2008 JACKSON HOLE HILLCLIMB

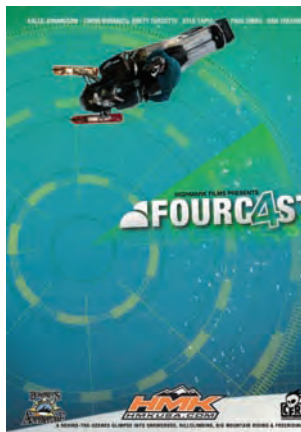

This is the year of snow and lots of it. The mountain is rough and deeply trenched. In the bottom of the trenches are stumps and boulders that get larger as each racer makes his run. You'll see every detail of the action as these racers pin the throttle in hopes of making it over the top. Jackson is the most extreme sled race on earth and Snow King Mountain takes it toll on man and machine. Sledheads Magazine said it best: "You haven't watched the Jackson Hole Hillclimb until you have seen it from the viewpoint of BAM Film Productions. BAM covers all the hillclimb action just like a nationally broadcast sporting event. Seven cameras along the climb path catch all the action and destruction. You even hear the sounds of plastic breaking and metal bending with each crushing roll of a falling sled." The incredible and unexpected happens this year and you will have a front row seat for all the explosive action. A special bonus crash section is included.

FRESH 3 “GROWING PAINS”

Back again is the crew that helped change the face of snowmobiling in the northeast U.S. The Rave X freestyle and backcountry crew have been working hard over the past few years to create a new lifestyle in the snowmobiling industry and bring new light to the northeast. This day and age it is not uncommon for northeastern riders to buy freestyle ramps or get long track snowmobiles to bring their shredding skills to the next level. By introducing this film series we have helped keep that fire burning in riders by showing them attainable riding in common Maine and New Hampshire locations. With some epic POW days and some gnarly freestyle events, Rave X and the crew are giving you their best film yet! Strap in for another adventure with this great crew. Bonus features include a short with Miss Rave X, Brietanya Lee Anderson plus the first ever Fan segment.

FRESH 2 “DON'T QUIT YOUR DAY JOB”

FRESH 2: Don't Quit your Day Job is another northeast U.S. based flick displaying the gnarly terrain of the Maine backcountry along with some great freestyle footage of the Outer Limits Tour. If you're looking for 200 foot cliff drops then there are ten other movies for that. This is different... this is FRESH. This year we teamed up with the East Coast Sno X series and ripped through Vermont, New York and New Hampshire plus hosted some great shows in our beautiful state of Maine. Watch the antics of Luke Maue, Brandon Bell, Seth Bell, Eric St. John, Fred Rasmussen and Joe McLafferty as they perform big air stunts for the masses. Also, check out the backcountry ripping of Alex Bishop, Johnny Mac, Ralph Gallagher and Darryl "D-Rail" Tait. Most importantly...you can see shots from our year ending romp at Saddleback Mountain as we took over the terrain park and had some fun with the skiers and boarders including pro riders, Kevin Jellerson and Andrew Kahkonen. When you combine freestyle ski/board with snowmobiles you get AWESOME!!! In addition, this year we were able to grab some great footage of our buddy Darryl "D-Rail" Tait who has battled back from a paralysis a couple years ago. Hear the story from Darryl as he continues to rip on his sled and yes...backflip his wheelchair!!!

BIG WHEEL SHOP DOLLY

Sno-Stuff introduces a new breed in shop dolly design. This isn't your average "run of the mill" shop dolly either. Our big wheeled sled mover has a number of distinct advantages over the competitions "same old same old" design. The most obvious of which is our large diameter, narrow profile, and high strength wheels. These wheels allow for dramatic ease of motion over large obstacles, gravel, snow, slush or garage thresholds. The high-pressure tires withstand the extreme weight of today's heaviest sleds without so much as a whimper. Another revolutionary design feature is our new "swept back" design, which aids in leverage for easy lifting. As importantly it makes handlebar and windshield clearance problems a thing of the past because the balance point is achieved without the cross bar ever coming close to the handlebars or windshield. People with handlebar hooks, riser blocks or flared/high windshields will notice this benefit immediately.

- Yellow finish
- Remote activated industry exclusive leg extensions for A-arm suspensions
