You also have the choice of an appropriate head positioner based on your surgical needs:

- Choose the C-Flex® Head Positioning System Package #A-70002 if you require an advanced head positioner with simple “squeeze and position” technology that can be used to position the head for all types of spine surgery, including posterior cervical surgeries that require skull clamps and pins.
- Choose the C-Prone Head Positioner Package #A-70000 if you require a standard head positioner that helps position the head quickly and simply for lumbar surgery only.

Scoliosis

Pediatric Patients

Prone And Lateral Positioning

Wingset Body Positioners #A-70200

Supports That Adjust To Fit The Patient

The wingsets are prone patient supports that have been optimized for pressure management and adjustability. These supports accommodate varying patient anatomies.

- Allows abdomen to hang free
- Designed to reduce compression of brachial plexus
- Offers sternal decompression
- Adjustable for barrel-chested, pediatric and scoliosis patients
- Used with shear-reducing, moisture-absorbent comfort cover disposables
- Multi-layer pad design for optimal pressure management
- Accommodates pediatric to adult patients
- Pads adjust to widths of 10" - 18" (225 mm - 455 mm)
- Fits the Allen® Advance Table
- Fits the Allen Flex Frame
- Fits the Mizuho OSI Modular Table System*
- Patient weight capacity: 500 lbs (227 kg)

Optional Cut-Out Hip Wingset is ideal for larger patients. The Cut-Out Hip Wingset must be used with the Standard Chest Wingset.

Bow Frame
On Mizuho OSI MTS*

Allen® Bow® Frame #A-70800

Versatile - Compatible with Standard OR Tables, Allen Advance Table, Allen Flex Frame Or Mizuho OSI Modular Table System

The Allen Bow Frame is a platform used to perform less complex spine surgeries. The Bow Frame is more versatile than the existing Wilson™ Frame, as the single device attaches to standard OR tables, Allen Advance Table, Allen Flex Frame and the Mizuho OSI Modular Table System*.

Its shape creates the desired reverse lordosis needed to open the intervertebral spaces. The Bow Frame enables the patient's abdomen to hang free during procedures. It is also radiolucent and allows for unrestricted C-arm access. The removable crank is used to adjust the amount of flex and tension in the patient supports. Every Bow Frame comes with a storage cart. Ideal for use with Laminectomy, Microdisc procedures, Disc procedures, Fusion procedures, Decompressions, and Foraminotomy.

- Fits OR tables
- Radiolucent
- Device weight: 25 lbs (11.3 kg)
- Patient supports are adjustable to fit patients of various sizes
- Patient supports adjust laterally up to 10" (25.4 cm) to relieve pressure on the patient's abdomen
- Patient weight capacity: 500 lbs (227 kg)
- Lightweight for easy set-up
- Compact for easy storage
- Storage cart included for easy transport
- Skin Care Cover disposables are comprised of cosmetic foam

Easy To Set-Up

Works With Standard Wingsets

Proven Pressure Management

Allen® 4-Post System #A-71201, #A-71200

Versatile And Easy To Use: Set Up On Your OR Table Within Minutes

The Allen 4-Post System is a lightweight, versatile platform that attaches to an OR table via short or long attachment straps and allows the surgeon to place patients in a prone or lateral spine position. Lordosis, kyphosis and a neutral position of the lumbar spine is now achievable without the use of a large and expensive specialty platform. The 4-Post System is designed to allow the patient's abdomen to hang freely, which may help reduce vena caval pressure. This also offers the ability to place an x-ray plate under the patient and provides unrestricted C-Arm access.

Ideal for use with Laminectomies, Discectomies, Osteotomies, Fusions, and other prone and lateral procedures.

- Fits operating tables
- Radiolucent
- Weighs under 10 lbs (4.5 kg) without the Wingsets
- Patient weight capacity: 227 kg (500 lbs)
- Skin Care Cover disposable made of cosmetic foam
- Compact for storage
- Lightweight and easy to set-up
- Easy to adjust for different size patients

Just Squeeze And Position

Anterior Access

Kyphotic Patients

Precision Adjustments

C-Flex® Head Positioning System #A-70700

Makes Head Adjustments Easy... Just Squeeze And Position

The modular system can be used to position the head during spine surgery. The quick-connect coupler makes connecting to a skull clamp easy. Ability to “squeeze and position” supports readjustments intraoperatively. An extensive range of motion makes the C-Flex system ideal for use with extremely kyphotic patients, anterior artificial discs and lateral procedures.

- Cervical flexion / extension
- Lumbar positioning
- Adjust vertically for kyphotic patients
- Lateral positioning
- Device weight: 20 lbs (9 kg)
- 6" (15 cm) lateral adjustment range
- 28" (71 cm) height adjustment range
- 9" (23 cm) extension adjustment range
- +/- 15° lateral tilt
- Works with Standard and Radiolucent Skull Clamps and Headrest Systems from DORO™ and Mayfield®*
- Includes fold-away mirror
- Easy airway access
- Fits the Allen® Advance Table
- Fits the Allen Flex Frame
- Fits the Mizuho OSI Modular Table System**

Artifact-Free Zone

Odontoid Screw

Optional Leg

C-Flex® AP-Vantage System #A-70110, #A-70111

Advanced Table Imaging Capabilities For Your OR Table

The unique product design eliminates obstructions, leaving nothing but the patient in the shot. C-Flex AP-Vantage System provides for high quality cervical images on an OR table.

The system can be used for both anterior and posterior cervical surgeries; it includes an OR table adaptor (with carbon fiber rails) and the C-Flex head positioning system. All the benefits of the C-Flex system for the OR table with a variety of different head attachments.

Ideal for use with Odontoid Screws, Cervical Fusion and Artificial Cervical Discs.

- Artifact-Free Imaging
- Squeeze & Position with C-Flex
- Easy Precision Adjustments Intraoperatively
- Added Stability with Optional Leg
- Device Weight: 20 lbs (9 kg)
- Works with Standard and Radiolucent Skull Clamps and Horseshoe Headrest from DORO™ and Mayfield®*
- Fits OR Tables with Outside Rail Width 20" - 25½" (508 mm - 648 mm)
- Fits Most Accessory Rail Types (US, EU, UK, Denyer and Japanese)

Eliminate Broken Armboard Teeth

Easy Armboard With Trigger #O-ABSLT

With the trigger design, simply pull the radiolucent release mechanism for full articulation and release it to lock. A spring lever accessible from both sides securely locks the armboard to the rail. Armboard measures 26" x 5½" (66 x 14 cm). Note: Japanese version is 22" x 5½" (56 x 14 cm). The pad width measures 6" (15¼ cm). Patient Weight Capacity: 400 lbs (181 kg).

Advance Accessory Cart #A-71600

The Allen Advance Table Accessory Cart stores the surgical platforms and the accessories used with the Allen Advance Table. The platforms store safely and securely in custom slots within the cart while additional molded shelving offer ample space to store all the of the tables' additional accessories.

Bow® Frame Cart #A-70815

The Bow Frame Cart stores all of the accessories used with the frame, including the head positioner and arm supports. The Bow Frame stores securely in the deep bin of the cart. The cart's weighted base makes it tip-resistant and reduces potential vibration during transport. Polymer base is dent-resistant. Heavy-duty casters roll smoothly. Two casters lock for safer and easier loading, unloading and storage.
