

# XPRESS 6 MILK SYSTEM CLEANING INSTRUCTIONS

Cleaning Kit #98552

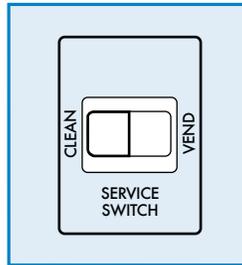

- USE HOT WATER dispensed from the machine.
- DO NOT USE COLD WATER, cleaner is not effective in cold water.
- Use gloves and eye protection when cleaning machine.
- Powder contains chlorine. Solution may bleach/stain countertop or clothing.

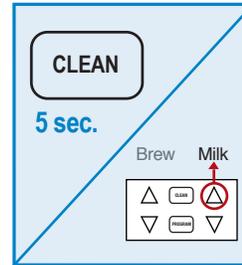

**1** • Use the provided gloves and appropriate eye protection while cleaning the machine.

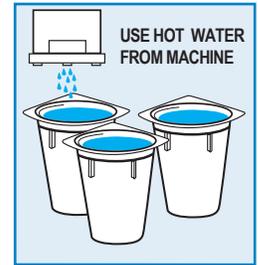

**2** • Open the menu board. Press the button to open the touch pad panel.

**3** • Push the service switch to the "CLEAN" position.

**4** • Press and HOLD **CLEAN** button until tone stops, approx 5 seconds. Select "MILK" by pressing the right **▲** button.

**5** • Use the cups provided with cleaning kit. As directed, fill the 3 cups with hot water dispensed from the machine.

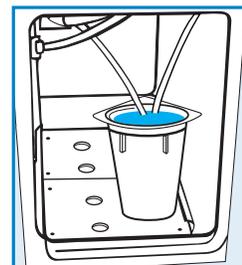

**6** • Stir and dissolve the Cleaner #1 packet contents into the first cup. Stir and dissolve the Cleaner #2 packet contents into the second cup. Nothing is added to the third cup – it remains plain hot water.

**7** • Place both milk tubes into the cup with Cleaner #1. Press **CLEAN** button.

**8** • When display changes to "INSERT CLEANER #2," remove the first cup and replace it with the cup containing Cleaner #2. Press **CLEAN** button.

**9** • When the display changes to "INSERT FRESH WATER," remove the empty cup and replace it with the cup containing plain hot water. Press **CLEAN** button.

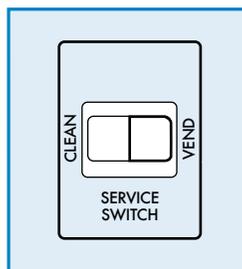

**10** • Clean interior of refrigeration unit. Remove and clean trays, and wipe down tubing with a sanitized\* towel. Reinstall trays.

**11** • Using a clean cloth, re-insert milk tubes into milk containers and place in refrigerator.

**12** • Use a clean towel moistened with sanitizer\* to clean product outlets.

**13** • Press the service switch to the "VEND" position. Secure cleaning materials and close all doors. The milk system cleaning process is now complete.

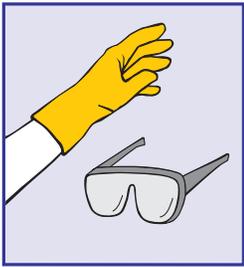

Caution!

- Do not mix cleaning solutions 1 and 2 together.
- Be certain to perform the daily cleaning to maintain machine warranty.
- Keep out of the reach of children.
- Read and observe all safety precautions listed on packaging.

\* Use a sanitizer approved by State and Local Health Department regulations.

# XPRESS 6 BREW SYSTEM CLEANING INSTRUCTIONS

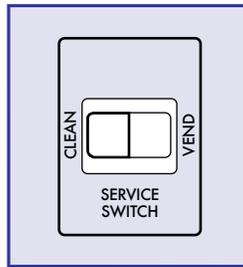

- Perform once a day.
- Use gloves and eye protection when cleaning machine.

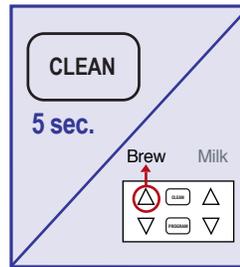

**1.** Use the provided gloves and appropriate eye protection while cleaning the machine.

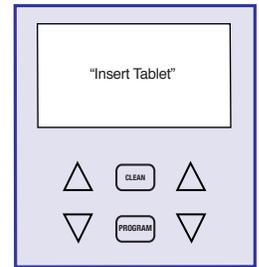

**2.** Open the menu board. Press the button to open the touch pad panel.

**3.** Push the service switch to the "CLEAN" position.

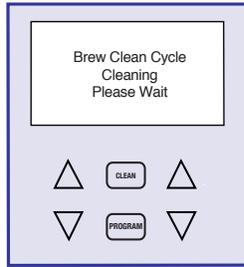

**4.** Press and HOLD **CLEAN** button for 5 seconds until tone stops. Select "BREW" by pressing left **▲** button.  
DO NOT DO ANYTHING UNTIL THE SCREEN INSTRUCTS YOU TO.

**5.** PLEASE WAIT until the screen says "INSERT TABLET".

**6.** Place one Cleaning Tablet in the brew chamber. DO NOT mistakenly place the tablet in the grounds chute or coffee funnel.

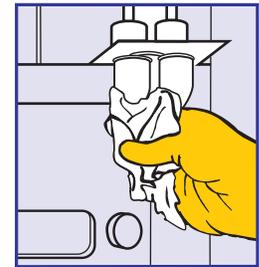

**7.** Press **CLEAN** button. Cycle will last approx. 3 minutes.

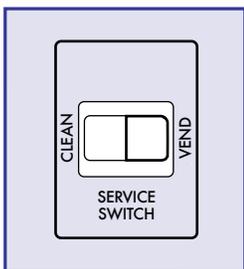

**8.** After the cycle has stopped, use your brush to sweep away any loose grounds. Brush loose coffee grounds into the chute.

**9.** When the brew cycle is finished, open the front doors of machine, clean the drain tray and grate. Remove and empty the grounds bin, and replace it in the machine.

**10.** Use a clean towel moistened with sanitizer\* to clean product outlets.

**11.** Press the service switch to the "VEND" position. Secure cleaning materials and close all doors. The brew system cleaning process is now complete.

**12.** Clean the machine exterior. Restock all items.
