- MTR3000 Sales & Ordering Guide (MOL Resource Center)

ORDERING REQUIREMENTS:

DUE TO THE COMPLEX NATURE OF CERTAIN ORDERABLE OPTION CONFIGURATIONS WE STRONGLY RECOMMEND REVIEW OF THE PRODUCT PLANNER AND SALES & ORDERING GUIDE

- The MTR3000 ships standard with a 12 foot AC Power Cable (US and Canada) and a basic install/ service manual . The X347AF has been removed
- The MTR3000 main model (T3000) must be ordered for a Standalone Base Radio
- To operate as a base station with the same frequencies the X622AC option must be ordered. If same receive and transmit frequency operation (i.e. simplex) with a singular antenna is desired, then X371 is required as well

Optional Software Features: As new software releases are available there may be software features offered for an additional charge for each Base Radio license. An email address must be provided when ordering so that a software entitlement ID can be emailed to the requestor. The entitlement id allows a user to download the software feature at their convenience when they are connected to the MTR3000. To download the software version that is connected to the station (via USB) user must have an internet connection.

Customer Programming Software (CPS) is required to program the MTR3000. Order RVN5115 Portable, Mobile and Repeater Customer Programming Software (CPS) Package: Package includes CPS, Air Tracer, Tuner, Repeater Diagnostics and Control (RDAC), MOTOTRBO System Planner, and 3 year subscription. Software is compatible with Windows XP (Home and Professional Versions) Windows 2000, Windows 7, and Vista. The RVN5115 software updates are posted on MOL and are available to customers with a current subscription at the following location: MOL > Resource Center> Software > Two-Way > MOTOTRBO > Service. CPS Cabling: MTR3000 stations use a standard type A to type B USB cable for connection to the CPS computer.

CPS Cabling: Model DDN9957. MTR3000 stations require a standard type A to type B USB cable for connection to the CPS computer.

Notes:

- All Base Radios ship un-configured and must be field programmed via the Customer Programming Software
- MTR3000 cannot utilize the MTR2000 RSS software (RVN4148)
- You must purchase the RVN5115 for the MTR3000 Base Radio and the MTR2000 MOTOTRBO Upgraded Base Radio
- RVN5115 programs MTR3000, & XPR Mobiles, Portables & Repeater

Duplexers: Optional. The filter provides the capability to use a single antenna for both transmit and receiver. Only one transmitter and receiver can be combined.

Preselectors are Optional but Mandatory when a Duplexer is Ordered. Preselectors reject the unwanted signals including the transmit signals from the overloading of the receiver .

Frequencies: Exact customer frequencies are required at the time order is placed. Frequency selection option is also mandatory

The MTR3000 station comes equipped to be front mountable.

Note: The U178 cabinet-mount-hardware option provides L-brackets which support the weight of the base radio prior to the insertion of the front mounting screws. This option is designed for use ONLY with Schroff Eurorack cabinets.

Racks and Cabinets are available through Aftermarket Support (1-800-422-4210).

See product catalog sheets for FCC information.

Premium Software Features:

HKLN4429	Analog to Digital Software Upgrade (for use with Analog only and 800/900MHz radios after Digital firmware conversion)	\$116.67
----------	---	----------

Notes: Use this part number to purchase Entitlement ID's (EID) to Register and Activate the Digital features in Analog only and 800/900MHZ radios after Digital firmware conversion. You will receive the EID via an e-mail. Register the Serial Numbers of the units, which will be upgraded, and Activate the features via the RVN5115 MOTOTRBO CPS.

MOTOTRBO Software Licenses are NOT transferable from one device to another.

Once a software feature has been Registered and Activated in a radio, it can NOT be transferred to another radio. If a radio unit is sent for repairs to a Motorola repair service depot, and the unit is readable with CPS, it will be returned back with the same features enabled, as it had originally. If the radio cannot be read with CPS, it will be returned from repairs with only factory default settings, since the depot cannot verify the features, which were originally enabled. In this case, a call to Technical Support 800-927-2744 will be required to request a replacement license.

General Notes:

- 1) XPR 6580 / XPR 6380 Portables are upgradeable to MOTOTRBO digital trunking via a software flash - no additional hardware required.
- 2) SMARTNET/Privacy Plus Operation and Digital Operation not supported simultaneously.
- 3) To Convert a Smartnet radio to Digital firmware, use CPS version 5.5 or latter, and the Device Conversion Packages 3600 Baud Trunking to MOTOTRBO Digital Firmware from MOL. After the Conversion, the radios will DEFAULT TO ANALOG ONLY features.

To Enable the Digital features - purchase the Analog to Digital Upgrade licenses HKLN4429A at quantity equal to the number of radios that will be Converted. It's recommended to purchase the licenses before beginning the conversion, to avoid down time. It usually takes up to 24 hours, between the time when the Software license order is placed and the e-mail with license Entitlement ID, is received.

Premium System Software:

Use the part numbers below to purchase Premium Software feature Entitlement ID's (EID) for the XPR8380 and XPR8400 repeaters. You will receive the EID via an e-mail. Use the MOTOTRBO RVN5115 CPS to register the serial number and activate the specific feature in the firmware of the desired unit. Internet connection is required during the registration, but the activation can be done offline.

Note: MOTOTRBO Premium Software Licenses are NOT transferrable from one device to another. Once a software feature has been registered and activated is a radio, it can NOT be transferred to another radio. If a radio unit is sent for repairs to a Motorola Solutions repair service depot, and the unit is readable with CPS, it will returned back with the same features enabled as it had originally. If the radio cannot be read with CPS< it will be returned from the repair depot with only the factory default settings since the depot cannot verify the features originally enabled. In this case, a call to Technical Support at 800-927-2744 will be required to request a replacement license.

MOTOTRBO PORTABLES AND MOBILES SOFTWARE LICENSES

Use this part number to purchase Entitlement ID's (EID) to Register and Activate the Bluetooth Data Transfer option in the radios. You will receive the EID via an e-mail. Register the Serial Numbers of the units, which will be upgraded, and Activate the features via the RVN5115 MOTOTRBO CPS. Internet connection is required during the registration, but the activation can be done offline.

MOTOTRBO Software Licenses are NOT transferable from one device to another. Once a software feature has been Registered and Activated in a radio, it can NOT be transferred to another radio. If a radio unit is sent for repairs to a Motorola repair service depot, and the unit is readable with CPS, it will be returned back with the same features enabled, as it had originally. If the radio cannot be read with CPS, it will be returned from repairs with only factory default settings, since the depot cannot verify the features, which were originally enabled. In this case, a call to Technical Support 800-927-2744 will be required to request a replacement license.

PLEASE NOTE: EID's purchased after December 23, 2013 require CPS 10.0 to register and activate.
