MIRROR PHONE

Smart Phone Mirroring-Car AV System

The AV media can support 2-Way control between your Smart Phone & Car AV system after the free CarLink APP is downloaded & installed.

How it works?

- Android Smart Phone need support HDMI or MHL Control can use mirroring function and 2-Way control
- iOS Smart Phone can support the mirroring function, but need to purchase another dedicated HDMI cable.

◆ Mirroring

Mirror your Smart Phone screen to the Car AV System smoothly.

◆ 2-Way Control

Once the smart phone screen has been mirrored on the Car AV System, connect the smart phone and Car AV System by CarLink, then you can control the smart phone on the Car AV System.

● How to download CarLink?

1. Search "**CarLink**" on Google Play or scan the QR code, then download and install it.
2. Login in www.caradio.com.hk to download /install CarLink.

TIPS

- The smart phone with Android version 4.0 or above can support & install the CarLink.
- When making the search on the Google Play, please include the quotation mark, "**CarLink**", to ensure a more precise & quicker search of our APP.

◆ 1-Way Control

Some Smart Phones are not using Android system. (eg: iOS mobile phone, etc.), only 1-Way control from Smart Phone to Car AV System is supported, if the Smart Phone does support HDMI or MHL out.

MIRROR PHONE

Smart Phone Mirroring-Car AV System

◆ Mirroring Cable

Currently the smart phone supports 2 kinds of connector: MHL and HDMI. Please make sure to use the correct kind of connecting cable according to your Smart Phone.

TIPS

- **MHL** stands for Mobile High-Definition Link technology, which allows you to display your smartphone's content to a larger screen, all while charging your mobile device.
- **HDMI** (High-Definition Multimedia Interface) is a compact audio/video interface for transferring uncompressed video data and compressed or uncompressed digital audio data from an HDMI-compliant source device
