- For ADJUSTMENTS (SECTION 6), refer to SERVICE MANUAL, ADJ (987674351.pdf).
- For INSTRUCTION MANUAL, refer to SERVICE MANUAL, LEVEL 1 (987674341.pdf).
- **Reference No. search on printed wiring boards is available.**
- **HELP:** Sheet attachment positions and procedures of processing the flexible boards/harnesses are shown.

#### On the CH-146 and SY-101 boards

This service manual provides the information that is premised the circuit board replacement service and not intended repair inside the CH-146 and SY-101 boards.

Therefore, schematic diagram, printed wiring board and electrical parts list of the CH-146 and SY-101 boards are not shown.

The following pages are not shown.

|                              |                            |
|------------------------------|----------------------------|
| Schematic diagram .....      | Pages 4-9 to 4-26          |
| Printed wiring board .....   | Pages 4-39 to 4-42         |
| Mounted parts location ..... | Pages 4-50 and 5-51        |
| Electrical parts list .....  | Pages 5-7 and 5-10 to 5-14 |

The above-described information is shown in service manual Level 3.

## ■ BC-CS2A/CS2B Ni-MH battery charger (supplied with the DSC-P43)

|                             |                                                                                                                                        |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Power requirements          | AC 100 to 240V 50/60Hz<br>3 W                                                                                                          |
| Output voltage              | AA : DC 1.4 V 400 mA × 2<br>AAA : DC 1.4 V 160 mA × 2                                                                                  |
| Operating temperature range | 0° to +40°C (32° to +104°F)                                                                                                            |
| Storage temperature range   | −20° to +60°C (−4° to +140°F)                                                                                                          |
| Dimensions                  | 71 × 30 × 91 mm<br>(2 <sup>7</sup> / <sub>8</sub> × 1 <sup>3</sup> / <sub>16</sub> × 3 <sup>5</sup> / <sub>8</sub> inches) (W/H/<br>D) |
| Mass                        | Approx. 90 g (3 oz)                                                                                                                    |

## ■ AC-LS5 AC Adaptor (not supplied)

|                             |                                                                                                                                                                                   |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Input rating                | AC 100 to 240 V, 50/60 Hz<br>11 W, 0.16 to 0.09 A                                                                                                                                 |
| Output rating               | DC 4.2 V, 1.5 A                                                                                                                                                                   |
| Operating temperature range | 0° to +40°C (32° to +104°F)                                                                                                                                                       |
| Storage temperature range   | −20° to +60°C (−4° to +140°F)                                                                                                                                                     |
| Dimensions                  | Approx. 48 × 29 × 81 mm (1 <sup>15</sup> / <sub>16</sub> ×<br>1 <sup>3</sup> / <sub>16</sub> × 3 <sup>1</sup> / <sub>4</sub> inches) (W/H/D,<br>protruding portions not included) |
| Mass                        | Approx. 130 g (5 oz)                                                                                                                                                              |

## Accessories

- HR6 (size AA) Ni-MH batteries (2) (DSC-P43 only)
- R6 (size AA) alkaline batteries (2) (DSC-P41 only)
- Battery case (1)
- BC-CS2A/CS2B Ni-MH Battery charger (1) (DSC-P43 only)
- Power cord (mains lead) (1) (DSC-P43 only)
- USB cable (1)
- A/V connecting cable (1) (DSC-P43 only)
- Wrist strap (1)
- "Memory Stick" (16MB) (1)
- CD-ROM (USB driver: SPVD-012) (1)
- Operating Instructions (1)

See page 5-15.

Design and specifications are subject to change without notice.

**SAFETY-RELATED COMPONENT WARNING!!**

COMPONENTS IDENTIFIED BY MARK  $\triangle$  OR DOTTED LINE WITH MARK  $\triangle$  ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

**ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!**

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE  $\triangle$  SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

**SAFETY CHECK-OUT**

After correcting the original service problem, perform the following safety checks before releasing the set to the customer.

1. Check the area of your repair for unsoldered or poorly-soldered connections. Check the entire board surface for solder splashes and bridges.
2. Check the interboard wiring to ensure that no wires are "pinched" or contact high-wattage resistors.
3. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
4. Look for parts which, through functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
5. Check the B+ voltage to see it is at the values specified.
6. Flexible Circuit Board Repairing
  - Keep the temperature of the soldering iron around 270°C during repairing.
  - Do not touch the soldering iron on the same conductor of the circuit board (within 3 times).
  - Be careful not to apply force on the conductor when soldering or unsoldering.

**Unleaded solder**

Boards requiring use of unleaded solder are printed with the lead-free mark (LF) indicating the solder contains no lead. (Caution: Some printed circuit boards may not come printed with the lead free mark due to their particular size.)

**: LEAD FREE MARK**

Unleaded solder has the following characteristics.

- Unleaded solder melts at a temperature about 40°C higher than ordinary solder.  
Ordinary soldering irons can be used but the iron tip has to be applied to the solder joint for a slightly longer time.  
Soldering irons using a temperature regulator should be set to about 350°C.  
Caution: The printed pattern (copper foil) may peel away if the heated tip is applied for too long, so be careful!
- Strong viscosity  
Unleaded solder is more viscous (sticky, less prone to flow) than ordinary solder so use caution not to let solder bridges occur such as on IC pins, etc.
- Usable with ordinary solder  
It is best to use only unleaded solder but unleaded solder may also be added to ordinary solder.

## SECTION 1 SERVICE NOTE

### 1-1. NOTE FOR REPAIR

Make sure that the flat cable and flexible board are not cracked or bent at the terminal.  
Do not insert the cable insufficiently nor crookedly.

Cut and remove the part of gilt which comes off at the point.  
(Be careful or some pieces of gilt may be left inside)

When remove a connector, don't pull at wire of connector.  
It is possible that a wire is snapped.

When installing a connector, don't press down at wire of connector.  
It is possible that a wire is snapped.

### 1-2. DISCHARGING OF THE ST-098 BOARD'S CHARGING CAPACITOR (C852)

The charging capacitor (C852) of the ST-098 board is charged up to the maximum 300 V potential.

There is a danger of electric shock by this high voltage when the capacitor is handled by hand. The electric shock is caused by the charged voltage which is kept without discharging when the main power of the unit is simply turned off. Therefore, the remaining voltage must be discharged as described below.

#### Preparing the Short Jig

To preparing the short jig, a small clip is attached to each end of a resistor of 1 k $\Omega$  / 1 W (1-215-869-11).

Wrap insulating tape fully around the leads of the resistor to prevent electrical shock.

#### Discharging the Capacitor

Short-circuit between the positive and the negative terminals of charged capacitor with the short jig about 10 seconds.

1-3. DESCRIPTION ON SELF-DIAGNOSIS DISPLAY

Self-diagnosis display

The camera has a self-diagnosis display. This function displays the camera condition with five-digits (a combination of a letter and figures) on the LCD screen. If this occurs check the following code chart. The five-digits display informs you of the camera's current condition. The last two digits (indicated by □□) will differ depending on the state of the camera.

Self-diagnosis display

- C: □□: □□  
You can reverse the camera malfunction yourself. (However, contact your Sony dealer or local authorized Sony service facility when you cannot recover from the camera malfunction.)
- E: □□: □□  
Contact your Sony dealer or local authorized Sony service facility.

| Display Code | Countermeasure                                       | Cause                                                          | Caution Display During Error |
|--------------|------------------------------------------------------|----------------------------------------------------------------|------------------------------|
| C:32:□□      | Turn the power off and on again.                     | Trouble with hardware.                                         | SYSTEM ERROR                 |
| C:13:□□      | Format the “Memory stick”.                           | Unformatted memory stick is inserted.                          | FORMAT ERROR                 |
|              | Insert a new “Memory Stick”.                         | Memory stick is broken.                                        | MEMORY STICK ERROR           |
| E:61:□□      | Checking of lens drive circuit.                      | When failed in the focus and zoom initialization.              | —                            |
| E:91:□□      | Checking of flash unit or replacement of flash unit. | Abnormality when flash is being charged.                       |                              |
| E:92:□□      | Insert batteries correctly.                          | Batteries are not inserted correctly.                          |                              |
|              | Turn the power off and on again.                     | Batteries were installed or removed when using the AC adaptor. |                              |

## SECTION 2 DISASSEMBLY

### 2-1. FLOW CHART

The following flow chart shows the disassembly procedure.

**Note: High-voltage cautions**

**Discharging the Capacitor**  
Short-circuit between the two points with the short jig about 10 seconds.

- ① Screw (M1.7) x2  
② **Microphone unit**

- ① Caution label  
② Tape (A) **HELP**  
③ FP-853: CN702  
④ FP-856: CN601  
⑤ **Lens block**

- ① **Control switch block**  
② Control switch block flexible: CN706  
③ FP-852: CN703  
④ **ST-098**  
⑤ Tapping screw x2  
⑥ SP retainer plate  
⑦ **FP-860: CN751**  
⑧ FP-861: CN705  
⑨ Tapping screw x2  
⑩ **SY-101**  
⑪ BT harness: CN001  
⑫ Tapping screw x1  
⑬ **MS**

Refer to "5-1-3. BT HOLDER BLOCK SECTION" (Page 5-4) for details.

2-2. SY-101 BOARD SERVICE POSITION

**Setting the "STILL" or "MOVIE" mode**

Before turn on the power, you have to keep a switch (SW1) pushed in order to maintain the "STILL" or "MOVIE" mode.

**Setting the "VIEW" mode**

Before turn on the power, you have to keep a switch (SW2) pushed in order to maintain the "VIEW" mode.

## 2-3. CIRCUIT BOARDS LOCATION

| Board Name                     | Function                                                                                |
|--------------------------------|-----------------------------------------------------------------------------------------|
| CD-501                         | CCD IMAGER                                                                              |
| CH-146<br>(included in SY-101) | CCD SIGNAL PROCESS                                                                      |
| MS (FP-861)                    | MEMORY STICK CONNECTOR                                                                  |
| ST-098                         | FLASH DRIVE                                                                             |
| SW-420                         | CONTROL SWITCH, LCD DRIVE                                                               |
| SY-101<br>(Including CH-146)   | CAMERA MODULE, CAMERA DSP, LENS DRIVE, SH DSP,<br>FRONT CONTROL, AUDIO, DC/DC CONVERTER |

## 2-4. FLEXIBLE BOARDS LOCATION

# HELP

Sheet attachment positions and procedures of processing the flexible boards/harnesses are shown.

## 4-2. SCHEMATIC DIAGRAMS

### 4-2. SCHEMATIC DIAGRAMS

#### THIS NOTE IS COMMON FOR SCHEMATIC DIAGRAMS

(In addition to this, the necessary note is printed in each block)

##### (For schematic diagrams)

- All capacitors are in  $\mu\text{F}$  unless otherwise noted.  $\text{pF} : \mu\text{F}$ . 50 V or less are not indicated except for electrolytics and tantalums.
- Chip resistors are 1/10 W unless otherwise noted.  $\text{k}\Omega=1000 \Omega$ ,  $\text{M}\Omega=1000 \text{k}\Omega$ .
- Caution when replacing chip parts.  
New parts must be attached after removal of chip.  
Be careful not to heat the minus side of tantalum capacitor, Because it is damaged by the heat.
- Some chip part will be indicated as follows.

- Constants of resistors, capacitors, ICs and etc with XX indicate that they are not used.  
In such cases, the unused circuits may be indicated.
- Parts with ★ differ according to the model/destination.  
Refer to the mount table for each function.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- Signal name  
XEDIT → EDIT      PB/XREC → PB/REC
- : non flammable resistor
- : fusible resistor
- : panel designation
- : B+ Line
- : B- Line
- : IN/OUT direction of (+,-) B LINE.
- : adjustment for repair.
- : VIDEO SIGNAL (ANALOG)
- : AUDIO SIGNAL (ANALOG)
- : VIDEO/AUDIO SIGNAL
- : VIDEO/AUDIO/SERVO SIGNAL
- : SERVO SIGNAL
- Circled numbers refer to waveforms.

##### (Measuring conditions voltage and waveform)

- Voltages and waveforms are measured between the measurement points and ground when camera shoots color bar chart of pattern box. They are reference values and reference waveforms.  
(VOM of DC 10  $\text{M}\Omega$  input impedance is used)
- Voltage values change depending upon input impedance of VOM used.)

**Note :** The components identified by mark  $\triangle$  or dotted line with mark  $\triangle$  are critical for safety. Replace only with part number specified.

#### 1. Connection

#### 2. Adjust the distance so that the display of Fig. a can be obtain.

When indicating parts by reference number, please include the board name.

**Note :** Les composants identifiés par une marque  $\triangle$  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

4-2. SCHEMATIC DIAGRAMS

CD-501 BOARD

For Schematic Diagram

• Refer to page 4-37 for printed wiring board.

Precautions for Replacement of CCD Imager

- The CD-501 board mounted as a repair part is not equipped with a CCD imager. When replacing this board, remove the CCD imager from the old one and mount it onto the new one.
- If the CCD imager has been replaced, carry out all the adjustments for the camera section.
- As the CCD imager may be damaged by static electricity from its structure, handle it carefully like for the MOS IC. In addition, ensure that the receiver is not covered with dusts nor exposed to strong light.

Schematic diagrams of the CH-146 and SY-101 boards are not shown.  
Pages from 4-9 to 4-26 are not shown.

For Schematic Diagram  
• Refer to page 4-45 for printed wiring board.

The components identified by mark or dotted line with mark are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

4-2. SCHEMATIC DIAGRAMS

MS BOARD

FP-860 FLEXIBLE BOARD

For Schematic Diagram

### 4-3. PRINTED WIRING BOARDS

#### 4-3. PRINTED WIRING BOARDS

##### THIS NOTE IS COMMON FOR PRINTED WIRING BOARDS

-  : Uses unleaded solder.
-  : Circuit board
-  : Flexible board
-  : Pattern from the side which enables seeing.
-  : pattern of the rear side  
(The other layers' patterns are not indicated)
- Through hole is omitted.
- Circled numbers refer to waveforms.
- There are a few cases that the part printed on diagram isn't mounted in this model.
-  : panel designation

- Chip parts.  
Transistor

- Diode

| Board Name | Parts Location | Pattern                |                      |
|------------|----------------|------------------------|----------------------|
|            |                | Total Number of Layers | Layers Not Indicated |
| CD-501     | 4-49           | 4 layers               | 2 and 3 layers       |
| SW-420     | 4-52           | 4 layers               | 2 and 3 layers       |
| ST-098     | 4-52           | 4 layers               | 2 and 3 layers       |
| MS         | —              | 1 layer                | —                    |

CD-501

Note for Printed Wiring Board (See page 4-35).

 : Uses unleaded solder.

Printed wiring boards of the CH-146 and SY-101 boards are not shown.  
Pages from 4-39 to 4-42 are not shown.

**Note for Printed Wiring Board (See page 4-35).**

**LF** : Uses unleaded solder.

## SW-420 BOARD (SIDE A)

## 5. REPAIR PARTS LIST

### SECTION 5 REPAIR PARTS LIST

**NOTE:**

- -XX, -X mean standardized parts, so they may have some differences from the original one.
- Items marked “\*” are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- The mechanical parts with no reference number in the exploded views are not supplied.
- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- CAPACITORS:  
uF:  $\mu$ F
- COILS  
uH:  $\mu$ H
- RESISTORS  
All resistors are in ohms.  
METAL: metal-film resistor  
METAL OXIDE: Metal Oxide-film resistor  
F: nonflammable
- SEMICONDUCTORS  
In each case, u:  $\mu$ , for example:  
uA...:  $\mu$ A... ,  $\mu$ PA... ,  $\mu$ PA... ,  
uPB... ,  $\mu$ PB... ,  $\mu$ PC... ,  $\mu$ PC... ,  
uPD... ,  $\mu$ PD...
- Abbreviation  
AR : Argentine model  
AUS : Australian model  
BR : Brazilian model  
CH : Chinese model  
CND: Canadian model  
HK : Hong Kong model  
J : Japanese model  
JE : Tourist model  
KR : Korean model

When indicating parts by reference number, please include the board name.

The components identified by mark  $\triangle$  or dotted line with mark  $\triangle$  are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque  $\triangle$  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

The components identified by mark  $\triangle$  or dotted line with mark  $\triangle$  are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque  $\triangle$  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

## [Description of main button functions on toolbar of the Adobe Acrobat Reader Ver5.0 (for Windows)]

### Printing a text

1. Click the Print button .
2. Specify a printer, print range, number of copies, and other options, and then click [OK].

#### Application of printing:

To set a range to be printed within a page, select the graphic selection tool  and drag on the page to enclose a range to be printed, and then click the Print button.

### Reversing the screens displayed once

- To reverse the previous screens (operation) one by one, click the .
- To advance the reversed screens (operation) one by one, click the .

#### Application to the Service Manual:

This function allows you to go and back between circuit diagram and printed circuit board diagram, and accordingly it will be convenient for the voltage check.

### Finding a text

1. Click the Find button .
2. Enter a character string to be found into a text box, and click the [Find]. (Specify the find options as necessary)

#### Application to the Service Manual:

To execute "find" from current page toward the previous pages, select the check box "Find Backward" and then click the "Find".

3. Open the find dialog box again, and click the [Find Again] and you can find the matched character strings displayed next. (Character strings entered previously are displayed as they are in the text box.)

#### Application to the Service Manual:

The parts on the drawing pages (block diagrams, circuit diagrams, printed circuit boards) and parts list pages in a text can be found using this find function. For example, find a Ref. No. of IC on the block diagram, and click the [Find Again] continuously, so that you can move to the Ref. No. of IC on the circuit diagram or printed circuit board diagram successively.

**Note:** The find function may not be applied to the Service Manual depending on the date of issue.

### Moving with link

1. Select either palm tool , zoom tool , text selection tool , or graphic selection tool .
2. Place the pointer in the position in a text where the link exists (such as a button on cover and the table of contents page, or blue characters on the removal flowchart page or drawing page), and the pointer will change to the forefinger form .
3. Then, click the link. (You will go to the link destination.)

### Moving with bookmark:

Click an item (text) on the bookmark pallet. and you can move to the link destination. Also, clicking  can display the hidden items.

(To go back to original state, click )

### Zooming or rotating the screen display

#### "Zoom in/out"

- Click the triangle button in the zoom control box to select the display magnification. Or, you may click  or  for zooming in or out.

#### "Rotate"

- Click rotate tool , and the page then rotates 90 degrees each.

#### Application to the Service Manual:

The printed circuit board diagram you see now can be changed to the same direction as the set.

### Switching a page

- To move to the first page, click the .
- To move to the last page, click the .
- To move to the previous page, click the .
- To move to the next page, click the .

## Revision History
