Important Notice

• Kawasaki cautions you that whenever the power output of a motorcycle is increased, reliability and durability may decrease. Therefore, proper and perhaps more frequent maintenance and repair work becomes especially important. The Kawasaki Service Manual contains information that will enable you to perform essential maintenance and repairs. This manual can be obtained from any authorized Kawasaki dealer or online at Kawasaki-me.com.

• Installation of race parts requires mechanical knowledge, proper tools and, in some cases, will require re-tuning of engine and suspension components. For best results, an experienced tuner should make racing modifications. You may wish to take your vehicle to an authorized Kawasaki dealer to have race parts installed on your motorcycle. There will be a charge for installation.

• Prices, product and specifications are subject to change without notice or liability. Availability is subject to production, stocking and demand. The purchaser accepts all responsibility concerning installation of race parts, including quality, performance, cost or service and/or necessary repairs.
