Congratulations on your purchase of the BOB Handlebar Console. It is designed to provide beverage holders and additional storage. Proper installation and care will provide years of reliable service.

Before attempting to install your new Handlebar Console, read and understand these instructions completely to insure proper installation. If you are unclear on any point, contact your dealer or BOB before use.

⚠ WARNINGS ⚠

- This product is not designed to hold hot beverages. Placing hot beverages in the cup holders can result in spills and injury to you or your child, including burns.
- When placing containers in the cup holders, it is critical that at least 60% of the container be inserted in the beverage holder so containers do not come out.
- The Handlebar Console is designed exclusively for use with BOB single strollers. It is not intended for use with other strollers or products.

INSTALLATION

1. Begin by orienting the Handlebar Console as shown in figure 1.

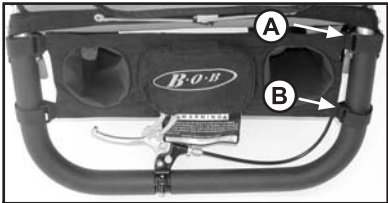

Fig. 1 Console orientation

2. The Handlebar Console attaches to the stroller handlebar by 4 velcro straps. Start attaching the Handlebar Console to the handle bar with the forward right velcro strap, "A" in figure 1. The strap attaches as follows:

A) Align the strap with the forward edge of the handlebar foam. Route the strap underneath the handlebar and between the black metal rod, brake cable housing and handlebar being careful not to wrap the strap around the red handlebar release lever. **Note: older strollers do not have a black metal rod or red handlebar release lever.**

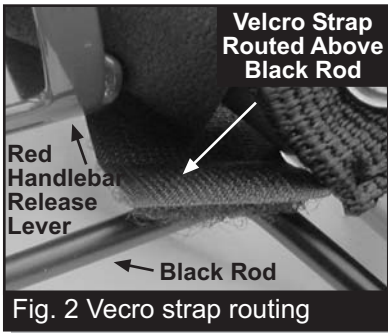

Fig. 2 Velcro strap routing

handlebar release lever. Wrapping the strap around the black rod can interfere with the correct function of the handlebar release system resulting in the handlebar unexpectedly releasing, causing loss of control and injury.

Wrapping the strap around the brake cable housing can interfere with the proper function of the brake causing loss of control and injury.

Wrapping the strap around the red handlebar release lever can interfere with the correct function of the handlebar release system resulting in the handlebar unexpectedly releasing, causing loss of control and injury.

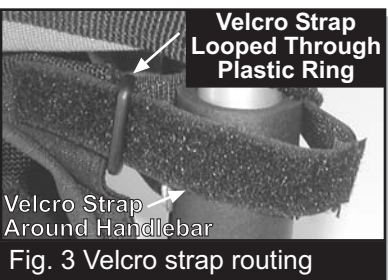

Fig. 3 Velcro strap routing

Correct routing of the velcro strap is shown in figure 2.

B) Continue wrapping the velcro strap around the handlebar and insert through the black plastic ring as shown in figure 3.

C) Loop the velcro strap through the ring and secure as shown in figure 4.

D) Repeat with the above steps with the forward strap on the opposite side.

3. Next attach the back right strap, "B" in figure 1. The strap attaches as follows:

A) Align the strap so the Handlebar Console is pulled tight fore and aft. Route the strap underneath the handlebar and between the brake cable housing and handlebar.

Fig. 4 Velcro strap secured

WARNING - It is critical that the strap not wrap around the brake cable housing. Wrapping the strap around the brake cable housing can interfere with the proper function of the brake causing loss of control and injury.

Correct routing of the strap is shown in figure 5.

B) Continue wrapping the velcro strap around the handlebar and insert through the black plastic ring as shown in figure 3.

C) Loop the velcro strap through the ring and secure as shown in figure 4.

D) Repeat with the above steps with the rear strap on the opposite side.
