# tips & tricks —

## ring style

To quickly switch your ring style, press and hold # from the home screen.

## 'flip open' to answer

Just open the flip to answer a call. Press  $\mathbf{\Phi} > \mathbf{\Phi}$  My settings > Clamshell > Clamshell open answer from the home screen

## torch on

To quickly turn on your torch, press 5 from the home screen. Press 5 to turn it off. voicemail

Press and hold 1. If your voicemail number is pre-set, you will connect.

## recent calls

To see your dialled, received and missed calls, press u from the home screen.

## music player —

To use the music player, insert a microSD memory card (optional). The music player supports MP3, MIDI and AMR music formats

## play music

## Find it: $\mathbf{\Phi} > \mathbf{N}$ Music player > All songs.

Tip: Press the music key (WX265)

controls

| function                       |                          |
|--------------------------------|--------------------------|
| play/pause                     | Press 🔶.                 |
| skip to next/<br>previous song | Press 'Q' right or left. |
| volume                         | Press 'Q' up or down.    |

Note: To transfer songs to/from your memory card, use a microSD memory card reader on your computer to drag & drop files to the "Audios > Music" folder.

## photos –

**Note:** You can only take photos with the WX295.

● Press • > ● Camera > Camera.

**Tip:** To guickly turn on your camera, press the camera key.

- Set as your wallpaper press O
   up.
- Send by Bluetooth press **•Ô•** down.
- Send by MMS press  $\hat{\mathbf{O}}$  left.
- Assign as contact press **•Ô** right.
- Delete press Delete.

• Return to the viewfinder press Back.

Tip: To set where your photos are stored press **Options** > **Storage** > **Phone** or **Memory card**.

To transfer photos to/from your memory card, use a microSD memory card reader on your computer to drag & drop files to the "Images" folder.

## radio –

## listen to the radio

• Plug a mini-USB headset into your phone.

Note: The FM radio works only when the headset is plugged in.

**2** Press  $( \mathbf{\Phi} ) > \mathbf{P}$  Games & apps > FM radio (WX295) or • → > 🖬 > FM radio (WX265) from the home screen

To tune in a station, press  $\mathbf{\hat{Q}}$  left or right or press Options > Auto search.

To adjust the volume, press  $\mathbf{\hat{O}}$ , up or down. To turn off the radio, press Options > Turn off.

## store favourite stations

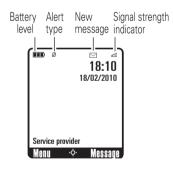

When listening to a station, press Save > Ok. Select a channel number and press Add to store it.

Press Options > Channel list to see your stored stations. Press keys 1 to 40 to select a stored station.

## Safety, regulatory & legal

## Battery use & safety

\_(**A**)

Important: Handle and store batteries properly to avoid injury or damage. Most battery issues arise from improper handling of batteries, and particularly from the continued use of damaged batteries. DON'Te

- Don't disassemble, crush, puncture, shred or otherwise attempt to change the form of your battery.
- Don't let the phone or battery come in contact with water. Water can get into the phone's circuits, leading to corrosion. If the nhone and/or hattery net wet, have them checked by your service provider or contact Motorola, even if they appear to be working
- Don't allow the battery to touch metal objects. If metal objects. such as jewellery, stay in prolonged contact with the hattery contact points, the battery could become very hot.
- Don't place your battery near a heat source. Excessive heat can damage the phone or the battery. High temperatures can cause the battery to swell, leak or malfunction. Therefore:
- Do not dry a wet or damp battery with an appliance or heat source. such as a hair drver or microwave oven. Avoid leaving your phone in your car in high temperatures.\*
- Do avoid dropping the battery or phone. Dropping these items, especially on a hard surface, can potentially cause damage.
- Do contact your service provider or Motorola if your phone or battery has been damaged by being dropped or by high

\* Note: If the product guide expressly states that your phone is designed to resist damage from exposure to certain rugged conditions, such as water immersion, rain, dust, high and low temperatures, shock or other conditions, do not exceed the stated limits and ensure the stated precautions are taken. Always make sure that the battery compartment is closed and secure to avoid direct exposure of the battery to any of these conditions

Important: Use Motorola Original products for quality assurance and safeguards. To aid consumers in identifying authentic Motorola batteries from non-original or counterfeit batteries (that may not have adequate safety protection). Motorola provides holograms on its batteries. Consumers should confirm that any hattery they purchase has a "Motorola Original" hologram Motorola recommends that you always use Motorola-branded hatteries and chargers. Motorola mobile devices are designed to work with Motorola batteries. If you see a message on your display such as

Invalid Battery or Linable to Charne take the following steps:

- Remove the battery and inspect it to confirm that it has a "Motorola Original" hologram;
- If there is no hologram, the battery is not a Motorola battery.
- If there is a hologram, replace the battery and try charging it again; If the message remains, contact a Motorola authorised service
- centre
- Important: Motorola's warranty does not cover damage to the phone caused by non-Motorola batteries and/or chargers.

Warning: Use of a non-Motorola battery or charger may present a risk of fire, explosion, leakage or other hazard.

Proper and safe battery disposal and recycling: Proper battery disposal is not only important for safety, it also benefits the environment. Consumers may recycle their used batteries in many retail or service provider locations. Additional information on proper disposal and recycling may be found on the

www.motorola.com/recycling

 www.rbrc.org/call2recycle/ (in English only) Disposal: Promptly dispose of used batteries in accordance with local regulations. Contact your local recycling centre or national recycling organisations for more information on how to

disnose of hatteries Warning: Never dispose of batteries in a fire because they may explode.

#### **Battery charging** Notes for charging your phone's battery:

- When charging your battery, keep it near room temperature. Never expose batteries to temperatures below 0°C (32°F) or above 45°C (113°F) when charging.
- · New batteries are not fully charged.
- New batteries or batteries stored for a long time may take more time to charge.
- Motorola batteries and charging systems have circuitry that protects the battery from damage from overcharging.

## Specific absorption rate (ICNIRP)

Your model wireless phone meets international guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organisation ICNIRP and include safety margins designed to assure the protection of all persons,

regardless of age and health, and to account for any variations in measurements. he guidelines use a unit of measurement known as the Specific Absorption Bate (SAR). The ICNIRP SAR limit for mobile devices used by the general public is 2 watts per kilogram (W/kg) and the highest SAB value for this mobile device when tested at the ear is 0.875 W/kg. As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this quide. In this case the highest tested SAR value is 0.358 W/kg. The tests are carried out in accordance with international guidelines for testing. The SAR information includes the Motorola testing protocol, assessment procedure and measurement uncertainty range for this

As SAR is measured utilising the mobile device's highest transmitting power, the actual SAR of this mobile device while operating is typically below that indicated above. This is due to automatic changes to the power level of the mobile device to ensure it only uses the minimum level required to reach the network. While there may be differences between the SAR levels of various mobile devices

and at various positions, they meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause ifferences in the SAR value for later products; in all cases, products are designed to e within the quidelines

The World Health Organisation has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure, then you can do so by limiting the ength of calls or using a hands-free device to keep the mobile device away from the head and hody

Additional information can be found on the Web sites of the World Health Organisation (http://www.who.int/emf) and Motorola, Inc. http://www.motorola.com/rfhealth).

#### European Union directives conformance statement

Hereby, Motorola declares that this product is in compliance

- The essential requirements and other relevant provisions of Directive 1999/5/EC
- All other relevant FU Directives.

IMEI: 350034/40/394721/9 **C**€1588 Product Approval Type: MC2-41H14 Number

The above gives an example of a typical Product Approval Number. You can view your product's Declaration of Conformity (DoC) to Directive 1999/5/E0 (to R&TTE Directive) at www.motorola.com/rtte. To find your DoC, enter the Product Approval Number from your product's label in the "Search" bar on the Web

## Software copyright notice

Motorola products may include copyrighted Motorola and third-party software stored in semiconductor memories or other media. Laws in the United States and other countries preserve for Motorola and third-party software providers certain exclusive rights for copyrighted software, such as the exclusive rights to distribute or reproduce the copyrighted software. Accordingly, any copyrighted software contained in Motorola products may not be modified, reverse-engineered, istributed or reproduced in any manner to the extent allowed by law. Furthermore the purchase of Motorola products shall not be deemed to grant, either directly or by implication or estoppel or otherwise, any licence under the copyrights, patents or patent applications of Motorola or any third-party software provider, except for the normal, non-exclusive, royalty-free licence to use that arises by operation of law in the sale of a product.

#### Content copyright

The unauthorised copying of copyrighted materials is contrary to the provisions of the Copyright Laws of the United States and other countries. This device is intended solely for copying non-copyrighted materials, materials in which you own the copyright or materials which you are authorised or legally permitted to copy. If you are uncertain about your right to copy any material, please contact your legal

#### Safety & general information This section contains important information on the safe and efficient operation of your mobile device. Read this information before using your nohile device.

## Exposure to radio frequency (RF) energy

Your mobile device contains a transmitter and receiver. When it is ON, it receives and transmits RF energy. When you communicate using your mobile device, the system handling your call controls the power level at which your mobile device

Your mobile device is designed to comply with local regulatory requirements in your country concerning exposure of human beings to RF energy.

#### Operational precautions

For optimal mobile device performance, and to be sure that human exposure to BE energy does not exceed the guidelines set forth in the relevant standards, always follow these instructions and precautions.

#### Product operation

When placing or receiving a phone call, hold your mobile device just like you would a landline phone

If you wear the mobile device on your body, always place the mobile device in a rola-supplied or approved clip, holder, holster, case or body harness. If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 centimetres (1 inch) from your body when

Using accessories not supplied or approved by Motorola may cause your mobile device to exceed RF energy exposure guidelines. For a list of Motorola-supplied or approved accessories, visit our Web site at: <u>www.motorola.com</u>.

#### RF energy interference/compatibility

Nearly every electronic device is subject to RF energy interference from external sources if inadequately shielded, designed or otherwise configured for RF energy compatibility. In some circumstances, your mobile device may cause interference with other devices.

## Follow instructions to avoid interference problems

Turn off your mobile device in any location where posted notices instruct you to do

In an aircraft turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an aeroplane mode or similar feature, consult airline staff about using it in-flight.

If you have an implantable medical device, such as a pacemaker or defibrillator. consult your doctor before using this mobile device.

- Persons with implantable medical devices should observe the following precautions: ALWAYS keep the mobile device more than 20 centimetres (8 inches) from
  - the implantable medical device when the mobile device is turned ON.
- DO NOT carry the mobile device in the breast pocket. Use the ear opposite the implantable medical device to minimise the
- notential for interference
- Turn OFF the mobile device immediately if you have any reason to suspect that interference is taking place.

Read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your mobile device with your implantable medical device, consult your health care provider.

#### Driving precautions

Using a mobile device while driving may cause distraction. End a call if you can't concentrate on driving. Enter information about your destination and route prior to your drive. Do not enter data or engage in text messaging while driving. Keep your eyes on the road while driving. Listen to the audible turn-by-turn directions, if

Also, using a mobile device or accessory may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products. Responsible driving practices can be found at www.motorola.com/ callsmart (in English only),

### Operational warnings

Obey all posted signs when using mobile devices in public areas.

#### Potentially explosive atmospheres

Areas with potentially explosive atmospheres are often, but not always, posted and can include fuelling areas, such as below decks on boats, fuel or chemical transfer or storage facilities or areas where the air contains chemicals or particles, such as orain dust or metal nowders

When you are in such an area, turn off your mobile device and do not remove, install or charge batteries. In such areas, sparks can occur and cause an explosion or fire.

#### Symbol key

Your battery, charger or mobile device may contain symbols, defined as follows:

#### Batteries & chargers

Caution: Improper treatment or use of batteries may present a danger of fire explosion, leakage or other hazard. For more information, see "Battery Use &

#### Keep your mobile device & its accessories away from small children

These products are not toys and may be hazardous to small children. For example:

- A choking hazard may exist for small, detachable parts. Improper use could result in loud sounds, possibly causing hearing injury. Improperly handled batteries could overheat and cause a burn.
- Glass parts

Some parts of your mobile device may be made of glass. This glass could break if the product is dropped on a hard surface or receives a substantial impact. If plass breaks, do not touch or attempt to remove. Stop using your mobile device until the glass is replaced by a qualified service centre.

#### Seizures/blackouts

Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when playing video games. These may occur even if a person has never had a previous seizure or blackout.

If you have experienced seizures or blackouts or if you have a family history of such occurrences, please consult your doctor before playing video games or enabling a flashing-lights feature (if available) on your mobile device

Discontinue use and consult a doctor if any of the following symptoms occur: convulsion, eve or muscle twitching, loss of awareness, involuntary movements or disorientation. It is always a good idea to hold the screen away from your eyes. leave the lights on in the room, take a 15-minute break every hour and stop use if you are tired

193

#### Caution about high volume usage

Warning: Exposure to loud noise from any source for extended periods of time may affect your hearing. The louder the volume sound level, the less time is required before your hearing could be affected. To protect your hearing:

- Limit the amount of time you use headsets or headphones
- at high volume

When you repetitively perform actions such as pressing keys or entering

during or after such use, stop use and see a doctor.

Avoid turning up the volume to block out noisy surroundings.

 Turn the volume down if you can't hear people speaking near you. If you experience hearing discomfort, including the sensation of pressure or fullness in your ears, ringing in your ears or muffled speech, you should stop listening to the device through your headset or headphones and have your hearing checked. For more information about hearing see our website at direct motorola com/ hellomoto/nss/AcousticSafety.asp (in English only).

finger-written characters, you may experience occasional discomfort in your hands,

schemes and further information on Motorola recycling activities can be found at: www.motorola.com/recvcling

#### Disposal of your mobile device packaging & product guide

Product packaging and product guides should only be disposed of in accordance with national collection and recycling requirements. Please contact your regional authorities for more details

## Privacy & data security

Motorola understands that privacy and data security are important to everyone. Because some features of your mobile device may affect your privacy or data security, please follow these recommendations to enhance protection of your

- Monitor access—Keen your mobile device with you and do not leave it where others may have unmonitored access. Lock your device's keypad where this feature is available
- Keen software up to date—If Motorola or a software/application vendor releases a patch or software fix for your mobile device that updates the device's security, install it as soon as possible.
- Secure personal information—Your mobile device can store personal information in various locations including your SIM card, memory card and nhone memory. Be sure to remove or clear all personal information before you recycle, return or give away your device. You can also back up your nersonal data to transfer to a new device

Note: For information on how to back up or wipe data from your mobile device no to www.motorola.com/support

- Online accounts—Some mobile devices provide a Motorola online account (such as MOTOBLUR). Go to your account for information on how to manage the account and how to use security features such as remote wipe and device location (where available).
- Location-based information—Location-based information includes information that can be used to determine the approximate location of a mobile device. Mobile phones that are connected to a wireless network transmit location-based information. Devices enabled with GPS or AGPS technology also transmit location-based information. Additionally, if you use applications that require location-based information (e.g. driving directions such applications transmit location-based information. This location-based information may be shared with third parties, including your wireless service provider, applications providers, Motorola and other third parties rovidina services.
- Other information your device may transmit—Your device may also transmit testing and other diagnostic (including location-based) information, and other non-personal information to Motorola or other third-party servers. This information is used to help improve products and services offered by Motorola

If you have further questions regarding how the use of your mobile device may impact your privacy or data security, please contact Motorola at privacy@motorola.com, or contact your service provider.

#### Smart practices while driving Drive Safe, Call Smart

Check the laws and regulations on the use of mobile devices and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas-for example, hands-free use only. Go to www.motorola.com/callsmart (in English only) for more information.

our mobile device lets you communicate by voice and data, almost anywhere anytime, wherever wireless service is available and safe conditions allow. When driving a car, driving is your first responsibility. If you choose to use your mobile device while driving, remember the following tips:

- Get to know your Motorola mobile device and its features such as speed dial and redial. If available, these features help you to place your call without taking your attention off the road
- When available, use a hands-free device. If possible, add an additional layer of convenience to your mobile device with one of the many Motorola Original hands-free accessories available today

 Position your mobile device within easy reach. Be able to access your mobile device without removing your eves from the road. If you receive an incoming call at an inconvenient time. if possible, let your voicemail answer it for you.

- Let the person you are speaking to know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, ice and even heavy traffic can be hazardous.
- Do not take notes or look up phone numbers while driving. Jotting down a "to do" list or going through your address book takes attention away from your primary responsibility-driving safely.
- · Dial sensibly and assess the traffic; if possible, place calls when your car is not moving or before pulling into traffic. If you must make a

call while moving, dial only a few numbers, check the road and your mirrors, then continue

- Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking to aware you are driving and suspend conversations that can divert your attention away from the road
- Use your mobile device to call for help. Dial 999 or another local emergency number in the case of fire, traffic accident or medical emergencies (wherever wireless phone service is available).
- Use your mobile device to help others in emergencies. If you see a road accident, crime in progress or other serious emergency where lives are in danger, call 999 or another local emergency number (wherever wireless phone service is available), as you would want others to do for you.
- Call roadside assistance or a special non-emergency wireless assistance number when necessary. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured or a vehicle you know to be stolen, call roadside assistance or another special non-emergency wireless number (wherever wireless phone service is available).

#### www.hellomoto.com

Certain mobile phone features are dependent on the capabilities and settings of your service provider's network. Additionally, certain features may not be activated by your service provider, and/or the provider's network settings may limit the feature's functionality. Always contact your service provider about feature availability and functionality. All features. functionality and other product specifications, as well as the information contained in this guide, are based upon the latest available information and believed to be accurate at the time of printing.
